```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

** INFOS from ICELAND **

Jonas Bjarnason (TF2JB), President of the Icelandic Radio Amateurs
(IRA), reports that the Icelandic Post and Telecom administration
has extended access to the 500 kHz (493-510 kHz), 70 MHz (70.000-
70.200 MHz) and 5 MHz bands by two years, until 31 December 2012.
As for 60 metres, TF operators have been granted 150 kHz (5360-
5410 kHz) instead of the previous eight fixed channels, but the
maximun power allowed has been reduced from 200 to 100 watts.

Guadeloupe Island (French Antillas, FK96HF) qrv on 144 MHz EME
since 29.12.2010! LATEST NEWS, from Phil, dated 2010-12-28:
Just finished to assembly and test, it is 17 h local time and I
take the red color !!here around 30ï¿½ and 76% of humidity I will
be qrv on 29 at 05H15 UTC, my moonrise for the 1st try , QRG will
be on 144,143 because birdies on 144 , the freq can change if
necessary . FG4KH always 1st I cannot have full elevation, but
it will change in the next days Hope all will be ok, I cross the
fingers! LATEST NEWS, from Phil, dated 2010-12-29: All has worked

nice, not to much noise, but today no full elevation so the trafic
stopped at 10 UTC, sorry for NA window. First day with 42 stations
in log , tomorrow I will be QRV again since my moon rise with full
elevation. For log on line updated, follow link below - 73 all

MOONBOUNCE from THE GAMBIA (C56 / IK13QL)
After the very successfull DXpedition to Mauritius last year (3B8EME
with 340 QSO's on 144 MHz and 7 inits om 432 MHz) Rene PE1L will try
again to make moonbounce QSO's from the Gambia on 144 MHz and 432 MHz
This time Eltje PA3CEE and Johan PE9DX will join the party again.
Don't change a winning team! We will be QRV moonbounce 2 meter as
C56EME, a special moonbounce permit is requested. If all ok we will
have a small 70cm setup with us. From February 11th until February
21st 2011, C56EME will be active from the Gambia on 144 MHz moon-
bounce. The locator will be IK13ql... read all and more in detail:

** PY1KK qrv from GG76qs on 6m / 70cm **

Hello all, All ready here at the coast qth on both 70cm and 6m.
70cm setup is a 4m dish, xpol patch-feeder, LNAs at feeder, R&S
at 800W, and IC-910H. 6m setup is single 1 wl horizontally polarized
yagi, no elevation, IC-PW1 and IC-746PRO. Some echoes have been
seen, but no EME qso yet. Will be qrv on both bands during the
whole January. I thank you for the nice lunar activity during the
ending year, and wish you all a very nice New Year of 2011.
Vy 73 de Bruce, PY1KK / PY2BS via W7GJ s [Magic Band EME]

** TA2AD on 6m EME **

Hello! This morning, TA2AD became the first TA station to complete
a contact on 6m EME during his moonset. It was also a DXCC #163 for
me (#111 via 6m EME). The Kp was 2.0 and Degradation was -1.6 dB.
My understanding is that Sua was using 200w and some sort of yagi
relatively close to the ground. His JT65A signal only -28 dB here.
SOURCE: Lance, W7GJ via [Magic Band EME]

** JD1 qrv HF and Satellites **

Makoto, JI5RPT (JD1BLY) and Harry, JG7PSJ (JD1BMH) will once again
be active from Chichijima Island (IOTA AS-031, WLOTA 2269, WFF
JAFF-090, JCG #10007) between 24 December 2010 and 8 January 2011.
QRV on all bands 160-10m, with focus on the lower bands, using CW,
SSB, Digital and the satellites. JD1BLY will be active between
24 December 2010 and 3 January 2011, while JD1BMH will be active
between 30 December and 8 January 2011. QSL via the bureau to the
JD1 callsigns or direct to their home callsigns...
SOURCE: ICPO Bulletin (24-31 Decenber 2010)

** The DEM. REPUBLIC OF CONGO is qrv again until Jan.11th, 2011 **

Barney, ZS6TQ (es-ZS4U), is now active as 9Q0HQ/6 until Jan. 11th,
2011. Activity will be mainly on the weekends and some days during
the week after 1800z. Operations will be on 40/20/15/10/6 meters
using CW, SSB and PSK31. QSL via K3IRV...
SOURCE: Ohio/Penn DX Bulletin #991

** 3D2, FIJI, activity in march april **

Operators Eddie/VK4AN, Kenneth/OZ1IKY and possibly others are
planning a big operation as 3D2A to the Fijis between March 15th
and April 2nd in 2011. They are currently looking for experienced

DXers to join them during this operation. They state that their activities will be from Nadi in a "3-story 2-br luxury a/c apartment with roof top antennas including a full-size 160m Inverted Vee or delta-loop, Spiderbeam, DX-88 and other antennas!" Activity will be on all bands (160-6m) and modes but with a concentrating on the lower bands. Operations will include participation in the BARTG RTTY and CQ WPX SSB DX Contests. If you would like to join their team, contact Eddie, VK4AN, at: vk4an@wia.org.au Also, via SKYPE at < ewdeyoung >. More details are available at their "Pacific DXers" Wweb page at: http://pacific-dxers.com ADDED NOTE: Eddie, VK4AN, is also planning activity from Naura (C2) in mid-to-late 2011 and is looking for experienced DXers to join them for a 2 week operation. 3. SARL NEWS - SUNDAY 02 JANUARY 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-01-01 20:00:20 UTC
From: website@sarl.org.za
Message-ID: <20110101200007.358E133C37@panix2.panix.com>
Source record: 5143
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 02 JANUARY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

SILENT KEY

It is with regret that it has to be announced that the key of Scotty Vallance, ZS5SV, a member of the Highway Amateur Radio Club, became silent on 29 December 2010.

Our sincere condolences to his wife, Merle, family and friends in this difficult time.

(PAUSE)

In the news today:

SARL PREPARING DOCUMENTATION TO INCREASE 160 METRE ALLOCATION

MAJOR EFFORT TO "CLEAN" SARL DATA BASE UNDERWAY

BOOKING NOW OPEN FOR THE PIC COURSE IN GAUTENG

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SARL PREPARING DOCUMENTATION TO INCREASE 160 METRE ALLOCATION

The SARL is preparing documentation to have access to more of the 160 metre band for amateur communication in South Africa. You are invited to make input by sending your views why it is necessary to expand the very narrow allocation currently available to South African amateurs. Please include in your motivation items such as propagation studies and of what benefit an expanded 160 metre allocation will be. Send the information to zs6akv@sarl.org.za by end January. The SARL proposal will be presented at the next SARL/ICASA liaison meeting planned

February 2011.

MAJOR EFFORT TO "CLEAN" SARL DATA BASE UNDERWAY

A team of volunteers under the leadership of the SARL Data Base Administrator, Colin de Villiers, ZS6COL, are working on the SARL data Base in order to update the call book and free-up many call signs that appear not to have been in use for many years.

The SARL maintains a database of members of the SARL at the SARL offices at the National Amateur Radio Centre. The database is designed specifically to administer membership subscriptions, print labels for the distribution of Radio ZS and conduct the operation of the QSL Bureau. It is a rather complex database that takes into account duplicate call signs held by members, Special Event call signs and also retains details of Silent Keys for a number of years in order to handle QSL cards that have been known to arrive as much as 10 years after the contact was made. This is of particular significance to the efficient operation of the QSL Bureau. It is also used for AGM communications to members and more recently has an added SMS facility for alerting members in the various regions of SARL sponsored events in their area.

Please support this effort by doing the following" 1) Please go to the Web call book and check your callsign details for accuracy. The team has made many corrections to the database and want to be sure that we have not introduced any errors.

2) If you find that your call sign is not on the Web callbook and you know that it was previously there, then this means that you were one of the 650 people that the team has removed from the callbook as the ICASA database shows you are not licensed. We hope that you do not find this to be the case as only call signs where there had been no recorded activity for 16 years and where ICASA has shown you as being unlicensed for most of those years were removed.

If you feel that this is not correct i.e. you have a valid paid up licence for 2010, you are invited to send Colin a scanned copy of your licence for further investigation. The email address is dataproject@sarl.org.za.

3) Please do not communicate on behalf of somebody else unless you are able to send a copy of their licence. Please note that only communications that are accompanied by this proof will be actioned or responded to.

For detailed discussion on the process, visit www.sarl.org.za. You find all the information on the home page.

BOOKING NOW OPEN FOR THE PIC COURSE IN GAUTENG

The SARL will be presenting the popular course "learn how to work with Microchip PIC's, how to programme them and use them in projects" on 29 January in Gauteng.

During 2011 only two PIC courses will be presented, Gauteng on 29 January and in Cape Town on 16 July. Booking for the Gauteng course is now open. Visit www.sarl.org.za and select RTA on the left hand menu and follow the links.

ARE YOU A SHORTWAVE LISTENER?

With many changes for Amateur Radio Mirror International planned for introduction later this month, including a name change, new web pages, and new features, the SARL is looking for a keen Shortwave Listener to present a 5 minute slot on all aspects of shortwave listening. If you are the person to take up the challenge and have your own regular radio column send an email to armi@sarl.org.za with your telephone number and we will contact you to discuss the details and logistics.

SATELLITE MEETING IN GAUTENG

Eddie Leighton,ZS6BNS, will be anchoring a meeting on satellites on Saturday 15 January at the National Amateur Radio Centre. Learn more about operating amateur satellites, how to build a simple satellite antenna, how to track and all the ins and outs of this fascinating part of Amateur Radio. It starts at 10 am. Find out how you can get involved in the SA AMSAT CubeSat project.

The NARC is situated at Sender Technology Park, Octave road, Radiokop, Roodepoort.

HUNTING LIONS IN THE AIR

The radio amateurs and the Lions Club of Eshowe are planning to observe Saturday 15 January as an opportunity for Lions Clubs to exchange greetings on the air via Amateur Radio. The birthday of the founder of Lionism, Melvin Jones, born in 1879 at Ft. Thomas, Arizona USA is commemorated on 13 January.

The Eshowe Lions will be on the air from 14:00 CAT and want to exchanging greetings with other Lions and radio clubs in South Africa and/or the rest of the world - no prizes - but exchange QSL cards and 'make friends.'

If there are Lions and radio clubs around the country interested in joining the radio amateurs and the Eshowe Lions Club on Saturday 15 January 2011, please contact Willie, ZS5WI, at zs5wi@telkomsa.net, and give him your information.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. 2010 came to a close with a flurry of new sunspots. One region rotated into view on the eastern limb, and at the same time, three new sunspots have suddenly popped up. One of these regions located in the northern hemisphere appears to be growing at a good pace. Another region in the south is existing region 1 139. May 2011 be full of sunspots for all of us! The effective sunspot number is expected to be less than 20 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be fair towards Europa on 15 m, later to be followed by fair 20 m openings. Early evening 15 m contacts with the USA are possible. Contacts with Australia are possible on 20 m during the late afternoons. 15 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the work horse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

15 January - Hunt Lions on the Air from 10:00 CAT; 15 January - Satellite meeting at 10:00 CAT the NARC; 20 January 2011 - Closing date for submission for application for the May 2011 RAE bursaries; visit www.amateurradio.org.za for application forms; 20 January - Closing date for submission of proposals and synopsis of papers for 2011 SA AMSAT Space Symposium to saamsat@intekom.co.za; 29 January - PIC course at the NARC in Gauteng; 30 January 2011 - Closing date for phase 1 of the construction competition; 31 January - Proposals for extension to 160 m-band to be in to zs6akv@sarl.org.za.

SARL News invites clubs and individuals to submit terms of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za , click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, K3USC, NG3K & ADXO, N4AA & QRZ DX, K6AM, KH6BZF, N7OU, N7UN, AA8LL, K8CX, K8GI, K8YSE, W8GEX (60m News), K8EL, N0TG, AT International, CT1EEB, DL1SBF, DL2GAC, DL7MAE & The DX News Letter, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, F8DVD, G3KHZ, I1JQJ/IK1ADH & 425 DX News, I2YSB, OZ6OM & 50 MHz DX News, Pacific DXers, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and ZL2AL for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 26th-December, through Sunday, 2nd-January there were 219 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H40, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2010 DX SOUND BITES! Tom, K8CX, has done it again. He has provided DXers with 131 memorable DX sound clips from 2010. Visit Tom's famous "HAM GALLERY" Web at: http://hamgallery.com/dx2010
While there also check out some of his other features on his Web page,

such as: 13 years of "Rare DX Sound Clips" of the past (as well as some clips from the 1960's and 1970's), QSL Card Museum, Dayton Photo Galleries and Tribute to Silent Key Ham Operators. Tom state, "If anyone has any old HF recordings, I would be interested in hearing from them."

2011 DX MARATHON IS UNDERWAY!! John, K9EL, CQ DX Marathon Administrator, reports: "CQ Magazine's 2010 DX Marathon is now over. Please visit <http://www.dxmarathon.com> for details on submitting your score. Submissions must be in by 2359z, January 31st, 2011. High claimed scores will be posted on the website after the submission deadline. Winners for 2010 will be announced mid-year 2011 in CQ Magazine. The 2011 Marathon is now underway. EVERY Country is a new one! 2011 Score Sheets are available on the website."

3B8 & 3B9, MAURITIUS AND RODRIGUES ISLANDS. Bogdan, SP2FUD, will be active as 3B8/SP2FUD from Mauritius Island (AF-049) between February 8-17th, and as 3B9/SP2FUD from Rodrigues Island (AF-017) between February 18-22nd. Activity from both places will be on the HF bands using SSB and RTTY. QSL via his home call sign.

3B9, RODRIGUES ISLAND. After his Mauritius (AF-049), Slavo, SP2JMB, will once again be active as 3B9/SP2JMB from Rodrigues Island (AF-017) between February 18-22nd. Activity will be on all HF bands CW, while his wife Dorota, SP2TO, will be active on SSB. Look for him to also be in the ARRL DX CW Contest (February 19-20th) as a Single-Op entry. QSL via his home callsign.

3D2, FIJI. Udo, DL9HCU, is once again in the Pacific for about 2 months and will be active as 3D2HC from Fiji (OC-017). He likes 20 meters CW, so watch 14002 or 14025 kHz between 0500-0800z. Also, watch 14183 kHz (after 0500z), Udo will sometimes check into the ANZA Net. It is reported that he might not go island hopping this year as he has done in the past due to poor conditions for QRP. QSL via DL9HCU, by the Bureau or direct to: Udo Moeller, Mienenbuettel 4, 21629 Neu Wulmstorf, GERMANY.

4L, GEORGIA. Operator Daniil, UT5EO, will be active as 4L0A from Obcha during the CQ 160-Meter CW Contest (January 28-30th) a Single-Op/High-Power entry. QSL via LoTW.

4S, SRI LANKA. Matts, SM6LRR, will be active as 4S7LRG between January 22nd and February 5th. Activity will be between a holiday and semi-holiday style operation with a focus on 160/80/40 meters with a possible serious effort in the CQWW 160m CW Contest (January 28-30th) -- provided that permits for a specific good Top-Band location are received. His focus is to give North America stations a new one on 160m. QSL via his home callsign. More info is forthcoming on QRZ.com.

60M NEWS. Jose, CT1EEB, informs OPDX: "This is no doubt a good new-years eve present. Today in the mailbox there was an envelope from Anacom with the license to continue with the 60m band propagation tests. This license is valid between the 1st of January 2011 to the 30th of April 2011 on 5371.5 kHz and 5403.5 kHz both SSB and CW. I have actually asked for

two more additional frequencies in this band but the request was denied. Phase1 tests made during the 1st of May 2010 and the 31st of July 2010 produced a report sent to Anacom and to the Military, the report can be seen at: http://www.qsl.net/ct1eeb/60m/CT1EEB_5MHz.pdf
I just received word that Mike, CT1IUA, located at the Southern tip of Portugal also received the same permit from Anacom, and I'm sure that Carlos', CT1END, license will be renewed as well."

6V7, SENEGAL. Luc, F5RAV, will once again be active from La Somone between February 26th and March 7th. He will be operating from Jean-Francois, 6W7RV, QTH as 6V7T. Activity will be on SSB and PSK31, and on 160-10 meters (including 17 and 12m with a dipole only). He is planning to be in the French REF SSB Contest (February 26-27th) and the ARRL DX SSB Contest (March 5-6th). QSL via only direct to his home callsign. See details on QRZ.com. Also, visit his BLOG page at: http://f5rav.free.fr

8P, BARBADOS. Operators Tony/N3ME and Bernie/W3UR will be active as 8P9ME and 8P9UR, respectively, from the Cave Bay area in St. Philip Parish between January 26th and February 14th. Activity will be on all HF bands using CW, SSB, PSK and RTTY. QSL via their home callsigns, direct, by the Bureau or the LoTW.

8Q, MALDIVES. Marco, DH1IAC, will be active as 8Q7AC from Farukolufushi (Club Faru) between January 4-18th. Bands and modes of activity were not provided, but he will use a FT-857 into an Atas 25 and Atas 120 portable antennas. QSL via his home address on QRZ.com.

C6, THE BAHAMAS. Randy, W6SJ, will once again head to Grand Bahama Island (NA-001) in February. He expects to be on the air as C6AWS between February 3-9th. Activity will be holiday style (when not fishing) CW only and with a focus on the 30/17/12 meter bands. QSL via LoTW or to W6SJ, direct or by the Bureau.

CY0, SABLE ISLAND (Update). Randy, N0TG, reports, "Storms that caused our failed attempt to access Sable on December 6th have continued throughout the month. For sure, Sable is not easy to get to, thus perhaps the move up in the DX Magazine's "2010 Most Wanted Countries Survey" rankings to No. 50 overall, No. 36 RTTY, and No. 14 in Asia. The time frame for our next attempt is March 2011. Prior to traveling to our takeoff point in Canada we desire to observe somewhat stable weather and suitable beach landing conditions. Thus, we will keep our personal schedules flexible in order to be able to travel on short notice. Thanks to all for being patient and the expressions that have encouraged us; we are determined and eager to get on the air. The Web site will be updated as new information develops. <http://www.CY0dxpedition.com>".

DX0, SPRATLY ISLANDS. Just a reminder that 37 operators from 15 countries will take part in a three teams efffort to put DX0DX on air between January 6th and February 1st. Activity will be from Thitu Island on all bands and modes. QSL Manager is N2OO. For more information about the DXpedition, including pictures of the team arriving in DU-land and the list of suggested frequencies, please check out their Web site at:

http://www.dx0dx.net
AN INSIDE LOW BAND TIP FOR EASTCOAST STATESIDE: Don't look for them until the 9th at the earliest - but watch your LONG PATH from the S/SW at about 1030z for them on both 80 and 160 meters - this is BEFORE your sunrise. They may peak at your sunrise time again but it may be better earlier on at 1030z (which is just after the Eastcoast sunset). They will be on the SUNSET path around 2200z or so from the East/SE path or over Europe depending on the skew.

DX MAGAZINE PUBLISHES 2010 MOST WANTED RESULTS. The DX Magazine's "2010 Most Wanted Survey" has been published in their latest Jan/Feb 2011 issue. The survey that most DXers go by should soon be available online at: http://dxpub.com/dx_news.html
The survey was conducted between September and October of 2010. The listing shows the top 100 World-Wide and also includes the ranking for 2009, for comparison. The "Top Ten Most Wanted" are as follows:

2010 PREFIX / COUNTRY 2009 2010 PREFIX / COUNTRY 2009
---- --------------- ---- ---- --------------- ----
1 P5 • North Korea 1 6 FT5/Z • Amsterdam 9
2 KP1 • Navassa 2 7 ZS8 • Marion Island 3
3 3Y • Bouvet 4 8 VP8/S - South Sandwhich 10
4 7O • Yemen 5 9 FT5/W • Crozet 7
5 VK0/H • Heard Island 6 10 BS7 • Scarborough Reef 11

FR8, REUNION ISLAND. Frederic, ex-F5INL, will be active as FR8NE from Reunion Island (AF-016) until July 2012. Activity will be on 20/17/15/12/10 meters using mostly CW. QSL direct to Frederic Bossu, 2 Chemin des Grenadiers, 97490 Sainte Clotilde, Reunion Island or by the Bureau.

H44, SOLOMON ISLANDS. Bernhard, DL2GAC, informs OPDX that he will once again be on a DX vacation in the Solomon Islands. He is expected to arrive in Honiara, the capital, on January 13th and will (expected) depart on April 12th. He will once again be active as H44MS, usually on SSB only but will probably focus on the 80 and 40 meter bands. QSL via DL2GAC .

IOTA NEWS.....
AF-004. Luis, EA8AY, will once again be active as ED8T from Tenerife during the in ARRL DX CW Contest (February 19-20th) as a Single-Op/All-Band entry. QSL via LoTW. Visit Luis's Web page at: http://www.ea8ay.com/cw4evr/index.html

NA-062. Operators Wade/AA8LL and Roger/K0RMK will be active as home-call/4 from Key Largo, FL. This also counts for USI FL049S. Activity will be holiday style operating CW, SSB and RTTY, on 40-12 meters using 200 watts and wire antennas. Suggested frequencies are:
CW - 7030, 10114, 14040, 18098, 21040, 24910 and 28040 kHz
SSB - 7155, 14260, 18128, 21260 and 24950 kHz
RTTY - 7039, 10139, 14079, 21810, 21079 and 24925 kHz
QSL AA8LL/4 direct or by the Bureau to AA8LL. AA8LL/4 logs

will also be uploaded into the LoTW and eQSL. QSL K0RMK/4
direct or by the Bureau to K0RMK.

IO7, ITALY (Special Event). Just a reminder that operators Fred/IK7JWX
(SSB), Vincenzo/I7PXV (SSB and CW) and Mike/IK7FPX (SSB) will activate
the special callsign IO7DAI from the Abbeys of Lecce and Province between
now and March 31st. Activity is to provide contacts for the special
"Italian Abbeys Award Diploma Abbazie Italiane". For rules, see the Web
site at: http://www.aribusto.it/dai_rules.htm
Send QSO data to the QSL Manager IK7JWX via: ik7jwx2003@yahoo.it
All QSOs will be QSLed via Bureau; if you wish QSL via direct, send
1 USD. The logs will be available on the Web site at:
http://www.enzolog.org/login.php

ISWL CELEBRATION. Throughout the year 2011, the members of the Inter-
national Short Wave League (ISWL) will be celebrating 65 years of service
to "Licensed Amateurs" and "Short Wave Listeners". Look for the callsign
GB65ISWL to be active from several locations throughout the year. The
QSL Manager is Herbie, G6XOU. QSL cards will be returned on a QSLR basis.
QSL details are on QRZ.com. All logs will automatically be uploaded to
eQSL.cc (LoTW is NOT use). Also, look for Fred, PA0FAW, to be active as
PA65ISWL between now and January 28th. Both callsigns can be claimed for
the ISWL Monitor award. For more details, see the ISWL Web page at:
http://www.iswl.org.uk

J3, GRENADA. Roy, KE4TG, will be active as J38RF between February 9th
and March 10th. His primary interest is the Digital modes using a K-3
with a G5RV and phased vertical antennas. Please note that he will try
to be active on 60 meters on channel 5. QSL via his home callsign.

J7, DOMINICA. The "Buddies in the Caribbean" DXpedition (Team #1), which
specializes in 100 watts or less low power radios and the Buddipole
portable antenna systems, will be going to Dominica, February 1-9th.
The team plans to stay at the Calibashie Cove hotel on the north shore
of Dominica <http://www.calibishiecove.com>. After two very successful
mini-DXpeditions to St. Lucia in 2010, the team looks forward to demon-
strating their capabilities for an "ultralite" DXpeditioning into magnifi-
cent vista locations, operating a field portable, battery-only radio
with backpackable, lightweight antennas and most of all having fun on
the island of Dominica. The entire mini-DXpedition is limited to equipment
that can fit in their airline suitcase. The eight operators are: Budd/W3FF,
Chris/W6HFP, Wey/K8EAB, Mike/KC4VG, Steve/wG0AT, Paul/KB9AVO, Dan/WZ1P
and Guy/N7UN. The J7 license applications are currently being processed.
There will be 3 Villa stations in operation at various times on 160-10
meters using CW, SSB, and RTTY. During the day several teams will be
battery-only, field portable either from Dominica beaches or scenic
mountain tops. 160m and 80m CW operations are planned, conditions
permitting. QSL via LoTW, eQSL, or mail to the operator's home callsign
(SASE required). A Web page is under development for this operation.

KH6BZF PROPAGATION FORECAST/REPORT (For January 3-9th)....
Jan 3 AN SOLAR REFERENCE KEYS

Jan 4 HN ----------
Jan 5 HN BN - Below Normal
Jan 6 HN AN - Above Normal/Geomagnetic Level is QUIET
Jan 7 AN LN - Low Normal
Jan 8 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jan 9 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LU1, SOUTH SHETLAND ISLANDS. Diego, LU8DIP, is now active as LU1ZS from the Antarctic Base Teniente Camara on Half Moon Island (AN-010) until mid-March. Most activity has been on 20 meters SSB and some 40 meters. QSL via only LU4DXU.

P29, PAPUA NEW GUINEA (IOTA DXpedition). Derek, G3KHZ/P29NI, is organizing a 6th trip to P26-land in April to activate three rare Papua New Guinea IOTAs. This time the destinations will be Feni (OC-101), Nuguria (OC-257) and Green Island (OC-231). He informs that there is one operating position left. If you would like to join the team please contact G3KHZ at: g3khz@derekcox.plus.com

PJ2, NETHERLANDS ANTILLES. After his ZF6AM operation (see ZF below) John, K6AM, will be active as PJ2T from the Signal Point Station on Curacao (SA-006, WLOTA LH-0942) during the ARRL DX SSB Contest (March 5-6th) as a Single-Op/All-Band/High-Power entry. He informs that he will not do too much operating outside the contest. QSL via LoTW or direct to N9AG.

POSSIBLE NEW DXCC ENTITY? Some 3 million Sudanese will be voting on a referendum on independence on January 9th. It looks like the Southern Sudan may be reborn again. This act of secession should put to rest Africa's longest and bloodiest civil war. Stay tuned! For more details, visit the following:
http://www.guardian.co.uk/commentisfree/2010/dec/27/sudan-two-countries
http://edition.cnn.com/2011/WORLD/africa/01/01/sudan.vote.bashir

OLD QSL COLLECTION (Update). Jean Michel, F6AJA, wants to remind everyone
to visit the Les Nouvelles DX (LNDX) Web page to see more than 8300 old
QSL cards in several different albums/galleries. This site contains:
- The ten most wanted DXCC entities (2004 to 2009) with more than
300 QSLs
- At least one card for each 58 deleted DXCC countries (more than
1100+ QSLs)
- Nearest the totality of current prefixes, disappeared now (more
than 3100+ QSLs)
- Album for stations from Magrebh - 1947 to 1962 (more than 300+ QSLs)
- More than 800 QSLs from the Antarctic bases.
- Nearly 260 QSLs from the TAAF (Terres Australes and Antarctiques
Francaises).
- More than 300 QSLs for the rare French Pacific Islands such as
FK/C, FO/C, FO/A, FO/M, FO/C and FW
- Nearly 100 cards from Eparses Islands such as FR/B/E/G/J/T
- More than 900 cards for the old timer with more than 120 countries
before 1945.
- A card from the French Department before 1945.
- One card from each of the states in the U.S. before 1945.
The URL address for the Web site is: http://LesNouvellesDX.free.fr
Some cards are still needed for the collection, and your particip-
ation is welcome. Please visit their site and give them your comments
by sending an E-mail to: LesNouvellesDX@free.fr

POSTAL RATES FROM ITALY. Silvano, I2YSB, informs OPDX that it is bad news on the POSTAL RATES from Italy as of January 1st:
0.75 EUR for Europe (+15% increase)
1.60 EUR outside Europe (+88% increase)
2.00 EUR Pacific (VK-ZL-ecc.+100% increase)
This is for lightweight letters, max 20 grams (2 QSL) standard size. Should you want to receive a direct QSL from I2YSB QSL Manager, please include: 2 USDs for Europe + SAE and 3 USDs outside of Europe + SAE. PLEASE -- NO IRCs and NO STAMPs.

QSLS VIA LoTW: 4O3A, 5V7TT, 5W0KH, 5X1NH, 9L5VT, AM3SSB, C6APT, C6AUM, E4X, EA5BZ, EA8FJ, EN220FI, F1PKH, G4NXG/M, HK4SAN, I4IKW, IV3RAV, J79XBI, JF1SEK, LX1CW, MD0CCE, OE3GCU, OH7MA, OJ0B, OK2PAY, ON4CMT, ON4WW, OX3XR, OZ4VV, PA5RA, RZ3AFK, SN0HQ, SN3R, SN9U, SQ7WK, T77C, US3QQ, US5XD, UT1UY, V31RR, V44KAI, VO1HP, VP2E/W1UE, YL5T, YN2AA, ZL8X and ZP6CW

QSLS RECEIVED VIA MAIL: 7Z1TT, 9J2KK, 9Q50ON, C91JR, CY0X, ES1QD, ES5QD, FJ/SM5FUJ, FM1HN, HL5FUA, HS0AC, J88CF, LX1DA, LX8RTTY, PJ2/W1NG, PJ4D, PJ4LS, PJ5/AA4NC, PJ5/AH6HY, PJ5/K1XM, PJ6A, PJ7E, RI1FJ, TO3GA, V73TM, VK0CW, VP2V/NY6X, VP8DMH and ZL7A

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED this week!

T30, WESTERN KIRIBATI. Operators Bill/N7OU and Bob/W7YAQ will once again team up for another operation in the Pacific, but this time from Tarawa Island (OC-017) between February 8-22nd. Callsigns will be announced at a later date. Activity will be on 160-10 meters, using mostly CW with some SSB and RTTY, and using 100 watts and vertical antennas. They will also be in the ARRL DX CW Contest (February 19-20th) as a Multi-Single entry. QSL via their home callsigns.

T31, CENTRAL KIRIBATI. An international team will activate T31A from Kanton Island (OC-043) between April 17-28th. The transportation has been arranged, all licenses are assigned and the permit is in its final stages. They plan to have 6 stations on the air, operating on 160-10 meters. More details should be forthcoming and look for updates at: http://www.T31A.com

TF, ICELAND. The "W8GEX 60m News" reports that Torlin, TF1GW, states starting January 1st, 2011, the Icelandic radio amateurs can use 150 kHz in the 5 MHz band instead of 8 frequencies. They can use between 5260-5410 kHz with 100 watts PEP out, 3 kHz bandwith, and modes J3E and A1A.

TJ, CAMEROON. An international team composed of members of the Provins ARC (F6KOP) is heading to Cameroon between 10-20th. All the required steps have been made with the local Administration and the team has applied for the callsign TJ3C. The main operating QTH will be in Kribi, 2 hours by road from Douala. Operators mentioned are: Frank/F4AJQ (Team Leader), Seb/F5UFX (Assistant Team leader), Michel/FM5CD, Bob/N6OX, Bill/N2WB, Dave/K4SV, Eric/ON7RN, Gabriele/I2VGW, Jean-Paul/F8BJI, Alain/F6ENO, Jean-Luc/F6BIV, Michel/F5EOT, John/F5VHQ, Gerard/F2JD, Gerard/F2VX,

Yan/F1NGP, Mathieu/F5PED and Henri/F1HRE. Activity will be on all bands, 160-10 meters using CW, SSB, RTTY and PSK. They will have six stations (5x FT450sat and 1x K3) with 6 Amps (Acom 1010) and 6 laptops using Wintest software on the air, 24 hours a day during their 9 day operations. The antenna farm will consist of Spderbeams (3x five banders, 1x tri-bander, and 1x WARC bands), and a vertical for 20/30/40/75/80/160m. For the lower bands, depending on a usable place, 1 or 2 beverages and a K9YA system will be set-up. A Web site is under construction and the URL address will be published soon. Other individuals involved are:
QSL Manager : Didier/F5OGL
Pilot Station : Serge/F6AML
Webmaster : Thierry/F4TTR
Internet Mailing List: Maurice/F5NQL (subscribe by F5NQL@aol.com)
The main target is to make 80,000 QSOs, during their nine days of operations, with an emphasis on the lower bands, 160-30 meters and the Digimodes.

TM8, FRANCE (Special Event). Look for special event station TM8AAW to be on air between February 12&#65533;28th. Activity is to celebrate the 8th Antarctic Activity Week. Operation will be made by Fran&#65533;ois, F8DVD, from his QTH in Macon, in the east part of France. WAP reference number for TM8AAW is 199. Activity will be on 40-10 meters, mostly SSB. QSL via F8DVD, direct or by the Bureau. For more details, see QRZ.com or visit: http://tm8aaw.monsite-orange.fr

V3, BELIZE. Darren, VA3EGG, will be active as V31DI from Maya Beach, Placencia, Belize, sometime in January (dates not provided). He enjoys working all bands on 160-6 meters, but particularly the 6, 20 and 40 meter bands, and mainly SSB. QSL via his home callsign direct only.

V3, BELIZE. Will, AA4NC, will once again be active as V31RR from Placencia between February 16-23rd. Activity will be on CW, SSB, RTTY, and the 30/17/12 meter bands. His activity will also include the ARRL DX CW Contest (February 19-20th) as a Single-Op entry. QSL via AI4U or LoTW. No Bureau cards.

V5, NAMIBIA. Klaus, DJ4SO, will once again be active as V5/DJ4SO from a farm home southeast of Windhoek (same as last year) between February 22nd and March 23rd. Activity will be on 160-10 meters using mostly CW and RTTY/PSK31, with some possible SSB. QSL via his home callsign, direct or by the Bureau (E-mail request to klaus@dj4so.de). His logs will be uploaded to LoTW. No eQSL.

VK8L, LORD HOWE ISLAND. Christopher, VK5CP, has once again return to Lord Howe Island (OC-004) and will be active as VK5CP/VK9L until January 7th. According to "DX-World.Net", Chris states, "I am using a half wave dipole at 10m, an IC7000 and a LDG tuner. Power is about 50w. I can hear very well but my signal is weak (sorry, but the 14Kg luggage limit did not allow me to bring the Alpha 87A). I am working SSB only 80-6m. Please QSL to VK5CP. I will make a special QSL for VK5CP/VK9L."

VK9N, NORFOLK ISLAND (Just a reminder!). Operators Alan/VK3XPD, Kevin/ VK4UH and Mike/VK3KH, will once again be active as VK9NA from Norfolk Island (OC-005, WLOTA 1469) between January 7-21st. This is the same group that did a VHF, UHF and Microwave DXpedition last year. The group plans again to be operational on 50 MHz through to 10 GHz using CW, SSB and WSJT. QSL Manager is VK3KH: Michael Coleman, 44 Rosserdale Cres, Mount Eliza Victoria 3930, AUSTRALIA. Look for more details and updates at: http://www.vk9na.com/index.html

ZF, CAYMAN ISLANDS (NA-016). John, K6AM, will be active as ZF2AM for two weeks so he can operate during the ARRL DX CW Contest (February 19-20th) as a Single-Op/All-Band/High-Power entry and the CQWW 160m SSB Contest (February 25-27th). He informs that activity outside of the contest will be some casual phone operations, mostly on the WARC bands as time allows. QSL via K6AM, direct or by the Bureau or LoTW. ADDED NOTE: He will head to PJ2 right after this operation (PJ2 above).

ZL NEWS (New Zealand DX Hall of Fame Citations - 2011). A press release by Lee Jennings, ZL2AL, New Zealand DX Hall of Fame Panel Convener, reports (edited): "The New Zealand DX Hall of Fame was established in 2009 to honor those outstanding ZL DXers and contesters who have excelled in our radio sport hobby over many years. The current panel of judges includes Ken McCormack/ZL1AIH, Duncan McMahon/ZL3JT and Bill Carney/ZL3NB. Previous winners have included, Roy/ZL4BO, Ron/ZL1AMO and Jock/ZL2GX (SK) in 2009. Winners in 2010 included Dave/ZL1AMN, Aola/ZL1ALE and Dave/ZL1HY (SK). This year, after much deliberation the judges were unanimous in their selection and have elected the next three ZL radio amateurs to the New Zealand DX Hall of Fame for 2011. Their individual citations are below:

* John N. Shaw, ZL1BYZ - The election of John Shaw, ZL1BYZ, as the 7th inductee to the NZ DX Hall of Fame recognizes his extraordinary abilities as a contester and DXer. Licensed in 1983, John has proven to be a prolific contest operator and amazing DXer with most of his operations on CW. He usually places highly in major international contests and generates enormous pileups when he operates from his Pukekohe farm. John was a member of the ZL6QH contest group, ZL7T DXpedition, ZL6LH Light House team and a long time active member of the Papakura Radio Club. He has won the Doug Gorman Frequency measuring contest and numerous Jock White Field Day contests. He was recently made a member of the ARRL A-1 Operators Club. John will be joining the ARRL DXCC Club soon with an initial entry of over 300 countries. He contributes much to the sport of Amateur Radio Contesting and DXing in New Zealand. We wish John well in the future and hope that he will enjoy having the NZ DX HoF award plaque on his shack wall.

* Bryan Anderson, ZL2AFT - The election of Bryan Anderson as the 8th inductee to the NZ DX Hall of Fame recognizes his superb DXing skills and outstanding contribution to the sport of radio DXing. Licensed in 1954, Bryan has a long history of working DX with his own homebuilt equipment and had over 200 countries confirmed by by 1975. In 2009 he achieved DXCC #1 Honor Roll with 354 confirmed, mostly with antique Drake equipment and a homebuilt Quad. Bryan has given outstanding

service to his local radio club and assisted many ZLs to achieve DX in the pile-ups. He has always tried to keep the hobby in perspective and not let it interfere with the more important things in life, such as his family and his work as a Polytech lecturer in Palmerston North. We wish Bryan well in the future and hope that he will enjoy having the award plaque on his wall.

* Peter W. Watson, ZL3GQ (SK) - To the Family of Peter Watson.... It gives me great pleasure to inform you that Peter Watson, ZL3GQ (SK), has been elected to the New Zealand DX Hall of Fame. The posthumous election of Peter as the 9th inductee to the NZ DX Hall of Fame recognizes Peter's extraordinary and unselfish contribution to the sport of Amateur Radio DXing in New Zealand. From his 5.5 acre on the outskirts of Christchurch he achieved 323 entities by 1997, DXCC HR in CW, DXCC HR in Phone, 5BDXCC with 160m Endorsement, 5BWAZ Award #29, 160WAZ Award #26. His passion was 160M and CW. He routinely set CQWW contest records and recorded the first ZL to VS6 top band contact. As an FOC member he was awarded the prestigious Al Slater award by the FOC committee for outstanding services to amateur radio. He was also a member of the ARRL A-1 Operators Club and a team member of the May 1996 ZL8RI DXpedition to Raoul Island in the Kermadecs. He was an out-standing ZL radio amateur for decades. His last contest was in February 1998 and he became a SK on March 27 of that year. This award honors Peter's wonderful DXing and Contesting skills and will attest to how accomplished this great New Zealand DXer was.

We offer our heartiest congratulations to these three outstanding ZL radio amateurs who have been elected to the New Zealand DX Hall of Fame in 2011. Thanks to Ken, Duncan and Bill for their work in selecting the inductees. New Zealand has a rich history of producing world renowned DXers and Contesters. We are delighted that these ZL DXers have been recognized. They are among the best of New Zealand amateur DXers."

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 2nd January 2011

IRTS 80M Counties Contest

The 80m Counties Contest this year will be held tomorrow Monday the 3rd, the Bank Holiday. Rules in Echo Ireland and on the IRTS web site.

IRTS Committee Meeting

The provisional date for the next IRTS Committee Meeting is next Saturday 8th of January in Portlaoise. All affiliated Club reps are encouraged to attend.

WAI Square Checker

WAI square checker is available on line for those who maybe want to verify their grid square (also know as Tetrad).

The website http://www.gridreference.ie is accurate in the absence on an Ordnance Survey map. By simply zooming and clicking in on your location on the map , all very useful grid information can be found to the right of the page (WAI square is last on list - Letter followed by 2 digits).

Tipperary Amateur Radio Group

The Tipperary Amateur Radio Group Would Like to wish all Radio Amateurs and Shortwave Listeners a Happy New Year and to get 2011 off to a good start the January meeting of the Group will take place in Raheen House Hotel, Raheen Road, Clonmel on Thursday next the 6th at 8.00pm Weather Permitting All are welcome.

Olivier ON4EI / EI8GQB

Oliver is back again and will be QTV for the 80m Contest tomorrow and will also be active around family schedule during his stay. Of course for those of you that do not get a chance to work him during his stay this time, he is planning on returning in March for the WPX Contest.

DX News

Barney ZS6TQ is at present QRV from the Democratic Republic of the Congo using the call 9Q0HQ/6. Look for him on 40/20/15/10/6m. He plans to be there till 11th January and QSLs go via K3IRV.

For classical music lovers there is the chance to work a station commemorating the 200th anniversary of the birth of the composer Franz Liszt. The call HG200LST will be aired at various times during 2011 by a group of Hungarian amateurs.

Another special event station this time commemorating the 150th anniversary of the birth of the Brazilian scientist, inventor and radio pioneer Roberto Landell de Moura will be on during the month of January. The call to look for is PS150PLM and QSLs will be sent automatically via the bureau.

Francis F6BLP will be on holiday in Senegal from 8th to 21st January and will take the opportunity to get on the air as 6W7SK. QSLs go via the home call and also via Logbook of the World.

Eddy ON4AFU will be in Thailand for the next 3 months and will activate HS0ZJF. While there he hopes to do some island trips and operate as HS0ZJF/8 from IOTA AS-101 and as HS0ZJF/9 from IOTA AS-126.

(direct: dj5av@darc.de)

DX0 - Spratly Islands: The call DX0DX will be used for a big multinational
DXpedition to the Philippinian Spratly-Island Pagasa (AS-051), lasting
January 6th through February 1st. On 160 through 6 m (with some 2 m,
70 cm and 23 cm) they will be on thew air with ten stations
simultaniously, four on CW and SSB, two for RTTY/digimodes and one for
2 m and 6 m. Colin, GM0RLZ, is experienced OP on UHF/VHF and will try
for EME also. They will have ten IC-7600 and one IC-9100 tranceiver
ACOM linears and SteppIR antennas. The 32 members of the three teams
will be: Ed, 4F1OZ, David, AH6HY, Eduardo, DU1EV, Kaye, DU9XO, Dindo,
DV1UD, Christian, EA3NT, Gerard, F2JD, Clive, GM0POI, Colin, GM0RLZ,
Edmund, GM0WED, Gabriele, I2VGW, Simon, IZ7ATN, Krassimir, K1LZ,
Jeffrey, K1ZM, David, K3LP, Clay, K7HC, George, N6NKT, Paul, N6PSE,
Douglas, N6TQS, Dima, RA9USU, Bjorn, SM0MDG, Dr. Josephine, VK2FXGR,
Allan, VK2GR, Peter, VK3FGRC, Nikolaas, VK3FNIK, Lee, VK3GK, Chris,
VK3FY (teamleader), Wally, VK6YS, Sarla, VU2SWS, Hrane, YT1AD, Mladen,
YT6W, and Markovic, YU1AU.
Announced frequencies of DX0DX:
BAND CW SSB RTTY/PSK31

2 m 144.100 144.200 -
70 cm 432.100 432.100 -
```

23 cm 1296.100 1296.100 -
QSL manager is Bob Schenck, N2OO, direct or bureau. Also Online Request System (OQRS) will be available for direct cards via PayPal or bureau. The website of the DXpedition is at www.dx0dx.net .

H4 - Solomon Islands: Look for Shane, VK4KHZ, using the call H44DA from Guadalcanal Island (OC-047) January 6th through 16th holiday style preferably on 6 m. Shane will have an FT-847, a 500-Watt-PA, 3el beam for HF and a 3ele Yagi for 6 m. QSL via VK4KHZ.

HK - Colombia: Again Lothar, DK8LRF, will be HK3JCL January 10th through March 7th, preferably on on 20 and 40 m. He will also give Pactor and PSK31 a try. QSL for HK3JCL via DK8LRF via bureauo or direct (qrz.com).

LU/Z - South-Shetland-Islands: Diego, LU8DIP, will be active from LU1ZS, the club station located at he "Teniente Camara" base (AN-010) of Argentina until mid-March. Look for him on 14.185 and 7.070 MHz. QSL manager is LU4DXU.

P4 - Aruba: Find Marty, W2CG, as P40CG from different places of Aruba (SA-036, WLOTA 0033) January 10th through 24th in his mornings and early evening hours mainly 80 through 10 m CW with SSB on request. He will have a verical 10 m up. QSL by LoTW or via home call direct or via bureau to via W2CG.

V3 - Belize: In January Joe/DJ1JB (V31ML) and Max/DJ4EL (V31ME) will visit several IOTAs with this time table:
NA-073 Ambergris Caye 10.-11.01.
NA-073 Caye Caulker 11.-14.01.
NA-123 Long Caye 14.-18.01.
NA-180 Tobacco Caye 18.-26.01.
They will be on all HF bands with SSB using 100 watts and a ZS6BKW antenna, several quad loops, and a vertical antenna. QSLs via bureau to appropiate home call.

VK9N - Norfolk: Find Alan/VK3XPD, Kevin/VK4UH, and Mike/VK3KH, January 7th through 21st transmitting from Norfolk as VK9NA on 50 MHz through 10 GHz in CW, SSB and WSJT. Der QSL-Manager is VK3KH. Furtherinformation at www.vk9na.com/index.html .

VP9 - Bermudas: James, VP9/WW3S, will visit Ed, VP9GE, January 6th through 10th and use all HF bands. QSL via LoTW or direct to James S. Tolbert, Jr., 21986 Russet Dr., Meadville, PA 16335, USA.

3B8 - Mauritius/3B9 - Rodriguez: Jacques, F6HMJ, will be active as 3B9/F6HMJ from Rodriguez Island (AF-017) January 11th through 20th and as 3B8/F6HMJ from Mauritius January 5th through 10th and again January 20th through February 21st. He will operate CW, SSB and possibly RTTY on all bands. QSL via F6HMJ.

6W - Senegal: Francis, F6BLP, will be active holiday style as 6W7SK January 8th through 21st. He will operate mainly CW on 17, 20, 30 and 40 m using an IC-7000 and G5RV aerial. QSL via F6BLP, direct or via

bureau and LoTW, also eQSL. Find more details, log and pictures of
his last operation as 6W7SK at
www.f6blp.org/index.phplangue=uk&contenu=home.php .

8Q - Maldives: Listen for Marco, DH1IAC, as 8Q7AC January 4th through 18th
from Farukolufushi Island using an FT-857 and Atas 25 as well as Atas
120 portable aerial. QSL via home call, bureau ok!

England, special event: Special call GB65ISWL will remind for foundation of
the "International Short Wave League" (www.iswl.org.uk) 65 years ago
transmitting from several places in England. QSL via G6XOU, direct,
via bureau or eQSL.

Silent Keys:

Following DXers became a silent key during the last weeks:
Silvano Amenta, KB5GL (ex-I1SEM, -IT1SEZ and -IT9SEZ), passed away 30.
December at 80 years age from a stroke. He was active especially in the
IOTA program and activated Mangaia Island, (ZK1AGL) among others.
Further Silent Keys: Petar Glas (9A6NGP), Gene "Jeannot" Ameriguian (K8CD),
Paul N. Beane (NW8C), Aleksandr Y. Savenkov (UR5IOK), and Frederic G.
Hargesheimer (W0EBG, ex-VK9FH).

DXCC:

Possibly the entity "Southern Sudan" (ST0) - deleted after Dec 1994 might
return. January 9th three millions of South Sudan inhabitants give a vote
about their independence. Get more information from
www.guardian.co.uk/commentisfree/2010/dec/27/sudan-two-countries &
http://edition.cnn.com/2011/WORLD/africa/01/01/sudan.vote.bashir

Additional frequencies for Iceland:

Jonas Bjarnason (TF2JB), President of "Icelandic Radio Amateurs" (IRA),
reports that from now through December 31st 2012 TF operators have
permission to use 493 through 510 kHz, 70.000 through 70.200 MHz and
the 5 MHz-Band for amateur radio. On 60-m now there is permission for
5.360 through 5.410 MHz instead of eight fixed channels but with only
100 watts instead of 200.

LINKS:
Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

8.January: Activity Distrikt Nordrhein;
8.January: Schwaben-Contest;
8./9.January: EUCW 160 m Contest;

9.January: DARC 10 m Contest.

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-017, AS-079, AS-024, AS-047, JA, Japan, Okinawa: Skip, JE2HCA, reports
that 50 years ago Okinawa returned to Japanese administration. Skip's
Okinawa-Call is JS6SSW. At the end of WW II Okinawa was occupied by USA.
There were trials to establish an independent "State of Okinawa" or
"Republic of the Ryukyus". Even a status similar to Hawaii had been in
consideration once but 1972 Okinawa became part of Japan again. There
will be numerous special calls and events. "Okinawa DX Radio Club"
(ODXRC) uses 8J6HAM/OKA50 through January 8th.
All throug 2011 there will be appendixes to the calls of the islands
as e. g. JS6SSW/OKA50:
Island Appendix IOTA

Okinawa /OKA50 AS-017
Ie /IEJ50 AS-017
Aguni /AGJ50 AS-017
Kerama /KJP50 AS-017

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

January 5, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Keep Them Digits Rolling - ARRL RTTY Roundup
- Little Pistol Heaven - NAQP CW & SSB
- YASME Excellence Awards for 2011
- New Issue of Pileup! Available
- Life's A Beach with Team Vertical
- NAQP Summer Contests Rescored
- Our Favorite Star in Sky & Telescope
- The SDR Invasion
- From Parallel to Serial and Back Again

NEW HF OPERATORS - THINGS TO DO

I can't think of a better pair of contests for the beginning
radiosporter than the North American QSO Party CW and SSB events - just
give your name and state! If you'd rather type, try the ARRL's RTTY
Roundup instead.

BULLETINS

See the News and Results items regarding scoring and multiplier log
format for this and next weekend's North American QSO Party contests.

BUSTED QSOS

No errors detected or corrected!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Jan 8-9

- ARRL RTTY Roundup
- NS Weekly Sprint--CW(Jan 7)
- 070 PSKFest
- Hunting Lions In the Air
```

- WW Peace Messenger Cities,
- North American QSO Party--CW
- EUCW 160 Meter Contest--CW
- DARC 10 Meter Contest
- Midwinter QSO Party
- CWops Mini-CWT Test (Jan 12)
- Linc Cundall Memorial CW Contest (Jan 12)

Jan 15-16

- North American QSO Party--Phone
- LZ Open Contest--CW
- International United Teenager Contest
- UK DX RTTY Contest
- HA DX Contest
- Feld-Hell Gridloc Sprint

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The YASME Excellence Awards <http://www.yasme.org/excellence.html> are given to individuals who through their own service, creativity, effort and dedication have made a significant contribution to the cause of Amateur Radio. The contribution may be in recognition of technical, operating, or organizational achievement as all three are necessary for amateur radio to grow and prosper. With the 2010 Excellence Awards, YASME recognizes the following individuals in order to recognize them and inspire others on behalf of Amateur Radio now and in the future.

- Ram&#65533;n Santoyo V, XE1KK <http://www.qrz.com/db/XE1KK> who is recognized for his work in advancing ham radio in Mexico and Central America and his service to the international radio community as IARU Region 2 Secretary. He is a strong proponent of radiosport and the World Radiosport Team Championships. Voices like Ram&#65533;n's help the amateur community work together worldwide, strengthening our position and reputation as important members of the wireless community.
- Makoto (Mako) Mori, JE3HHT <http://mmhamsoft.amateur-radio.ca> who deserves much credit for popularizing RTTY by writing the MMTTY software modem and making it available for integration into logging software. MMTTY is a great product and Mako has exhibited great ham spirit with a huge effect.
- Bruce Horn, WA7BNM <http://www.hornucopia.com/contestcal> who continues to generate useful and innovative web applications including a complete upgrade of his excellent contest calendar web site. His 3830 score reporting and compilation service and Cabrillo log submission tools have changed the nature of radiosport.
- Rick Meuthing, KN6KB <http://www.winlink.org/WINMOR> for developing the new WINMOR sound-card digital mode software now gaining wide use in the worldwide Winlink 2000 system. Many attempts at approaching the performance of the proprietary PACTOR III protocol and hardware failed before WINMOR, attesting to the difficulty of the problem.
- Mikael Styrefors, SM2O <http://www.remoterig.com/> who has developed

the Remote Radio Control interface. The ability to connect radios and operators transparently and robustly over the Internet is a key technological element of putting top-grade remote HF stations on the air - something more common every day.
- Alex Shovkoplyas, VE3NEA <http://www.dxatlas.com> for developing DX Atlas, Morse Runner, HAM-CAP, CW Skimmer, Rocky and other innovative software. Alex's products are making a remarkable impact on the competitive HF operating environment. Making this software available to the amateur community at little or no cost demonstrates excellent ham spirit.
- Pepe Ardid, EA5KB <http://www.ea5kb.net> who makes it possible for many Latin American DXers, who are in many cases saddled with deficient postal services and QSL Bureaus, to confirm contacts with attractive and unique QSL cards. Pepe contributes countless hours of service in support of his fellow amateurs so they can continue to participate in one of amateur radio's most cherished traditions.

There has been some confusion about logging for the upcoming NAQP CW and SSB contests regarding what is an acceptable abbreviation for North American countries. Contest manager, Bruce WA7BNM clarifies the situation as follows: "For US states and Canadian provinces and territories, use standard postal abbreviations as the QTH designations. For North American countries, other than the US and Canada, use the standard ARRL DXCC entity prefixes <http://www.arrl.org/country-lists-prefixes> as the QTH designations. Other abbreviations are acceptable as long as they unambiguously designate the QTH. The logged QSO info for contacts with stations outside of North America may leave the QTH blank, or specify "DX", in lieu of the country designation. This and other logging suggestions that are designed to reduce errors in entrants' submitted logs are described on the NCJ web site <http://www.ncjweb.com/naqploghints.php>. Participants are responsible for assuring that they have recorded this information correctly in the logs before they submit them regardless of the logging software they are using." Bruce continues regarding the use of decoding technology in the contest's Single-Op category, "We've returned the Single-Op criteria to the pre-2009 definition that prohibits the use of automated tools. The rules on the NCJ web site have been updated to reflect this change."

The World Wide Radio Operators Foundation, Inc <http://wwrof.org/>. (WWROF) has been granted IRS 501(c)3 status as a tax-exempt public charity. This means that contributions to WWROF by U.S. taxpayers are deductible to the extent allowed by law. Two new directors were also added; John Sluymer, VE3EJ, and Tine Brajnik, S50A, both well-known in the international contest community for their operating skill and leadership talents. In the past year, WWROF has provided financial and "behind-the-scenes" technical support for several programs of interest to active operators, including several award programs and log-checking services for the IARU HF Championship HQ station competition. In 2011, WWROF will be seeking to implement several high-impact, high-return

programs that will benefit the contest community at large and would appreciate your financial support.

Tor N4OGW announces the release of a new logging program, SO2SDR <http://code.google.com/p/so2sdr/>. "The general idea is to explore uses of SDR technology for SO2R (Single-op, Two-radio) CW contesting." The program does not decode any CW and is freely available for download. Tor notes that it is still a work in progress, but does run on both Windows and Linux platforms and features an SDR panadapter integrated into the band map.

The 22nd annual Dayton TopBand Dinner <http://topbanddinner.com/> is slated for Friday night, May 20, 2011 at the Crowne Plaza Hotel <http://www.cpdayton.com/>. Program details and menu selections will be announced in late January and tickets will be available starting in February. (Thanks, Tim K3LR)

Rin JG1VGX contributes new of the Japanese digital band <http://www.jarl.or.jp/English/6_Band_Plan/JapaneseAmateurBandplans20090330.pdf> plan just in time for this weekend's ARRL RTTY Roundup contest.
Summarizing, most JA stations will be found here:
3520 - 3530 and 3599 - 3612 kHz
7025 - 7045 and 7100 - 7200
14070 - 14112
21070 - 21125
28070 - 28150
JA stations can operate split and generally prefer the lower available segment.

The LZ Open Contest <http://www.lzopen.com/> is trying a new score reporting technique according to Krasimir LZ1GL. "You can watch live logs check right after the contest after every new log received and uploaded. You can also compare your log with any other log and you can see your errors. This cross check function is unique and we are proud to be the first contesters using it." The contest will also be recorded from Sofia, Bulgaria.
(Thanks, Dave KM3T)

A similar tactic is being employed by the sponsors of the Montana QSO Party <http://www.fvarc.org/>. "After the contest is over, upload your scores and logs and see the results instantly! You will also be able to download a 2011 Montana QSO party certificate that you can print out in full color!" (Thanks, Lyndell N7LT, Montana QSO Party Manager)

Web Site of the Week - The latest issue of the Finnish contesting magazine Pileup! <http://www.helsinki.fi/%7Ekorpela/PU/PU.html>, is online and ready for your reading enjoyment. It's a "wonderful, fantastic reading, great job! Thank you," according to contester Jim, K1TN.

WORD TO THE WISE

Can this be the first set of contest disqualification rules? "For in a contest there is much labor needed--and after the contest victory falls to some, to others disgrace. Is the palm ever given or the crown granted before the course is finished? ... Therefore no one can receive a reward, unless he has striven lawfully; nor is the victory a glorious one, unless the contest also has been toilsome." -St. Ambrose of Milan, Chapter 15, Three Books on the Duties of the Clergy, 4th century (Thanks, Bert N4CW via John K1AR)

==> SIGHTS AND SOUNDS

We're still having fun "using a few verticals on the beach..." reports Kenny K2KW/C6ATA regarding the Team Vertical trip during the 2010 CQWWCW. You'll particularly enjoy the unorthodox mounting of the 160 meter vertical. "Weather and waves prohibited us from installing 160m vertical in one piece. After a lot of thought and computer analysis, we came up with a unique solution: put the base of the vertical on the beach, and the rest of the antenna on the elevated deck of the villa. While not graceful, the 160 sure worked as N6BT has claimed a new 160m LP World Record. We hope you enjoy the videos <http://n6bt.com/n6bt-C6-2010--vid-1.htm> and photos <http://n6bt.com/n6bt-C6-2010-1.htm> which review the antenna & station design."

The big signals from Vlad RA4LW will be off the air for a while due to a recent snow and ice storm in Russia. The antenna farm damage was severe as shown by gallery images <http://rw4lyl.ru/plugins/p17_image_gallery/images/798.jpg> 798 through 808. RD3A <http://contesting.at-communication.com/en/rd3a_winter-rain/> also suffered a lot of damage in the same storm. (Thanks, Yuri VE3DZ and Al 4L5A)

Speaking of digital modes...and what is that sound anyway? You can take an online tour of the audio signal signatures courtesy of WB8NUT <http://www.wb8nut.com/digital.html>. (Thanks, George K5TR)

==> RESULTS AND RECORDS

Log checking issues with the Summer 2010 NAQP contests have resulted in the contests being rescored. "NAQP management has made the decision because of some conflicting information on the Web as to the correct way to log non W/VE North American stations in NAQP. As a result, a popularly used logging program was incorrectly populating the QTH field for non W/VE North American stations. This caused a number of QSOs and multipliers to be disallowed in participant's logs. Rescoring these events did not change any of the top finishers in the SSB or RTTY NAQP. However, this rescoring did change the Top Ten finish order for several stations in the Top Ten Single Operator class of the August 2010 CW NAQP including a change in the overall winner. The revised results are available on the NCJ Web site <http://www.ncjweb.com/contests.php> under Preliminary Results and will be summarized in the Mar/Apr, 2010 issue of NCJ." (Thanks, NCJ Editor, Al K0AD)

The results for the 2010 CW Rookie Roundup are now posted <http://www.arrl.org/contest-results-articles>. Award certificates will be emailed to Rookie participants within the next several days. Mark your calendars for Sunday, April 17, 2011 for the Next Rookie Roundup; April will feature SSB, and anybody licensed in 2009, 2010 or 2011 can enter as a Rookie. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

The results for the 2010 CQ 160 Meter Contest <http://cq160.com/> are now available online. There are some corrections to the article:

- ND8DX is the winner for Zone 4 Single-Op SSB not K5RX.
- The club score for Arizona Outlaws Contest Club was incorrectly listed as Central Arizona DX Association. They had 52 entries and finished 16th in the world.
- For the CW plaques, JA5DQH's correct name is Akito, not Akira

To get your Log Checking Report, email CQ WW 160 Contest Director, Andy N2NT <director@cq160.com> indicating your call sign and mode.

CQ WPX Contest Director, Randy K5ZD announces that, "Following in the established footsteps of the CQWW Contest, the CQ WPX Contest is now making submitted logs public and available for download. The first contest to be posted is WPX SSB 2010 <http://www.cqwpx.com/publiclogs/2010ph/>. Read the WPX blog <http://www.cqwpx.com/blog/?p=74> for more information."

A listing of the preliminary results of the 2010 Stew Perry contest <http://web.jzap.com/k7rat/STEWSCR.TXT> is online with 630 logs submitted thus far. (Thanks, Stew Perry Contest Manager, Tree N6TR)

The results of the 2010 Ukrainian DX Contest <http://www.urdxc.org/results2010/results2010.htm> are now online. (Thanks and Happy New Year from Leon, UT7CL)

Marc ON7SS/OO9O has posted the 2010 UBA CW Contest results <http://www.uba.be/> online, as well. The Contest Certificate database is also up to date so you can download your certificate.

Like "shooting your age" in golf, Jack W1WEF reports, "In 2010, my 58th year as a ham, I set a goal to operate in 58 contests. RAEM wrapped it up!"

OPERATING TIP

In RTTY contests, do not use "cut numbers", such as 5NN. This requires an extra shift character to be sent, making your rate slower, unlike CW. Also note that if you receive a letter sequence where numerals are expected, the shift character was likely miscopied. The number represented by each letter is above and to the left of the letter key. For example, TOO is 599 without the shift. (Thanks, Dick W0RAA and Barry W2UP)

==> TECHNICAL TOPICS AND INFORMATION

The mail carrier brought me the February 2011 issue of "Sky and Telescope <http://www.skyandtelescope.com/>" and its theme is the ham's favorite star - the Sun. The lead story is on the giant solar storm of 1859 and what the effects of such as storm today might be. Plus, there are loads of solar photos and "Amateur Solar Radio Astronomy", a great article on how to listen to the Sun at wavelengths from 10 meters to 1 cm. If you do pick up an issue, be sure to flip to the back page's "Focal Point" on demonstrating astronomy - it might give you some ideas about putting ham radio in the public's eye, as well.

Speaking of solar flares, last May the Galaxy 15 communications satellite <http://tinyurl.com/2amezh4> had its "brains fried" (a technical term) by just such an event. Although still functional, its navigation and communications systems would not accept commands and the satellite drifted out of its orbit. On December 23, engineers at Intelsat were finally able to reset the satellite and it was put into safe mode. (From AMSAT <http://amsat.org/> bulletin ANS-002.07)

A pair of eham.net <http://eham.net> technical articles caught my eye and may give you some ideas, too. The first is for every little pistol's dream - a 40 meter beam. The article "Vertical Moxon for 40 Meters <http://www.eham.net/articles/25130>" by N8MUS describes hanging a vertical wire beam antenna under a KT34A tribander. The second article is a classic by one of the site's founders - "Fighting CC&R's: 20M 4-Square Array <http://www.eham.net/articles/25000>" by W4AN (SK). It shows how to make the best of a compromise situation and still have a useful and capable antenna system.

Everybody needs a miniature solder pot <http://www.qrpkits.com/files/MiniSolderPot.pdf> now and then and here is the Goldilocks version - it's "just right". (Thanks, Dan KI4YZE)

Successful RFI sleuthing often takes a bit of the deerstalker hat and meerschaum pipe as in these "The Case of..." RFI stories by ON4WW <http://www.on4ww.be/emi-rfi.html>. (Thanks, Tim K3LR)

I debated whether to put this video of a 190-foot tower going up <http://www.youtube.com/watch?v=eUWI38ocVTM> under Sights and Sounds, but as it provides some heavy-duty guidelines for heavy-duty towers, it's a Technical Tip. (Thanks, Craig K9CT)

David K1TTT writes to let us know, "I have just cut the prices on my 25th Anniversary edition of "Building a <http://stores.lulu.com/k1ttt> Super Station <http://stores.lulu.com/k1ttt>". The e-book download is now free, and the DVD and paper copies are $5 cheaper than before."

Instead of soldering aluminum wire, trying splicing as described by Tod, K0TO. "Wrap 5 turns of aluminum wire tightly around the second aluminum wire and wrap 5 turns of the second wire around the first wire about 3 inches away from the first splice wrap. The result is a very satisfactory splice between the wires." Tod recommends stainless steels fasteners to clamp the wires.

Technical Web Site of the Week - This week features a long list of web sites offering SDR kits for receivers and transceivers thanks to Ken K9VV. Enjoy!

==> CONVERSATION

>From Parallel to Series and Back Again

The recent discussions about single-operator categories in the NAQP and many other contests are a microcosm of the larger technological hurricane rearranging the wireless world and with it, Amateur Radio. Since the invention of the tuned amplifier, the radio spectrum has been envisioned as a "series circuit" so that one tunes through individual signals sequentially by frequency, just as current flows through the components of a series circuit.

Everything about the box called a "radio" supports this concept. Our frequency displays and dials assign a different value to each frequency, sometimes around a circle or across a scale. Stacks of increasingly narrow filters carefully select just a single signal out of all that are present. Incremental tuning, passband shift, high-cut, low-cut, notch, split - these are all devices to navigate us in the frequency-domain world. It's as if our radio world was a one-dimensional string that stretches from dc to light and beyond, with each station a separate bead on the string.

It's safe to say that nearly all contest operators learned to contest and developed their skills based on the series model of radio. Most of us are very heavily invested in that model. We pride ourselves on being able to tune from bead to bead quickly. In a dense region of beads, we can distinguish between them accurately and rapidly. We develop a sense of when to stay put or move along the string and of where more beads can be found. Similarly, nearly all contests are set up with the series model underlying their rules, categories, scoring, and awards. We are limited in how and where our bead can be placed. Information about the position and behavior of other beads is strictly limited.

With the advent of wideband signal processing software and the availability of hardware to make it feasible in amateur stations, the model is changing. Instead of a series spectrum, it is commonplace to view wide swaths of spectrum - and the signals in it - in parallel, all at once. The information in those signals is available all at once and to all. What was previously hidden in the series world is public in the parallel world. This is a seismic shift in the world of radiosport.

What happens to the series version of radiosport and of ham radio in general as radio changes from series to parallel? Is it necessary to possess the series skill set in order to excel in the parallel world? Or does the parallel world require a whole new and different set of skills that have no analog in the series environment. How can a series contester adapt to and excel in a parallel world? For many of us, this transition will be uncomfortable.

There is precedent elsewhere in the wireless community. Beginning over a decade ago, the cellular telephone industry began its changeover from the series format of FDMA (frequency-division, multiple-access) model of channels with separate frequencies. The new parallel model is based on CDMA (code-division, multiple-access) in which signals used the same spectrum simultaneously, but are differentiated based on coded patterns of behavior - i.e. spread-spectrum techniques.

Was all of the old FDMA knowledge obsolete? Not hardly. Much of the fundamental physical know-how required to create, modulate, transmit, receive, and demodulate RF signals is equally applicable to both worlds. Once the information has been recovered, the processes of handling and routing information are nearly independent of how the actual transmission and reception were performed.

So the transition is survivable - even though occasionally painful or disconcerting - if one can distinguish between the key principles that are meaningful in both worlds. It may mean moving beyond some of the hard-won skills of a different era, but if there are sufficient common elements we will be able to recognize the signposts and move confidently into the future.

The careful reader may have noted that the title of this column refers to a pair of transitions and begins with "parallel", not "series". I've only addressed the second transition so far, but I want to remind the readers that the original wireless environment was very

much a parallel world. Emissions from spark transmitters are wideband by nature and with the feeble selectivity of early receivers wireless technology was a thoroughly "spread spectrum" endeavor. Techniques such as rotary spark gaps performed rudimentary amplitude modulation, giving signals some individuality. Even an individual's "fist" served as a means of picking one signal out of the QRN and QRM. Every signal was in the mix of noise in the headphones.

With the widespread adoption of continuous wave came the transition to our modern series world and, yes, proponents of spark decried the change. But they found many of their techniques and skills to have meaning in the new world, too. While oiling the rotary's bearings was no longer of much use, the skill of putting up an effective aerial was just as important, if not more so for the new QRP CW transmitters. Translating to the present day, while our VFO tuning skills may atrophy with the advent of wideband SDR and DSP, it will still be just as important to know the most effective heights for a beam, how to deal with "rotten QRM", and keep our competitive butts in the operating chair. Plus, there will be new skills to learn.

The next challenge to address and the subject of the next issue's Conversation will be of where the operator stops and where the station begins. Technology is blurring that line as well, yet the question may yield if one can remember to shift focus between principle and gadget and back again.

73, Ward N0AX

==> CONTESTS

5 Jan to 18 Jan 2011

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

NS Weekly Sprint--CW, from Jan 7, 0230Z to Jan 7, 0300Z. Bands (MHz): 1.8-14. Frequencies: Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

070 PSKFest--Digital, from Jan 8, 0000Z to Jan 8, 2400Z. Bands (MHz): 3.5-28. Exchange: Call sign, RST, S/P/C . Logs due: Feb 8. Rules <http://www.podxs070.com/>

Hunting Lions In the Air--Phone,CW,Digital, from Jan 8, 0000Z to Jan 9, 2359Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or name, club name, district. Logs due: Feb 28. Rules <http://lionshuntingintheair.lionwap.org/>

WW Peace Messenger Cities--Phone,CW, from Jan 8, 1200Z to Jan 9, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and PMC ref number or CQ zone. Logs due: 30 days. Rules <http://www.s59dcd.si/>

ARRL RTTY Roundup--Digital, from Jan 8, 1800Z to Jan 9, 2400Z. Bands (MHz): 3.5-28. Exchange: RST, state/province/serial. Logs due: Feb 1. Rules <http://www.arrl.org/contests>

North American QSO Party--CW, from Jan 8, 1800Z to Jan 9, 0600Z. Bands (MHz): 1.8-28. Exchange: Name and S/P/C. Logs due: 14 days. Rules <http://www.ncjweb.com/naqprules.php>

EUCW 160 Meter Contest--CW, from Jan 8, 2000Z to Jan 8, 2300Z and Jan 9, 0400Z to Jan 9, 0700Z. Bands (MHz): 1.8. Frequencies: Multiple operating periods. Exchange: RST, serial, club name, member nr or "NR". Logs due: Feb 15. Rules <http://www.uft.net/>

DARC 10 Meter Contest--Phone,CW, from Jan 9, 0900Z to Jan 9, 1059Z. Bands (MHz): 28. Exchange: RS(T), serial, DOK code. Logs due: 3 weeks. Rules <http://www.darc.de/referate/dx/fedcz.htm>

Midwinter QSO Party--Phone,CW, from Jan 9, 1000Z to Jan 9, 1400Z. Bands (MHz): 3.5-28. Exchange: RS(T) and serial. Logs due: Feb 15. Rules <http://trafficbureau.veron.nl/>

CWops Mini-CWT Test--CW, from Jan 12, 1100Z to Jan 13, 0400Z, Monthly on the second Wednesday, multiple operating periods - see Web site. Bands (MHz): 3.5-14. Frequencies:, 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Linc Cundall Memorial CW Contest--CW, from Jan 12, 2300Z to Jan 13, 2300Z and Jan 15, 2300Z to Jan 16, 2300Z. Bands (MHz): 1.8-7. Multiple operating periods. Exchange: See Web site. Logs due: 30 days. Rules <http://www.antiquewireless.org/hamevents2010.htm>

LZ Open Contest--CW, from Jan 15, 0000Z to Jan 15, 0400Z. Bands (MHz): 3.5, 7. Exchange: 6-digit serial and serial from previous QSO. Logs due: 30 days. Rules <http://www.lzopen.com/>

International United Teenager Contest--Phone,CW, from Jan 15, 0600Z to Jan 15, 1400Z. Bands (MHz): 3.5-28, 144/432/1.2G. Exchange: RS(T) and age or "RT". Logs due: 30 days. Rules <http://www.qrz.ru/contest/detail/140.html>

UK DX RTTY Contest--Digital, from Jan 15, 1200Z to Jan 16, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: 30 days. Rules <http://www.ukdx.srars.org/>

HA DX Contest--Phone,CW, from Jan 15, 1200Z to Jan 16, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and serial. Logs due: 30 days. Rules <http://www.ha-dx.com/>

Feld-Hell Gridloc Sprint--Digital, from Jan 15, 1600Z to Jan 15, 1800Z. Bands (MHz): 1.8-28. Frequencies: Monthly on 3rd Saturday. Exchange:

RST, QTH, Feld-Hell number. Rules <http://www.feldhellclub.org/>

North American QSO Party--Phone, from Jan 15, 1800Z to Jan 16, 0600Z.
Bands (MHz): 1.8-28. Exchange: Name and S/P/C. Logs due: 14 days. Rules
<http://www.ncjweb.com/naqprules.php>

VHF+ CONTESTS

International United Teenager Contest--Phone,CW, from Jan 15, 0600Z to
Jan 15, 1400Z. Bands (MHz): 3.5-28, 144/432/1.2G. Exchange: RS(T) and
age or "RT". Logs due: 30 days. Rules
<http://www.qrz.ru/contest/detail/140.html>

11. gpredict (linux) + FT-817

Newsgroup: rec.radio.amateur.misc
Date: 2011-01-05 13:20:58 UTC
From: Kris_gor <kris_gor@poczta.onet.pl>
Message-ID: <4d247039$0$2500$65785112@news.neostrada.pl>
Source record: 5051

Hello!

I have a little problem with config gpredict(ver: 1.2) and FT-817.
I have set PTT in gpredict as AUTO.

Example:
Downlink: 70cm band
Uplink: 2m band

$ rigctld -m 120 -r /dev/ttyUSB0 -s 9600 -P RIG -vvvv

What's more, I realise that radio in RX mode switches about every 10
seconds to PA for a while (just a fraction of a second) and at the same
time it switches mode from FM to LSB.

73!!

12. 4000 Solutions manual to Mechanics, Mechanical Engineering and Aerospace Engineering Books

Newsgroup: rec.radio.amateur.misc
Date: 2011-01-06 20:40:59 UTC

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=IQCRN2AV

I do not review the forums, just send me an email.

==> + BPL: ARRL SHOWS IBEC BPL SYSTEMS ARE INTERFERING, VIOLATING FCC
RULES

Late last month, the ARRL filed a complaint with the FCC, documenting
ongoing harmful interference and egregious rules violations by
Broadband over Power Lines (BPL) systems installed by IBEC, Inc. in
Virginia, Pennsylvania and Indiana. In its filing, the ARRL requested
that the FCC "initiate immediately an enforcement proceeding regarding
these BPL systems, and cause them to cease operation until such time as
they are each in full compliance with the Commission's Rules."

Contrary to earlier representations -- both to the ARRL and in
statements in the online BPL database -- IBEC's systems in these
```

locations are not universally notching the amateur bands as is
necessary in order to avoid emissions at levels that are likely to
cause harmful interference to licensed Amateur Radio stations. In fact,
measurements by ARRL staff that were independently confirmed show that
IBEC systems are not even notching the aeronautical bands. The FCC
rules require BPL systems to avoid these bands, but IBEC is operating
at power levels that cause radiation well in excess of the FCC limits.

ng-fcc-rules>.

==> + ON-THE AIR: ARRL AUDIO NEWS ONCE AGAIN AVAILABLE FROM ITUNES

The ARRL Audio News is once again available through iTunes,
beginning today. You can find the URL for the Audio News' RSS feed here
<http://www.arrl.org/arrlletter/audio/aan.rss>. To download and
subscribe to the Audio News at iTunes, log into your iTunes account and
go to the "Advanced" pull-down menu. Click on "Subscribe to Podcast,"
insert http://www.arrl.org/arrlletter/audio/aan.rss in the dialogue box
and click "OK." You are now subscribed! If you had previously
subscribed to the ARRL Audio News via iTunes, you should not have to
re-do these steps; episodes should appear in your podcast folder once
you sync your device. Step-by-step photo instructions are available
here
<http://www.arrl.org/news/em-arrl-audio-news-em-once-again-available-from-itu
nes>.

Of course, the ARRL Audio News is also available on the ARRL Web site
<http://www.arrl.org/arrl-audio-news> and via telephone at
860-594-0384. The ARRL Audio News is compiled, edited and produced in
conjunction with each ARRL Letter (except during the Dayton Hamvention,
Thanksgiving and other times as announced).

==> ON-THE AIR: THE KING OF DIGITAL CONTESTING IS HERE!

Start 2011 with one of the most enjoyable contests on the calendar
-- the ARRL RTTY Roundup, January 8 and 9. The goal is simple: make as
many contacts -- and multipliers -- as possible! While any digital mode
can be used in during the Roundup (including PSK31), radio teletype --
better known as RTTY -- is the undisputed king of this event. You won't
need to shout into a microphone or master high-speed CW to participate.
If you can type -- even slowly -- on a computer keyboard, you're more
than qualified to try the RTTY Roundup. Read more here
<http://www.arrl.org/news/the-king-of-digital-contesting-is-here>.

==> + AMATEUR RADIO IN WASHINGTON: US REP GREG WALDEN, W7EQI, TWEETS
NEWS OF NEW SUBCOMMITTEE CHAIRMANSHIP

When US Representative Greg Walden, W7EQI (R-OR), learned December
16 that he would be chairing the House Subcommittee on Communications,
Technology and the Internet when the 112th Congress convened in
January, he let the world know about it by tweeting the news in Morse

code. "Just the ham radio operator in me having fun," he posted to his official Web page. The subcommittee has jurisdiction over "interstate and foreign telecommunications including, but not limited to all telecommunication and information transmission by broadcast, radio, wire, microwave, satellite or other mode."

ARRL Chief Executive Officer David Sumner, K1ZZ, was pleased to hear the news: "We're delighted that the subcommittee is in the hands of such a well-qualified chairman. Greg was an early cosponsor of HR2160 <http://www.arrl.org/hr2160>, and while he may not always be able to agree with every ARRL position, we know his door will always be open to us."

==> + GET READY FOR THE FEBRUARY ISSUE OF QST!

The February issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a look at the upcoming launch of ARISSat-1-- this issue of QST has something for just about everyone.

After years of planning, the next generation of satellites to be launched from the International Space Station is getting ready to be sent off into space. Go behind the scenes -- and discover how you, too, can get in on the fun -- as AMSAT and the Amateur Radio on the International Space Station (ARISS) program team up in "Get Ready for ARISSat-1." And if space is indeed the "final frontier," a Mid-Eastern desert is probably a close second. Join David Collingham, K3LP, and Paul Ewing, N6PSE, as they recount their DXpedition to Kurdistan in Northern Iraq in "YI9PSE Iraq 2010 -- An Extreme Venture."

Lou Burke, W7JI, wanted to add a receiver on to the QRP transmitter project he had built. He wanted the receiver to be housed in the same enclosure and to work with the transmitter in a transceiver-like mode, but still have the ability to stand alone as a separate receiver. In his article "A Compact 40 Meter Receiver," Burke says that there is nothing like the feeling you get from making a QSO with a rig that you built yourself.

ARRL Field and Regulatory Correspondent Chuck Skolaut, K0BOG, takes a look at the Ten-Tec R4020 two band CW QRP transceiver in this month's Product Review. He calls it a "transceiver with a variety of convenience features. It can operate from internal batteries, so add a paddle, headphones and antenna and head for your favorite trail location." QST Contributing Editor Phil Salas, AD5X, checks out the Mini-Circuits PWR-6GHS+ USB power sensor. He says that it is "a reasonably priced, highly accurate, very broad range power meter that is equally useful in a commercial lab or home experimenter's workshop." QST Technical Editor Joel Hallas, W1ZR, reviews the Array Solutions AS-43A digital upgrade kit for the Bird 43 wattmeter. He says this kit "provides a three digit digital readout for your tired old Bird wattmeter. While the accuracy is limited by the wattmeter slugs, a calibration adjustment is described that can improve accuracy."

Of course, there are the usual columns you know and expect in the February QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio and more. Look for your February issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of December -- looks at the ARRL confronting the FCC over BPL matters, a possible new secondary MF allocation, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-29>.

==> + FCC NEWS: FCC CITES RETAILER FOR MARKETING CB RADIOS AS AMATEUR RADIOS

In October 2010, an agent from the FCC's Enforcement Office visited Monroe, Michigan-based Doctor Radio's CB Shop to find that the store was selling, among other items, a radio that was described as "an Amateur Radio that could operate on CB frequencies" that was modified to operate above the approved power limits. As such, the FCC issued a Citation to the store on January 4 for marketing unauthorized radio frequency devices in the United States in violation of Section 302(b) of the Communications Act and Section 2.803(a)(1) of the Commission's rules. Read more here <http://www.arrl.org/news/fcc-cites-retailer-for-marketing-amateur-radios-as-cb-radios>.

==> + GENERAL MOTORS TURNS TO HAM TO SOLVE ANTENNA PROBLEM

<http://reviews.cnet.com/8301-13746_7-20026067-48.html> When General Motors -- the world's second largest auto maker -- encountered a problem with the AM/FM antenna on its 2011 Chevrolet Camaro convertible, it was at a loss as to what to do. Spy photographs showed a pre-production version of the car with a long whip-style antenna on its rear fender. After what GM called "an outcry among Camaro enthusiasts," the company decided to rethink the antenna. But how?

On hardtop Camaros, the antenna is integrated into the rear windshield, but given the disappearing nature of this car's roof, that wasn't possible on the convertible. So GM turned to two antenna engineers -- Don Hibbard, W8DBH, and Gregg Kittinger -- who were tasked with doing what some thought was impossible: concealing the AM/FM antenna without sacrificing radio reception, while not putting it inside the Camaro's windows. Read more here <http://www.arrl.org/news/general-motors-turns-to-ham-radio-to-solve-antenna-problem>.

==> YASME FOUNDATION ANNOUNCES 2010 YASME EXCELLENCE AWARD RECIPIENTS

The Yasme Excellence Awards are given to individuals who through
their own service, creativity, effort and dedication, have made a
significant contribution to Amateur Radio. Their contribution may be in
recognition of technical, operating or organizational achievement. The
Yasme Foundation has recognized the following individuals "in order to
inspire them and others on behalf of Amateur Radio now and in the
future." Read more here
<http://www.arrl.org/news/yasme-foundation-announces-2010-yasme-excellence-aw
ard-recipients>.

==> + NEW SECTION MANAGER APPOINTED IN ALABAMA

David Drummond, W4MD, of Northport, Alabama has been appointed Alabama
Section Manager effective January 1, 2011. In December, Jay Isbell,
KA4KUN, -- who had served as Section Manager since January 2008 --
resigned due to health related reasons. ARRL Membership and Volunteer
Programs Manager Dave Patton, NN1N, made the appointment in
consultation with Southeastern Division Director Greg Sarratt, W4OZK.
Drummond has served as Alabama Assistant Section Manager since January
2008. He will complete the current Section Manager term that continues
through December 31, 2011.

==> SOLAR UPDATE

Tad "Shining snow crystals rainbowed by the Sun
<http://classiclit.about.com/library/bl-etexts/alowell/bl-alowell-winter.htm>
"
Cook, K7RA, reports: The average daily sunspot numbers were up nearly
24 points this week to 50, while the average daily solar flux rose more
than 9 points to 89.5. The lagging three month average of daily sunspot
numbers was down 3.5 points from last month's average of the previous
three months. The three month moving average of daily sunspot numbers
--ending on June through December -- was 16.2, 20.4, 23.2, 28.9, 33,
35.6 and 32.1. The latest forecast from NOAA/USAF for the next 10 days
has a solar flux of 88 on January 6-7, 86 on January 8-9, 84 on January
10, 82 on January 11 and 80 on January 12-15. Planetary A index is
predicted at 7 on January 6-7, 10 on January 8-10, 7 on January 11 and
5 on January 12-15. There is a chance of a stiff solar wind and
geomagnetic storms on January 7-8. Yekta Gursel, KJ6DRO, alerted us to
an article in the February 2011 issue of Sky & Telescope titled "The
Perfect Solar Superstorm." You can read most of it here
<http://www.nxtbook.com/nxtbooks/newtrack/st_201102/#/28>; click on
"Preview" if you are not a subscriber. Your local library may also
provide online access to the magazine. The article begins on page 28.
Look for more information on the ARRL Web site on Friday, January 7.
For more information concerning radio propagation, visit the ARRL
Technical Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" is brought to you by Amy Lowell's A Winter Ride
<http://classiclit.about.com/library/bl-etexts/alowell/bl-alowell-winter.htm>
.

==> ARRL RECOGNIZES: ERIC NICHOLS, KL7AJ, WINS DECEMBER QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for December is Eric Nichols, KL7AJ, for his article "Gimme an X, Gimme an O. What's that Spell? -- Radio." Congratulations Eric! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the January issue today.

==> SILENT KEY: FORMER ARRL CANADIAN DIRECTOR GEORGE SPENCER, VE3AGS (SK)

A. George Spencer, VE3AGS, passed away December 21, 2010. He was 90. Spencer served as ARRL Canadian Division Vice Director from January 1970-January 1974. In 1974 -- upon the election of Canadian Director Noel Eaton, VE3CJ, as ARRL Vice President -- Spencer moved up to the Director position and served one term. An engineer by training and profession, Spencer lived all across Canada. While on the ARRL Board of Directors, he was VE2MS and then VE4IM; he later became VE6AW before moving to Ontario and obtaining his initials.

==> + SILENT KEY: AMERICA'S OLDEST SCOUTER, WOODY WOODWARD, W7KOP (SK)

Leonard Andrew "Woody" Woodward, W7KOP, of Mapleton, Utah, passed away December 25, 2010. He was 99. Woodward -- who, according to the Boy Scouts of America, was the "longest continuously registered Scouter" -- was involved with scouting for more than 87 years. BSA's Utah National Parks Council Program Director John Gailey called Woodward "an amazing man" and told the ARRL that his friend was still "very much active on the air weeks before his death." At the age of 8 in 1918, Woodward built his own radio. At the time of his death, he was using the Internet to connect Amateur Radio operators around the world. Woodward was known all over the world as an unofficial ambassador of America and Scouting through his radio contacts. Read more here <http://www.arrl.org/news/america-s-oldest-scouter-woody-woodward-w7kop-sk>.

==> THIS WEEK ON THE RADIO

This week:

- January 7 -- NCCC Sprint Ladder
- January 8 -- Midwinter Contest (CW)
- January 8-9 -- ARRL RTTY Roundup <http://www.arrl.org/rtty-roundup>; North American QSO Party (CW); Michigan QRP January (CW); Contest Hunting Lions in the Air Contest; EUCW 160 Meter Contest; WW PMC Contest
- January 9 -- NRAU-Baltic Contest (CW); Midwinter Contest (Phone); NRAU-Baltic Contest (SSB)
- January 12-13 -- CWops Mini-CWT Test

Next week:

- January 14 -- NCCC Sprint Ladder
- January 15 -- LZ Open Contest, Feld Hell Sprint
- January 15-16 -- North American QSO Party (SSB), Hungarian DX
Contest, UK DX Contest (RTTY)
- January 17 -- Run for the Bacon QRP Contest
- January 20 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 8, 2011 -- ARRL Delta Division Convention
<http://www.selarc.org/selarchamfest.htm>, Hammond, Louisiana
- January 9, 2011 -- ARRL New York-Long Island Section Convention
<http://www.hamradiouniversity.org/>, Bethpage, New York
- January 15, 2011 -- ARRL Southern Florida Section Convention
<http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida
- January 28-29, 2011 -- ARRL Mississippi State Convention
<http://www.msham.org/hamfest.php>, Jackson, Mississippi

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1743 - January 7 2011

Amateur Radio Newsline report number 1743 with a release date of
Friday, January 7, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in Missouri face a series of killer
tornados while their counterparts in Australia go on alert as massive
rains hit Queensland state. Also, the South African Radio League
prepares to ask that nations telecommunications regulators to expand
160 meters, researchers say that cubersecurity is really the new civil
defense and Russia announces plans to take the Internet into space.
Find out the details on Amateur Radio Newsline(tm) report number 1743
coming your way right now.

RESCUE RADIO: MISSOURI SKYWARN HAMS CALLED OUT AS TWISTERS HIT REGION

Ham radio first responders' associated with SKYWARN were called out as
killer storms swept across Southwest Missouri just before New Years.
David Black, KB4KCH, is in our South-East Bureau with the details:

--

For amateur radio operators in Missouri, the end of 2010 was anything
but quiet. Killer storms roared across southwestern parts of the state
December 30th and 31st. Two of the twisters were rated as EF-3s. 3
people were killed in Missouri, with three more deaths reported in
Arkansas.

Rod Kittleman, K0ADI, is the ARRL's Information Officer in Southwestern
Missouri. He says hams monitored the storms including supercell
thunderstorms as they moved from Arkansas, across the state line,
leaving extensive damage:

--

K0ADI: "We had storm spotters from our SKYWARN group out all the way
from Chhristian County ARES, Green County, Texas County, etc. Pretty
much (observing) as the storms tracked along through Arkansas through
Missouri, we had each of the ARES groups in the individual counties who
where continuing to track the storms and relay the information to the
National Weather Service.

"We had spotters that were out, chasing the storm and watching the stor. A very, very active bunch of people."

--

For at least 14 hours, radio amateurs stayed active, tracking storms and reporting on their progress to National Weather Service forecasters in Springfield. Kittleman says the storms hit with bad timing, which teaches hams a valuable lesson:

--

K0ADI: " You always have to be prepared because you never know whats going to happen. The bad thing about this storm is that it happened on a holiday when a lot of people are not thinking about these kind of storms. They are out doing their holiday activities

"Everybody needs to be prepared for all times in all seasons, but this shows that ham radio operators are always prepared all season long."

--

Despite the large amount of territory affected, Kittleman says Skywarn and ARES groups coordinated efforts closely. That resulted in an active flow of real time information on the storms and the damage they were causing:

--

K0ADI: "I was actually n the air about 7:30 in the morning and tracked one tornado that went from the Missouri -Arkansas border all the way up to the Ft. Leonardwood wild area. That was the one that ended up killing a couple of people up there."

--

The various amateur radio teams are being praised for their efforts to keep the community safe. Weather Service Forecasters say they were impressed at the amount of response and support hams in the state gave when it was so badly needed.

>From the Southeast Bureau in Birmingam, Alabama, I'm David Black, KB4KCH, for The Amateur Radio Newsline.

--

In all, At least 5 tornadoes, 2 of which produced fatalities and numerous severe thunderstorms pounded the Missouri Ozarks for over 14 hours on December 30th into New Years Eve.

(N0UAM, K0ADI, others)

**

RESCUE RADIO: VK HAMS RESPOND TO QUEENSLAND FLOODING

Massive flooding in Australia's Queensland state puts that nations corps of ham radio volunteers on alert. Les Unwin, VK4VIL, is in the city of Rockhampton with the latest:

--

Following widespread rains over the past several weeks, Queensland's Fitzroy River is currently in full flood, with water inundating towns on its movement downstream. The Fitzroy basin, covering some 53,000 square kilometers is Australia's second largest river system.

After completely drowning some towns such as Theodore in its more western tributaries, then devastating the larger town of Emerald of 12,000 people, Rockhampton, population 75000, is now facing what could be its second largest flood in recorded history. The city is already totally isolated with airport, all feeder highways and rail links underwater . Sadly, several lives have been lost as a result of flood related incidents.

Rockhampton and District Amateur Radio Club President, Jack Chomley VK4JRC has a good number of club members on standby and registered with State Emergency Service and the Disaster Management Committee , with suitable equipment available for activation if the situation worsens, for relief of emergency workers or particularly in the case of power failure. Fortunately, amateur radio operators contacted in upstream areas have also not been called upon for assistance at this time.

The River is expected to take several weeks to return to its normal level.

For the Amateur Radio Newsline, I'm Les Unwin, VK4VIL, in Rochhampton.
--

Expect more on this rescue radio effort in upcoming Amateur Radio Newsline reports. (WIA News)

**

ENFORCEMENT: ALLEGED HONEYBEE SHOOTER WAS A HAM

The ham believed to be the so called possible 'honeybee' shooter is dead. Gary Amaya, 48, KC9AWD, was shot with his own gun while apparently trying to rob an Orland Park, Illinois, tanning salon on Saturday, December 11th.

Last October, three men were shot, one fatally, near the Illinois-Indiana border. The shootings appeared entirely random. One victim, a farmer, had a conversation with the shooter about honeybees before he was shot, earning the killer his nickname of the honeybee shooter.

Two months later, Gary Amaya was allegedly robbing an L.A. Tan location at gunpoint when a customer, Jason McDaniel, came through the door. McDaniel disarmed Amaya, and ultimately shot him twice, killing him.

Shortly after Amaya was killed, police released survailence video. The tape shows Amaya, clad in black, having bound the attendant behind the counter. McDaniel enters the store, and is brought behind the counter. At one point, Amaya, having set the gun down, bends over, and McDaniel seizes his opportunity, rushing forward to strike Amaya and grab the gun. The two men then move into a hallway just out of the frame, where apparently Amaya lunges at McDaniel. A shot goes off in the ensuing struggle, Amaya appears dazed but still a threat. Then McDaniel shoots him in the stomach.

According to an unnamed family friend, Amaya showed no earlier signs of violence. But something apparently changed in the man from tiny downstate Rankin, Illinois this past summer after helost his job at a Milford trucking company. By October, when the "honeybee" shootings started, Amaya had cut off ties with even his closest friends. (WB9QZB, Chicago Tribune OnLine, Morris Daily Herald, CNN, other sources)

**

RESTRUCTURING: SARL PREPARING DOCUMENTATION TO INCREASE 160 METRE ALLOCATION

The South African Radio League is preparing documentation to gain access to additional spectrum on the 160 meter band for amateur communication in that nation.

South African radio amateurs are invited to make input by sending their views as to why it is necessary to expand the very narrow allocation currently available. Responders are asked to include items such as propagation studies and of what benefit an expanded 160 meter allocation will be.

South African hams should send the information to zs6akv (at) sarl (dot) org (dot) za by end January. The South African Radio League proposal will be presented at the next SARL and the Independent Communications Authority of South Africa liaison meeting planned for February of 2011. (SARL)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W9BBK repeater serving Bollingbrook, Illinois.

(5 sec pause here)

**

ENFORCEMENT NEEDED: RESEARCHERS CALL CYBERSECURITY THE NEW CIVIL DEFENSE

A pair of University of Cincinnati researchers says the nation's cybersecurity is being threatened because an important element in

establishing it is not being emphasized enough. That of citizen awareness and participation. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has more:

--

In equating today's citizen role in cybersecurity to the Civil Defense efforts developed at the advent of the era of atomic weapons, Political Science faculty members Richard Harknett and James Stever argue that an active role for citizenry participation in security efforts is largely being overlooked.

They make their case in a new paper published in the "Journal of Homeland Security and Emergency Management." Harknett and Stever argue that a three-pronged approach to cybersecurity is necessary. They note that ideas of coordination within government agencies and also between government and business interests surface in almost every discussion on the topic, but engagement with the public about the role they can play in cybersecurity rarely gets mentioned.

The two researchers say that the general population must be engaged as active security providers, not simply beneficiaries of security policy. This is because their practices often create the threats to which government must respond. As an example, they cite the hijacking last July of up to 50,000 computers for use in a botnet denial-of-service attack on Web sites operated by the U.S. and South Korean governments.

For the Amateur Radio Newsline, I'm Bill Pasrternak, WA6ITF, in Los Angeles.

--

Currently, the government is in a period of re-examining policy towards cybersecurity. The New York Times recently published an extensive story examining U.S. deficiencies in policy towards cyber attacks, and a new study of 600 computer and computer-security executives showed high levels of concern that cyber attacks at any time could compromise our nations energy and communication sectors. (University of Cincinnati via Science Daily)

**

ENFORCEMENT: FCC CITES MICHIGAN BUSINESS FOR SELLING UNAUTHORIZED CB SETS

The FCC has issued an Official Citation to to Doctor Radio's CB Shop of Monroe, Michigan. This for marketing unauthorized radio frequency devices in the United States in violation of Section 302(b) of the Communications Act, and Section 2.803(a)(1) of the Commission's rules. The devices are identified as high power CB radios that could operatr outside of bthe 11 meter Class D Citizens Radio B and.

By way of background, on October 20, 2010, an agent from the Enforcement Bureau's Detroit Office visited the Doctor Radio. At that

time he observed that the store offered for sale the Cobra Sound Tracker and the Cobra 150 GTL DX. A store employee explained to the agent that the Cobra Sound Tracker was modified to operate with 170 watts of power. The store employee further explained that the Cobra 150 GTL DX was an amateur radio that could operate on CB frequencies. Under current FCC Rules, both of these radios are illegal to sell in the United States.

The Citation warns Doctor Radio's CB Shop that if, after receipt of the Citation, that it violates the Communications Act or the Rules by engaging in such sales that the Commission may impose monetary forfeitures of up to $16,000 for each such violation or each day of a continuing violation and up to $112,500 for any single act or failure to act. In addition, violations of the Communications Act or the Rules can result in seizure of equipment through forfeiture actions, as well as criminal sanctions, including imprisonment.

Doctor Radio's CB Shop was given thirty days after the January 5th release date of the Citation to reply either through a personal interview at the closest FCC office, or through a written statement. Any written statements must specify what actions have been taken by Doctor Radio to ensure that it does not violate the Rules governing the marketing of radio frequency devices in the future. (FCC)

NAMES IN THE NEWS: 2011 NEW ZEALIND DX HALL OF FAME INDUCTEES

John N. Shaw, ZL1BYZ, Bryan Anderson, ZL2AFT, and the late Peter W. Watson. ZL3GQ, have been selected asv the 2011 honorees have beem selected for iunduction into the New Zealand DX Hall of Fame. Each was choen based on his dedication to ham radio and the furthering of the art of DX operation.

The New Zealand DX Hall of Fame was established in 2009 to honor those outstanding ZL DXers and contesters who have excelled in the radio sport aspect hobby over many years. The current panel of judges includes Ken McCormack, ZL1AIH, Duncan McMahon, ZL3JT and Bill Carney, ZL3NB. (ZL2AL)

**

THE SOCIAL SCENE: HAMVENTION AWARDS NOMINATING PERIOD ENDS JANUARY 15th

And a reminder that the deadline for Hamvention award nominations is getting close. The Hamvention now sponsors four annual awards. These are the Technical Excellence, Special Achievement and Radio Amateur of the Year Awards. And as the special Radio Club of the Year was such a big success in 2010, that Hamvention planners have decided to make it a permanent addition to the Hamvention Awards program.

If you know of a radio amateur or a club deserving of recognition please submit your nomination. Further information and nomination forms can be found on-line at www.Hamvention.com in the awards section. To be considered for any award the nominations must be submitted no later than January 15, 2011. Nominations go by mail to Hamvention Awards, Post Office Box 964, Dayton, Ohio, 45401.

Again, the cutoff date to submit nominations is January 15th which is less than a week away. (Hamvention)

**

WITH NEWSLINE: RADIO SCOOTER INTERNATIONAL TO AIR ARNEWSLINET

Some good news for those hams who have been asking if any Internet radio stations retransmit these weekly Amateur Radio Newsline reports. Well Bill Bergadano, KA2EMZ, reports that his station known as Radio Scooter International began carrying Amateur Radio Newsline on January 9th.

According to Bergadano, Amateur Radio Newsline airs at 03:00 U-T-C on Mondays. That translates into 7:30PM Eastern and 4:30PM Pacific Time.

To listen go to www dot radioscooterinternational dot net. Then click the antenna and then the play button on the next page.

Bergadano tells Newsline that Radio Scooter International has been on the air since 2005, and, has been heard in over 80 countries. (KA2EMZ)

**

WITH NEWSLINE: PODCAST ADDRESS CHANGE

And a follow-up to last weeks report that some listeners with the latest iPods cannot get Amateur Radio Newsline to play on their 4th generation devices. We have received several listener responses with possible answers, but Kevin Trotman, N5PRE, who sponsors the Podcast thinks he has the best solution. Kevin has moved the Podcast file to a new server at http://n5pre.squarespace.com/arnewsline. He says that the new server should better serve listener needs. A live link to it in bright green is now at our website at www dot arnewsline dot org. If you are one of those suffering from the problem, please let us know if this fix helps you. Also, keep in mind that this is a direct link and not the same as available though the Apple iTunes on line store. (ARNewsline(tm) and N5PRE)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

SWL CORNER: THREE DX TESTS SET FOR FEBRUARY

If you are an SWL or a ham with a good Medium Wave receiver, listen up. On Saturday February 12th, at precisely oh-seven hundred and oh-eight-hundred U-T-C, radio station KHMO 1070 Kilohertz in Hannibal, Missouri, will conduct a DX test for SWL's worldwide. The test will be with Morse code, sweep tones, and voice announcements for five-minutes at the top of the first hour with its five-kilowatt, three-tower, day pattern, and then five-minutes at the top of the second hour at its one-kilowatt, six-tower, nighttime power.

Also on February 12th, from oh-nine hundred to oh-ten-hundred U-T-C, WLIQ 1530 Kilohertz in Quincy Illinois will conduct a DX test of its own WLIQ will test for twenty minutes using Morse code, sweep tones, voice announcement, special music, sound bites and the like at its fourteen-hundred watts, non-directional, day power. Then WLIQ will test for twenty minutes at two-hundred-ninety watts non-directional, critical hours power. Finally, for the last twenty minutes of the hour, they will test at three watts, non-directional, night power. That's right, we said three watts which is almost miuceo power on the AM broadcast band..

The third, and last test is on Saturday, February 19th. This one will be will be from oh-seven-hundred to oh-eight-hundred U-T-C from WLRB 1510 Kilohertz from Macomb Illinois. The WLRB test for the first thirty-minutes will use Morse code, sweep tones, voice announcement, special music, sound bites at one-kilowatt, non-directional, day power. For the second half of the test, the content will be the same but the

power will be reduced to two-hundred-fifty watts, non-directional for its critical hours power.

If you would like to receive a Q-S-L, you can send a written report, or a cassette or CD to the Chief Engineer of these stations by following the rules and sending reports the following address: Gary Glaenzer, c/o (Put the name of the station whose DX test your are reporting on the next line), 325 East Douglas Avenue, Jacksonville, Illinois 62650.

Tapes or CDs will be accepted along with written reports but must be cued up to the point of where the best reception is. If sending in a report by mail, you must include a return, self addressed, stamped envelope if you expect to get back a QSL or any reply.

The reports are being sent to the engineers home address, not the station. So please be patient, as Mr. Glaenzer is the Chief Engineer for 16 radio stations in Missouri and Illinois. E-QSLs are available. Send them to the engineer at glaenzer (at) frontier dot com with both the station call letters and the words "DX test" in the subject line. (W8HDU)

HAM RADIO IN SPACE: TMA-20 LAUNCH VIDEO NOW ON LINE

Video of the spectacular night launch of the Soyuz TMA-20 spacecraft can be sewen on-line at tinyurl.com/2gx5hqd. The TMA-20 launch carried Expedition 26 crew members NASA astronaut Cady Coleman, Russian cosmonaut Dmitry Kondratyev, and European Space Agency astronaut Paolo Nespoli. IZ0JPA to the International Space Station.

This is Nespoliu's second trip into space. In June of 2006, IZ0JPA was assigned to the Space Shuttle mission STS-120, which is dedicated to the build-up of the International Space Station. (UniverseToday.com, ARNewsline.orgT)

**

HAM RADIO IN SPACE: HOW TO WORK SATELLITES WITH YOUR HT

Clint Bradford, K6LCS, of Mira Loma California, has published an updated copy of the "How to Work Ham Satellites With Your HT" tutorial. Its posted on-line at www dot work dash sat dot com. (ANS)

**

ON THE AIR: CELEBRATING FRANZ LISZT

A group of Hungarian radio amateurs from J noshalma will use the special callsign HG200LST between January 1st and December 31st. This activity is to celebrate the 200th anniversary of the birth of composer and virtuoso pianist Franz Liszt QSL this operation via HA5GY. (DX OnLine)

**

HAM DX HELP WANTED: DX'ERS SOUGHT FOR LUXIUARY FILI OPERATION

VK4AN, OZ1IKY and possibly others are planning a major operation as 3D2A to Fiji between March 15th and April 2nd and are currently looking for experienced DXers to join them during this operation. They state that their activities will be from Nadi in a 3 story 2 bedroom luxury air conditioned apartment with roof top antennas including a full-size 160 meter Inverted Vee or delta-loop, Spiderbeam, DX-88 and other antennas. Activity will be on 160 through 6 meters but concentrating on the lower bands. If you would like to join their team, contact Eddie, VK4AN, at vk4an at wia dot org dot au. More details on this upcoming ham radio luxiary adventure are available at pacific-dxers dot com. (OPDX)

**

DX

In DX, word that HA3AUI is shortly heading back to Western Africa. Look for him to be active as 6W2SC from Senegal and J5UAP from Guinea-Bissau between February 1st and March 31st. His activity will be on 160 through 10 meters, mainly on CW and the digital modes. QSL direct via HA3AUI.

VO1AU will be active stroke 9M6 from, East Malaysia between March 2nd and the 15th. His operation will include the Commonwealth and ARRL DX SSB Contests. QSL via VO1MX.

DC9TH is now on the air as 8Q7TH from Baa Atoll in the Maldives. He's reporetedly been heard on 20 meter SSB. If you work him, please QSL to his home callsign.

EI8CC, the former Honorary Secretary of the Irish Radio Transmitting Societyt and new Irish ambassador to Lesotho will soon be on the air from that nation on CW and SSB as 7P8CC. The final items of his station have been shipped so expect to hear him on the air from Lesotho in the not to distant future.

Lastly, ZS6TQ is now active as 9Q0HQ/6 from the Republic of the Congo. His operation is primerally on weekends and during the week after 1800 UTC. Listen out for him on 40through 6 meters using CW, SSB and PSK31. QSL via K3IRV.

(Above from various DX ,news sources)

**

THAT FINAL ITEM: RUSSIA TO TAKE THE INTERNET INTO SPACE

And finally this week, Russian engineers have started drawing up a plans to take the Internet into space. They say that their new Kosmonet project and its implementation will provide an opportunity for Runet users to enter the Internet in a whole new way. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

The developers of the system say that rapid access to the Internet is only part of the task set before the Kosmonet. They give priority to guaranteeing communications between spacecraft and establishing control over Russian orbited flying objects from any point on the Earth and stable communications with remote regions of Russia.

Vitaly Davydov is the deputy head of the Russian space agency. He says that such a communication system is crucial for the north and in the Polar Regions of Russia because satellites in the geostationary orbit cannot provide access to these regions. He notes that for his nation to build fixed transmitters there or lay optic fiber cables to these regions is either economically inexpedient or technically impossible.

The new project is an upgraded version of the present system known as Gonets which translates into the word Messenger in English. Davydov says that it is crucial for Russia to have the possibility of ensuring communication with any of its satellites at any time and linking them with the mission control centers. In short, days Davydov, Russia is lifting the Internet into orbit.

The developers emphasize that the "Kosmonet" does not depend on a ground infrastructure. Rather, communications will be maintained with the assistance of terminals and basic stations through satellites. Consequently, emergency situations such as earthquakes or other calamities cannot interrupt the proposed systems communications.

For the Amateur Radio Newsline, I'm Bruce Tennent, K6PZW, in Los Angeles.

--

Davydov says that at present, there is no such a system, and his nation hopes to enter into this market first. (Southgate)

** MMMonVHF Trophy: "Best VHF DX Expedition" of the Year 2010 **

As in the past years, as well the VHF DX Portal MMMonVHF start
to find the "Best VHF DX Expedition of the Year 2010".
The best expedition on 144 MHZ in the sector MS and/or EME will
be voted in the first 3 weeks of january 2011 as past years: Voting
is open from 01.01.2011 00:00UTC till 20.01.2011 23:59UTC
Link to the: http: Voting Page: http://www.mmmonvhf.de/dxvote.php
PS: The VOTING will of course only include Expeditions which was
spread out on the 2010 LATEST NEWS at Make More Miles on VHF!
If you interesting to see the results of past year:

Guadeloupe Island (French Antillas, FK96HF) qrv on 144 MHz EME
since 29.12.2010! LATEST NEWS, from Phil, dated 2011-01-06: hi all,
Sunny day today, so we have made some visits. Tomorrow till monday
I will try to be on air most of the time of the moon path. Be
carefull about my frequency! it can change because birdies. 143 is
very bad now so I will use 139 or 136 but the best is to have a
look on N0UK EME site. I hope to qso the missing stations during
this week end. A special attention will be done for the JA station
as soon as we will have a common window. GL all 73 - also use:

DX0DX DXpedition to Spratly Islands in January 2011 - LATEST DX0,
SPRATLY ISLANDS Update 2011-01-04: Murphy has been hitting us
recently. Been having problems getting equipment out of customs,
but finally seeing light at the end of the tunnel. All equipment
is expected to be in Puerto Princesa, Palawan, on the morning of
January 5th. Thereafter, the gear will then need to be sent to
Pag-Asa. Some operators are also having weather related problems
enroute to DU, thus delaying them. Additionally, the charter flight
company advised that the plane to Pag-Asa will be delayed leaving
Manila by a day. Thus, DX0DX start-up is delayed too.

Norfolk Island (RG30XX) DX Expedition, 2011
LATEST NEWS from Guy, VK2KU, dated 2011-01-06: VK9NA operations
will begin on the local morning of Sunday 9 January after setting
up on the previous day. At the other end the 19th is likely to be
the final day of operation, leaving the 20th for packing up.
EME on 2m is only one facet of the expedition, but they will try

to be QRV on EME as much as possible. Moonrise on Norfolk Island
on 9th January (local) is at 2210-1 UTC, ie at 2210 on 8th January
(UTC date). The team have chosen 144.125MHz (in 1st period) for
their 2m operations, both terrestrial and EME. It would be
appreciated if others who regularly operate on this frequency
would make way for this rare DXCC operation. Given the likely
pileup on 144.125, it might be best to leave 144.124 - 144.126MHz
clear of unrelated signals. Good luck to all
SOURCE: tnx to Guy, VK2KU in QSP from the Team, direct to MMMonVHF

** V47JA qrv from his new Calypso Bay (FK87) again **

John, W5JON will be active as V47JA from his new Calypso Bay,
island of St. Kitts (IOTA NA-104, WW Loc. FK87PG) vacation home,
with full view of Caribbean, between 16th February and 30th March
2011. QRV on 80-6 metre SSB, including both the ARRL International
DX SSB Contest (5-6 March) and CQWW WPX SSB Contest (26-27th March)
both Single-Op/All-Band. Equipment will be TS-590S, KL-400
Amplifier (400 Watts) and Multiband Dipoles. XYL Cathy (W5HAM)
will also operate occasionally as V4/W5HAM. All QSL's via W5JON.
SOURCE: [NG3K] via ICPO Bulletin (31 Dec 2010 - 07 Jan 2011)

** VK9L, LORD HOWE ISLAND, qrv HF and 50 MHz **

Christopher, VK5CP, has once again return to Lord Howe Island
(OC-004) and will be active as VK5CP/VK9L until January 7th.
According to "DX-World.Net", Chris states, "I am using a half
wave dipole at 10m, an IC7000 and a LDG tuner. Power is about
50w. I can hear very well but my signal is weak (sorry, but the
14Kg luggage limit did not allow me to bring the Alpha 87A). I
am working SSB only 80-6m. Please QSL to VK5CP. I will make a
special QSL for VK5CP/VK9L."

Solution Manual A Brief Introduction to Fluid Mechanics (4th Ed., Donald Young, Bruce Munson, Theodore Okiishi, Wade Huebsch)
Solution Manual Engineering Fluid Mechanics (7th Ed., Clayton Crowe, Donald Elger, John Roberson)
Solution Manual Engineering Fluid Mechanics (8th Ed., Clayton Crowe, Donald Elger, John Roberson)
Solution Manual Engineering Fluid Mechanics (9th Ed., Clayton Crowe, Donald Elger, John Roberson, Barbara Williams)
Solution Manual Fluid Mechanics (Potter & Foss)
Solution Manual Mechanics of Fluids (3rd Ed., Potter)
Solution Manual Fluid Power with Applications (7th Ed., Esposito)
Solution Manual Mechanics of Fluids (4th Ed., Shames)
Solution Manual Applied Fluid Mechanics (6th Ed., Mott)
Solution Manual Applied Fluid Mechanics - SI Units (6th Ed., Mott)
Solution Manual Hydraulic Control Systems (Noah Manring)
Solution Manual Fluid Mechanics and Thermodynamics of Turbomachinery (5th Ed., S.L. Dixon)
Solution Manual Fluid Mechanics and Thermodynamics of Turbomachinery (6th Ed., S.L. Dixon & Cesare Hall)

Solution Manual The Design of High-Efficiency Turbomachinery and Gas Turbines (2nd Ed., David Gordon Wilson & Theododios Korakianitis)
Solution Manual Fundamentals of Turbomachinery (William Peng)
Solution Manual Principles of Turbomachinery in Air-Breathing Engines (Baskharone)
Solution Manual Fundamentals of Jet Propulsion with Applications (Ronald D. Flack)
Solution Manual Extended Irreversible Thermodynamics (3rd Ed., D. Jou, J. Casas-Vazquez & G. Lebon)
Solution Manual Thermodynamics : An Integrated Learning System (Schmidt, Ezekoye, Howell & Baker)
Solution Manual Design of Fluid Thermal Systems (2nd Ed., William Janna)
Solution Manual Design and Simulation of Thermal Systems (N.V. Suryanarayana & Oner Arici)
Solution Manual Introduction to Thermal and Fluids Engineering (Kaminski & Jensen)
Solution Manual Heating, Ventilating and Air Conditioning Analysis and Design (6th Ed., McQuiston)
Solution Manual Electricity, Electronics, and Control Systems for HVAC (4th Ed., Thomas Kissell)
Solution Manual Heat and Mass Transfer (Anthony Mills)
Solution Manual Convective Heat and Mass Transfer (4th Ed., Kays & Crawford)
Solution Manual Advanced Engineering Thermodynamics (3rd Ed., Bejan)
Solution Manual Convection Heat Transfer (3rd Ed., Bejan)
Solution Manual Design with Constructal Theory (Adrian Bejan & Sylvie Lorente)
Solution Manual Shape and Structure, from Engineering to Nature (Adrian Bejan)
Solution Manual Thermodynamics : Concepts and Applications (Stephen Turns)
Solution Manual Heat Transfer (10th Ed., Jack Holman)
Solution Manual Principles of Heat Transfer (Kaviany)
Solution Manual Heat Convection (Latif M. Jiji)
Solution Manual Fundamentals of Momentum, Heat and Mass Transfer (5th Ed., Welty)
Solution Manual Analytical Methods for Heat Transfer and Fluid Flow Problems (Bernhard Weigand)
Solution Manual Two-Phase Flow : Theory and Applications (Clement Kleinstreuer)
Solution Manual Convective Heat Transfer (kakac)
Solution Manual An Introduction to Fluid Dynamics : Principles of Analysis and Design (Stanley Middleman)
Solution Manual An Introduction to Mass and Heat Transfer : Principles of Analysis and Design (Stanley Middleman)
Solution Manual Fundamentals of Thermodynamics (5th Ed., Richard Sonntag, Claus Borgnakke & Gordon Van Wylen)
Solution Manual Fundamentals of Thermodynamics (6th Ed., Richard Sonntag, Claus Borgnakke & Gordon Van Wylen)

Solution Manual Fundamentals of Thermodynamics (7th Ed., Claus Borgnakke & Richard Sonntag)
Solution Manual Introduction to Engineering Thermodynamics (1st Ed., Richard Sonntag & Claus Borgnakke)
Solution Manual Introduction to Engineering Thermodynamics (2nd Ed., Richard Sonntag & Claus Borgnakke)
Solution Manual Fundamentals of Engineering Thermodynamics (5th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics (6th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics - SI Units (6th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics (7th Ed., Michael Moran, Howard Shapiro, Daisie Boettner, Margaret Bailey)
Solution Manual Fundamentals of Heat and Mass Transfer (5th Ed., Incropera, DeWitt)
Solution Manual Fundamentals of Heat and Mass Transfer (6th Ed., Incropera, DeWitt)
Solution Manual Introduction to Heat Transfer (4th Ed., Incropera, DeWitt)
Solution Manual Introduction to Heat Transfer (5th Ed., Incropera, DeWitt)
Solution Manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution Manual Radiation Detection and Measurement (4th Ed., Glenn Knoll)
Solution Manual Radiative Heat Transfer (2nd Ed., Michael Modest)
Solution Manual Computational Heat Transfer (2nd Ed., Jaluria)
Solution Manual Principles of Combustion (2nd Ed., Kenneth Kuan-yun Kuo)
Solution Manual Combustion (2nd Ed., Irvin Glassman)
Solution Manual Combustion (3rd Ed., Irvin Glassman)
Solution Manual Incompressible Flow (3rd Ed., Panton)
Solution Manual Modern Compressible Flow : With Historical Perspective (3rd Ed., John Anderson)
Solution Manual Non-Newtonian Flow : Fundamentals and Engineering Applications (R.P. Chhabra & J F Richardson)
Solution Manual Computational Techniques for Fluid Dynamics (Srinivas, K., Fletcher, C.A.J.)
Solution Manual Introduction to Computational Fluid Dynamics (A.W. Date)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Introduction to Robotics: Analysis, Control, Applications (Saeed B. Niku)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Control (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. Santibáñez, A. Loría)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed.,

Lorenzo Sciavicco, Bruno Siciliano)
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Robotic Mechanical Systems : Theory, Methods, and Algorithms (3rd Ed., Jorge Angeles)
Solution Manual Kinematic Chains and Machine Components Design (Dan B. Marghitu)
Solution Manual Kinematics, Dynamics, and Design of Machinery (2nd Ed., Waldron & Kinzel)
Solution Manual Kinematics and Dynamics of Machinery (3rd Ed., Charles E. Wilson & J. Peter Sadler)
Solution Manual Kinematics and Dynamics of Machinery - SI Units (3rd Ed., Charles E. Wilson & J. Peter Sadler)
Solution Manual Machines and Mechanisms : Applied Kinematic Analysis (3rd Ed., Myszka)
Solution Manual Mechanism Design : Analysis and Synthesis (4th Ed., Erdman, Sandor & Kota)
Solution Manual Mechanical Design : A Components Approach (2nd Ed., Peter Childs)
Solution Manual Mechanical Design of Machine Elements and Machines : A Failure Prevention Perspective (1st Ed., Collins)
Solution Manual Mechanical Design of Machine Elements and Machines : A Failure Prevention Perspective (2nd Ed., Collins, Busby & Staab)
Solution Manual Fundamentals of Machine Component Design (3rd Ed., Juvinall)
Solution Manual Fundamentals of Machine Component Design (4th Ed., Juvinall)
Solution Manual Design of Machine Elements (8th Ed., Spotts)
Solution Manual Machine Elements in Mechanical Design (4th Ed., Mott)
Solution Manual Machine Elements in Mechanical Design - SI Units (4th Ed., Mott)
Solution Manual Mechanical Design : An Integrated Approach (1st Ed., Ansel Ugural)
Solution Manual Design of Machinery (3rd Ed., Norton)
Solution Manual Design of Machinery (4th Ed., Norton)
Solution Manual Machine Design : An Integrated Approach (3rd Ed., Norton)
Solution Manual Machine Design : An Integrated Approach (4th Ed., Norton)
Solution Manual Mechanical Engineering Design (6th Ed., Shigley)
Solution Manual Mechanical Engineering Design (7th Ed., Shigley, Mischke & Budynas)
Solution Manual Shigley's Mechanical Engineering Design (8th Ed., Budynas & Nisbett)
Solution Manual Shigley's Mechanical Engineering Design (9th Ed., Budynas & Nisbett)
Solution Manual Fundamentals of Machine Elements (1st Ed., Hamrock)
Solution Manual Fundamentals of Machine Elements (2nd Ed., Hamrock)
Solution Manual Mechanics of Materials : A Modern Integration of Mechanics and Materials in Structural Design (Christopher Jenkins &

Sanjeev Khanna)
Solution Manual Mechanics of Materials (3th Ed., Beer)
Solution Manual Mechanics of Materials (5th Ed., Gere & Timoshenko)
Solution Manual Mechanics of Materials (6th Ed., Gere & Timoshenko)
Solution Manual Mechanics of Materials (7th Ed., Gere & Goodno)
Solution Manual Mechanics of Materials (Ansel Ugural)
Solution Manual Mechanics of Materials : An Integrated Learning System (1st Ed., Timothy Philpot)
Solution Manual Mechanics of Materials : An Integrated Learning System (2nd Ed., Timothy Philpot)
Solution Manual Mechanics of Materials (2nd Ed., Roy R. Craig)
Solution Manual Simplified Mechanics and Strength of Materials (6th Ed., James Ambrose)
Solution Manual Engineering Applications of Dynamics (Dean Karnopp & Donald Margolis)
Solution Manual Engineering Mechanics : Statics (Arthur Boresi, Richard Schmidt)
Solution Manual Engineering Mechanics : Dynamics (Arthur Boresi, Richard Schmidt)
Solution Manual Engineering Mechanics : Statics (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics - SI Version (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics - SI Version (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics - SI Version (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics - SI Version (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Vector Mechanics for Engineers : Statics (7th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Statics (8th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Dynamics (7th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Dynamics (8th Ed., Ferdinand Beer)
Solution Manual Statics : Analysis and Design of Systems in Equilibrium (Sheppard & Tongue)
Solution Manual Statics : Analysis and Design of Systems in Equilibrium - Update Edition (Sheppard & Tongue)
Solution Manual Dynamics : Analysis and Design of Systems in Motion (Sheppard & Tongue)
Solution Manual Dynamics : Analysis and Design of Systems in Motion

(2nd Ed., Sheppard & Tongue)
Solution Manual Statics and Mechanics of Materials : An Integrated Approach (2nd Ed., Riley, Sturges & Morris)
Solution Manual Mechanics of Materials (6th Ed., Riley, Sturges & Morris)
Solution Manual Basic Engineering Plasticity : An Introduction with Engineering and Manufacturing Applications (David Rees)
Solution Manual Theory of Plasticity (3rd Ed. Jagabanduhu Chakrabarty)
Solution Manual Deformation and Fracture Mechanics of Engineering Materials (4th Ed., Richard Hertzberg)
Solution Manual Deformable Bodies and Their Material Behavior (Haslach & Armstrong)
Solution Manual Intermediate Mechanics of Materials (1st Ed., Barber)
Solution Manual Elasticity (2nd Ed., J.R. Barber)
Solution Manual Elasticity : Theory, Applications, and Numerics (1st Ed., Martin Sadd)
Solution Manual Elasticity : Theory, Applications, and Numerics (2nd Ed., Martin Sadd)
Solution Manual Elasticity in Engineering Mechanics (2nd Ed., Boresi)
Solution Manual Advanced Mechanics of Materials (6th Ed., Boresi)
Solution Manual Advanced Mechanics of Materials (2nd Ed., Cook & Young)
Solution Manual Metal Fatigue in Engineering (2nd Ed., Stephens, Fatemi & Fuchs)
Solution Manual Applied Mechanics for Engineering Technology (8th Ed., Keith M. Walker)
Solution Manual Applied Statics and Strength of Materials (5th Ed. Limbrunner & Spiegel)
Solution Manual Statics and Strength of Materials (Robert Mott)
Solution Manual Applied Strength of Materials (4th Ed., Mott)
Solution Manual Applied Strength of Materials (5th Ed., Mott)
Solution Manual Intermediate Dynamics for Engineers (Marcelo R.M & Crespo da Silva)
Solution Manual Engineering Mechanics : Statics (Michael Plesha, Gary Gray & Francesco Costanzo)
Solution Manual Engineering Mechanics : Dynamics (Michael Plesha, Gary Gray & Francesco Costanzo)
Solution Manual Engineering Mechanics : Statics (4th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Statics (5th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Statics - SI Units (5th Ed., Anthony Bedford, Wallace Fowler & Yusof Ahmad)
Solution Manual Engineering Mechanics : Dynamics (4th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Dynamics (5th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Dynamics - SI Units (5th Ed., Anthony Bedford, Wallace Fowler & Yusof Ahmad)
Solution Manual Elastic And Inelastic Stress Analysis (Irving Shames)

Solution Manual Thermal Stresses (2nd Ed., Noda, Hetnarski & Tanigawa)
Solution Manual Strength of Materials - A New Unified Theory for the 21st Century (Surya Patnaik & Dale Hopkins)
Solution Manual Statics and Strengths of Materials (6th Ed., Morrow & Kokernak)
Solution Manual Engineering Mechanics : Statics (11th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Statics (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Statics - SI Units (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics (11th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics - SI Units (12th Ed., Hibbeler)
Solution Manual Mechanics of Materials (4th Ed., Hibbeler)
Solution Manual Mechanics of Materials (6th Ed., Hibbeler)
Solution Manual Mechanics of Materials (7th Ed., Hibbeler)
Solution Manual Mechanics of Materials - SI Units (7th Ed., Hibbeler)
Solution Manual Mechanics of Materials (8th Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials (Beer, Johnston, DeWolf & Mazurek)
Solution Manual Statics and Mechanics of Materials (Bedford, Liechti & Fowler)
Solution Manual Statics and Mechanics of Materials (2nd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials - SI Units (2nd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials (3rd Ed., Hibbeler)
Solution Manual Energy Principles and Variational Methods in Applied Mechanics (2nd Ed., Reddy)
Solution Manual The Physics of Vibrations and Waves (6th Ed., Pain)
Solution Manual Engineering Vibrations (3rd Ed., Inman)
Solution Manual Mechanical Vibrations - SI Units (4th Ed., Singiresu S. Rao)
Solution Manual Mechanical Vibrations (5th Ed., Singiresu S. Rao)
Solution Manual Theory of Vibration : An Introduction (2nd Ed., A.A. Shabana)
Solution Manual Vibration of Discrete and Continuous Systems (2nd Ed., Ahmed Shabana)
Solution Manual Introduction to Finite Element Vibration Analysis (Maurice Petyt)
Solution Manual Vibrations and Stability : Advanced Theory, Analysis, and Tools (2nd Ed., Jon J. Thomsen)
Solution Manual Dynamics and Vibration : An Introduction (Magd Abdel Wahab)
Solution Manual Mechanical Vibration (William J. Palm, III)
Solution Manual Random Vibrations : Analysis of Structural and Mechanical Systems (Loren Lutes & Shahram Sarkani)
Solution Manual Mechanical and Structural Vibrations : Theory and Applications (by Jerry H. Ginsberg)
Solution Manual Fundamentals of Structural Integrity : Damage Tolerant Design and Nondestructive Evaluation (Alten F. Grandt)

Solution Manual A First Course in the Finite Element Method (4th Ed., Daryl L. Logan)
Solution Manual Finite Element Analysis Theory and Application with ANSYS (3rd Ed., Moaveni)
Solution Manual An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
Solution Manual Fundamentals of Finite Element Analysis (1st Ed., David V. Hutton)
Solution Manual The Finite Element Method in Engineering (4th Ed., Rao)
Solution Manual The Finite Element Method and Applications in Engineering Using ANSYS (Madenci & Guven)
Solution Manual Introduction to Finite Element Analysis and Design (Nam-Ho Kim, Bhavani V. Sankar)
Solution Manual Introduction to the Finite Element Method : Theory, Programming and Applications (Erik G. Thompson)
Solution Manual The Finite Element Method : Its Basis and Fundamentals (6th Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution Manual Fundamental Finite Element Analysis and Applications : with Mathematica and Matlab Computations (Asghar Bhatti)
Solution Manual Advanced Topics in Finite Element Analysis of Structures : With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution Manual Modeling and Analysis of Dynamic Systems (3rd Ed., Close)
Solution Manual Modeling and Simulation of Dynamic Systems (Robert Woods, Jr. & Kent Lawrence)
Solution Manual System Dynamics (1st Ed., William J Palm III)
Solution Manual System Dynamics (2nd Ed., William J Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and Applications (Nicolae Lobontiu)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual System Dynamics : Modeling and Simulation of Mechatronic Systems (4th Ed., Karnopp, Margolis & Rosenberg)
Solution Manual Concepts and Applications of Finite Element Analysis (4th Ed., Cook, Malkus, Plesha & Witt)
Solution Manual Finite Element Modeling for Stress Analysis (Robert Cook)
Solution Manual Fracture Mechanics : Fundamentals and Applications (2nd Ed., T.L. Anderson)
Solution Manual Mechanical Behavior of Materials (3rd Ed., Dowling)
Solution Manual Mechanical Behavior of Materials (W.F. Hosford)
Solution Manual Mechanical Behavior of Materials (Keith Bowman)
Solution Manual Theory and Design for Mechanical Measurements (4th Ed., Figliola & Beasley)
Solution Manual Theory and Design for Mechanical Measurements (5th Ed., Figliola & Beasley)
Solution Manual Mechanical Measurements (6th Ed., Beckwith, Marangoni & Lienhard)

Solution Manual Measurement and Data Analysis for Engineering and Science (Patrick Dunn)
Solution Manual Design and Analysis of Lean Production Systems (Askin & Goldberg)
Solution Manual Work Systems : The Methods, Measurement & Management of Work (Mikell P. Groover)
Solution Manual Automation, Production Systems, and Computer-Integrated Manufacturing (2nd Ed., Groover)
Solution Manual Automation, Production Systems, and Computer-Integrated Manufacturing (3rd Ed., Groover)
Solution Manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (3rd Ed., Mikell Groover)
Solution Manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (4th Ed., Mikell Groover)
Solution Manual Materials and Processes in Manufacturing (9th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual DeGarmo's Materials and Processes in Manufacturing (10th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual Principles of Metal Manufacturing Processes (Beddoes & Bibby)
Solution Manual Design for Manufacturing : A Structured Approach (Corrado Poli)
Solution Manual Fundamentals of Manufacturing (2nd Ed., Philip D. Rufe)
Solution Manual Engineering Materials Science (Milton Ohring)
Solution Manual Engineering Materials : Properties and Selection (8th Ed., Budinski)
Solution Manual Engineering Materials : Properties and Selection (9th Ed., Budinski)
Solution Manual Materials Science for Engineering Students (Traugott Fischer)
Solution Manual Essentials of Modern Materials Science and Engineering (James Newell)
Solution Manual Science and Design of Engineering Materials (2nd Ed., Schaffer, Saxena, et al)
Solution Manual Structure and Properties of Engineering Materiales (5th Ed., Daniel Henkel & Alan Pense)
Solution Manual Materials Selection in Mechanical Design (3rd Ed., Michael Ashby)
Solution Manual Materials Selection in Mechanical Design (4th Ed., Michael Ashby)
Solution Manual Materials : Engineering, Science, Processing and Design (1st Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution Manual Materials : Engineering, Science, Processing and Design (2nd Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution Manual Engineering Materials Vol. 1 : An Introduction to Properties, Applications and Design (3rd Ed., Michael Ashby & David Jones)
Solution Manual Engineering Materials Vol. 2 : An Introduction to Microstructures, Processing and Design (3rd Ed., Michael Ashby & David

Jones)
Solution Manual Materials Science and Engineering : An Introduction (6th Ed., William Callister)
Solution Manual Materials Science and Engineering : An Introduction (7th Ed., William Callister)
Solution Manual Materials Science and Engineering : An Introduction (8th Ed., William Callister)
Solution Manual Fundamentals of Materials Science and Engineering : Integrated Approach (2nd Ed., William Callister)
Solution Manual Fundamentals of Materials Science and Engineering : Integrated Approach (3rd Ed., William Callister)
Solution Manual Foundations of Materials Science and Engineering (3rd Ed, Smith)
Solution Manual Foundations of Materials Science and Engineering (4th Ed, Smith & Hashemi)
Solution Manual Foundations of Materials Science and Engineering (5th Ed, Smith & Hashemi)
Solution Manual Introduction to Materials Science for Engineers (6th Ed., Shackelford)
Solution Manual Introduction to Materials Science for Engineers (7th Ed., Shackelford)
Solution Manual Introduction to Materials Science for Engineers - International Edition (7th Ed., Shackelford)
Solution Manual Manufacturing Facilities Design and Material Handling (3rd Ed., Meyers & Stephens)
Solution Manual Manufacturing Facilities Design and Material Handling (4th Ed., Stephens & Meyers)
Solution Manual Manufacturing Processes for Engineering Materials (5th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing Processes for Engineering Materials - SI Units (5th Ed. Kalpakjian, Smith & Chih-Wah Kok)
Solution Manual Manufacturing, Engineering & Technology (5th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing, Engineering & Technology (6th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing, Engineering & Technology - SI Units (6th Ed. Kalpakjian & Smith)
Solution Manual Principles of Corrosion Engineering and Corrosion Control (Zaki Ahmad)
Solution Manual Steels : Microstructure and Properties (3rd Ed. Bhadeshia & Honeycombe)
Solution Manual Analysis and Performance of Fiber Composites (3rd Ed., Bhagwan Agarwal, Lawrence Broutman & K. Chandrashekhara)
Solution Manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution Manual Applied Manufacturing Process Planning : With Emphasis on Metal Forming and Machining (Nelson, Schneider)
Solution Manual Mastering CAD/CAM (1st Ed., Ibrahim Zeid)
Solution Manual Principles of CAD/CAM/CAE (Kunwoo Lee)
Solution Manual Computer Numerical Control : Operation and Programming

(3rd Ed., Stenerson & Curran)
Solution Manual Introduction to Computer Numerical Control (4th Ed., Valentino & Goldenberg)
Solution Manual Linear State-Space Control Systems (Robert L. Williams, II & Douglas A. Lawrence)
Solution Manual Gas Turbine Theory (6th Ed., H.I.H. Saravanamuttoo, G.F.C. Rogers, H. Cohen & Paul Straznicky)
Solution Manual Rocket Propulsion Elements (7th Ed., George P. Sutton & Oscar Biblarz)
Solution Manual Rocket Propulsion Elements (8th Ed., George P. Sutton & Oscar Biblarz)
Solution Manual Orbital Mechanics for Engineering Students (1st Ed., Howard Curtis)
Solution Manual Orbital Mechanics for Engineering Students (2nd Ed., Howard Curtis)
Solution Manual Atmospheric and Space Flight Dynamics : Modeling and Simulation with MATLAB and Simulink (Ashish Tewari)
Solution Manual Flight Dynamics Principles (2nd Ed., by Cook)
Solution Manual Mechanics of Flight (1st Ed., Warren F. Phillips)
Solution Manual Mechanics of Flight (2nd Ed., Warren F. Phillips)
Solution Manual Fundamentals of Airplane Flight Mechanics (David G. Hull)
Solution Manual Dynamics of Flight : Stability and Control (3rd Ed., Bernard Etkin & Lloyd Duff Reid)
Solution Manual Aircraft Rescue and Firefighting (5th Ed., IFSTA)
Solution Manual Aircraft Propulsion (Saeed Farokhi)
Solution Manual Aircraft Performance (Maido Saarlas)
Solution Manual Flight Performance of Fixed and Rotary Wing Aircraft (Antonio Filippone)
Solution Manual Fundamentals Of Aircraft Structural Analysis (Howard Curtis)
Solution Manual Aircraft Control and Simulation (2nd Ed., Brian Stevens & Frank Lewis)
Solution Manual Aircraft Structures for Engineering Students (3rd Ed., T.H.G. Megson)
Solution Manual Aircraft Structures for Engineering Students (4th Ed., T.H.G. Megson)
Solution Manual Introduction to Aircraft Structural Analysis (T.H.G. Megson)
Solution Manual Mechanics of Aircraft Structures (2nd Ed, C. T. Sun)
Solution Manual Principles of Helicopter Aerodynamics (1st Ed., Leishman)
Solution Manual Fundamentals of Aerodynamics (2nd Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (3th Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (4th Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (5th Ed., Anderson)
Solution Manual Aerodynamics for Engineers (5th Ed., John Bertin & Russell Cummings)
Solution Manual Introduction to Flight (5th Ed., Anderson)
Solution Manual Introduction to Flight (6th Ed., Anderson)

Solution Manual Mechatronics : Principles and Applications (Godfrey Onwubolu)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual Introduction to Mechatronics and Measurement Systems (2nd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Mechatronics and Measurement Systems (3rd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Engineering Experimentation (2nd Ed., Wheeler & Ganji)
Solution Manual Introduction to Engineering Experimentation (3rd Ed., Wheeler & Ganji)
Solution Manual Gas Dynamics (3rd Ed., John & Keith)
Solution Manual Fundamentals of Gas Dynamics (2nd Ed, Robert D. Zucker)
Solution Manual Theory of Ground Vehicles (3rd Ed., J. Y. Wong)
Solution Manual Theory of Ground Vehicles (4th Ed., J. Y. Wong)
Solution Manual Vehicle Dynamics : Theory and Application (Reza Jazar)
Solution Manual Internal Combustion Engines : Applied Thermosciences (2nd Ed., Ferguson & Kirkpatrick)
Solution Manual Advanced Engine Performance Diagnosis (4th Ed., James Halderman)
Solution Manual Automotive Engines (8th Ed., Crouse)
Solution Manual Automotive Heating & Air Conditioning (5th Ed., Tom Birch)
Solution Manual Diagnosis and Troubleshooting of Automotive Electrical, Electronic, and Computer Systems (5th Ed., James Halderman)
Solution Manual Automotive Brake Systems Package (4th Ed., Rehkopf)
Solution Manual Automotive Brake Systems (4th Ed., Halderman)
Solution Manual Automotive Engine Performance (2nd Ed., Halderman)
Solution Manual Automotive Engines : Theory and Servicing (6th Ed., James Halderman)
Solution Manual Automotive Fuel and Emissions Control Systems (2nd Ed., James Halderman & James Linder)
Solution Manual Automotive Science and Mathematics (Allan Bonnick)
Solution Manual Automotive Mathematics (Jason Rouvel)
Solution Manual Automotive Service Management (Andrew Rezin)
Solution Manual Automotive Technology : Principles, Diagnosis, and Service (3rd Ed., Halderman)
Solution Manual Automotive Steering, Suspension, and Alignment (4th Ed., Halderman)
Solution Manual Automatic Transmissions & Transaxles (4th Ed., Tom Birch & Chuck Rockwood)
Solution Manual Hybrid and Alternative Fuel Vehicles (Halderman & Martin)
Solution Manual Manual Drivetrains and Axles (5th Ed., Birch & Rockwood)
Solution Manual Blueprint Reading for the Machine Trades (6th Ed., Schultz & Smith)
Solution Manual Modern Welding Technology (6th Ed., Cary & Helzer)

Solution Manual Tissue Engineering (Bernhard O. Palsson & Sangeeta N. Bhatia)
Solution Manual Tissue Engineering (Clemens van Blitterswijk, et al.)
Solution Manual Tissue Mechanics (Cowin, Doty)
Solution Manual Technology and Society (3rd Ed., Hjorth, Eichler, Khan & Morello)
Solution Manual BTEC First Engineering Curriculum Support Pack (Mike Tooley)
Solution Manual BTEC First Engineering (Mike Tooley)
Solution Manual Exploring Engineering : An Introduction to Engineering and Design (1st Ed., Philip Kosky, George Wise, Robert Balmer & William Keat)
Solution Manual Exploring Engineering : An Introduction to Engineering and Design (2nd Ed., Philip Kosky, Robert Balmer, William Keat & George Wise)
Solution Manual Engineering Science (5th Ed., W. Bolton)
Solution Manual Principles of Energy Conversion (2nd Ed., Archie W. Culp)
Solution Manual Fundamentals of Renewable Energy Processes (1st Ed., Aldo da Rosa)
Solution Manual Fundamentals of Renewable Energy Processes (2nd Ed., Aldo da Rosa)
Solution Manual Alternative Energy Systems (B. K. Hodge)
Solution Manual Solar Energy Engineering : Processes and Systems (Soteris Kalogirou)
Solution Manual Solar Engineering of Thermal Processes (2nd Ed., John Duffie & William Beckman)
Solution Manual Solar Engineering of Thermal Processes (3rd Ed., John Duffie & William Beckman)
Solution Manual Energy Technology and Directions for the Future (Fanchi)
Solution Manual Power Generation Technologies (Paul Breeze)
Solution Manual Concepts in Engineering (Holtzapple & Reece)
Solution Manual Concepts in Engineering (2nd Ed., Holtzapple & Reece)
Solution Manual Foundations of Engineering (2nd Ed, Holtzapple & Dan Reece)
Solution Manual Industrial Mechanics and Maintenance (3rd Ed., Larry Chastain)
Solution Manual Mechanical and Electrical Equipment for Buildings (10th Ed., Stein, Reynolds, Grondzik, Kwok)
Solution Manual Mechanical and Electrical Equipment for Buildings (11th Ed., Grondzik, Kwok, Stein & Reynolds)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution Manual Engineering Drawing And Design (7th Ed., Jensen, Helsel & Short)
Solution Manual Autodesk Inventor (James M. Leake)
Solution Manual Engineering Design Graphics : Sketching, Modeling, and Visualization (1st Ed., James Leake & Jacob Borgerson)
Solution Manual Orthopaedic Biomechanics : Mechanics and Design in

Musculoskeletal Systems (Donald Bartel, Dwight Davy & Tony Keaveny)
Solution Manual Science for Engineering (3rd Ed., John Bird)

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=1P9GUXB1

I do not review the forums, just send me an email.

- Electrical, Electronics & Computer Engineering :

Solution Manual Design for Electrical and Computer Engineers (J. Eric Salt & Robert Rothery)
Solution Manual Electrical Engineering : Principles and Applications (3rd Ed., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (4th Ed., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (5th Ed., Hambley)
Solution Manual Electronics (2nd Ed., Hambley)
Solution Manual Electronics and Communications for Scientists and Engineers (Martin Plonus)
Solution Manual Cryptography & Network Security (Behrouz A Forouzan)
Solution Manual Data Communications and Networking (3rd Ed., Behrouz A. Forouzan)
Solution Manual Data Communications and Networking (4th Ed., Behrouz A. Forouzan)
Solution Manual TCP/IP Protocol Suite (2nd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (3rd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (4th Ed., Behrouz Forouzan)

Solution Manual Local Area Networks (Behrouz A Forouzan)
Solution Manual Analog Integrated Circuits for Communication : Principles, Simulation and Design (2nd Ed., Donald Pederson & Kartikeya Mayaram)
Solution Manual Satellite Communications (2nd Ed, Pratt, Bostian, Allnutt)
Solution Manual Business Data Communications (Behrouz A Forouzan)
Solution Manual Logic and Computer Design Fundamentals (4th Ed., Mano & Kime)
Solution Manual Linear Robust Control (Michael Green, David J. N. Limebeer)
Solution Manual Adaptive Control (2nd Ed., Karl Johan Astrom, Bjorn Wittenmark)
Solution Manual Digital Control Engineering : Analysis and Design (M. Sami Fadali & Antonio Visioli)
Solution Manual Computer-Controlled Systems : Theory and Design (3rd Ed., Karl Johan Astrom & Bjorn Wittenmark)
Solution Manual Electric Circuits (7th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (8th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (9th Ed., Nilsson & Riedel)
Solution Manual Introductory Circuits for Electrical and Computer Engineering (James Nilsson, Susan Riedel)
Solution Manual Electromagnetic Noise and Quantum Optical Measurements (Hermann A. Haus)
Solution Manual Electromagnetics (Branislav M. Notaros)
Solution Manual Electromagnetics for Engineers (Fawwaz T. Ulaby)
Solution Manual Fundamentals of Applied Electromagnetics (5th Ed., Fawwaz T. Ulaby)
Solution Manual Fundamentals of Applied Electromagnetics (6th Ed., Ulaby, Michielssen & Ravaioli)
Solution Manual Applied Electromagnetics : Early Transmission Lines Approach (Stuart Wentworth)
Solution Manual Fundamentals of Electromagnetics with Engineering Applications (Stuart Wentworth)
Solution Manual Electromagnetics for Engineers : With Applications to Digital Systems and Electromagnetic Interference (Clayton Paul)
Solution Manual MEMS & Microsystems : Design and Manufacture (1st Ed., Tai-Ran Hsu)
Solution Manual MEMS & Microsystems : Design, Manufacture, and Nanoscale Engineering (2nd Ed., Tai-Ran Hsu)
Solution Manual Probability and Statistics for Engineering and the Sciences (7th Ed., Jay L. DeVore)
Solution Manual Probability and Stochastic Processes : A Friendly Introduction for Electrical and Computer Engineers (2nd Ed., Roy Yates & David Goodman)
Solution Manual Process Systems Analysis and Control (3rd Ed. Donald Coughanowr, Steven LeBlanc)
Solution Manual Fuel Cell Engines (Matthew M. Mench)
Solution Manual Fuel Cell Fundamentals (1st Ed., Ryan O'Hayre, et. al)
Solution Manual Fuel Cell Fundamentals (2nd Ed., Ryan O'Hayre, Whitney

Colella, Suk-Won Cha, Fritz Prinz)
Solution Manual Control Systems Engineering (4th Ed., Norman Nise)
Solution Manual Control Systems Engineering (5th Ed., Norman Nise)
Solution Manual Control Systems Engineering (6th Ed., Norman Nise)
Solution Manual Automatic Control Systems (8th Ed., Benjamin C. Kuo, Farid Golnaraghi)
Solution Manual Automatic Control Systems (9th Ed., Farid Golnaraghi, Benjamin C. Kuo)
Solution Manual Basic Electricity for Industry : Circuits and Machines - Canadian Edition (Doug Edgar)
Solution Manual Basic Engineering Circuit Analysis (8th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (9th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (10th Ed., Irwin & Nelms)
Solution Manual A Brief Introduction to Circuit Analysis (J. David Irwin)
Solution Manual Semiconductor Devices : Basic Principles (Jasprit Singh)
Solution Manual Semiconductor Device Fundamentals (Robert F. Pierret)
Solution Manual Device Electronics for Integrated Circuits (3rd Ed., Richard S. Muller, Theodore I. Kamins)
Solution Manual Fundamentals of Semiconductor Devices (Anderson)
Solution Manual Scientific Computing (2nd Ed., Michael T. Heath)
Solution Manual Scientific Computing with Case Studies (Dianne P. O'Leary)
Solution Manual Pattern Recognition and Machine Learning (Christopher M. Bishop)
Solution Manual Modern Semiconductor Devices for Integrated Circuits (Chenming C. Hu)
Solution Manual Analysis and Design of Analog Integrated Circuits (4th Ed., Paul Gray, et al.)
Solution Manual Analysis and Design of Analog Integrated Circuits (5th Ed., Paul Gray)
Solution Manual Analysis and Design of Digital Integrated Circuits (3rd Ed., Hodges)
Solution Manual Introduction to Electric Circuits (6th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (7th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (8th Ed., Dorf & Svoboda)
Solution Manual Modulation, Detection and Coding (Tommy Öberg)
Solution Manual Principles of Communications: Systems, Modulation, and Noise (5th Ed., R.E. Ziemer & W.H. Tranter)
Solution Manual Principles of Communications (6th Ed., R.E. Ziemer & W.H. Tranter)
Solution Manual The Analysis and Design of Linear Circuits (4th Ed, Thomas & Rosa)

Solution Manual The Analysis and Design of Linear Circuits : Laplace Early (4th Ed, Thomas & Rosa)
Solution Manual The Analysis and Design of Linear Circuits (5th Ed, Thomas)
Solution Manual The Analysis and Design of Linear Circuits (6th Ed, Thomas, Rosa & Toussaint)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual Modern Control Systems (11th Ed., Dorf & Bishop)
Solution Manual Modern Control Systems (12th Ed., Dorf & Bishop)
Solution Manual System Dynamics (1st Ed., William Palm III)
Solution Manual System Dynamics (2nd Ed., William Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and Applications (Nicolae Lobontiu)
Solution Manual Optimal Control (2nd Ed., Frank Lewis & Vassilis Syrmos)
Solution Manual Optimal Control Theory : An Introduction (Donald E. Kirk)
Solution Manual Power Electronic Circuits (Issa Batarseh)
Solution Manual Power Electronics : Circuits, Devices and Applications (3rd Ed., Muhammad H. Rashid)
Solution Manual Power Electronics : Converters, Applications, and Design (3rd Ed., Ned Mohan, Tore Undeland & William Robbins)
Solution Manual Intuitive Probability and Random Processes using MATLAB (Steven Kay)
Solution Manual Signals and Systems using MATLAB (Luis Chaparro)
Solution Manual Analog Signals and Systems (Erhan Kudeki & David C. Munson, Jr.)
Solution Manual Continuous and Discrete Time Signals and Systems (Mrinal Mandal, Amir Asif)
Solution Manual Digital Signal and Image Processing (Tamal Bose)
Solution Manual Digital Image Processing (2nd Ed., Rafael Gonzalez, Richard Woods)
Solution Manual A Wavelet Tour of Signal Processing : The Sparse Way (3rd Ed., Stephane Mallat)
Solution Manual Discrete-Time Signal Processing (2nd Ed., Alan Oppenheim, Ronald Schafer, John Buck)
Solution Manual Discrete-Time Signal Processing (3rd Ed., Alan Oppenheim & Ronald Schafer)
Solution Manual Signal Processing First (James H. McClellan, Ronald W. Schafer, Mark A. Yoder)
Solution Manual Statistical Digital Signal Processing and Modeling (Monson Hayes)
Solution Manual Digital Signal Processing (Thomas J. Cavicchi)
Solution Manual Digital Signal Processing System Design : LabVIEW-Based Hybrid Programming (2nd Ed., Kehtarnavaz)
Solution Manual Digital Signal Processing (2nd Ed., Mitra)
Solution Manual Digital Signal Processing (3rd Ed., Mitra)
Solution Manual Digital Signal Processing (4th Ed., Mitra)

Solution Manual Digital Signal Processing (4th Ed., John G. Proakis, Dimitris K Manolakis)
Solution Manual Digital Signal Processing (Charles Schuler & Mahesh Chugani)
Solution Manual Digital Signal Processing : Fundamentals and Applications (Li Tan)
Solution Manual Digital Signal Processing : An Experimental Approach (Shlomo Engelberg)
Solution Manual Digital Signal Processing : System Analysis and Design (Paulo S. R. Diniz)
Solution Manual Digital Signal Processing : A Modern Introduction (Ashok Ambardar)
Solution Manual Engineering Optimization : Theory and Practice (4th Ed., Singiresu S. Rao)
Solution Manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution Manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution Manual Introduction to Applied Optimization (2nd Ed., Urmila Diwekar)
Solution Manual Logic Synthesis and Verification Algorithms (Gary Hachtel & Fabio Somenzi)
Solution Manual Adaptive Filtering : Algorithms and Practical Implementation (3rd Ed., Paulo S. R. Diniz)
Solution Manual Introduction to Scientific Computation and Programming (Daniel T. kaplan)
Solution Manual Principles of Signal Detection and Parameter Estimation (Bernard C. Levy)
Solution Manual Electric Machines Analysis and Design Applying MatLab (Cathey)
Solution Manual Fundamentals of Electrical Engineering (Giorgio Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (4th Ed, Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (5th Ed, Rizzoni)
Solution Manual Fundamentals of Electric Circuits (2nd Ed., Alexander & Sadiku)
Solution Manual Fundamentals of Electric Circuits (3rd Ed., Alexander & Sadiku)
Solution Manual Fundamentals of Electric Circuits (4th Ed., Alexander & Sadiku)
Solution Manual MSP430 Microcontroller Basics (John Davies)
Solution Manual Programming Massively Parallel Processors : A Hands-on Approach (David Kirk & Wen-mei Hwu)
Solution Manual Embedded Systems and Software Validation (Abhik Roychoudhury)
Solution Manual Embedded Systems Design with Platform FPGAs : Principles and Practices (Ronald Sass, Andrew Schmidt)
Solution Manual Embedded DSP Processor Design : Application Specific

Instruction Set Processors (Dake Liu)
Solution Manual Embedded Microcontrollers and Processor Design (Charles Greg Osborn)
Solution Manual Embedded System Design : A Unified Hardware/Software Introduction (Vahid & Givargis)
Solution Manual Embedded Microcomputer Systems : Real Time Interfacing (2nd Ed., Jonathan W. Valvano)
Solution Manual Matlab : A Practical Introduction to Programming and Problem Solving (Stormy Attaway)
Solution Manual Principles of Computer System Design : An Introduction (Jerome Saltzer & M. Frans Kaashoek)
Solution Manual The Illustrated Network : How TCP/IP Works in a Modern Network (Walter Goralski)
Solution Manual Electronic Design Automation : Synthesis, Verification, and Test (Laung-Terng Wang, Yao-Wen Chang & Kwang-Ting Cheng)
Solution Manual Digital Design (Frank Vahid)
Solution Manual Digital Design with RTL Design, Verilog and VHDL (2nd Ed., Frank Vahid)
Solution Manual Digital Logic Design Principles (Balabanian & Carlson)
Solution Manual Fundamentals of Logic Design (5th Ed., Charles H. Roth)
Solution Manual Real-Time Systems and Software (Alan Shaw)
Solution Manual Introduction to VLSI Circuits and Systems (John P. Uyemura)
Solution Manual Chip Design for Submicron VLSI : CMOS Layout & Simulation (John Uyemura)
Solution Manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution Manual Objects, Abstraction, Data Structures and Design : Using C++ (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Objects, Abstraction, Data Structures and Design Using Java Version 5.0 (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Computer Architecture and Organization : An Integrated Approach (Murdocca & Heuring)
Solution Manual Wiley Pathways Networking Basics (1st Ed., Ciccarelli, Faulkner, FitzGerald, Dennis & Miller)
Solution Manual Software Engineering : Principles and Practice (3rd Ed., Hans van Vliet)
Solution Manual Software Design : From Programming to Architecture (Eric Braude)
Solution Manual Software Engineering : An Object-Oriented Perspective (Eric Braude)
Solution Manual Software Engineering : Modern Approaches (2nd Ed., Eric Braude & Michael Bernstein)
Solution Manual Neural and Adaptive Systems : Fundamentals through Simulations (José Principe, Neil Euliano & W. Curt Lefebvre)
Solution Manual Fundamentals of Electronic Circuit Design (David J. Comer & Donald T. Comer)
Solution Manual Microelectronic Circuit Design (2nd Ed., Jaeger &

Blalock)
Solution Manual Microelectronic Circuit Design (3rd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (4th Ed., Jaeger & Blalock)
Solution Manual Introduction to Microelectronic Fabrication : Volume 5 of Modular Series on Solid State Devices (2nd Ed., Richard Jaeger)
Solution Manual Microelectronic Circuits (5th Ed., Adel S. Sedra, K. C. Smith)
Solution Manual VHDL for Engineers (Kenneth Short)
Solution Manual Fundamentals of Digital Logic with VHDL Design (1st Ed., Brown & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (2nd Ed., Brown & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (3rd Ed., Brown & Vranesic)
Solution Manual CMOS Analog Circuit Design (2nd Ed., Phillip E. Allen, Douglas R. Holberg)
Solution Manual Design of Analog CMOS Integrated Circuits (Behzad Razavi)
Solution Manual Design of Integrated Circuits for Optical Communications (Behzad Razavi)
Solution Manual Fundamentals of Microelectronics, Preliminary Edition (Behzad Razavi)
Solution Manual Fundamentals of Microelectronics (1st Ed., Behzad Razavi)
Solution Manual Design with Operational Amplifiers and Analog Integrated Circuits (3rd Ed., Sergio Franco)
Solution Manual Your UNIX : The Ultimate Guide (1st Ed., Sumitabha Das)
Solution Manual Your UNIX : The Ultimate Guide (2nd Ed., Sumitabha Das)
Solution Manual Microwave Engineering (Annapurna Das)
Solution Manual Microwave Engineering (3rd Ed., David M. Pozar)
Solution Manual Microwave and RF Design of Wireless Systems (David M. Pozar)
Solution Manual Introduction to Wireless Systems (P. M. Shankar)
Solution Manual Microwave Transistor Amplifiers : Analysis and Design (2nd Ed., Guillermo Gonzalez)
Solution Manual Control Systems (Madan Gopal)
Solution Manual A First Lab in Circuits and Electronics (Yannis Tsividis)
Solution Manual Power System Analysis : Analysis and Design (John Grainger)
Solution Manual Power Systems Analysis (2nd Ed., Hadi Saadat)
Solution Manual Power Systems Analysis and Design (4th Ed., J.Duncan Glover and Mulukutla S. Sarma)
Solution Manual An Introduction to Digital and Analog Communications (2nd Ed., Simon Haykin & Michael Moher)
Solution Manual Communication Systems (4th Ed., Simon Haykin)

Solution Manual Communication Systems (5th Ed., Simon Haykin)
Solution Manual Communication Systems (4th Ed., A. Bruce Carlson, Paul B. Crilly, Janet Rutledge)
Solution Manual Communication Systems (5th Ed., A. Bruce Carlson, Paul B. Crilly)
Solution Manual Signals and Systems (2nd Ed., Simon Haykin & Barry Van Veen)
Solution Manual Introduction to Computing Systems : From bits & gates to C & beyond (1st Ed., Patt and Patel)
Solution Manual Introduction to Computing Systems : From bits & gates to C & beyond (2nd Ed., Patt and Patel)
Solution Manual Elements of the Theory of Computation (2nd Ed., Lewis & Papadimitriou)
Solution Manual Introduction to Languages and the Theory of Computation (3rd Ed., John Martin)
Solution Manual Introduction to Languages and the Theory of Computation (4th Ed., John Martin)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution Manual Silicon VLSI Technology : Fundamentals, Practice, and Modeling (Plummer, Deal & Griffin)
Solution Manual Dynamic Electromagnetics (Paul Diament)
Solution Manual Engineering Electromagnetics (2nd Ed., Nathan Ida)
Solution Manual Engineering Electromagnetics (Kenneth Demarest)
Solution Manual Field and Wave Electromagnetics (1st Ed., David Cheng)
Solution Manual Fundamentals of Engineering Electromagnetics (David Cheng)
Solution Manual Information Modeling and Relational Databases (2nd Ed., Terry Halpin & Tony Morgan)
Solution Manual Probability, Statistics, and Random Processes For Electrical Engineering (3rd Ed., Alberto Leon-Garcia)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur Giordano)
Solution Manual The Intel Microprocessors (8th Ed., Barry B. Brey)
Solution Manual Wireless Networking (Kumar, Manjunath & Kuri)
Solution Manual Wireless Communications : Principles and Practice (2nd Ed., Theodore S. Rappaport)
Solution Manual Digital Electronics and Design with VHDL (Volnei A. Pedroni)
Solution Manual System-on-Chip Test Architectures : Nanometer Design for Testability (Wang, Stroud & Touba)
Solution Manual Digital Design (Verilog) : An Embedded Systems Approach Using Verilog (Peter Ashenden)
Solution Manual Digital Design (VHDL) : An Embedded Systems Approach Using VHDL (Peter Ashenden)
Solution Manual Computer Organization and Design : The Hardware/ Software Interface (3rd Ed., Patterson & Hennessy)
Solution Manual Computer Organization and Design : The Hardware/ Software Interface (4th Ed., Patterson & Hennessy)
Solution Manual Fundamentals of Computer Organization and Design

(Sivarama P. Dandamudi)
Solution Manual Wireless Communications & Networking (Vijay Garg)
Solution Manual Network Flows : Theory, Algorithms, and Applications (Ravindra K. Ahuja, Thomas L. Magnanti, James B. Orlin)
Solution Manual Network Analysis, Architecture, and Design (3rd Ed., James McCabe)
Solution Manual Computer Networks : A Systems Approach (4th Ed., Peterson & Davie)
Solution Manual Computer Networks ISE : A Systems Approach (4th Ed., Peterson & Davie)
Solution Manual Digital Design and Computer Architecture (David Harris & Sarah Harris)
Solution Manual Fault-Tolerant Systems (Israel Koren & C. Krishna)
Solution Manual Computer Architecture : Pipelined and Parallel Processor Design (Michael J. Flynn)
Solution Manual Computer Architecture : A Quantitative Approach (4th Ed., Hennessy & Patterson)
Solution Manual High-Performance Embedded Computing : Architectures, Applications, and Methodologies (Wayne Wolf)
Solution Manual Pattern Recognition (3rd Ed., Theodoridis & Koutroumbas)
Solution Manual Pattern Recognition (4th Ed., Theodoridis & Koutroumbas)
Solution Manual Data Mining : Concepts and Techniques (2nd Ed., Han & Kamber)
Solution Manual Commonsense Reasoning (Erik Mueller)
Solution Manual Introduction to Data Compression (3rd Ed., Khalid Sayood)
Solution Manual Programming Language Pragmatics (2nd Ed., Michael Scott)
Solution Manual Programming Language Pragmatics (3rd Ed., Michael Scott)
Solution Manual Computer Graphics for Java Programmers (2nd Ed., Leen Ammeraal & Kang Zhang)
Solution Manual Database Modeling and Design : Logical Design (4th Ed., Teorey, Lightstone & Nadeau)
Solution Manual Computers As Components : Principles of Embedded Computing System Design (1st Ed., Wayne Wolf)
Solution Manual Computers As Components : Principles of Embedded Computing System Design (2nd Ed., Wayne Wolf)
Solution Manual Virtual Machines : Versatile Platforms for Systems and Processes (Jim Smith & Ravi Nair)
Solution Manual Comprehensive Functional Verification : The Complete Industry Cycle (Wile, Goss & Roesner)
Solution Manual User Interface Design and Evaluation (Stone, Jarrett, Woodroffe & Minocha)
Solution Manual Network Algorithmics : An Interdisciplinary Approach to Designing Fast Networked Devices (George Varghese)
Solution Manual Data Modeling Essentials (3rd Ed., Simsion & Witt)
Solution Manual A Student Guide to Object-Oriented Development (Carol

Britton & Jill Doake)
Solution Manual Routing, Flow, and Capacity Design in Communication and Computer Networks (Pioro & Medhi)
Solution Manual Knowledge Representation and Reasoning (Brachman & Levesque)
Solution Manual Communication Networking : An Analytical Approach (Anurag Kumar, D. Manjunath & Joy Kuri)
Solution Manual Principles and Practices of Interconnection Networks (Dally & Towles)
Solution Manual Game Physics (David Eberly)
Solution Manual Engineering a Compiler (Keith Cooper & Linda Torczon)
Solution Manual Constraint Processing (Rina Dechter)
Solution Manual Design Methods for Reactive Systems : Yourdon, Statemate, and the UML (R. J. Wieringa)
Solution Manual Temporal Data & the Relational Model (C.J. Date, Darwen & Lorentzos)
Solution Manual Java Made Simple (2nd Ed., P. K. McBride)
Solution Manual The Firmware Handbook (Jack Ganssle)
Solution Manual Optical Networks : A Practical Perspective (2nd Ed., Ramaswami & Sivarajan)
Solution Manual Optical Networks : A Practical Perspective (3rd Ed., Ramaswami, Sivarajan & Sasaki)
Solution Manual Usability Engineering : Scenario-Based Development of Human-Computer Interaction (Rosson & Carroll)
Solution Manual The Designer's Guide to VHDL (2nd Ed., Peter Ashenden)
Solution Manual Transactional Information Systems : Theory, Algorithms, and the Practice of Concurrency Control and Recovery (Weikum & Vossen)
Solution Manual Parallel Computer Architecture : A Hardware/Software Approach (Culler, Singh & Gupta)
Solution Manual Advanced Compiler Design and Implementation (Steven Muchnick)
Solution Manual Parallel Programming with MPI (Peter Pacheco)
Solution Manual Distributed Algorithms (Nancy Lynch)
Solution Manual Electrical and Electronic : Principles and Technology (3rd Ed., John Bird)
Solution Manual Electrical and Electronic : Principles and Technology (4th Ed., John Bird)
Solution Manual Electrical Circuit Theory and Technology (3rd Ed., John Bird)
Solution Manual Electrical Circuit Theory and Technology (4th Ed., John Bird)
Solution Manual Electronic Circuits : Fundamentals & Applications (3rd Ed., Mike Tooley)
Solution Manual A Practical Guide to SysML : The Systems Modeling Language (Friedenthal, Moore & Steiner)
Solution Manual Multidimensional Signal, Image, and Video Processing and Coding (John Woods)
Solution Manual Bioelectrical Signal Processing in Cardiac and Neurological Applications (Leif Sörnmo & Pablo Laguna)

Solution Manual Foundations of Analog and Digital Electronic Circuits (Anant Agarwal & Jeffrey Lang)
Solution Manual Introduction to Linear Circuit Analysis and Modelling : From DC to RF (Luis Moura & Izzat Darwazeh)
Solution Manual Embedded Systems Architecture : A Comprehensive Guide for Engineers and Programmers (Tammy Noergaard)
Solution Manual Bioimpedance and Bioelectricity Basics (2nd Ed., Grimnes & Martinsen)
Solution Manual Simulation with Arena (5th Ed., Kelton, Sadowski & Swets)
Solution Manual Simulation Modeling and Analysis with ARENA (Tayfur Altiok & Benjamin Melamed)
Solution Manual The Visual Story : Creating the Visual Structure of Film, TV and Digital Media (2nd Ed., Bruce Block)
Solution Manual The Shut Up and Shoot Documentary Guide : A Down & Dirty DV Production (Anthony Artis)
Solution Manual Portable Video : ENG & EFP (5th Ed., Medoff & Fink)
Solution Manual Voice and Vision : A Creative Approach to Narrative Film and DV Production (Mick Hurbis-Cherrier)
Solution Manual Writing for Multimedia and the Web : A Practical Guide to Content Development for Interactive Media (3rd Ed., Timothy Garrand)
Solution Manual Developing and Maintaining a Design-Tech Portfolio : A Guide for Theatre, Film & TV (Rafael Jaen)
Solution Manual Producing for TV and Video : A Real-World Approach (Cathrine Kellison)
Solution Manual Producing for TV and New Media : A Real-World Approach for Producers (2nd Ed., Cathrine Kellison)
Solution Manual Placing Shadows : Lighting Techniques for Video Production (3rd Ed., Gloman & Tom LeTourneau)
Solution Manual Film Directing Fundamentals : See Your Film Before Shooting (3rd Ed., Nicholas Proferes)
Solution Manual Introduction to Media Production : The Path to Digital Media Production (3rd Ed., Musburger & Kindem)
Solution Manual Introduction to Media Production : The Path to Digital Media Production (4th Ed., Kindem & Musburger)
Solution Manual Directing the Documentary (5th Ed., Michael Rabiger)
Solution Manual Video Production Handbook (4th Ed., Gerald Millerson & Jim Owens)
Solution Manual Making Media : Foundations of Sound and Image Production (Jan Roberts-Breslin)
Solution Manual Prepare to Board! Creating Story and Characters for Animation Features and Shorts (Nancy Beiman)
Solution Manual Light and Lens : Photography in the Digital Age (Robert Hirsch)
Solution Manual The Radio Station : Broadcast, Satellite & Internet (7th Ed., Michael Keith)
Solution Manual Developing Story Ideas (2nd Ed., Michael Rabiger)
Solution Manual Radio Production Worktext : Studio and Equipment (5th Ed., Reese, Gross & Gross)

Solution Manual Broadcast News Writing, Reporting, and Producing (4th Ed., Ted White)
Solution Manual Problem Solving and Programming Concepts (7th Ed., Sprankle)
Solution Manual Problem Solving and Programming Concepts (8th Ed., Sprankle & Hubbard)
Solution Manual A Balanced Introduction to Computer Science (2nd Ed., David Reed)
Solution Manual Introduction to Computing and Programming with Java : A Multimedia Approach (Guzdial & Ericson)
Solution Manual Starting Out with Programming Logic and Design (Tony Gaddis)
Solution Manual Starting Out with Programming Logic and Design (2nd Ed., Tony Gaddis)
Solution Manual Tools For Structured and Object-Oriented Design (7th Ed., Bohl & Rynn)
Solution Manual Programming with Alice and Java (Lewis & DePasquale)
Solution Manual e-Business and e-Commerce How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual XML How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto, Ted Lin, Praveen Sadhu)
Solution Manual Python How to Program (Harvey M. Deitel, Paul J. Deitel, Jonathan P. Liperi Ben Wiedermann)
Solution Manual Perl How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto, D. C. McPhie)
Solution Manual C How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual C How to Program (5th Ed., Harvey & Paul Deitel)
Solution Manual C++ How to Program (6th Ed., Harvey & Paul Deitel)
Solution Manual Visual Basic.NET How to Program (2nd Ed., Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual Visual C++ 2008 How to Program (2nd Ed., Harvey & Paul Deitel)
Solution Manual Internet & World Wide Web : How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual Web Technologies : A Computer Science Perspective (Jeffrey C. Jackson)
Solution Manual Mastering the Internet, XHTML and JavaScript (2nd Ed., Ibrahim Zeid)
Solution Manual Weaving a Website : Programming in HTML, Java Script, Perl and Java (Susan Anderson-Freed)
Solution Manual Simply C++ : An Application-Driven Tutorial Approach (Harvey & Paul Deitel)
Solution Manual Visual C# 2005 How to Program (2nd Ed., Harvey & Paul Deitel)
Solution Manual Visual C# 2008 How to Program (3rd Ed., Harvey & Paul Deitel)
Solution Manual Simply C# : An Application-Driven Tutorial Approach (Harvey & Paul Deitel, Hoey & Yaeger)
Solution Manual Java : An Introduction to Problem Solving and Programming (4th Ed., Walter Savitch)

Solution Manual Java : An Introduction to Problem Solving and Programming (5th Ed., Savitch & Carrano)
Solution Manual Introduction to Computing and Programming with Java : A Multimedia Approach (Guzdial & Ericson)
Solution Manual Java How to Program (7th Ed., Harvey & Paul Deitel)
Solution Manual Java For Students (5th Ed., Bell & Parr)
Solution Manual Java, Java, Java, Object-Oriented Problem Solving (3rd Ed., Morelli & Walde)
Solution Manual Java : An Eventful Approach (Bruce, Danyluk & Murtagh)
Solution Manual Introduction to Java Programming with JBuilder (3rd Ed., Y. Daniel Liang)
Solution Manual Starting Out with Visual Basic 2008 (4th Ed., Gaddis & Irvine)
Solution Manual Starting Out with Visual Basic 2010 (5th Ed., Gaddis & Irvine)
Solution Manual Starting Out with Python (Tony Gaddis)
Solution Manual Object-Oriented Programming in Python (Goldwasser & Letscher)
Solution Manual Introduction to MathCAD 11 (Ronald W. Larsen)
Solution Manual Introduction to MathCAD 13 (2nd Ed., Ronald W. Larsen)
Solution Manual MatLAB Programming (David Kuncicky)
Solution Manual Introduction to Maple 8 (David Schwartz)
Solution Manual Introduction to FORTRAN 90 (2nd Ed., Larry R. Nyhoff & Sanford Leestma)
Solution Manual Fortran 95/2003 Scientists and Engineers (3rd Ed., Stephen J. Chapman)
Solution Manual Introduction to Java (Stephen J. Chapman)
Solution Manual Java Software Solutions for AP Computer Science A (2nd Ed., Lewis, Loftus & Cocking)
Solution Manual Business Data Networks and Telecommunications (6th Ed., Raymond R. Panko)
Solution Manual Business Data Networks and Telecommunications (7th Ed., Raymond R. Panko)
Solution Manual Business Data Communications (Allen Dooley)
Solution Manual Object-Oriented Programming in C++ (4th Ed., Robert Lafore)
Solution Manual C++ : Classes and Data Structures (Jeffrey Childs)
Solution Manual Data Structures Outside-In with Java (Sesh Venugopal)
Solution Manual Data Structures and Abstractions with Java (2nd Ed., Frank M. Carrano)
Solution Manual Data Structures and Algorithms in Java (Peter Drake)
Solution Manual Practical Introduction to Data Structures and Algorithm Analysis : C++ Edition (2nd Ed., Clifford A. Shaffer)
Solution Manual Computer Vision : A Modern Approach (David Forsyth & Jean Ponce)
Solution Manual Computer Graphics Using Java 2D and 3D (Hong Zhang & Y. Daniel Liang)
Solution Manual Computer Graphics Using OpenGL (3rd Ed., Francis Hill Jr. & Stephen Kelley)
Solution Manual Computer Graphics with OpenGL (3rd Ed., Donald Hearn &

M. Pauline Baker)
Solution Manual User-Centered Web Site Development : A Human-Computer Interaction Approach (McCracken & Wolfe)
Solution Manual Fundamentals of Game Design (Ernest Adams & Andrew Rollings)
Solution Manual Introduction to The Game Industry (Moore & Sward)
Solution Manual Fundamentals of Math and Physics for Game Programmers (Wendy Stahler)
Solution Manual Usability Engineering : Process, Products & Examples (Laura Leventhal & Julie Barnes)
Solution Manual Web Usability : A User-Centered Design Approach (Jonathan Lazar)
Solution Manual Structured Computer Organization (5th Ed., Andrew S. Tanenbaum)
Solution Manual Assembly Language for Intel-Based Computers (5th Ed., Kip Irvine)
Solution Manual Assembly Language for x86 Processors (6th Ed., Kip R. Irvine)
Solution Manual Fundamentals of Multimedia (Ze-Nian Li & Mark Drew)
Solution Manual Digital Media Primer (Yue-Ling Wong)
Solution Manual Essentials for Design Macromedia Director MX 2004 Comprehensive (Tara Gray)
Solution Manual Modern Systems Analysis and Design (4th Ed., Jeffrey Hoffer, Joey George, & Joseph Valacich)
Solution Manual Modern Systems Analysis and Design (5th Ed., Jeffrey Hoffer, Joey George, & Joseph Valacich)
Solution Manual Modern Database Management (8th Ed., Hoffer, Prescott & Topi)
Solution Manual Modern Database Management (9th Ed., Hoffer, Prescott & Topi)
Solution Manual Database Systems Using Oracle (2nd Ed., Nilesh Shah)
Solution Manual An Advanced Course in Database Systems : Beyond Relational Databases (Dietrich & Urban)
Solution Manual Data and Text Mining : A Business Applications Approach (Thomas Miller)
Solution Manual Network Management : Concepts and Practice, A Hands-On Approach (J. Richard Burke)
Solution Manual Computer and Communication Networks (Nader F. Mir)
Solution Manual High Performance TCP/IP Networking (Mahbub Hassan & Raj Jain)
Solution Manual Computer Security : Principles and Practice (William Stallings & Lawrie Brown)
Solution Manual Computer Forensics : Principles and Practices (Volonino, Anzaldua & Godwin)
Solution Manual Disaster Recovery : Principles and Practices (April Wells, Charlyne Walker & Timothy Walker)
Solution Manual Firewalls and VPNs : Principles and Practices (Richard Tibbs & Edward Oakes)
Solution Manual Network Defense and Countermeasures : Principles and Practices (Chuck Easttom)

Solution Manual Corporate Computer and Network Security (1st Ed., Raymond Panko)
Solution Manual Corporate Computer and Network Security (2nd Ed., Raymond Panko)
Solution Manual IP Telephony Using CallManager Express Lab Portfolio (Cheryl Schmidt & Ernie Friend)
Solution Manual High-Speed Networks and Internets : Performance and Quality of Service (2nd Ed., William Stallings)
Solution Manual Object-Oriented Modeling and Design with UML (2nd Ed., Michael Blaha & James Rumbaugh)
Solution Manual Operating Systems : Internals and Design Principles (5th Ed., William Stallings)
Solution Manual Operating Systems : Internals and Design Principles (6th Ed., William Stallings)
Solution Manual Distributed Systems : Principles and Paradigms (2nd Ed., Tanenbaum & Van Steen)
Solution Manual Modern Operating Systems (3rd Ed., Andrew Tanenbaum)
Solution Manual Operating Systems Design and Implementation (3rd Ed., Andrew Tanenbaum & Albert Woodhull)
Solution Manual UNIX Unbounded : A Beginning Approach (5th Ed., Amir Afzal)
Solution Manual Introduction to Operating Systems and Networks (Ruth Watson)
Solution Manual Operating Systems (3rd Ed., Harvey Deitel, Paul Deitel & David Choffnes)
Solution Manual Operating Systems Principles (Lubomir Bic & Alan Shaw)
Solution Manual A Practical Guide to Linux : Commands, Editors, and Shell Programming (Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Hat Enterprise Linux (2nd Ed., Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Hat Enterprise Linux (3rd Ed., Mark Sobell)
Solution Manual A Practical Guide to Fedora and Red Hat Enterprise Linux: College Edition (Mark Sobell)
Solution Manual A Practical Guide to Ubuntu Linux (Mark Sobell)
Solution Manual Automata, Computability and Complexity : Theory and Applications (Elaine Rich)
Solution Manual Modern Digital Electronics (R.P. Jain)
Solution Manual Linear Systems and Signals (B.P. Lathi)
Solution Manual Modern Digital and Analog Communications Systems (3rd Ed., B. P. Lathi)
Solution Manual Introduction to Digital Systems (Milo D. Ercegovac, Lang & Moreno)
Solution Manual Embedded Systems : Architechture, Programming and Design (Raj Kamal)
Solution Manual Modern Power System Analysis (D. P. Kothari & I. J. Nagrath)
Solution Manual Basic Electrical Engineering (2nd Ed., D.P. Kothari, I.J. Nagrath)
Solution Manual Electric Machines (3rd Ed., D.P. Kothari, I.J.

Nagrath)
Solution Manual Circuits and Networks (A. Sudhakar & S. Palli Shyammohan)
Solution Manual Electrical and Electronic Technology (9th Ed., Edward Hughes, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electrical and Electronic Technology (10th Ed., Edward Hughes, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electric Motors and Drives : Fundamentals, Types and Applications (3rd Ed., Austin Hughes)
Solution Manual Modern Processor Design : Fundamentals of Superscalar Processors (John P. Shen)
Solution Manual Computer Networks : Principles, Technologies and Protocols for Network Design (N. Olifer & V. Olifer)
Solution Manual Computer Networking : Internet Protocols in Action (Jeanna Matthews)
Solution Manual Computer Organization (5th Ed., Hamacher et al.)
Solution Manual CMOS Digital Integrated Circuits : Analysis and Design (3rd Ed., Sung-Mo Kang & Yusuf Leblebici)
Solution Manual Introduction to Logic Design (1st Ed., Alan B Marcovitz)
Solution Manual Introduction to Logic Design (2nd Ed., Alan B Marcovitz)
Solution Manual Introduction to Logic Design (3rd Ed., Alan B Marcovitz)
Solution Manual Introduction to Logic and Computer Design (Alan B Marcovitz)
Solution Manual Digital Principles and Design (Donald D. Givone)
Solution Manual Programmable Logic Controllers (3rd Ed., Frank Petruzella)
Solution Manual Antenna Theory and Design (2nd Ed., Stutzman & Thiele)
Solution Manual Antennas for All Applications (3rd Ed., John Kraus & Ronald Marhefka)
Solution Manual Principles of Neurocomputing for Science and Engineering (Fredric M. Ham & Ivica Kostanic)
Solution Manual Introduction to Algorithms (2nd Ed., Cormen, et al.)
Solution Manual Algorithms (Dasgupta, et al.)
Solution Manual Applied Operating Systems Concepts (Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (6th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (7th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (8th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating Systems Concepts with Java (6th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (7th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (8th Ed., Silberschatz, Galvin & Gagne)

Solution Manual C++ Program Design (3rd Ed., Cohoon & Davidson)
Solution Manual Java : Program Design 5.0 (Cohoon & Davidson)
Solution Manual Programming in C++ : Lessons and Applications (Timothy B. D'Orazio)
Solution Manual Applied C : An Introduction and More (Alice Fischer)
Solution Manual Programming Languages : Principles and Paradigms (1st Ed., Allen Tucker & Robert Noonan)
Solution Manual Programming Languages : Principles and Paradigms (2nd Ed., Allen Tucker & Robert Noonan)
Solution Manual Introduction to Parallel Computing (2nd Ed., Grama, Karypis, Kumar & Gupta)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael J Quinn)
Solution Manual Data Communications and Network Security (Houston H. Carr & Charles Snyder)
Solution Manual Data Communications and Networks (David Miller)
Solution Manual Management Information Systems (3rd Ed., Post & Anderson)
Solution Manual Management Information Systems (4th Ed., Post & Anderson)
Solution Manual Database Management Systems (3rd Ed. Post)
Solution Manual Management Information Systems (9th Ed., James A. O'Brien, George Marakas)
Solution Manual Introduction to Systems Analysis and Design (Whitten & Bentley)
Solution Manual Systems Analysis & Design : An Active Approach (2nd Ed., Marakas)
Solution Manual An Introduction to Object-Oriented Programming with Java (4th Ed., C. Thomas Wu - Otani)
Solution Manual An Introduction to Object-Oriented Programming with Java (5th Ed., C. Thomas Wu - Otani)
Solution Manual A Comprehensive Introduction to Object-Oriented Programming With Java (C. Thomas Wu)
Solution Manual Data Structures and the Java Collections Framework (1st Ed., William Collins)
Solution Manual Data Structures and the Java Collections Framework (2nd Ed., William Collins)
Solution Manual Data Structures and the Standard Template Library (William Collins)
Solution Manual Database System Concepts (4th Ed., Silberschatz)
Solution Manual Database System Concepts (5th Ed., Silberschatz)
Solution Manual Database System Concepts (6th Ed., Silberschatz, Korth & Sudarshan)
Solution Manual Database Management Systems (3rd Ed., Ramakrishnan & Gehrke)
Solution Manual Fundamentals of Network Security (Eric Maiwald)
Solution Manual Computing Concepts (1st Ed., Haag, et al.)
Solution Manual Computing Concepts (2nd Ed., Haag et al.)
Solution Manual Microsoft Office 2003 (Haag et al.)
Solution Manual Advanced Programming Using Visual Basic .NET (2nd Ed.,

Julia Case Bradley & Anita Millspaugh)
Solution Manual Advanced Programming Using Visual Basic 2005 (3rd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming with Java (Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in C#.Net (1st Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual C# 2005 (2nd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Learning Programming Using Visual Basic.Net (Bill Burrows & Joe Lanford)
Solution Manual Programming in Visual Basic.NET : Visual Basic.NET 2005 (6th Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual Basic .Net : 2003 Update Edition (5th Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Survey of Operating Systems (2nd Ed., Jane Holcombe & Charles Holcombe)
Solution Manual Principles of Voice and Data Communications (Regis J. Bates & Marcus Bates)
Solution Manual Mike Meyers' Network+ Guide To Managing and Troubleshooting Networks (Michael Meyers)
Solution Manual Introduction to Windows Server 2003 (Eric Ecklund)
Solution Manual Programming The Web : An Introduction (Barrie Sosinsky & Valda Hilley)
Solution Manual Programming The Web Using XML (Ellen Pearlman & Eileen Mullin)
Solution Manual Internet Marketing : Building Advantage in a Networked Economy (2nd Ed., Rafi Mohammed et al.)
Solution Manual Internet Technologies at Work (Fred T. Hofstetter)
Solution Manual Internet Literacy (4th Ed., Fred T. Hofstetter)
Solution Manual Software Engineering : A Practitioner's Approach (5th Ed., Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (6th Ed., Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (7th Ed., Roger Pressman)
Solution Manual Web Engineering : A Practioner's Approach (1st Ed., Roger S. Pressman & David Lowe)
Solution Manual Object-Oriented Software Engineering (Stephen Schach)
Solution Manual Object-Oriented and Classical Software Engineering (5th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (6th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (7th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (8th Ed., Steve Schach)
Solution Manual Introduction to Object-Oriented Analysis and Design (Steve Schach)
Solution Manual Communication Networks (2nd Ed., Alberto Leon-Garcia &

Indra Widjaja)
Solution Manual Fundamentals of Digital Logic with Verilog Design (1st Ed., Stephen Brown & Zvonko Vranesic)
Solution Manual Fundamentals of Digital Logic with Verilog Design (2nd Ed., Stephen Brown & Zvonko Vranesic)
Solution Manual Continuous and Discrete Control Systems (John Dorsey)
Solution Manual Engineering Circuit Analysis (6th Ed., William Hayt, Jack Kemmerly & Steven Durbin)
Solution Manual Engineering Circuit Analysis (7th Ed., William Hayt, Jack Kemmerly & Steven Durbin)
Solution Manual Engineering Electromagnetics (7th Ed., William Hayt & John Buck)
Solution Manual Principles of Electronic Materials and Devices (2nd Ed., Safa O. Kasap)
Solution Manual Principles of Electronic Materials and Devices (3rd Ed., Safa O. Kasap)
Solution Manual Programming in Haskell (Graham Hutton)
Solution Manual Probability and Random Processes With Applications to Signal Processing and Communications (Miller & Childers)
Solution Manual Logic in Computer Science : Modelling and Reasoning about Systems (2nd Ed., Michael Huth & Mark Ryan)
Solution Manual Introduction to Distributed Algorithms (2nd., Gerard Tel)
Solution Manual Information Theory, Inference and Learning Algorithms (David J. C. MacKay)
Solution Manual Digital Systems Engineering (William Dally & John Poulton)
Solution Manual Concepts in Programming Languages (by John Mitchell)
Solution Manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kealton)
Solution Manual Simulation Modeling and Analysis with Expertfit Software (4th Ed., Averill Law)
Solution Manual System Modeling and Analysis : Foundations of System Performance Evaluation (Hisashi Kobayashi & Brian Mark)
Solution Manual Wireless Communications (Andrea Goldsmith)
Solution Manual Testing of Digital Systems (N. K. Jha & S. Gupta)
Solution Manual Space-Time Coding (Hamid Jafarkhani)
Solution Manual Space-Time Block Coding for Wireless Communications (Erik Larsson & Petre Stoica)
Solution Manual Smart Electronic Materials : Fundamentals and Applications (Jasprit Singh)
Solution Manual Radio-Frequency Electronics : Circuits and Applications (Jon Hagen)
Solution Manual Photonic Devices (Jia-ming Liu)
Solution Manual Networking Wireless Sensors (Bhaskar Krishnamachari)
Solution Manual Mobile Wireless Communications (Mischa Schwartz)
Solution Manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution Manual Fundamentals of Wireless Communication (David Tse & Pramod Viswanath)
Solution Manual Fundamentals of Modern VLSI Devices (Yuan Taur & Tak

H. Ning)
Solution Manual Electronic and Optoelectronic Properties of Semiconductor Structures (Jasprit Singh)
Solution Manual An Introduction to Statistical Signal Processing (Robert M. Gray)
Solution Manual An Introduction to Radio Frequency Engineering (Christopher Coleman)
Solution Manual Algebraic Codes for Data Transmission (Richard Blahut)
Solution Manual Fundamentals of Solid State Electronics (C.T. Sah)
Solution Manual Fundamentals of Solid State Engineering (2nd Ed., Manijeh Razeghi)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Control (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. Santibáñez, A. Loría)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed., Lorenzo Sciavicco, Bruno Siciliano)
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Semiconductor Fabrication (Gary S. May, Simon M. Sze)
Solution Manual Semiconductor Devices : Physics and Technology (2nd Ed, Simon M. Sze)
Solution Manual Physics of Semiconductor Devices (3rd Ed., Simon M. Sze, Kwok K. Ng)
Solution Manual Electric Machinery (6th Ed., Fitzgerald)
Solution Manual Electric Machinery Fundamentals (4th Ed., Chapman)
Solution Manual Electric Machinery and Power System Fundamentals (Chapman)
Solution Manual Local Area Networks (2nd Ed., Keiser)
Solution Manual Signals and Systems : Analysis of Signals Through Linear Systems (1st Ed., M.J. Roberts)
Solution Manual Fundamentals of Signals and Systems (M.J. Roberts)
Solution Manual Introduction to Signals and Systems (Lindner)
Solution Manual Semiconductor Physics and Devices (3rd Ed., Donald Neamen)
Solution Manual An Introduction to Semiconductor Devices (Donald Neamen)
Solution Manual Microelectronic Circuit Analysis and Design (3rd Ed., Donald Neamen)
Solution Manual Electronic Circuit Analysis and Design (2nd Ed., Donald Neamen)
Solution Manual Design for Electrical and Computer Engineers (1st Ed., Ralph Ford & Chris Coulston)
Solution Manual Fundamentals of Modeling and Analyzing Engineering Systems (Cha, Rosenberg, Dym)
Solution Manual Linear Systems (Panos J. Antsaklis & Anthony N. Michel)

Solution Manual A Linear Systems Primer (Panos J. Antsaklis & Anthony N. Michel)
Solution Manual Principles of Linear Systems (Philip E. Sarachik)
Solution Manual Linear Systems Control : Deterministic and Stochastic Methods (Elbert Hendricks, Ole Jannerup & Paul Haase Sørensen)
Solution Manual Power Systems Harmonics : Fundamentals, Analysis and Filter Design (George J. Wakileh)
Solution Manual Principles of Adaptive Filters and Self-learning Systems (Anthony Zaknich)
Solution Manual Algebraic Methods for Nonlinear Control Systems (2nd Ed., Conte, Moog & Perdon)
Solution Manual Discrete-Time Control Systems (2nd Ed., K. Ogata)
Solution Manual Modern Control Engineering - Problems B (3rd Ed., K. Ogata)
Solution Manual Modern Control Engineering (4th Ed., K. Ogata)
Solution Manual Modern Control Engineering (5th Ed., K. Ogata)
Solution Manual Modern Control Engineering - International Version (5th Ed., K. Ogata)
Solution Manual LabVIEW 8 Student Edition (Bishop)
Solution Manual LabVIEW 2009 Student Edition (Bishop)
Solution Manual Learning with LabVIEW 2009 (Bishop)
Solution Manual Introduction to Feedback Control (Li Qiu & Kemin Zhou)
Solution Manual Modeling and Simulation of Dynamic Systems (Robert Woods, Jr. & Kent Lawrence)
Solution Manual Feedback Control of Dynamic Systems (4th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems (5th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems (6th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems - International Version (6th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Predictive Control with Constraints (Jan Maciejowski)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Stenerson & Curran)
Solution Manual Engineering Problem Solving with C (3rd Ed., Etter)
Solution Manual Engineering Problem Solving with C++ (2nd Ed., Etter)
Solution Manual Process Control Instrumentation Technology (8th Ed., Johnson)
Solution Manual Electrical Power and Controls (2nd Ed., Skvarenina & DeWitt)
Solution Manual Electronics and Computer Math (8th Ed., Deem & Zannini)
Solution Manual Circuits, Signals, and Systems for Bioengineers : A MATLAB-Based Introduction (John Semmlow)
Solution Manual VLSI Test Principles and Architectures : Design for Testability (Laung-Terng Wang, Cheng-Wen Wu & Xiaoqing Wen)
Solution Manual Mechatronics : Principles and Applications (Godfrey Onwubolu)
Solution Manual Machine Vision : Theory, Algorithms, Practicalities

(3rd Ed., E. R. Davies)
Solution Manual Essential Java for Scientists and Engineers (Brian D. Hahn & Katherine M. Malan)
Solution Manual Guide to Microsoft Excel 2002 for Scientists and Engineers (3rd Ed., Bernard V. Liengme)
Solution Manual 10-Key Touch Key : Developing Speed and Accuracy (Burton)
Solution Manual Introduction to C++ Programming, Brief Version (Y. Daniel Liang)
Solution Manual Introduction to C++ Programming, Comprehensive (Y. Daniel Liang)
Solution Manual C++ for Business Programmers (2nd Ed., John C. Molluzzo)
Solution Manual Introduction to Java Programming - Brief Version (7th Ed., Liang)
Solution Manual Introduction to Java Programming - Brief Version (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Brief Version - International Edition (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (6th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (7th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version - International Edition (8th Ed., Liang)
Solution Manual Introduction to Java Programming : Fundamentals First (6th Ed., Y. Daniel Liang)
Solution Manual Objects First With Java : A Practical Introduction Using BlueJ (3rd Ed., Barnes & Kolling)
Solution Manual Simply Java Programming : An Application-Driven™ Tutorial Approach (Deitel)
Solution Manual Java : An Introduction to Computing (Joel Adams, Larry R. Nyhoff & Jeffrey Nyhoff)
Solution Manual Advanced Java™ 2 Platform How to Program (Deitel & Santry)
Solution Manual SQL for SQL Server (Bijoy Bordoloi & Douglas B. Bock)
Solution Manual SQL Clearly Explained (3rd Ed., Jan Harrington)
Solution Manual An Introduction to Programming Using Visual Basic 2005 (6th Ed., Schneider)
Solution Manual An Introduction to Programming Using Visual Basic 2008 (7th Ed., Schneider)
Solution Manual An Introduction to Programming Using Visual Basic 2010 (8th Ed., Schneider)
Solution Manual Simply Visual Basic .NET (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual Simply Visual Basic 2005 (2nd Ed., Harvey & Paul Deitel & Associates)
Solution Manual Simply Visual Basic 2008 (3rd Ed., Harvey & Paul

Deitel & Associates)
Solution Manual Visual Basic 2005 How to Program (3rd Ed., Deitel & Associates)
Solution Manual Visual Basic 2008 How to Program (4th Ed., Deitel & Associates)
Solution Manual An Introduction to Programming with Visual Basic 6.0 (4th Ed., Schneider)
Solution Manual Visual Basic.Net Programming (2nd Ed., Jeffrey Tsay)
Solution Manual Simply Visual Basic .NET (Harvey & Paul Deitel & Nieto)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual PC Systems, Installation and Maintenance (2nd Ed., R.P. Beales)
Solution Manual Introduction to Linear Programming (Leonid N. Vaserstein)
Solution Manual Electric Circuits Fundamentals (8th Ed., Thomas Floyd)
Solution Manual Introductory Circuit Analysis (11th Ed., Robert L. Boylestad)
Solution Manual Introductory Circuit Analysis (12th Ed., Robert L. Boylestad)
Solution Manual Principles of Electric Circuits : Conventional Current Version (8th Ed., Thomas Floyd)
Solution Manual Principles of Electric Circuits : Conventional Current Version (9th Ed., Thomas Floyd)
Solution Manual Principles of Electric Circuits : Electron Flow Version (8th Ed., Thomas L. Floyd)
Solution Manual Principles of Electric Circuits : Electron Flow Version (9th Ed., Thomas L. Floyd)
Solution Manual Contemporary Electric Circuits : Insights and Analysis (2nd ed., Strangeway, Petersen, Gassert & Lokken)
Solution Manual Introductory Electronic Devices and Circuits : Electron Flow Version (7th Ed., Paynter)
Solution Manual Introductory Electronic Devices and Circuits : Conventional Flow Version (7th Ed., Paynter)
Solution Manual Electronics Technology Fundamentals : Conventional Flow (2nd Ed., Robert T. Paynter & Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Conventional Flow (3rd Ed., Robert T. Paynter & Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Electron Flow (2nd Ed., Robert T. Paynter, Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Electron Flow (3rd Ed., Robert T. Paynter, Toby Boydell)
Solution Manual Introductory DC/AC Circuits (6th Ed., Nigel P. Cook)
Solution Manual Introductory DC/AC Electronics (6th Ed., Nigel P. Cook)
Solution Manual Electronic Devices : Conventional Current Version (7th Ed., Floyd)
Solution Manual Electronic Devices : Conventional Current Version (8th Ed., Floyd)
Solution Manual Electronic Devices : Electron Flow Version (7th,

Floyd)
Solution Manual Electronic Devices : Electron Flow Version (8th, Floyd)
Solution Manual Electronics Fundamentals : Circuits, Devices and Applications (7th Ed., Thomas L. Floyd)
Solution Manual Electronics Fundamentals : Circuits, Devices and Applications (8th Ed., Floyd & Buchla)
Solution Manual Electronic Devices and Circuit Theory (9th Ed., Boylestad, Nashelsky)
Solution Manual Electronic Devices and Circuit Theory (10th Ed., Boylestad, Nashelsky)
Solution Manual The Science of Electronics : DC/AC (David M. Buchla, Thomas L. Floyd)
Solution Manual The Science of Electronics : Digital (Floyd & Buchla)
Solution Manual The Science of Electronics: Analog Devices (Floyd & Buchla)
Solution Manual Digital Electronics : A Practical Approach (7th Ed., Kleitz)
Solution Manual Digital Electronics : A Practical Approach (8th Ed., Kleitz)
Solution Manual Digital Systems : Principles and Applications (10th Ed., Tocci, Widmer & Moss)
Solution Manual Digital Electronics with VHDL - Quartus II Version (Kleitz)
Solution Manual Digital Fundamentals (9th Ed., Floyd)
Solution Manual Digital Fundamentals (10th Ed., Floyd)
Solution Manual Digital Fundamentals with PLD Programming (Thomas L. Floyd)
Solution Manual The 8051 Microcontroller (4th Ed., MacKenzie & Chung-Wei Phan)
Solution Manual The 8051 Microcontroller and Embedded Systems (2nd Ed., Muhammad Ali Mazidi, Janice Mazidi & Rolin McKinlay)
Solution Manual INTEL Microprocessors 8086/8088, 80186/80188, 80286, 80386, 80486, Pentium, Prentium ProProcessor, Pentium II, III, 4, (7th Ed., Barry B. Brey)
Solution Manual Microcontroller Technology : The 68HC11 (5th Ed., Peter Spasov)
Solution Manual PIC Microcontroller (Muhammad Ali Mazidi, Rolin McKinlay & Danny Causey)
Solution Manual HCS12 Microcontrollers and Embedded Systems : Using Assembly and C with CodeWarrior (Muhammad Ali Mazidi, Danny Causey & Janice Mazidi)
Solution Manual The x86 PC : Assembly Language, Design, and Interfacing (5th Ed., Muhammad Ali Mazidi, Janice Mazidi & Danny Causey)
Solution Manual The AVR Microcontroller and Embedded Systems : Using Assembly and C (Muhammad Ali Mazidi, Sarmad Naimi & and Sepehr Naimi)
Solution Manual Industrial Electronics (James A. Rehg, Glenn J. Sartori)
Solution Manual Programmable Controllers Using the Allen-Bradley

SlC-500 Family (2nd Ed., Dave Geller)
Solution Manual Programmable Logic Controllers (James A. Rehg, Glenn J. Sartori)
Solution Manual Fundamentals of Programmable Logic Controllers, Sensors, and Communications (3rd Ed., Jon Stenerson)
Solution Manual An Introduction to Programming with Visual Basic 6.0, Update Edition (4th Ed., Schneider)
Solution Manual C++ Programming Today (1st Ed., Barbara Johnston)
Solution Manual C++ Programming Today (2nd Ed., Barbara Johnston)
Solution Manual Introduction to Data Communications and Networking (Wayne Tomasi)
Solution Manual Introduction to Telecommunications (2nd Ed., Martha Rosengrant)
Solution Manual Network Security Essentials : Applications and Standards (3rd Ed., William Stallings)
Solution Manual Network Security Essentials : Applications and Standards (4th Ed., William Stallings)
Solution Manual Information Security: Principles and Practices (Mark Merkow, James Breithaupt)
Solution Manual Principles and Practice of Information Security (Linda Volonino, Stephen R. Robinson)
Solution Manual Principles of Electronic Communication Systems (3rd Ed., Louis E. Frenzel)
Solution Manual Modern Electronic Communication (8th Ed., Jeff Beasley, Gary M. Miller)
Solution Manual Modern Electronic Communication (9th Ed., Jeff Beasley, Gary M. Miller)
Solution Manual Electronic Communications for Technicians (2nd ed., Tom Wheeler)
Solution Manual Concepts In Systems and Signals (2nd Ed., John D. Sherrick)
Solution Manual Understanding Fiber Optics (5th Ed., Jeff Hecht)
Solution Manual Understanding UNIX/LINUX Programming : A Guide to Theory and Practice (Bruce Molay)
Solution Manual Applying PIC18 Microcontrollers : Architecture, Programming, and Interfacing using C and Assembly (Barry Brey)
Solution Manual Electrical Power and Controls (2nd Ed., Timothy L. Skvarenina, William E. DeWitt)
Solution Manual Process Control Instrumentation Technology (8th Ed., Curtis Johnson)
Solution Manual Electrical Machines, Drives and Power Systems (6th Ed., Theodore Wildi)
Solution Manual Introduction to Vacuum Technology (David M. Hata)
Solution Manual Electronic Project Design and Fabrication (6th Ed., Ronald A. Reis)
Solution Manual Technology and Society (3rd Ed., Linda Hjorth, Barbara A. Eichler, Ahmed S. Khan, John Morello)
Solution Manual Solid State Electronic Devices (6th Ed., Ben Streetman, Sanjay Banerjee)
Solution Manual Approaching Quantum Computing (Dan C. Marinescu &

Gabriela M. Marinescu)
Solution Manual Foundations of MEMS (Chang Liu)
Solution Manual Basic Electromagnetics with Applications (Nannapaneni Narayana Rao)
Solution Manual Elements of Engineering Electromagnetics (6th Ed., Nannapaneni Narayana Rao)
Solution Manual Fundamentals of Electromagnetics for Electrical and Computer Engineering (Nannapaneni Narayana Rao)
Solution Manual Digital Design (4th Ed., M. Morris Mano & Michael D. Ciletti)
Solution Manual Digital Design : Principles and Practices Package (4th Ed., John F. Wakerly)
Solution Manual VHDL: A Starter's Guide (2nd Ed., Sudhakar Yalamanchili)
Solution Manual Computer Organization and Architecture : Designing for Performance (7th Ed., William Stallings)
Solution Manual Computer Organization and Architecture : Designing for Performance (8th Ed., William Stallings)
Solution Manual Parallel Programming : Techniques and Applications Using Networked Workstations and Parallel Computers (2nd Ed., Barry Wilkinson & Michael Allen)
Solution Manual Fundamentals of Parallel Processing (Harry F. Jordan & Gita Alaghband)
Solution Manual Digital and Analog Communication Systems (7th Ed., Leon W. Couch)
Solution Manual Digital Communications (4th Ed., John Proakis)
Solution Manual Digital Communications (5th Ed., John Proakis)
Solution Manual Principles of Digital Communication and Coding (Andrew J. Viterbi, Jim K. Omura)
Solution Manual Modern Wireless Communications (Simon Haykin, Michael Moher)
Solution Manual Communication Systems Engineering (2nd Ed., John G. Proakis & Masoud Salehi)
Solution Manual ISDN and Broadband ISDN with Frame Relay and ATM (4th Ed., William Stallings)
Solution Manual Data and Computer Communications (8th Ed., William Stallings)
Solution Manual Cryptography and Network Security (4th Ed., William Stallings)
Solution Manual Cryptography and Network Security : Principles and Practice (5th Ed., William Stallings)
Solution Manual Computer Networking with Internet Protocols (William Stallings)
Solution Manual Local and Metropolitan Area Networks (6th Ed., William Stallings)
Solution Manual Probabilistic Systems and Random Signals (Abraham Haddad)
Solution Manual Error Control Coding (2nd Ed., Shu Lin & Daniel J. Costello)
Solution Manual Wireless Communications & Networks (2nd ed., William

Stallings)
Solution Manual Wireless Communications and Networking (Jon W. Mark, Weihua Zhuang)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur Giordano)
Solution Manual Signals, Systems, and Transforms (3rd Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Signals, Systems, and Transforms (4th Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Signals, Systems, and Transforms - International Version (4th Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Fundamentals of Signals and Systems Using the Web and Matlab (3rd Ed., Edward Kamen & Bonnie Heck)
Solution Manual Adaptive Filter Theory (4th Ed., Simon Haykin)
Solution Manual Neural Networks and Learning Machines (3rd Ed., Simon Haykin)
Solution Manual Spectral Analysis of Signals (Petre Stoica & Randolph L. Moses)
Solution Manual Fluency with Information Technology : Skills, Concepts, and Capabilities (2nd Ed., Snyder)
Solution Manual Fluency with Information Technology : Skills, Concepts, and Capabilities (3rd Ed., Snyder)
Solution Manual Fluency with Information Technology, Brief Edition (Lawrence Snyder)
Solution Manual Excel 2003 Volume II: Advanced Concepts in Excel (5th Ed., Karen Jolly)
Solution Manual Focus on Excel 2003 (Julie Hayward Spooner)
Solution Manual Comprehensive Excel 2002 for Office XP (4th Ed., Karen Jolly)
Solution Manual Ethics for the Information Age (2nd Ed., Michael Quinn)
Solution Manual Ethics for the Information Age (3rd Ed., Michael Quinn)
Solution Manual Computer Science : An Overview (8th Ed., J. Glenn Brookshear)
Solution Manual Computer Science : An Overview (9th Ed., J. Glenn Brookshear)
Solution Manual Computer Science : An Overview (10th Ed., J. Glenn Brookshear)
Solution Manual Excel 2003 Volume 1 : Core Concepts in Excel (5th Ed., Karen J. Jolly)
Solution Manual Concise Prelude to Programming : Concepts and Design (2nd Ed., Stewart Venit)
Solution Manual Concise Prelude to Programming (3rd Ed., Stewart Venit & Elizabeth Drake)
Solution Manual Extended Prelude to Programming : Concepts and Design (2nd Ed., Stewart Venit)
Solution Manual Extended Prelude to Programming (3rd Ed., Stewart Venit & Elizabeth Drake)
Solution Manual Logic and Design of Computer Programs (Jim Messinger)

Solution Manual Absolute C++ (2nd Ed., Walter Savitch)
Solution Manual Absolute C++ (3rd Ed., Walter Savitch)
Solution Manual Absolute C++ (4th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ : The Object of Programming (5th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (6th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (7th Ed., Walter Savitch)
Solution Manual Problem Solving, Abstraction, and Design using C++ (4th Ed., Frank Friedman & Elliot Koffman)
Solution Manual Problem Solving, Abstraction & Design Using C++ (5th Ed., Frank Friedman & Elliot Koffman)
Solution Manual Starting Out with C++ : From Control Structures through Objects (5th Ed., Tony Gaddis)
Solution Manual Starting Out with C++ : From Control Structures through Objects (6th Ed., Tony Gaddis)
Solution Manual Starting Out with C++ : From Control Structures through Objects - Brief Version (6th Ed., Tony Gaddis)
Solution Manual Starting out with C++ Brief Version Updated (4th Ed., Gaddis & Krupnow)
Solution Manual Starting out with C++ Brief Version (5th Ed., Gaddis & Krupnow)
Solution Manual Starting Out with C++ : Brief Version Update, Visual C++ .NET (4th Ed., Gaddis & Krupnow)
Solution Manual Starting Out with C++ : Early Objects (5th Ed., Gaddis, Walters & Muganda)
Solution Manual Starting Out with C++ : Early Objects (6th Ed., Gaddis, Walters & Muganda)
Solution Manual Starting Out with C++ : Early Objects (7th Ed., Gaddis, Walters & Muganda)
Solution Manual C++ By Dissection (Ira Pohl)
Solution Manual Essential C++ for Engineers and Scientists (2nd Ed., Jeri Hanly)
Solution Manual C++ Coach : Essentials for Introductory Programming (Jeff Salvage)
Solution Manual C++ Primer (4th Ed., Stanley Lippman, Josée Lajoie & Barbara Moo)
Solution Manual Engineering Computation with MATLAB (1st Ed., David Smith)
Solution Manual Engineering Computation with MATLAB (2nd Ed., David Smith)
Solution Manual Absolute Java (1st Ed., Walter Savitch)
Solution Manual Absolute Java (2nd Ed., Walter Savitch)
Solution Manual Absolute Java (3rd Ed., Walter Savitch)
Solution Manual Absolute Java (4th Ed., Walter Savitch)
Solution Manual The Art and Science of Java (Eric Roberts)
Solution Manual Building Java Programs : A Back to Basics Approach (Stuart Reges & Martin Stepp)
Solution Manual Introduction to Programming in Java : An Interdisciplinary Approach (Robert Sedgewick & Kevin Wayne)
Solution Manual Java Foundations: Introduction to Program Design and

Data Structures (John Lewis, Peter DePasquale & Joe Chase)
Solution Manual Starting Out with Java : Early Objects (3rd Ed., Gaddis)
Solution Manual Starting Out with Java : From Control Structures through Objects (3rd Ed., Gaddis)
Solution Manual Starting Out with Java : From Control Structures through Objects (4th Ed., Gaddis)
Solution Manual Java Software Solutions (Java 5.0 version) : Foundations of Program Design (4th Ed., Lewis & Loftus)
Solution Manual Java Software Solutions : Foundations of Program Design (5th Ed., Lewis & Loftus)
Solution Manual Java Software Solutions : Foundations of Program Design (6th Ed., Lewis & Loftus)
Solution Manual Starting Out with Java : From Control Structures through Data Structures (Gaddis & Muganda)
Solution Manual Object of Java, The: Introduction to Programming Using Software Engineering Principles (2nd Ed, David Riley)
Solution Manual Object-Oriented Programming in Java : A Graphical Approach, Preliminary Edition (Kathryn E. Sanders & Andy van Dam)
Solution Manual Starting Out with Java 5 : Control Structures to Objects (Tony Gaddis)
Solution Manual Starting Out with Java 5 : Early Objects (Tony Gaddis)
Solution Manual Introduction to Programming Using Java : An Object-Oriented Approach (2nd Ed., David Arnow, Scott Dexter & Gerald Weiss)
Solution Manual Computing with Java (2nd Ed., Art Gittleman)
Solution Manual Problem Solving with Java, Update (2nd Ed., Elliot B. Koffman & Ursula Wolz)
Solution Manual Starting Out with Alice : A Visual Introduction to Programming (Tony Gaddis)
Solution Manual Problem Solving and Program Design in C (4th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Problem Solving and Program Design in C (5th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Problem Solving and Program Design in C (6th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Starting Out with Visual Basic 2005 (3rd Ed., Tony Gaddis & Kip Irvine)
Solution Manual Starting Out with Visual Basic 6 (Tony Gaddis, Kip Irvine & Bruce Denton)
Solution Manual Starting Out with Visual Basic.Net (2nd Ed., Tony Gaddis, Kip Irvine & Bruce Denton)
Solution Manual Computer Programming Fundamentals with Applications in Visual Basic® 6.0 (Mitchell Kerman & Ronald Brown)
Solution Manual Advanced VB.NET Alternate with VB.Net CD's (3rd Ed., Kip Irvine & Tony Gaddis)
Solution Manual Advanced Visual Basic 2005 (4th Ed., Kip Irvine & Tony Gaddis)
Solution Manual C# Software Solutions : Foundations of Program Design (John Lewis)
Solution Manual Problem Solving, Abstraction and Design Using C++,

Visual C++.NET Edition (Frank Friedman & Elliot Koffman)
Solution Manual Ada 95 : Problem Solving and Program Design (3rd Ed., Michael Feldman & Elliot Koffman)
Solution Manual Programming and Problem Solving with Delphi (Mitchell Kerman)
Solution Manual C Program Design for Engineers (2nd Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Data Abstraction & Problem Solving with C++ (5th ed., Frank Carrano)
Solution Manual Data Structures and Algorithm Analysis in C++ (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Algorithm Analysis in C++ (3rd Ed., Mark Allen Weiss)
Solution Manual Data Abstraction and Problem Solving with C++ : Walls and Mirrors (4th Ed., Frank Carrano)
Solution Manual Data Structures and Problem Solving Using C++ (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Algorithm Analysis in Java (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures in Java : From Abstract Data Types to the Java Collections Framework (Simon Gray)
Solution Manual Data Abstraction and Problem Solving with Java (2nd Ed., Frank Carrano & Janet Prichard)
Solution Manual Data Structures and Other Objects Using Java (3rd Ed., Michael Main)
Solution Manual Data Structures and Problem Solving Using Java (3rd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Problem Solving Using Java (4th Ed., Mark Allen Weiss)
Solution Manual Java Software Structures : Designing and Using Data Structures (2nd Ed., John Lewis, Joseph Chase)
Solution Manual The Object of Data Abstraction and Structures (using Java) (David Riley)
Solution Manual Classic Data Structures in Java (Timothy Budd)
Solution Manual Data Structures in Java (Thomas A. Standish)
Solution Manual Data Structures, Algorithms and Software Principles in C (Thomas A. Standish)
Solution Manual Introduction to the Design and Analysis of Algorithms (1st Ed., Anany Levitin)
Solution Manual Introduction to the Design and Analysis of Algorithms (2nd Ed., Anany Levitin)
Solution Manual Algorithm Design (Jon Kleinberg & Éva Tardos)
Solution Manual Data Structures and Algorithm Analysis in C (2nd Ed., Mark Allen Weiss)
Solution Manual Computer Algorithms : Introduction to Design and Analysis (3rd Ed., Sara Baase & Allen Van Gelder)
Solution Manual Artificial Intelligence : Structures and Strategies for Complex Problem Solving (6th Ed., George Luger)
Solution Manual Artificial Intelligence : A Modern Approach (2nd Ed., Stuart Russell & Peter Norvig)

Solution Manual The Complete A+ Guide to PC Repair (3rd Ed., Cheryl Schmidt)
Solution Manual The Complete A+ Guide to PC Repair (4th Ed., Cheryl Schmidt)
Solution Manual Complete Computer Repair Textbook (4th Ed., Cheryl Schmidt)
Solution Manual Computer Systems Organization and Architecture (John D. Carpinelli)
Solution Manual CMOS VLSI Design: A Circuits and Systems Perspective (3rd Ed., Neil Weste & David Harris)
Solution Manual Interactive Computer Graphics : A Top-Down Approach Using OpenGL (4th Ed., Edward Angel)
Solution Manual Interactive Computer Graphics : A Top-Down Approach Using OpenGL (5th Ed., Edward Angel)
Solution Manual File Structures : An Object-Oriented Approach with C++ (3rd Ed., Michael J. Folk, Bill Zoellick & Greg Riccardi)
Solution Manual Oracle 10g Programming : A Primer (Rajshekhar Sunderraman)
Solution Manual Databases, Types and the Relational Model (3rd Ed., C. J. Date & Hugh Darwen)
Solution Manual Fundamentals of Database Systems (5th Ed., Ramez Elmasri & Shamkant Navathe)
Solution Manual Database Systems : An Application-Oriented Approach, Introductory Version (2nd Ed., Michael Kifer, Arthur Bernstein & Philip M. Lewis)
Solution Manual Database Systems : An Application Oriented Approach, Complete Version (2nd Ed., Michael Kifer, Arthur Bernstein & Philip M. Lewis)
Solution Manual DataBase Systems : A Practical Approach to Design, Implementation and Management (4th Ed., Thomas M. Connolly & Carolyn E. Begg)
Solution Manual DataBase Systems : A Practical Approach to Design, Implementation and Management (5th Ed., Thomas M. Connolly & Carolyn E. Begg)
Solution Manual Database Systems : The Complete Book (2nd Ed., Hector Garcia-Molina, Jeffrey D. Ullman, Jennifer Widom)
Solution Manual A First Course in Database Systems (3rd Ed., Jeffrey D. Ullman, Jennifer Widom)
Solution Manual Fundamentals of Database Systems/Oracle 9i Programming (4th Ed., Ramez Elmasri, Shamkant B. Navathe & Rajshekhar Sunderraman)
Solution Manual An Introduction to Database Systems (8th Ed., C.J. Date)
Solution Manual Oracle 9i Programming : A Primer (Rajshekhar Sunderraman)
Solution Manual Elements of Information Theory (1st Ed., Thomas M. Cover & Joy A. Thomas)
Solution Manual Principles of Database Systems with Internet and Java Applications (Greg Riccardi)
Solution Manual Introduction to Data Mining (Pang-Ning Tan, Michael Steinbach & Vipin Kumar)

Solution Manual Data Mining: A Tutorial Based Primer (Richard Roiger & Michael Geatz)
Solution Manual Learning SQL : A Step-by-Step Guide Using Access (Sikha Bagui, Richard Earp)
Solution Manual Learning SQL : A Step-By-Step Guide Using Oracle (Richard Earp, Sikha Bagui)
Solution Manual Access 2007 Guidebook (6th Ed., Maggie Trigg & Phyllis Dobson)
Solution Manual Access 2003 Guidebook for Office XP (5th Ed., Maggie Trigg & Phyllis Dobson)
Solution Manual Implementing Databases in Oracle 9i (John Day & Craig Van Slyke)
Solution Manual Web 101: Making the Net Work for You (2nd Ed., Wendy Lehnert)
Solution Manual Web 101 (3rd Ed., Wendy G. Lehnert & Richard L. Kopec)
Solution Manual Web Developer Foundations : Using XHTML (2nd Ed., Terry Felke-Morris)
Solution Manual Web Development & Design Foundations With XHTML (3rd Ed., Terry Felke-Morris)
Solution Manual Web Development and Design Foundations with XHTML (4th Ed., Terry Felke-Morris)
Solution Manual Internet Effectively : A Beginner's Guide to the World Wide Web (Tyrone Adams & Sharon Scollard)
Solution Manual Light on the Web : Essentials to Making the 'Net Work for You (Wendy G. Lehnert)
Solution Manual Programming the World Wide Web (3rd Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (4th Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (5th Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (6th Ed., Robert W. Sebesta)
Solution Manual XML: Language Mechanics and Applications (Dwight Peltzer)
Solution Manual Practical Perl with CGI Applications (Elizabeth Chang)
Solution Manual Developing Web Applications with Active Server Pages (Thom Luce)
Solution Manual Structure and Interpretation of Signals and Systems (Edward A. Lee & Pravin Varaiya)
Solution Manual Languages and Machines : An Introduction to the Theory of Computer Science (2nd Ed., Thomas Sudkamp)
Solution Manual Languages and Machines : An Introduction to the Theory of Computer Science (3rd Ed., Thomas Sudkamp)
Solution Manual How to Break Software Security (James A. Whittaker & Herbert H. Thompson)
Solution Manual Software Quality Assurance : From Theory to Implementation (Daniel Galin)
Solution Manual Object Oriented Software Development Using Java (2nd Ed., Xiaoping Jia)

Solution Manual Introduction to the Team Software Process (Watts S. Humphrey)
Solution Manual Software Project Management : A Real-World Guide to Success (Joel Henry)
Solution Manual Software Engineering (7th Ed., Ian Sommerville)
Solution Manual Software Engineering (8th Ed., Ian Sommerville)
Solution Manual Software Engineering (9th Ed., Ian Sommerville)
Solution Manual Software Engineering (3rd Ed., Shari Lawrence Pfleeger & Joanne Atlee)
Solution Manual Software Engineering : Theory and Practice (4th Ed., Shari Lawrence Pfleeger & Joanne Atlee)
Solution Manual Object-Oriented Programming featuring Graphical Applications in Java (Michael Laszlo)
Solution Manual Project-Based Software Engineering : An Object-Oriented Approach (Evelyn Stiller & Cathie LeBlanc)
Solution Manual Engineering of Software, The: A Technical Guide for the Individual (Dick Hamlet & Joe Maybee)
Solution Manual Concepts of Programming Languages (7th Ed., Robert W. Sebesta)
Solution Manual Concepts of Programming Languages (8th Ed., Robert W. Sebesta)
Solution Manual Concepts of Programming Languages (9th Ed., Robert W. Sebesta)
Solution Manual Advanced Java : Internet Applications (2nd Ed., Art Gittleman)
Solution Manual Objects to Components with Java 2 Platform (Art Gittleman)
Solution Manual C for Java Programmers (Tomasz Muldner)
Solution Manual Pointers on C (Kenneth Reek)
Solution Manual C++ Programming with Design Patterns Revealed (Tomasz Muldner)
Solution Manual The C++ Programming Language (3rd Ed., Bjarne Stroustrup)
Solution Manual Operating Systems : A Systematic View (6th Ed., William S. Davis & T.M. Rajkumar)
Solution Manual Unix: The Textbook (2nd Ed., Syed Mansoor Sarwar, Robert Koretsky & Syed Aqeel Sarwar)
Solution Manual Operating Systems (3rd Ed., Gary Nutt)
Solution Manual LINUX & UNIX Programming Tools : A Primer for Software Developers (Syed Mansoor Sarwar & Khaled H. Al-Saqabi)
Solution Manual Addison-Wesley's Interactive Linux Tutorial and Reference (Edutrends, Inc.)
Solution Manual Linux : The Textbook (Syed Mansoor Sarwar, Robert Koretsky & Syed Aqeel Sarwar)
Solution Manual Kernel Projects for Linux (Gary Nutt)
Solution Manual OSP : An Environment for Operating System Projects (Michael Kifer & Scott A. Smolka)
Solution Manual Distributed Computing : Principles and Applications (M.L. Liu)
Solution Manual Distributed Operating Systems and Algorithm Analysis

(Randy Chow & Theodore Johnson)
Solution Manual Mastering Networks : An Internet Lab Manual (Jorg Liebeherr & Magda El Zarki)
Solution Manual Computer Networking Complete Package (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach Featuring the Internet (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (4th Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (5th Ed., James Kurose & Keith Ross)
Solution Manual Producing Great Sound for Film and Video (3rd Ed., Jay Rose)
Solution Manual Network Management : Principles and Practice (Mani Subramanian)
Solution Manual Computer Security : Art and Science (Matt Bishop)
Solution Manual Introduction to Computer Security (Matt Bishop)
Solution Manual Creating Powerful Brands (4th Ed., Leslie de Chernatony, Malcolm McDonald, Elaine Wallace)
Solution Manual How to Break Software Security (James A. Whittaker & Herbert H. Thompson)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael Quinn)
Solution Manual Modern Recording Techniques (6th Ed., Miles Huber & Runstein)
Solution Manual Creating Powerful Radio : Getting, Keeping and Growing Audiences News, Talk, Information & Personality Broadcast, HD, Satellite & Internet (Valerie Geller)
Solution Manual Electronic Media Law and Regulation (5th Ed., Kenneth Creech)
Solution Manual Electronic Media Management, Revised (5th Ed., Pringle & Starr)
Solution Manual Convergent Journalism an Introduction: Writing and Producing Across Media (Quinn & Filak)
Solution Manual Flash Journalism : How to Create Multimedia News Packages (Mindy McAdams)

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=1P9GUXB1

I do not review the forums, just send me an email.

- Math, Statistics & Probability :

Solution manual Advanced Engineering Mathematics (8th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (9th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (10th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (2nd Ed, Michael Greenberg)
Solution manual Advanced Engineering Mathematics (6th Ed., Peter O'Neil)
Solution manual Advanced Modern Engineering Mathematics (3rd Ed., Glyn James)
Solution manual Modern Engineering Mathematics (4th Ed., Glyn James)
Solution manual Differential Equations and Dynamical Systems (3rd Ed., Lawrence Perko)
Solution manual Introductory Differential Equations with Boundary Value Problems (3rd Ed., Martha Abell & James Braselton)
Solution manual A Modern Introduction to Differential Equations (2nd Ed., Henry J. Ricardo)
Solution manual Elementary Differential Equations (7th Ed., Boyce)

Solution manual Elementary Differential Equations (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations (9th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (7th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (9th Ed., Boyce & Diprima)
Solution manual Differential Equations : An Introduction to Modern Methods and Applications (James Brannan & William Boyce)
Solution manual Differential Equations with Boundary Value Problems : An Introduction to Modern Methods and Applications (James Brannan & William Boyce)
Solution manual Advanced Calculus : A Transition to Analysis (Thomas Dence & Joseph Dence)
Solution manual Calculus : Early Transcendentals Combined (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Combined (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Multivariable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Multivariable (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (9th Ed., Anton, Bivens & Davis)
Solution manual Introduction to the Finite Element Method : Theory, Programming and Applications (Erik G. Thompson)
Solution manual A Physicist's Guide to Mathematica (2nd Ed., Patrick Tam)
Solution manual Mathematics for Engineers : A Modern Interactive Approach (3rd., Anthony Croft & Robert Davison)
Solution manual Measurement and Data Analysis for Engineering and Science (Patrick F Dunn)
Solution manual Elementary Linear Algebra (4th Ed., Stephen Andrilli & David Hecker)
Solution manual Elementary Linear Algebra Edition Abridged (9th Ed., Anton & Rorres)
Solution manual Elementary Linear Algebra (9th Ed., Anton)

Solution manual Elementary Linear Algebra with Applications (9th Ed., Anton & Rorres)
Solution manual Boundary Value Problems and Partial Differential Equations (6th Ed., David Powers)
Solution manual Introductory Statistics : Using Technology (5th Ed., Prem S. Mann)
Solution manual Introductory Statistics (6th Ed., Prem S. Mann)
Solution manual Introductory Statistics (7th Ed., Prem S. Mann)
Solution manual Basic Real Analysis (Houshang H. Sohrab)
Solution manual Modern Algebra : An Introduction (6th Ed., John Durbin)
Solution manual The Art and Craft of Problem Solving (2nd Ed., Paul Zeitz)
Solution manual Numerical Linear Algebra (Grégoire Allaire, Sidi Mahmoud Kaber, K. Trabelsi)
Solution manual Introductory Statistics for the Behavioral Sciences (6th Ed., Welkowitz, Cohen & Ewen)
Solution manual Statistics : Principles and Methods (5th Ed., Richard Johnson)
Solution manual Statistics : Principles and Methods (6th Ed., Richard Johnson)
Solution manual Statistical Bioinformatics : with R (Sunil K. Mathur)
Solution manual Parameter Estimation and Inverse Problems (Richard Aster, Brian Borchers & Clifford Thurber)
Solution manual Codes : An Introduction to Information Communication and Cryptography (Norman L. Biggs)
Solution manual Geometry and Its Applications (2nd Ed., Walter A. Meyer)
Solution manual Elementary Differential Geometry (2nd Ed., A.N. Pressley)
Solution manual Fractal Geometry : Mathematical Foundations and Applications (2nd Ed., Kenneth Falconer)
Solution manual Analytical and Computational Methods of Advanced Engineering Mathematics (Grant B. Gustafson & Calvin H. Wilcox)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical Thought Processes (4th Ed., Daniel Solow)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical Thought Processes (5th Ed., Daniel Solow)
Solution manual Intuitive Probability and Random Processes using MATLAB (Steven Kay)
Solution manual Modeling Random Processes for Engineers and Managers (James Solberg)
Solution manual Probability, Statistics, and Random Processes For Electrical Engineering (3rd Ed., Alberto Leon-Garcia)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Applied Statistics for Engineers and Physical Scientists (3rd Ed., Johannes Ledolter & Robert Hogg)
Solution manual Applied Statistics and Probability for Engineers (3rd

Ed., Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (4th Ed., Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (5th Ed., Montgomery & Runger)
Solution manual Engineering Statistics (3rd Ed., Montgomery, Runger & Hubele)
Solution manual Engineering Statistics (4th Ed., Montgomery, Runger & Hubele)
Solution manual Introduction to Statistical Quality Control (5th Ed., Montgomery)
Solution manual Introduction to Statistical Quality Control (6th Ed., Montgomery)
Solution manual Calculus : One Variables (10th Ed., Salas, Hille, Etgen)
Solution manual Calculus : One and Several Variables (8th Ed., Salas, Hille, Etgen)
Solution manual Calculus : One and Several Variables (10th Ed., Salas, Hille, Etgen)
Solution manual Squaring the Circle : Geometry in Art and Architecture (Paul Calter)
Solution manual Technical Mathematics (5th Ed., Paul Calter & Michael Calter)
Solution manual Technical Mathematics with Calculus (5th Ed., Paul Calter & Michael Calter)
Solution manual Technical Mathematics with Calculus, Canadian Edition (Paul Calter & Michael Calter)
Solution manual Techniques of Problem Solving (Luis Fernández, Haedeh Gooransarab)
Solution manual Probability and Statistics in Engineering (4th Ed., Hines, Montgomery, Goldsman & Borror)
Solution manual A First Course in Design and Analysis of Experiments (Gary W. Oehlert)
Solution manual Design and Analysis of Experiments (6th Ed., Douglas Montgomery)
Solution manual Design and Analysis of Experiments (7th Ed., Douglas Montgomery)
Solution manual Introduction to Engineering Experimentation (2nd Ed., Wheeler & Ganji)
Solution manual Introduction to Engineering Experimentation (3rd Ed., Wheeler & Ganji)
Solution manual Introduction to the Design & Analysis of Experiments (Canavos & Koutrouvelis)
Solution manual Modern Methods For Quality Control and Improvement (2nd Ed., Wadsworth, Stephens, Godfrey)
Solution manual Essential Statistics for Economics, Business and Management (Teresa Bradley)
Solution manual Statistics and Econometrics : Methods and Applications (Ashenfelter, Levine & Zimmerman)
Solution manual Applied Combinatorics (5th Ed., Alan Tucker)

Solution manual Vector Calculus (Miroslav Lovric)
Solution manual Applied Multivariate Techniques (Subhash Sharma)
Solution manual Mathematical Modeling (3rd Ed., Mark Meerschaert)
Solution manual Discrete Mathematics : Mathematical Reasoning and Proof with Puzzles, Patterns, and Games (Douglas Ensley, J. Winston Crawley)
Solution manual Probability, Random Variables and Random Signal Principles (4th Ed., Peyton Z., Jr. Peebles)
Solution manual Introduction to C++, Excel MATLAB & Basic Engineering Numerical Methods V1.1 (Harvey Stenger & Charles Smith)
Solution manual Numerical Methods for Engineers and Scientists : An Introduction with Applications Using MATLAB (1st Ed., Amos Gilat & Vish Subramaniam)
Solution manual Numerical Methods for Engineers and Scientists : An Introduction with Applications Using MATLAB (2nd Ed., Amos Gilat & Vish Subramaniam)
Solution manual MATLAB : An Introduction with Applications (2nd Ed., Amos Gilat)
Solution manual MATLAB : An Introduction with Applications (3rd Ed., Amos Gilat)
Solution manual MATLAB : An Introduction with Applications (4th Ed., Amos Gilat)
Solution manual Matlab : A Practical Introduction to Programming and Problem Solving (Stormy Attaway)
Solution manual Data, Statistics, and Decision Models with Excel (Harnett & Horrell)
Solution manual Understanding Analysis (Stephen Abbott)
Solution manual Time Series Analysis With Applications in R (2nd Ed., Jonathan D. Cryer & Kung-Sik Chan)
Solution manual Time Series Analysis and Its Applications : With R Examples (2nd Ed., Robert Shumway & David Stoffer)
Solution manual Doing Statistics for Business with Excel : Data, Inference, and Decision Making (2nd Ed. Pelosi & Sandifer)
Solution manual Engineering with Excel (3rd Ed., Ronald W. Larsen)
Solution manual Spreadsheet Tools for Engineers Using Excel 2007 (Byron Gottfried)
Solution manual Spreadsheet Tools for Engineers using Excel (2nd Ed. Byron Gottfried)
Solution manual Spreadsheet Tools for Engineers using Excel (3rd Ed. Byron Gottfried)
Solution manual Introduction to Matlab 7 (Etter, Kuncicky & Moore)
Solution manual Introduction to Matlab 6 for Engineers (1st Ed., William Palm III)
Solution manual Introduction to Matlab 7 for Engineers (2nd Ed., William Palm III)
Solution manual Introduction to Matlab for Engineers (3rd Ed., William Palm III)
Solution manual A Concise Introduction to MATLAB (William J Palm III)
Solution manual Numerical Methods for Engineers (4th Ed. Steven Chapra, Raymond Canale)

Solution manual Numerical Methods for Engineers (5th Ed. Steven Chapra, Raymond Canale)
Solution manual Numerical Methods for Engineers (6th Ed. Steven Chapra, Raymond Canale)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Scientists (1st Ed., Steven Chapra)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Scientists (2nd Ed., Steven Chapra)
Solution manual MATLAB for Engineers (1st Ed., Holly Moore)
Solution manual MATLAB for Engineers (2nd Ed., Holly Moore)
Solution manual Statistics for Engineers and Scientists (1st Ed., William Navidi)
Solution manual Statistics for Engineers and Scientists (2nd Ed., William Navidi)
Solution manual Statistics for Engineers and Scientists (3rd Ed., William Navidi)
Solution manual Principles of Statistics for Engineers and Scientists (William Navidi)
Solution manual Probability (Jim Pitman)
Solution manual Basic Probability Theory (Robert B. Ash)
Solution manual An Introduction to Stochastic Modeling (3rd Ed., Samuel Karlin)
Solution manual Stochastic Calculus for Finance (Steven E. Shreve)
Solution manual Markov Processes for Stochastic Modeling (Oliver Ibe)
Solution manual Mathematical Statistics with Applications (K.M. Ramachandran & Chris Tsokos)
Solution manual Probability : A Graduate Course (Allan Gut)
Solution manual Linear Algebra Done Right (2nd Ed., Sheldon Axler)
Solution manual Precalculus : A Prelude to Calculus (Sheldon Axler)
Solution manual Statistics for Business (Derek Waller)
Solution manual An Introduction to the Mathematics of Financial Derivatives (2nd Ed., Salih Neftci)
Solution manual Elementary Number Theory with Applications (2nd Ed., Thomas Koshy)
Solution manual Introduction to Probability Models (9th Ed., Sheldon Ross)
Solution manual Introduction to Probability Models (10th Ed., Sheldon Ross)
Solution manual Introductory Statistics (2nd Ed., Sheldon Ross)
Solution manual Introductory Statistics (3rd Ed., Sheldon Ross)
Solution manual Introduction to Probability and Statistics for Engineers and Scientists (4th Ed., Sheldon Ross)
Solution manual Basic Mathematics through Applications (4th Ed. by Akst, Bragg)
Solution manual Developmental Mathematics (6th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics (7th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics : Basic Mathematics and Algebra (1st Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)

Solution manual Developmental Mathematics : Basic Mathematics and Algebra (2nd Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)
Solution manual Essential Mathematics (2nd Ed., Margaret Lial & Stanley Salzman)
Solution manual Essential Mathematics (3rd Ed., Margaret Lial & Stanley Salzman)
Solution manual Prealgebra & Introductory Algebra (2nd Ed. by Elayn El Martin-Gay)
Solution manual Prealgebra (5th Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Prealgebra (5th Ed., Elayn El Martin-Gay)
Solution manual Prealgebra : An Integrated Approach (Lial & Hestwood)
Solution manual Integrated Arithmetic and Basic Algebra (4th Ed., Jordan & Palow)
Solution manual Introductory Algebra through Applications (1st Ed., Akst & Bragg)
Solution manual Introductory Algebra through Applications (2nd Ed., Akst & Bragg)
Solution manual Beginning Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Elementary Algebra Early Graphing for College Students (3rd Ed., Allen R. Angel)
Solution manual Intermediate Algebra with Applications & Visualization (3rd Ed., Rockswold & Krieger)
Solution manual Intermediate Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Lial, Hornsby & McGinnis)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (3rd Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Algebra for College Students (4th Ed., Mark Dugopolski)
Solution manual Algebra for College Students (5th Ed., Mark Dugopolski)
Solution manual Algebra For College Students (6th Ed., Robert F Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (6th Ed., Lial, Hornsby & McGinnis)
Solution manual Statistics, Data Analysis, and Decision Modeling (3rd Ed., James Evans)
Solution manual Statistics, Data Analysis, and Decision Modeling (4th Ed., James Evans)
Solution manual College Geometry : A Discovery Approach (2nd Ed., David Kay)
Solution manual College Geometry : Using The Geometer's Sketchpad - Preliminary Edition (Barbara Reynolds & William Fenton)
Solution manual College Geometry : A Problem Solving Approach with Applications (2nd Ed., Musser, Trimpe & Maurer)
Solution manual A Survey of Mathematics with Applications (8th Ed., Angel, Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded

Edition (8th Ed., Angel, Abbott & Runde)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas: Expanded Edition (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Thinking : Problem-Solving and Proofs (2nd Ed., John P. D'Angelo & Douglas B. West)
Solution manual Thinking Mathematically (4th Ed., Robert F. Blitzer)
Solution manual Introduction to Mathematical Thinking: Algebra and Number Systems (Will J. Gilbert & Scott A. Vanstone)
Solution manual Mathematical Reasoning : Writing and Proof (1st Ed., Ted A. Sundstrom)
Solution manual Mathematical Reasoning : Writing and Proof (2nd Ed., Ted A. Sundstrom)
Solution manual Mathematical Reasoning for Elementary Teachers (4th Ed., Calvin T. Long & Duane W. DeTemple)
Solution manual Mathematical Reasoning for Elementary Teachers (5th Ed., Long, DeTemple & Millman)
Solution manual Mathematics for Elementary School Teachers (4th Ed., O'Daffer, Charles, Cooney, Dossey & Schielack)
Solution manual Mathematics for Elementary Teachers (2nd Ed., Sybilla Beckmann)
Solution manual Finite Mathematics and Calculus with Applications (7th Ed., Lial, Greenwell & Ritchey)
Solution manual Finite Mathematics and Calculus with Applications (8th Ed., Lial, Greenwell & Ritchey)
Solution manual Additional Calculus Topics (11th Ed., Barnett, Ziegler & Byleen)
Solution manual College Mathematics for Business, Economics, Life Sciences & Social Sciences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and Social Sciences (12th Ed., Haeussler, Paul & Wood)
Solution manual Finite Mathematics for Business, Economics, Life Sciences and Social Sciences (11th Ed., Barnett, Ziegler, Byleen)
Solution manual Finite Mathematics (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Calculus and Its Applications (9th Ed., Bittinger & Ellenbogen)
Solution manual Calculus for Business, Economics, Life Sciences & Social Sciences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Calculus with Applications (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Calculus with Applications : Brief Version (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Concepts of Calculus with Applications (Martha Goshaw)
Solution manual University Calculus : Elements with Early Transcendentals (Hass, Weir & Thomas, Jr.)
Solution manual Thomas' Calculus, Early Transcendentals: Media Upgrade (11th Ed., Thomas Jr., Weir, Hass & Giordano)

Solution manual Thomas' Calculus: Media Upgrade (11th Ed., Thomas Jr., Weir, Hass & Giordano)
Solution manual University Calculus : Alternate Edition (Hass, Weir & Thomas, Jr.)
Solution manual Differential Equations Computing and Modeling (4th Ed., Edwards & Penney)
Solution manual Differential Equations and Boundary Value Problems : Computing and Modeling (4th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations with Boundary Value Problems (6th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations (6th Ed., Edwards & Penney)
Solution manual Fundamentals of Differential Equations (7th Ed., Nagle, Saff & Snider)
Solution manual Fundamentals of Differential Equations with Boundary Value Problems (5th Ed., Nagle, Saff & Snider)
Solution manual Differential Equations and Linear Algebra (3rd Ed., Goode & Annin)
Solution manual Discrete Mathematical Structures (6th Ed., Kolman, Busby & Ross)
Solution manual College Algebra Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual College Algebra (10th Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra : Graphs and Models (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (3rd Ed., Judith A. Beecher, Judith A. Penna & Marvin L. Bittinger)
Solution manual College Algebra (8th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry for College Readiness (Margaret L. Lial & John Hornsby)
Solution manual Algebra and Trigonometry Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual Algebra and Trigonometry : Graphs & Models (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Trigonometry : A Unit Circle Approach (8th Ed., Michael Sullivan)
Solution manual Precalculus (3rd Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus (4th Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus : Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual Precalculus : Functions and Graphs (3rd Ed. Mark Dugopolski)
Solution manual Precalculus : Graphs & Models and Graphing (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Discrete and Combinatorial Mathematics (5th ed., Ralph P. Grimaldi)
Solution manual Discrete Mathematics (Sherwood Washburn, Thomas Marlowe & Charles T. Ryan)
Solution manual Discrete Mathematics (5th ed., John Dossey, Albert

Otto, Lawrence Spence & Charles Vanden Eynden)
Solution manual Mathematics for New Technologies (Don Hutchison & Mark Yannotta)
Solution manual Fundamental Finite Element Analysis and Applications: with Mathematica and Matlab Computations (Asghar Bhatti)
Solution manual Advanced Topics in Finite Element Analysis of Structures: With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution manual The Finite Element Method in Engineering (4th Ed., by Rao)
Solution manual An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
Solution manual Fundamentals of Finite Element Analysis (1st Ed., David V. Hutton)
Solution manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kelton)
Solution manual Simulation Modeling and Analysis (4th Ed., Averill Law)
Solution manual The Finite Element Method : Its Basis and Fundamentals (6th Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution manual Algebra : Form and Function (William McCallum, Eric Connally & Deborah Hughes-Hallett)
Solution manual Algebra : Form and Function, Preliminary Edition (William McCallum, Eric Connally & Deborah Hughes-Hallett)
Solution manual Applied Calculus (2nd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (3rd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (4th Ed., Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (3rd Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (4th Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (5th Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Single Variable (3rd Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (4th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (5th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (3rd Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (4th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (5th Ed., Deborah Hughes-Hallett)
Solution manual Functions Modeling Change : A Preparation for Calculus - Texas Edition (2nd Ed., Eric Connally, Deborah Hughes-Hallett & Andrew M. Gleason)

Solution manual Functions Modeling Change : A Preparation for Calculus (2nd Ed., Eric Connally, Deborah Hughes-Hallett, et al.)
Solution manual Functions Modeling Change : A Preparation for Calculus (3rd Ed., Eric Connally)
Solution manual Differential Equations (A. King, J. Billingham, S. Otto)
Solution manual Regression Methods in Biostatistics : Linear, Logistic, Survival, and Repeated Measures Models (Eric Vittinghoff, David Glidden, Stephen Shiboski, Charles McCulloch)
Solution manual A Modern Introduction to Probability and Statistics : Understanding Why and How (F.M. Dekking, C. Kraaikamp, H.P. Lopuhaä, L.E. Meester)
Solution manual Statistical Methods for the Analysis of Repeated Measurements (Charles S. Davis)
Solution manual Bayesian Core : A Practical Approach to Computational Bayesian Statistics (Jean-Michel Marin, Christian Robert)
Solution manual The Bayesian Choice : From Decision-Theoretic Foundations to Computational Implementation (2nd Ed., Christian Robert)
Solution manual Essentials of Stochastic Processes (Rick Durrett)
Solution manual Methods of Multivariate Statistics (Muni Srivastava)
Solution manual Regression Analysis : Theory, Methods, and Applications (Ashish Sen & Muni Srivastava)
Solution manual Applied Probability and Statistics (Mario Lefebvre)
Solution manual Basic Probability Theory with Applications (Mario Lefebvre)
Solution manual Foundations of Hyperbolic Manifolds (2nd Ed., John Ratcliffe)
Solution manual Fourier and Laplace Transforms (R. J. Beerends , H. G. ter Morsche)
Solution manual Infinite-Dimensional Dynamical Systems (James C. Robinson)
Solution manual Mathematical Methods for Physics and Engineering, (3rd Ed., Riley, Hobson & Bence)
Solution manual Numerical Methods in Engineering with MATLAB (Jaan Kiusalaas)
Solution manual Numerical Methods in Engineering with Python (Jaan Kiusalaas)
Solution manual An Introduction to Numerical Analysis (Endre Suli and David Mayers)
Solution manual Fundamentals of Engineering Numerical Analysis (Parviz Moin)
Solution manual Statistical Design (George Casella)
Solution manual Statistical Inference (2nd Ed., George Casella, Roger L. Berger)
Solution manual Monte Carlo Statistical Methods (2nd Ed., Christian P. Robert, George Casella)
Solution manual Introducing Monte Carlo Methods with R (Christian Robert & George Casella)
Solution manual Introduction to Mathematical Structures and Proofs

(Larry J. Gerstein)
Solution manual Analyzing Categorical Data (Jeffrey S. Simonoff)
Solution manual Fundamentals of Complex Analysis with Applications to Engineering, Science, and Mathematics (3rd Ed., E. Saff & Arthur Snider)
Solution manual Probability & Statistics for Engineers & Scientists (8th Ed., Walpole, Myers, Ye)
Solution manual Statistics for Engineering and the Sciences (5th Ed., Mendenhall & Sincich)
Solution manual A Second Course in Statistics : Regression Analysis (6th Ed., Mendenhall & Sincich)
Solution manual Miller & Freund's Probability and Statistics for Engineers (7th Ed., Johnson, Miller, Freund)
Solution manual Miller & Freund's Probability and Statistics for Engineers (8th Ed., Johnson, Miller, Freund)
Solution manual Numerical Methods Using Matlab (4th Ed., Mathews & Fink)
Solution manual Applied Numerical Analysis Using MATLAB (2nd Ed., Laurene v. Fausett)
Solution manual Applied Numerical Analysis (7th Ed., Curtis F. Gerald, Patrick O. Wheatley)
Solution manual Friendly Introduction to Numerical Analysis (Bradie)
Solution manual Elementary Linear Algebra (2nd Ed., Spence, Insel & Friedberg)
Solution manual Elementary Linear Algebra with Applications (9th Ed., Kolman & Hill)
Solution manual Introductory Linear Algebra : An Applied First Course (8th Ed., Kolman & Hill)
Solution manual Linear Algebra with Applications (6th Ed., S. Leon)
Solution manual Linear Algebra with Applications (7th Ed., S. Leon)
Solution manual Linear Algebra for Engineers and Scientists Using Matlab (Hardy)
Solution manual Linear Algebra with Applications (3rd Ed., Bretscher)
Solution manual Linear Algebra with Applications (4th Ed., Bretscher)
Solution manual Modern Matrix Algebra (Hill & Kolman)
Solution manual Matrix Methods : Applied Linear Algebra (3rd Ed., Richard Bronson & Gabriel B. Costa)
Solution manual A Transition to Abstract Mathematics : Learning Mathematical Thinking and Writing (2nd Ed., Randall Maddox)
Solution manual Partial Differential Equations and Boundary Value Problems with Fourier Series (2nd ed., Asmar)
Solution manual Applied Partial Differential Equations (4th Ed., Haberman)
Solution manual Technical Calculus (5th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Technical Mathematics (2th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Technical Mathematics with Calculus (2th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Introductory Mathematics (4th Ed., Cook)

Solution manual Mathematics for the Technical Trades (Cook)
Solution manual College Mathematics (7th Ed., Cleaves & Hobbs)
Solution manual Fundamentals of Statistics (2nd Ed., Michael III Sullivan)
Solution manual Fundamentals of Statistics (3rd Ed., Michael III Sullivan)
Solution manual Statistics : Informed Decisions Using Data (2nd Ed., Michael III Sullivan)
Solution manual Modern Elementary Statistics (12th Ed., John E. Freund, Benjamin M. Perles)
Solution manual Statistics : The Art and Science of Learning From Data (Agresti & Franklin)
Solution manual Statistics : The Art and Science of Learning From Data (2nd Ed., Agresti & Franklin)
Solution manual Elementary Statistics : Picturing the World (3rd Ed., Larson & Farber)
Solution manual Elementary Statistics : Picturing the World (4th Ed., Larson & Farber)
Solution manual A First Course in Statistics (9th Ed., McClave & Sincich)
Solution manual A First Course in Statistics (10th Ed., McClave & Sincich)
Solution manual Statistics (10th Ed., McClave & Terry Sincich)
Solution manual Statistics (11th Ed., McClave & Terry Sincich & William Mendenhall)
Solution manual Interactive Statistics (3rd Ed., Martha Aliaga & Brenda Gunderson)
Solution manual Statistics for the Life Sciences (3rd Ed., Samuels & Witmer)
Solution manual Applied Statistics and the SAS Programming Language (5th Ed., Cody & Smith)
Solution manual Biostatistics for the Health Sciences (R. Clifford Blair & Richard Taylor)
Solution manual Biostatistics : How It Works (Steve Selvin)
Solution manual Business Statistics : First Course (4th Ed., Levine, Krehbiel & Berenson)
Solution manual Business Statistics : First Course (5th Ed., Levine, Krehbiel & Berenson)
Solution manual Course in Business Statistics (4th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision Making Approach (6th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (7th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (8th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Statistics for Business & Economics (10th Ed., McClave, Benson & Sincich)
Solution manual Statistics for Managers Using Excel (5th Ed., Levine)
Solution manual Statistics for Managers Using Microsoft Excel (4th

Ed., Levine, Stephan, Krehbiel & Berenson)
Solution manual Statistics for Business and Economics (5th Ed., Newbold, Carlson & Thorne)
Solution manual Statistics for Business and Economics (6th Ed., Newbold, Carlson & Thorne)
Solution manual Statistics for Business and Economics (7th Ed., Newbold, Carlson & Thorne)
Solution manual Basic Business Statistics : Concepts and Applications (10th Ed., Berenson, Krehbiel & Levine)
Solution manual Basic Business Statistics (11th Ed., Berenson, Levine & Krehbiel)
Solution manual John E. Freund's Mathematical Statistics with Applications (7th Ed., Miller)
Solution manual Probability and Statistical Inference (7th Ed., Hogg & Tanis)
Solution manual Probability and Statistical Inference (8th Ed., Hogg & Tanis)
Solution manual Introduction to Mathematical Statistics (6th Ed., Hogg, Craig & McKean)
Solution manual Introduction to Mathematical Statistics and Its Applications (4th Ed., Larsen & Marx)
Solution manual A Brief Course in Mathematical Statistics (Hogg & Tanis)
Solution manual Fundamentals of Probability, with Stochastic Processes (3rd Ed., Saeed Ghahramani)
Solution manual A First Course in Probability (7th Ed., Sheldon Ross)
Solution manual A First Course in Probability (8th Ed., Sheldon Ross)
Solution manual Applied Multivariate Statistical Analysis (6th Ed., Johnson & Wichern)
Solution manual Multivariate Data Analysis (6th Ed., Hair, Black, Babin, Anderson & Tatham)
Solution manual Multivariate Data Analysis (7th Ed., Hair, Black, Babin, Anderson)
Solution manual Essential MATLAB for Engineers and Scientists (3rd Ed., Brian Hahn & Dan Valentine)
Solution manual Essential MATLAB for Engineers and Scientists (4th Ed., Brian Hahn & Dan Valentine)
Solution manual Introduction to Applied Statistical Signal Analysis : Guide to Biomedical and Electrical Engineering Applications (3rd Ed. Richard Shiavi)
Solution manual Construction Mathematics (Surinder Virdi & Roy Baker)
Solution manual Numerical Methods in Biomedical Engineering (Stanley Dunn, Alkis Constantinides & Prabhas Moghe)
Solution manual Probability and Statistics with Integrated Software Routines (Ronald Deep)
Solution manual Finite Element Analysis with Error Estimators : An Introduction to the FEM and Adaptive Error Analysis for Engineering Students (J. Akin)
Solution manual Basic Engineering Mathematics (4th Ed., John Bird)
Solution manual Engineering Mathematics (4th Ed., John Bird)

Solution manual Engineering Mathematics (5th Ed., John Bird)
Solution manual Higher Engineering Mathematics (5th Ed., John Bird)
Solution manual Construction Mathematics (Virdi & Baker)
Solution manual Mathematics for Electrical Engineering and Computing (Mary Attenborough)
Solution manual Probability and Random Processes : With Applications to Signal Processing and Communications (Miller & Childers)
Solution manual Introductory Statistics for Engineering Experimentation (Peter Nelson, Karen Copeland & Marie Coffin)
Solution manual Understanding Engineering Mathematics (Bill Cox)
Solution manual Statistics And Probability For Engineering Applications With Microsoft Excel (Decoursey)
Solution manual Business Math Using Calculators : With 10-Key Computer Assisted Instruction (Burton)
Solution manual Mathematics for Economics and Business (5th Ed., Ian Jacques)
Solution manual Business Math, Brief (7th Ed., Cleaves & Hobbs)
Solution manual Math for Merchandising: A Step-by-Step Approach (3rd Ed., Moore)
Solution manual Mathematics for Business (7th Ed., Salzman , Miller & Clendenen)
Solution manual Mathematics for Business (8th Ed., Salzman , Miller & Clendenen)
Solution manual Basic College Mathematics with Early Integers (K. Elayn Martin-Gay)
Solution manual Developmental Mathematics (K. Elayn Martin-Gay)
Solution manual An Introduction to Analysis (3rd Ed., William Wade)
Solution manual An Introduction to Analysis (4th Ed., William Wade)
Solution manual A Friendly Introduction to Analysis (2nd Ed., Witold A.J. Kosmala)
Solution manual Advanced Calculus (Gerald Folland)
Solution manual Analysis : With an Introduction to Proof (4th Ed., Steven R. Lay)
Solution manual Essentials of Basic College Mathematics (John Jr Tobey, Jr., Jeffrey Slater)
Solution manual Basic College Mathematics (5th Ed., John Tobey & Jeffrey Slater)
Solution manual Prealgebra (3rd Ed., Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Elementary Algebra Early Graphing for College Students (3rd Ed., Allen Angel)
Solution manual Elementary Algebra (Michael Sullivan III, Katherine R. Struve & Janet Mazzarella)
Solution manual Elementary Algebra for College Students (7th Ed., Allen R. Angel)
Solution manual Experiencing Introductory and Intermediate Algebra Through Functions and Graphs (3rd Ed., JoAnne Thomasson & Robert Pesut)
Solution manual Introductory Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Beginning Algebra (6th Ed., John Jr Tobey & Jeffrey

Slater)
Solution manual Beginning Algebra : Early Graphing (Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Beginning and Intermediate Algebra (2nd Ed., Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Introductory Algebra (4th Ed., Robert Blitzer)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Robert Blitzer)
Solution manual Intermediate Algebra for College Students (7th Ed., Allen Angel)
Solution manual Intermediate Algebra (Michael Sullivan III & Katherine Struve)
Solution manual Intermediate Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Essentials of Intermediate Algebra for College Students (Robert Blitzer)
Solution manual Intermediate Algebra (4th Ed., Robert Blitzer)
Solution manual Intermediate Algebra for College Students (5th Ed., Robert Blitzer)
Solution manual Algebra A Combined Approach (3rd Ed., K. Elayn Martin-Gay)
Solution manual Elementary & Intermediate Algebra (Michael Sullivan III, Katherine R. Struve & Janet Mazzarella)
Solution manual Essentials of Introductory and Intermediate Algebra for College Students (Robert F. Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (5th Ed., Robert F Blitzer)
Solution manual College Algebra (8th Ed., Michael Sullivan)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (4th Ed., Robert Blitzer)
Solution manual College Algebra Essentials (2nd Ed., Robert F. Blitzer)
Solution manual College Algebra : An Early Functions Approach (Robert F. Blitzer)
Solution manual College Algebra : Concepts Through Functions (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual College Algebra : Concepts Through Functions (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual College Algebra Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Essentials of College Algebra : Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Algebra and Trigonometry (8th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry (3rd Ed., Robert F. Blitzer)
Solution manual Algebra and Trigonometry: An Early Functions Approach (Robert Blitzer)
Solution manual Algebra & Trigonometry (7th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry Enhanced With Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Trigonometry (7th Ed., Michael Sullivan)

Solution manual Trigonometry (8th Ed., Michael Sullivan)
Solution manual Trigonometry Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus (8th Ed., Michael Sullivan)
Solution manual Precalculus (3rd Ed., Robert Blitzer)
Solution manual Precalculus (4th Ed., Robert Blitzer)
Solution manual Precalculus (1st Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual Precalculus : A Right Triangle Approach (2nd Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual Precalculus Essentials (2nd Ed., Robert Blitzer)
Solution manual Precalculus Essentials (3rd Ed., Robert Blitzer)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle Approach to Trigonometry (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle Approach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle Approach to Trigonometry (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle Approach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (5th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Essentials : Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Excursions in Modern Mathematics (5th Ed., Peter Tannenbaum)
Solution manual Excursions In Modern Mathematics with Mini-Excursions (6th Ed., Peter Tannenbaum)
Solution manual Quantitive Reasoning & the Environment (Greg Langkamp & Joseph Hull)
Solution manual Fundamentals of Mathematics (10th Ed., William M Setek & Michael A Gallo)
Solution manual Learning Math in Elementary and Middle School & IMAP Package (4th Ed., Cathcart, Pothier, Vance & Bezuk)
Solution manual Understanding the Math You Teach: Content and Methods for Prekindergarten Through Grade 4 (Anita C. Burris)
Solution manual Algebra Connections (Ira J. Papick & UMO University of Missouri)
Solution manual Calculus Connections (Asma Harcharras, Dorina Mitrea)
Solution manual Data Analysis and Probability Connections: Mathematics for Middle School Teachers (Debra A. Perkowski & Michael Perkowski)
Solution manual Geometry Connections (John K. Beem)
Solution manual Elementary Math Modeling Updated (2nd Ed., Mary Ellen Davis & C. Henry Edwards)

Solution manual Additional Calculus Topics (11th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Finite Math and Its Application (9th Ed., Larry J Goldstein, David I Schneider & Martha J. Siegel)
Solution manual Finite Mathematics and Its Application (10th Ed., Larry J Goldstein, David I Schneider & Martha J. Siegel)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and social Sciences (11th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and Social Sciences (12th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Additional Calculus Topics (9th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual College Mathematics for Business, Economics, Life Sciences and Social Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Brief Calculus and Its Applications (11th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Brief Calculus and Its Applications (12th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (10th Ed., Larry Goldstein, David Schneider, David Lay)
Solution manual Calculus and its Applications (11th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (12th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus for Business, Economics, Life Sciences and Social Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Calculus, Early Transcendentals (6th Ed., C. Henry Edwards & David Penney)
Solution manual Calculus, Early Transcendentals (7th Ed., C. Henry Edwards & David Penney)
Solution manual Calculus (9th Ed., Dale Varberg, Edwin Purcell & Steve Rigdon)
Solution manual Calculus Early Transcendentals (Dale Varberg, Edwin Purcell & Steve Rigdon)
Solution manual Calculus (3rd Ed., Monty Strauss, Gerald Bradley & Karl Smith)
Solution manual Calculus (6th Ed., Henry Edwards & David E. Penney)
Solution manual Single Variable Calculus (3rd Ed., Monty Strauss, Gerald Bradley & Karl Smith)
Solution manual Vector Calculus (3rd Ed., Susan Colley)
Solution manual Applied Linear Algebra (Peter Olver & Cheri Shakiban)
Solution manual Differential Equations and Linear Algebra (2nd Ed., Jerry Farlow, James E. Hall, Jean Marie McDill & Beverly West)
Solution manual Differential Equations and Linear Algebra (2nd Ed., C. Henry Edwards & David Penney)
Solution manual Differential Equations and Linear Algebra (3rd Ed., C.

Henry Edwards & David Penney)
Solution manual Differential Equations (2nd Ed., John Polking, Al Boggess & David Arnold)
Solution manual Differential Equations with Boundary Value Problems (2nd ed., John Polking, Al Boggess & David Arnold)
Solution manual Discrete Mathematics with Graph Theory (3rd Ed., Edgar Goodaire & Michael Parmenter)
Solution manual Essential Discrete Mathematics (Todd Feil & Joan Krone)
Solution manual Statistical Methods for the Social Sciences (4th Ed., Agresti & Finlay)
Solution manual A Brief Course in Mathematical Statistics (Tanis & Hogg)
Solution manual Business Mathematics, 10th Ed. (Miller, Salzman & Clendenen)
Solution manual Elementary Statistics (6th Ed., Weiss)
Solution manual Elementary Statistics (7th Ed., Weiss)
Solution manual Elementary Statistics Using the Graphing Calculator: For the TI-83/84 Plus (Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus Calculator (2nd Ed., Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus Calculator (3rd Ed., Mario Triola)
Solution manual Elementary Statistics Update (9th Ed., Mario Triola)
Solution manual Elementary Statistics (10th Ed., Mario Triola)
Solution manual Elementary Statistics (11th Ed., Mario Triola)
Solution manual Essentials of Statistics (2nd Ed., Mario Triola)
Solution manual Essentials of Statistics (3rd Ed., Mario Triola)
Solution manual Essentials of Statistics (4th Ed., Mario Triola)
Solution manual Introductory Statistics (7th Ed., Neil Weiss)
Solution manual Introductory Statistics (8th Ed., Neil Weiss)
Solution manual Intro Stats (2nd Ed., De Veaux, Velleman & Bock)
Solution manual Intro Stats (3rd Ed., De Veaux, Velleman & Bock)
Solution manual Stats: Data and Models, (De Veaux, Velleman & Bock)
Solution manual Stats: Data and Models, (2nd Ed., De Veaux, Velleman & Bock)
Solution manual Elementary Statistics Using Excel (2nd Ed., Mario Triola)
Solution manual Elementary Statistics Using Excel (3rd Ed., Mario Triola)
Solution manual Elementary Statistics Using Excel (4th Ed., Mario Triola)
Solution manual Stats : Modeling the World (2nd Ed., Bock, Velleman & De Veaux)
Solution manual Stats : Modeling the World (3rd Ed., Bock, Velleman & De Veaux)
Solution manual Statistical Reasoning for Everyday Life (2nd Ed., Bennett, Briggs & Triola)
Solution manual Statistical Reasoning for Everyday Life (3rd Ed., Bennett, Briggs & Triola)

Solution manual Business Statistics (Triola & Franklin)
Solution manual Business Statistics (Sharpe, De Veaux & Velleman)
Solution manual Business Statistics : A First Course (Sharpe, De Veaux & Velleman)
Solution manual Biostatistics for the Biological and Health Sciences with Statdisk (Marc Triola & Mario Triola)
Solution manual Biostatistics : A Guide to Design, Analysis and Discovery (2nd Ed., Ronald Forthofer, Eun Lee, Mike Hernandez)
Solution manual A Course in Probability (Neil A. Weiss)
Solution manual Probability and Statistics (3rd Ed., DeGroot & Schervish)
Solution manual Statistics for Science and Engineering (John Kinney)
Solution manual Mathematical Proofs : A Transition to Advanced Mathematics (1st Ed., Chartrand, Polimeni & Zhang)
Solution manual Mathematical Proofs : A Transition to Advanced Mathematics (2nd Ed., Chartrand, Polimeni & Zhang)
Solution manual Elementary Number Theory (5th Ed., Kenneth H. Rosen)
Solution manual History of Mathematics : Brief Version (Victor J. Katz)
Solution manual Geometry : An Investigative Approach (2nd Ed., Phares G. O'Daffer & Stanley Clemens)
Solution manual A First Course in Abstract Algebra (7th Ed., John Fraleigh)
Solution manual Complex Variables with Applications (3rd Ed., David Wunsch)
Solution manual Numerical Analysis with CD-ROM (Timothy Sauer)
Solution manual Numerical Analysis and Scientific Computation (Jeffery Leader)
Solution manual Linear Algebra and Differential Equations (Gary Peterson & James Sochacki)
Solution manual Elementary Differential Equations (2nd Ed., Werner Kohler & Lee Johnson)
Solution manual Elementary Differential Equations with Boundary Value Problems (2nd Ed., Werner Kohler & Lee Johnson)
Solution manual Fundamentals of Differential Equations (6th Ed., Kent B. Nagle, Late, Edward B. Saff & Arthur David Snider)
Solution manual Fundamentals of Differential Equations and Boundary Value Problems (4th Ed., Kent B. Nagle, Late, Edward B. Saff & Arthur David Snider)
Solution manual Linear Algebra and Its Applications with CD-ROM, Update (3rd Ed., David C. Lay)
Solution manual Introduction to Linear Algebra (5th ed., Lee W. Johnson, R. Dean Riess & Jimmy T. Arnold)
Solution manual Calculus for the Life Sciences (Marvin L. Bittinger, Neal Brand & John Quintanilla)
Solution manual Calculus with Applications for the Life Sciences (Raymond N. Greenwell, Nathan P. Ritchey & Margaret L. Lial)
Solution manual Calculus : An Integrated Approach to Functions and Their Rates of Change, Preliminary Edition (Robin J. Gottlieb)
Solution manual Calculus (9th Ed., George B. Thomas, Jr. & Ross L.

Finney)
Solution manual Thomas' Calculus, Alternate Edition (9th Ed., George B. Thomas, Jr. & Ross L. Finney)
Solution manual Calculus : A Complete Course (2nd Ed., Ross L. Finney, Franklin D. Demana, Bert K. Waits & Daniel Kennedy)
Solution manual Calculus (Elgin H. Johnston & Jerry Mathews)
Solution manual Thomas' Calculus, Updated (10th Ed., George B. Thomas, Jr., Ross L. Finney, Maurice D. Weir & Frank R. Giordano)
Solution manual Thomas' Calculus (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual Thomas' Calculus Early Transcendentals (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual University Calculus (Joel D. Hass, Maurice D. Weir & George B. Thomas, Jr.)
Solution manual University Calculus : Alternate Edition (Joel D. Hass, Maurice D. Weir & George B. Thomas, Jr.)
Solution manual Thomas' Calculus, Media Upgrade (11th Ed., George B. Thomas, Jr., Maurice D. Weir & Frank R. Giordano)
Solution manual Thomas' Calculus, Early Transcendentals, Media Upgrade (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual Calculus with Applications (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Calculus with Applications, Brief Version (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Finite Mathematics with Applications (9th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Finite Mathematics with Applications (10th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Finite Mathematics (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Mathematics with Applications (9th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Mathematics with Applications (10th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Mathematical Ideas (10th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas Expanded Edition (10th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas Expanded Edition (11th Ed., Miller, Heeren & Hornsby)
Solution manual Using and Understanding Mathematics: A Quantitative Reasoning Approach (3rd Ed., Bennett & Briggs)
Solution manual Using and Understanding Mathematics: A Quantitative Reasoning Approach (4th Ed., Bennett & Briggs)
Solution manual A Problem Solving Approach to Mathematics (9th Ed., Billstein, Libeskind & Lott)

Solution manual A Survey of Mathematics with Applications (7th Ed., Angel, Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded Edition (7th Ed., Angel, Abbott & Runde)
Solution manual Mathematics All Around (3rd Ed., Tom Pirnot)
Solution manual Mathematics for Elementary School Teachers (3rd Ed., Phares O'Daffer, Randall Charles, Thomas Cooney, John Dossey & Jane Schielack)
Solution manual Mathematics for Elementary School Teachers (4th Ed., Phares O'Daffer, Randall Charles, Thomas Cooney, John Dossey & Jane Schielack)
Solution manual Mathematics for Elementary Teachers with Activities (Sybilla Beckmann)
Solution manual Mathematics for Elementary Teachers plus Activities Manual (2nd Ed., Sybilla Beckmann)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (8th Ed., Billstein, Libeskind & Lott)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (9th Ed., Billstein, Libeskind & Lott)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (10th Ed., Billstein, Libeskind & Lott)
Solution manual Essentials of Using and Understanding Mathematics : A Quantitative Reasoning Approach (Jeffrey Bennett & William Briggs)
Solution manual Technical Calculus with Analytic Geometry (4th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics (8th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics (9th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus (8th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus (9th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus Metric Version (8th Ed., Allyn Washington)
Solution manual Introduction to Technical Mathematics (5th Ed., Washington, Triola & Reda)
Solution manual A Graphical Approach to Precalculus (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits (3rd Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits : A Unit Circle Approach (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits : A Unit Circle Approach (5th Ed., Hornsby, Lial & Rockswold)
Solution manual Precalculus : Functions and Graphs (5th Ed., Demana, Waits, Foley & Kennedy)
Solution manual Precalculus : Graphical, Numerical, Algebraic (7th Ed., Demana, Waits, Foley & Kennedy)
Solution manual Precalculus : Graphs and Models Graphing Calculator

Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Precalculus : Graphs and Models Graphing Calculator Manual Package (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Functioning in the Real World : A Precalculus Experience (2nd Ed., Gordon, F. Gordon, Tucker & Siegel)
Solution manual Precalculus with Modeling and Visualization (3rd Ed., Gary K. Rockswold)
Solution manual Precalculus with Modeling and Visualization (4th Ed., Gary K. Rockswold)
Solution manual Precalculus (2nd Ed., Beecher, Penna & Bittinger)
Solution manual Precalculus (3rd Ed., Beecher, Penna & Bittinger)
Solution manual Precalculus (3rd Ed., Mark Dugopolski)
Solution manual Precalculus (4th Ed., Mark Dugopolski)
Solution manual Precalculus : Functions and Graphs (2nd Ed., Mark Dugopolski)
Solution manual Precalculus : Functions and Graphs (3rd Ed., Mark Dugopolski)
Solution manual Fundamentals of Precalculus (Mark Dugopolski)
Solution manual Trigonometry (1st Ed., Mark Dugopolski)
Solution manual Trigonometry (2nd Ed., Mark Dugopolski)
Solution manual Trigonometry (3rd Ed., Mark Dugopolski)
Solution manual Trigonometry (8th Ed., Lial, Hornsby & Schneider)
Solution manual Trigonometry (9th Ed., Lial, Hornsby & Schneider)
Solution manual Trigonometry : A Circular Function Approach (Marie Aratari)
Solution manual A Graphical Approach to Algebra and Trigonometry (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Algebra and Trigonometry (5th Ed., Hornsby, Lial & Rockswold)
Solution manual Algebra and Trigonometry : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Algebra and Trigonometry (2nd Ed., Beecher, Penna & Bittinger)
Solution manual Algebra and Trigonometry (3rd Ed., Beecher, Penna & Bittinger)
Solution manual College Algebra and Trigonometry (1st Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra and Trigonometry (2nd Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra and Trigonometry (3rd Ed., Mark Dugopolski)
Solution manual College Algebra and Trigonometry (4th Ed., Mark Dugopolski)
Solution manual College Algebra and Trigonometry : A Unit Circle Approach (5th Ed., Mark Dugopolski)
Solution manual Algebra and Trigonometry with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual Algebra and Trigonometry with Modeling and Visualization (4th Ed., Gary Rockswold)

Solution manual College Algebra and Trigonometry (3rd Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra and Trigonometry (4th Ed., Lial, Hornsby & Schneider)
Solution manual A Graphical Approach to College Algebra (4th Ed., John Hornsby, Margaret Lial & Gary Rockswold)
Solution manual A Graphical Approach to College Algebra (5th Ed., John Hornsby, Margaret Lial & Gary Rockswold)
Solution manual College Algebra : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual College Algebra (J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual College Algebra with Modeling and Visualization (4th Ed., Gary Rockswold)
Solution manual Essentials of College Algebra with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual Essentials of College Algebra (Lial, Hornsby & Schneider)
Solution manual Essentials of College Algebra, Alternate Edition (Lial, Hornsby & Schneider)
Solution manual Essentials of College Algebra (10th Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra (3rd Ed., Mark Dugopolski)
Solution manual College Algebra (4th Ed., Mark Dugopolski)
Solution manual College Algebra (5th Ed., Mark Dugopolski)
Solution manual College Algebra in Context with Applications for the Managerial, Life, and Social Sciences (1st Ed., Ronald Harshbarger & Lisa Yocco)
Solution manual College Algebra in Context with Applications for the Managerial, Life, and Social Sciences (2nd Ed., Ronald Harshbarger & Lisa Yocco)
Solution manual College Algebra (2nd Ed., Judith Beecher, Judith Penna & Marvin Bittinger)
Solution manual College Algebra (9th Ed., Margaret Lial, John Hornsby & David Schneider)
Solution manual Essentials of Geometry for College Students (2nd Ed., Margaret Lial, Barbara Brown, Arnold Steffenson & L. Murphy Johnson)
Solution manual Algebra for College Students (5th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (3rd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (4th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning and Intermediate Algebra (3rd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Margaret

Lial, John Hornsby & Terry McGinnis)
Solution manual Elementary and Intermediate Algebra (1st Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Elementary and Intermediate Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Introductory and Intermediate Algebra : A Combined Approach (2nd Ed., Marvin Bittinger & Judith Beecher)
Solution manual Introductory and Intermediate Algebra (3rd Ed., Marvin Bittinger & Judith Beecher)
Solution manual Introductory and Intermediate Algebra through Applications (2nd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Elementary and Intermediate Algebra (1st Ed., George Woodbury)
Solution manual Elementary and Intermediate Algebra (2nd Ed., George Woodbury)
Solution manual Elementary and Intermediate Algebra (2nd Ed., Mark Dugopolski)
Solution manual Elementary and Intermediate Algebra (3rd Ed., Mark Dugopolski)
Solution manual Elementary and Intermediate Algebra : Concepts and Applications (4th Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Beginning and Intermediate Algebra with Applications and Visualization (Gary Rockswold & Terry Krieger)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (2nd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Foundations of Mathematics (Marvin Bittinger & Judith Penna)
Solution manual Intermediate Algebra (9th Ed., Marvin Bittinger)
Solution manual Intermediate Algebra (10th Ed., Marvin Bittinger)
Solution manual Intermediate Algebra : Graphs & Models (2nd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Intermediate Algebra : Graphs & Models (3rd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Intermediate Algebra (8th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Intermediate Algebra (9th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Intermediate Algebra with Applications and Visualization (2nd Ed., Gary Rockswold & Terry Krieger)
Solution manual Intermediate Algebra (Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Intermediate Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Intermediate Algebra: Concepts and Applications (7th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Beginning Algebra (10th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Prealgebra and Introductory Algebra (Marvin Bittinger & David Ellenbogen)

Solution manual Prealgebra and Introductory Algebra (2nd Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Elementary Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Introductory Algebra (9th Ed., Marvin Bittinger)
Solution manual Introductory Algebra (10th Ed., Marvin Bittinger)
Solution manual Prealgebra and Introductory Algebra (2nd Ed., Margaret Lial, John Hornsby, Terry McGinnis & Diana Hestwood)
Solution manual Prealgebra and Introductory Algebra (3rd Ed., Margaret Lial, Diana Hestwood, John Hornsby & Terry McGinnis)
Solution manual Elementary Algebra with Early Systems of Equations (Tom Carson & Ellyn Gillespie)
Solution manual Elementary Algebra : Concepts and Applications (6th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Elementary Algebra : Concepts and Applications (7th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Introductory Algebra (Richelle Blair)
Solution manual Introductory Algebra (8th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory Algebra (9th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning Algebra with Applications and Visualization (Gary Rockswold & Terry Krieger)
Solution manual Integrated Arithmetic and Basic Algebra (3rd Ed., Bill Jordan & William Palow)
Solution manual Introductory Algebra through Applications (Geoffrey Akst & Sadie Bragg)
Solution manual Prealgebra (3rd Ed., Margaret Lial & Diana Hestwood)
Solution manual Prealgebra (4th Ed., Margaret Lial & Diana Hestwood)
Solution manual Prealgebra (4th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Prealgebra (5th Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Prealgebra (2nd Ed., Tom Carson)
Solution manual Basic Mathematics (9th Ed., Marvin Bittinger)
Solution manual Basic Mathematics (10th Ed., Marvin Bittinger)
Solution manual Basic Mathematics Preliminary Edition (Robert Prior)
Solution manual Basic Mathematics with Early Integers (Marvin Bittinger & Judith Penna)
Solution manual Basic College Mathematics (7th Ed., Margaret Lial, Stanley Salzman & Diana Hestwood)
Solution manual Basic College Mathematics (8th Ed., Margaret Lial, Stanley Salzman & Diana Hestwood)
Solution manual Basic Mathematics through Applications (3rd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Fundamental Mathematics through Applications (3rd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Wave Motion (J. Billingham & A. C. King)
Solution manual Solving ODEs with MATLAB (L. F. Shampine, I. Gladwell & S. Thompson)

Solution manual Numerical Solution of Partial Differential Equations:
An Introduction (2nd Ed., K. W. Morton & D. F. Mayers)
Solution manual Measure Theory and Filtering : Introduction and
Applications (Lakhdar Aggoun & Robert J. Elliott)
Solution manual Mathematical Models in Biology : An Introduction
(Elizabeth S. Allman & John A. Rhodes)
Solution manual Insurance Risk and Ruin (David C. M. Dickson)
Solution manual Data Analysis and Graphics Using R : An Example-based
Approach (2nd Ed., John Maindonald & John Braun)
Solution manual Applied Optimization with MATLAB Programming (1st Ed.,
P. Venkataraman)
Solution manual Applied Optimization with MATLAB Programming (2nd Ed.,
P. Venkataraman)
Solution manual Convex Optimization (Stephen Boyd & Lieven
Vandenberghe)
Solution manual Concrete Abstract Algebra : From Numbers to Gröbner
Bases (Niels Lauritzen)
Solution manual A Concrete Approach to Abstract Algebra : From the
Integers to the Insolvability of the Quintic (Jeffrey Bergen)
Solution manual Calculus : Concepts and Methods (Ken Binmore & Joan
Davies)
Solution manual An Introduction to Partial Differential Equations
(Yehuda Pinchover & Jacob Rubinstein)
Solution manual An Introduction to Ordinary Differential Equations
(James C. Robinson)
Solution manual An Introduction to Mathematical Physiology and Biology
(2nd Ed., J. Mazumdar)
Solution manual An Introduction to Financial Option Valuation :
Mathematics, Stochastics and Computation (Desmond Higham)
Solution manual An Interactive Introduction to Mathematical Analysis
(Jonathan Lewin)
Solution manual An Introduction to Mathematical Finance: Options and
Other Topics (1st Ed., Sheldon M. Ross)

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=1P9GUXB1

I do not review the forums, just send me an email.

- Physics & Astronomy :

Solution manual Introduction to Solid State Physics (8th Ed., Charles Kittel)
Solution manual Quantum Physics (3rd Ed., Stephen Gasiorowicz)
Solution manual Fundamentals of Nuclear Reactor Physics (Elmer Lewis)
Solution manual Nuclear Energy : An Introduction to the Concepts, Systems, and Applications of Nuclear Processes (6th Ed., Raymond L. Murray)
Solution manual Fundamentals of Electromagnetics with Engineering Applications (Stuart M. Wentworth)
Solution manual Physics (7th Ed. by Paul E. Tippens)
Solution manual Physics (6th Ed., Cutnell & Johnson)
Solution manual Physics (7th Ed., Cutnell & Johnson)
Solution manual Physics (8th Ed., Cutnell & Johnson)
Solution manual Essentials of Physics (Cutnell & Johnson)
Solution manual Understanding Physics (1st Ed., Cummings, Laws, Redish & Cooney)
Solution manual Introductory Physics : Building Understanding (Jerold Touger)
Solution manual Physics Matters : An Introduction to Conceptual Physics (James Trefil & Robert Hazen)

Solution manual How Things Work : The Physics of Everyday Life (3rd Ed., Louis Bloomfield)
Solution manual An Introduction to Modern Astrophysics (2nd Ed., Bradley W. Carroll & Dale A. Ostlie)
Solution manual Foundations of Astrophysics (Barbara Ryden & Bradley Peterson)
Solution manual Physics (5th Ed., Halliday, Resnick, Krane)
Solution manual Fundamentals of Physics (6th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (7th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (8th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (9th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (3rd Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (4th Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (5th Ed., Thomas Griffith)
Solution manual Physics of Everyday Phenomena : A Conceptual Introduction to Physics (6th Ed., W. Thomas Griffith & Juliet W. Brosing)
Solution manual Integrated Science (2nd Ed., Tillery et al.)
Solution manual Integrated Science (3rd Ed., Tillery et al.)
Solution manual Integrated Science (4th Ed., Tillery et al.)
Solution manual Physical Science (5th Ed., Tillery)
Solution manual Physical Science (6th Ed., Tillery)
Solution manual Physical Science (7th Ed., Tillery)
Solution manual Physical Science (8th Ed., Tillery)
Solution manual The Physical Universe (11th Ed., Konrad Krauskopf & Arthur Beiser)
Solution manual The Physical Universe (12th Ed., Konrad Krauskopf & Arthur Beiser)
Solution manual Physics of the Life Sciences (Jay Newman)
Solution manual Physics in Biology and Medicine (3rd Ed., Paul Davidovits)
Solution manual Optics (1st Ed., Ajoy Ghatak)
Solution manual Optics (4th Ed., Eugene Hecht)
Solution manual Nonlinear Optics (3rd Ed., Robert Boyd)
Solution manual Introduction to Optics (3rd Ed., Frank L Pedrotti, Leno M Pedrotti & Leno S Pedrotti)
Solution manual Principles of Physical Optics (Charles Bennett)
Solution manual Optics : Principles and Applications (Kailash Sharma)
Solution manual Continuum Electromechanics (James R. Melcher)
Solution manual Electromagnetic Noise and Quantum Optical Measurements (Hermann A. Haus)
Solution manual Matter and Interactions I : Modern Mechanics (2nd Ed., Ruth W. Chabay & Bruce A. Sherwood)

Solution manual Matter and Interactions : Volume 1 : Modern Mechanics (3rd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions II : Electric and Magnetic Interactions (2nd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions : Volume 2 : Electric and Magnetic Interactions (3rd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Thermal Stresses (2nd Ed., Noda, Hetnarski & Tanigawa)
Solution manual Introduction to Statistical Physics (Kerson Huang)
Solution manual Extended Irreversible Thermodynamics (3rd Ed., D. Jou, J. Casas-Vazquez & G. Lebon)
Solution manual An Introduction to Thermodynamics and Statistical Mechanics (2nd Ed, Keith Stowe)
Solution manual Equilibrium and Non-Equilibrium Statistical Thermodynamics (Michel Le Bellac, Fabrice Mortessagne & G. George Batrouni)
Solution manual Elements of Statistical Mechanics: With an Introduction to Quantum Field Theory and Numerical Simulation (Ivo Sachs & Siddhartha Sen)
Solution manual Quantum Transport (2nd Ed., Supriyo Datta)
Solution manual Ocean Waves and Oscillating Systems (Johannes Falnes)
Solution manual Statistical Mechanics (2nd Ed., R.K. Pathria)
Solution manual Quantum Mechanics (Gennaro Auletta, Mauro Fortunato & Giorgio Parisi)
Solution manual Applied Quantum Mechanics (1st Ed., A. F. J. Levi)
Solution manual Applied Quantum Mechanics (2nd Ed., A. F. J. Levi)
Solution manual Fundamentals of Quantum Mechanics (C.L. Tang)
Solution manual Astronomy : A Physical Perspective (2nd Ed., Marc L. Kutner)
Solution manual Classical Mechanics (Douglas Gregory)
Solution manual Electromagnetic Field Theory Fundamentals (2nd Ed., Singh Guru & Hiziroglu)
Solution manual Special Relativity : From Einstein to Strings (P.M. Schwarz & J.H. Schwarz)
Solution manual Gravity : An Introduction to Einstein's General Relativity (James Hartle)
Solution manual A Short Course in General Relativity (3rd Ed., James Foster & J. David Nightingale)
Solution manual Statistical Thermodynamics (Normand Laurendeau)
Solution manual Statistical Thermodynamics and Microscale Thermophysics (Van P. Carey)
Solution manual Thermal Physics (Ralph Baierlein)
Solution manual Topics in Atomic Physics (Charles E. Burkhardt, Jacob J. Leventhal)
Solution manual Foundations of Quantum Physics (Charles E. Burkhardt, Jacob J. Leventhal)
Solution manual Applied Physics (8th Ed., Dale Ewen, Ronald Nelson, Neill Schurter & Erik Gundersen)
Solution manual Applied Physics (9th Ed., Dale Ewen, Neill Schurter & Erik Gundersen)
Solution manual Analytical Mechanics (7th Ed., Grant R. Fowles, George

Cassiday)
Solution manual Orbital Mechanics for Engineering Students (1st Ed., Howard Curtis)
Solution manual Orbital Mechanics for Engineering Students (2nd Ed., Howard Curtis)
Solution manual Diagnostic Ultrasound Imaging : Inside Out (Thomas Szabo)
Solution manual Astronomy : A Beginner's Guide to the Universe (5th Ed., Eric Chaisson & Steve McMillan)
Solution manual The Cosmic Perspective (5th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Cosmic Perspective Media Update (4th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective Media Update (4th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective Media Update (3rd Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective (3rd Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual Astronomy Today (5th Ed., Eric Chaisson & Steve McMillan)
Solution manual Astronomy Today (6th Ed., Eric Chaisson & Steve McMillan)
Solution manual Conceptual Physical Science (3rd Ed., Paul G. Hewitt, John A. Suchocki & Leslie Hewitt)
Solution manual Conceptual Physical Science (4th Ed., Paul G. Hewitt, John A. Suchocki & Leslie Hewitt)
Solution manual Conceptual Integrated Science (Paul G. Hewitt, Suzanne Lyons, John A. Suchocki & Jennifer Yeh)
Solution manual Physics : Concepts & Connections (4th Ed., Art Hobson)
Solution manual Physics : Concepts & Connections (5th Ed., Art Hobson)
Solution manual Conceptual Physics (10th Ed., Paul Hewitt)
Solution manual Conceptual Physics (11th Ed., Paul Hewitt)
Solution manual Conceptual Physics Fundamentals (Paul G. Hewitt)
Solution manual College Physics (6th Ed., Jerry Wilson, Anthony Buffa & Bo Lou)
Solution manual College Physics (7th Ed., Jerry Wilson, Anthony Buffa & Bo Lou)
Solution manual College Physics (8th Ed., Young & Geller)
Solution manual Modern Physics (2nd Ed., Randy Harris)
Solution manual Modern Physics for Scientists and Engineers (John Morrison)
Solution manual Solid State Physics : Essential Concepts (David Snoke)
Solution manual Physics with Mastering Physics (3rd Ed., James Walker)
Solution manual Physics with Mastering Physics (4th Ed., James Walker)
Solution manual Active Learning Guide (Alan Van Heuvelen & Eugenia Etkina)
Solution manual E&M TIPERs : Electricity & Magnetism Tasks (C. J.

Hieggelke, D. P. Maloney, T. L. O'Kuma & Steve Kanim)
Solution manual Physics : Principles with Applications (6th Ed., Douglas C. Giancoli)
Solution manual Physlet® Physics : Interactive Illustrations, Explorations and Problems for Introductory Physics (Wolfgang Christian & Mario Belloni)
Solution manual University Physics with Modern Physics with Mastering Physics (11th Ed., Hugh Young & Roger Freedman)
Solution manual University Physics with Modern Physics with Mastering Physics (12th Ed., Hugh Young & Roger Freedman)
Solution manual Physics for Scientists and Engineers (3rd Ed., Douglas C. Giancoli)
Solution manual Physics for Scientists and Engineers with Modern Physics (3rd Ed., Douglas Giancoli)
Solution manual Physics for Scientists and Engineers with Modern Physics (4th Ed., Douglas Giancoli)
Solution manual Physlet® Quantum Physics : An Interactive Introduction (Mario Belloni, Wolfgang Christian & Anne Cox)
Solution manual Introduction to Electrodynamics (3rd Ed., David J. Griffiths)
Solution manual Introduction to Quantum Mechanics (2nd Ed., David Griffiths)
Solution manual Quantum Mechanics : An Accessible Introduction (Robert Scherrer)
Solution manual Modern Quantum Mechanics (J. J. Sakurai)
Solution manual The Physics of Sound (3rd Ed., Richard Berg & David Stork)
Solution manual Electromagnetism : Principles and Applications (1st Ed., Paul Lorrain, Dale R. Corson)
Solution manual Classical Electromagnetism (Jerrold Franklin)
Solution manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution manual An Introduction to Astrobiology (Iain Gilmour & Mark Sephton)
Solution manual An Introduction to Galaxies and Cosmology (Mark HJones & Robert Lambourne)
Solution manual An Introduction to the Solar System (Neil McBride & Iain Gilmour)
Solution manual Quantum Physics (Michel Le Bellac)
Solution manual Laser Fundamentals (2nd Ed., William T. Silfvast)
Solution manual Laser Electronics (3rd Ed., Joseph T. Verdeyen)
Solution manual Introductory Quantum Optics (Christopher Gerry & Peter Knight)
Solution manual Introduction to Plasma Physics: With Space and Laboratory Applications (D. A. Gurnett & A. Bhattacharjee)
Solution manual A Short Introduction to Quantum Information and Quantum Computation (Michel Le Bellac)

Solution manual A Quantum Approach to Condensed Matter Physics (Philip L. Taylor & Olle Heinonen)
Solution manual A First Course in String Theory (Barton Zwiebach)
Solution manual A First Course in Computational Physics and Object-Oriented Programming with C++ (David Yevick)
Solution manual A Course in Modern Mathematical Physics : Groups, Hilbert Space and Differential Geometry (Peter Szekeres)
Solution manual Ultrasonic Nondestructive Evaluation Systems: Models and Measurements (Lester W. Schmerr & Sung-Jin Song)
Solution manual Explorations : Stars Galaxies and Planets (1st Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (2nd Ed., Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (3rd Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (4th Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (5th Ed. Updated, Thomas Arny)
Solution manual Astronomy : Journey to the Cosmic Frontier (3rd Ed., John D. Fix)
Solution manual Astronomy : Journey to the Cosmic Frontier (4th Ed., John D. Fix)
Solution manual Astronomy : Journey to the Cosmic Frontier (5th Ed., John D. Fix)
Solution manual Pathways to Astronomy with Starry Night Pro (Steven Schneider & Thomas T Arny)
Solution manual From Molecules to Networks (2nd Ed., John Byrne & James Roberts)
Solution manual Biotechnology (David Clark & Nanette Pazdernik)
Solution manual Light and Video Microscopy (Randy Wayne)

- Civil Engineering and Architecture :

Solution manual Mechanical and Structural Vibrations : Theory and Applications (by Jerry H. Ginsberg)
Solution manual Fundamentals of Structural Analysis (1st Ed., Leet & Uang)
Solution manual Fundamentals of Structural Analysis (2nd Ed., Leet & Uang)
Solution manual Fundamentals of Structural Analysis (3rd Ed., Leet, Uang & Gilbert)
Solution manual Fundamentals of Structural Analysis (4th Ed., Leet, Uang & Gilbert)
Solution manual A Structures Primer (Harry F. Kaufman)
Solution manual Steel Design (4th Ed., William T. Segui)
Solution manual Structural and Stress Analysis (2nd Ed., Megson)
Solution manual Structural Steel Design ASD Method (4th Ed., Jack McCormac)
Solution manual Structural Steel Design (4th Ed., Jack McCormac)
Solution manual Structural Steel Design : A Practice Oriented Approach (Abi Aghayere & Jason Vigil)
Solution manual Unified Design of Steel Structures (Louis

Geschwindner)
Solution manual Steel Structures : Behavior and LRFD (1st Ed., Ramulu Vinnakota)
Solution manual The Engineering of Foundations (1st Ed., Rodrigo Salgado)
Solution manual Mechanics of Materials : A Modern Integration of Mechanics and Materials in Structural Design (Christopher Jenkins & Sanjeev Khanna)
Solution manual Analysis and Design of Shallow and Deep Foundations (Lymon Reese, William Isenhower & Shin-Tower Wang)
Solution manual Elementary Structures for Architects and Builders (5th Ed., Ronald Shaeffer)
Solution manual Statics and Strength of Materials for Architecture and Building Construction (3rd Ed., Onouye & Kane)
Solution manual Finite Element Techniques in Structural Mechanics (C. T. F. Ross)
Solution manual Fundamental Finite Element Analysis and Applications: with Mathematica and Matlab Computations (Asghar Bhatti)
Solution manual Advanced Topics in Finite Element Analysis of Structures : With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution manual Adjustment Computations : Spatial Data Analysis (4th Ed., Charles Ghilani & Paul Wolf)
Solution manual Adjustment Computations : Spatial Data Analysis (5th Ed., Charles Ghilani)
Solution manual Surveying (5th Ed., Jack McCormac)
Solution manual Surveying with Construction Applications (6th Ed., Barry Kavanagh)
Solution manual Surveying with Construction Applications (7th Ed., Barry Kavanagh)
Solution manual Surveying : Principles and Applications (8th Ed., Barry Kavanagh)
Solution manual Surveying Fundamentals and Practices (5th Ed., Jerry Nathanson, Michael Lanzafama & Philip Kissam)
Solution manual Surveying Fundamentals and Practices (6th Ed., Jerry Nathanson, Michael Lanzafama & Philip Kissam)
Solution manual Structural Analysis (5th Ed., Hibbeler)
Solution manual Structural Analysis (7th Ed., Hibbeler)
Solution manual Structural Analysis - SI Units (7th Ed., Hibbeler)
Solution manual Dynamics of Structures (3rd Ed., Chopra)
Solution manual Principles of Geotechnical Engineering (6th Ed., Braja M. Das)
Solution manual An Introduction to Geotechnical Engineering (2nd Ed., Robert D. Holtz, William D. Kovacs, Thomas C. Sheahan)
Solution manual Geotechnical Engineering: Principles and Practices (2nd Ed., Donald P. Coduto, Man-chu Ronald Yeung & William A. Kitch)
Solution manual Geotechnical Engineering: Principles and Practices - International Version (2nd Ed., Donald P. Coduto, Man-chu Ronald Yeung & William A. Kitch)
Solution manual Fundamentals of Structural Stability (George Simitses & Dewey Hodges)

Solution manual Fundamentals of Structural Mechanics (2nd Ed., keith D. Hjelmstad)
Solution manual Fundamentals of Structural Dynamics (2nd Ed., Roy Craig & Andrew Kurdila)
Solution manual Design of Concrete Structures (13th Ed., Nilson, Darwin & Dolan)
Solution manual Design of Concrete Structures (14th Ed., Nilson, Darwin & Dolan)
Solution manual Structures (6th Ed., Daniel Lewis Schodek & Martin Bechthold)
Solution manual Concrete Structures (Mehdi Setareh & Robert Darvas)
Solution manual Reinforced Concrete Design : A Practical Approach (Brzev & Pao)
Solution manual Reinforced Concrete : A Fundamental Approach (6th Ed., Edward Nawy)
Solution manual Reinforced Concrete Design (6th Ed., Chu-Kia Wang, Charles Salmon)
Solution manual Reinforced Concrete Design (7th Ed., Chu-Kia Wang, Charles Salmon & José Pincheira)
Solution manual Reinforced Concrete Design (6th Ed., George Limbrunner & Abi Aghayere)
Solution manual Reinforced Concrete Design (7th Ed., George Limbrunner & Abi Aghayere)
Solution manual Reinforced Concrete : Mechanics and Design (4th Ed., James MacGregor & James Wight)
Solution manual Reinforced Concrete : Mechanics and Design (5th Ed., James Wight & James MacGregor)
Solution manual Reinforced Concrete : Mechanics and Design - International Version (5th Ed., James Wight & James MacGregor)
Solution manual Structural Concrete : Theory and Design (3rd Ed., M. Nadim Hassoun & Akthem Al-Manaseer)
Solution manual Structural Concrete : Theory and Design (4th Ed., M. Nadim Hassoun & Akthem Al-Manaseer)
Solution manual Design of Reinforced Concrete (6th Ed., Jack McCormac & James Nelson)
Solution manual Design of Reinforced Concrete (7th Ed., ACI 318-05 Code Edition, by Jack McCormac)
Solution manual Design of Reinforced Concrete (8th Ed., Jack McCormac & Russell Brown)
Solution manual Structural Analysis : Using Classical and Matrix Methods (3rd Ed., James Nelson, Jr., Jack McCormac)
Solution manual Structural Analysis : Using Classical and Matrix Methods (4th Ed., Jack McCormac)
Solution manual Pavement Design and Materials (A. T. Papagiannakis, E. A. Masad)
Solution manual Traffic Engineering (4th Ed., Roger P. Roess, Elena S. Prassas, William R. McShane)
Solution manual Principles of Highway Engineering and Traffic Analysis (3rd Ed., Fred Mannering, Walter Kilareski & Scott Washburn)
Solution manual Principles of Highway Engineering and Traffic Analysis

(4th Ed., Fred Mannering, Walter Kilareski & Scott Washburn)
Solution manual Highway Engineering (7th Ed., Paul Wright & Karen Dixon)
Solution manual Soil Mechanics : Concepts and Applications (2nd Ed., William Powrie)
Solution manual Unsaturated Soil Mechanics (Ning Lu & William Likos)
Solution manual Soil Mechanics and Foundations (2nd Ed., Muniram Budhu)
Solution manual Soils and Foundations - SI Units (6th Ed., Liu & Evett)
Solution manual Soils and Foundations (7th Ed., Liu & Evett)
Solution manual Fundamentals of Soil Mechanics for Sedimentary and Residual Soils (Laurence Wesley)
Solution manual Essentials of Soil Mechanics and Foundations : Basic Geotechnics (7th Ed., David McCarthy)
Solution manual Foundations and Earth Retaining Structures (Muniram Budhu)
Solution manual Design Analysis in Rock Mechanics (William G. Pariseau)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Hydraulic Control Systems (Noah Manring)
Solution manual Open Channel Hydraulics (A. Osman Akan)
Solution manual Open Channel Hydraulics (1st Ed., Terry Sturm)
Solution manual Open Channel Hydraulics (2nd Ed., Terry Sturm)
Solution manual Open-Channel Flow (2nd Ed., M. Hanif Chaudhry)
Solution manual Frozen Ground Engineering (2nd Ed., Orlando Andersland & Branko Ladanyi)
Solution manual Hydraulics in Civil and Environmental Engineering (4th Ed. Andrew Chadwick)
Solution manual Fundamentals of Hydraulic Engineering Systems (4th Ed., Robert Houghtalen, A. Osman Akan, Ned H. C. Hwang)
Solution manual Transportation Engineering : An Introduction (3rd Ed., C. Jotin Khisty, B. Kent Lall)
Solution manual Introduction to Transportation Engineering (2nd Ed., Banks)
Solution manual Urban Transportation Planning (2nd Ed., Meyer & Miller)
Solution manual Transportation Engineering and Planning (3rd Ed., Papacostas & Prevedouros)
Solution manual Structural Wood Design : A Practice-Oriented Approach (Abi Aghayere & Jason Vigil)
Solution manual Simplified Design of Wood Structures (6th Ed., James Ambrose & Patrick Tripeny)
Solution manual Simplified Design of Steel Structures (8th Ed., James Ambrose & Patrick Tripeny)
Solution manual Materials and Components of Interior Architecture (7th Ed., J. Rosemary Riggs)
Solution manual Olin's Construction : Principles, Materials, and

Methods (8th Ed., H. Leslie Simmons)
Solution manual Basic Construction Materials (8th Ed., Theodore Marotta, John C. Coffey, Cynthia LaFleur-Brown & Christine LaPlante)
Solution manual Fundamentals of Residential Construction (2nd Ed., Edward Allen & Rob Thallon)
Solution manual Fundamentals of Building Construction : Materials and Methods (4th Ed., Edward Allen & Joseph Iano)
Solution manual Fundamentals of Building Construction : Materials and Methods (5th Ed., Edward Allen & Joseph Iano)
Solution manual Composites for Construction : Structural Design with FRP Materials (Lawrence Bank)
Solution manual Building Construction : Principles, Materials, and Systems (Madan Mehta, Diane Armpriest & Walter Scarborough)
Solution manual Construction Contracts (2nd Ed., Jimmie Hinze)
Solution manual Construction Contracts (3rd Ed., Jimmie Hinze)
Solution manual Sustainable Construction and Design (Regina Leffers)
Solution manual Global Engineering and Construction (J. K. Yates)
Solution manual Construction Mathematics (Virdi & Baker)
Solution manual Materials for Civil and Construction Engineers (3rd Ed., Michael S. Mamlouk & John P. Zaniewski)
Solution manual Construction Management (3rd Ed., Daniel Halpin)
Solution manual Financial Management and Accounting Fundamentals for Construction (Daniel Halpin & Bolivar Senior)
Solution manual Construction Management Fundamentals (1st Ed., Schexnayder & Mayo)
Solution manual Construction Management Fundamentals (2nd Ed., Knutson, Schexnayder, Fiori & Mayo)
Solution manual Construction Planning, Equipment, and Methods (6th Ed., Peurifoy & Schexnayder)
Solution manual Construction Planning, Equipment, and Methods (7th Ed., Peurifoy, Schexnayder & Shapira)
Solution manual Construction Planning, Equipment, and Methods (8th Ed., Peurifoy, Schexnayder, Shapira & Schmitt)
Solution manual Construction Methods and Management (7th Ed., Stephens Nunnally)
Solution manual Construction Methods and Management (8th Ed., Stephens Nunnally)
Solution manual Construction Project Administration (8th Ed., Edward Fisk, Wayne Reynolds)
Solution manual Construction Project Administration (9th Ed., Edward Fisk, Wayne Reynolds)
Solution manual Construction Project Management (3rd Ed., Gould & Joyce)
Solution manual The Management of Construction : A Project Lifecycle Approach (F. Lawrence Bennett)
Solution manual Construction Accounting and Financial Management (1st Ed., Steven Peterson)
Solution manual Construction Accounting and Financial Management (2nd Ed., Steven Peterson)
Solution manual Principles and Practices of Commercial Construction

(8th Ed., Cameron K. Andres & R.C. Smith)
Solution manual Cost Analysis and Estimating for Engineering and Management (Phillip Ostwald & Timothy McLaren)
Solution manual Construction Estimating Using Excel (Stephen J. Peterson)
Solution manual Heating and Cooling of Buildings : Design for Efficiency (2nd Ed., Jan Kreider, Peter Curtiss & Ari Rabl)
Solution manual Heating, Cooling, Lighting : Sustainable Design Methods for Architects (3rd Ed., Norbert Lechner)
Solution manual Mechanical and Electrical Systems in Architecture, Engineering and Construction (5th Ed., Frank R. Dagostino & Joseph B. Wujek)
Solution manual Mechanical and Electrical Equipment for Buildings (10th Ed., Stein, Reynolds, Grondzik, Kwok)
Solution manual Mechanical and Electrical Equipment for Buildings (11th Ed., Grondzik, Kwok, Stein & Reynolds)
Solution manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution manual Introduction to Naval Architecture : Formerly Muckle's Naval Architecture for Marine Engineers (4th Ed., E.C. Tupper)
Solution manual Architectural Drawing and Light Construction (8th Ed., Philip A. Grau, III & Edward J. Muller)
Solution manual NEW Autodesk Civil 3D : Procedures & Applications (Harry O. Ward)
Solution manual Structural Health Monitoring with Piezoelectric Wafer Active Sensors (Victor Giurgiutiu)
Solution manual Architecture Design Notebook (2nd Ed., Peter Fawcett)
Solution manual Civil Drafting Technology (7th Ed., David A. Madsen, Terence M. Shumaker & David P. Madsen)
Solution manual Introduction to Homeland Security (2nd Ed., Bullock & George Haddow)

- Environmental Engineering, Earth and Environmental Sciences :

Solution manual Principles of Environmental Engineering and Science (1st Ed., Mackenzie Davis & Susan Masten)
Solution manual Principles of Environmental Engineering and Science (2nd Ed., Mackenzie Davis & Susan Masten)
Solution manual Introduction to Environmental Engineering (Richard Mines & Laura Lackey)
Solution manual Introduction to Environmental Engineering (4th Ed., MacKenzie Davis & David Cornwell)

GB2RS NEWS

Sunday 9th January 2011

The news headlines:

RSGB Questionnaires being analysed

New look for UK repeater website

Has your local radio club entered the Club of the Year competition?

The news team and all the staff at RSGB HQ would like to wish our newsreaders, listeners and online readers a very happy New Year.

The RSGB Questionnaire on the status of amateur radio within the UK closed on 31 December 2010. Over 3,000 responses were completed, well in excess of expectations, so the Society is very grateful for those who gave their time to have a go at the Questionnaire. It was particularly good to get feedback from several hundred lapsed members as well as a sizeable number of people who had never joined the Society. The analysis task has now started. Whilst there are some statistics that can be established quickly and easily some of the data, particularly the textual comments will take many hours to gather, categorise and collate. The timetable for the analysis is to complete the analysis by the summer so that the key findings can influence our longer-term planning for the Society.

The UK repeater website been given a fresh look for the New Year, making it easier to find information. There are improved search facilities with separate database and document searching. The document search gives a more effective search of previous committee minutes and other reference material, while the database search allows for searching various repeater data fields for example keeper callsign, frequency, channel and mode. The site lists all UK FM, D-Star and ATV repeaters. A new RSS news feed and Twitter are now available. See www.ukrepeater.net.

The search for the 2010 RSGB Club of the Year, sponsored by Waters and Stanton, is well underway. Entries for the Regional heats have to be submitted to your Regional Manager by midnight on 25 January. All the Regional winners then go forward to the National final, the winner of which receives a cash prize of ?1,000 and a trophy. Entry forms can be found at www.rsgb.org/clubooftheyear.

GB3JB, the 2m repeater located on the borders of Wiltshire, Somerset and Dorset, was powered by wind and solar power. The solar panel has been

stolen from the site and so GB3JB was switched off on 3 January. The repeater keeper will be checking the site for damage to the batteries or the wind turbine.

Advance notice now. The usual date for International Marconi Day in 2011 would have fallen on the Easter Weekend, so the organisers have changed the date to Saturday 30 April. Details of events will appear on the website www.gb4imd.org.uk in due course.

And now for the details of rallies and events for the coming week

The first rallies of 2011 will be on 16 January.

Dover Radio Rally will be held at Whitfield Village Hall, Dover CT16 3LY which is on the A2 just outside of Dover. The event was revived last year and was such a success that they have hired extra space for the rally this year. The focus will be on radio related items not other electronic bits and bobs. The website www.doverradiorally.com has all the usual information required.

The Red Rose Winter Rally will be held at the George H Carnall Leisure Centre, Kingsway Park, M41 7FJ. There is free car parking available and doors open at 11am. There will be trade stands, a Bring and Buy as well as an RSGB bookstall. Details from Steve on 07502 295 141.

Now for the news of special events

Midland Amateur Radio Society is celebrating the club's 80th anniversary. The special event station GB8OTH will be active each Wednesday between 7 and 9pm throughout January.

And now the HF DX news compiled from 425 DX News and other sources

Cezar, VE3LYC and Johan, PA3EXX will attempt a very challenging expedition to the Wollaston Islands and Diego Ramirez Islands between 7 and 22 January. The plan is to operate for four days from each group. However, weather and sea conditions can significantly influence this schedule.

Francis, F6BLP will be on holiday in Senegal from 8 to 21 January and will take the opportunity to get on the air as 6W7SK. QSLs go via the home call and also via Logbook of the World.

Eddy ON4AFU will be in Thailand for the next three months and will activate HS0ZJF. While there he hopes to do some island trips and operate as HS0ZJF/8 from IOTA AS-101 and as HS0ZJF/9 from IOTA AS-126.

Now the contest news

Today, 9 January, the CW AFS contest takes place from 1400 to 1800UTC on the 3.5MHz band. This event counts towards the new AFS Super league. Expect the competition to be tough in this one, but expect the competition to be even tougher in SSB AFS on Saturday 15th. The exchange on the 9th is signal report and serial number.

The 432MHz UK Activity Contest takes place on 11 January from 2000 to 2230UTC. Using all modes on the band the exchange is signal report, serial number and locator.

One of the 80m Club Championships SSB events takes place on 12 January between 2000 and 2130UTC. Remember the maximum power allowed in Club Champs is 100 watts, but for Foundation licensees and those who enjoy low power operation there's also a 10 watt category. The exchange is signal report and serial number.

Saturday 15 January sees the SSB AFS contest taking place between 1400 and 1800UTC. The exchange is signal report and serial number.

And now the solar forecast. This week we mainly take a look at the coming year, but first a very brief look at conditions over the Christmas and New Year period, compiled by Neil Clarke, G0CAS on the 4th of January.

Solar activity was very low and the geomagnetic field was mostly quiet over the Christmas and New Year period. The solar disc was spotless on some days and on others several sunspot groups were visible. This will be typical for the coming year. At times the solar disc will be spotless. However, these days will be few and far between, but when they do occur several spotless days could take place consecutively. Solar activity will be predominately very low but on occasions will increase to moderate levels. No X class solar flares have taken place so far during this sunspot cycle but there is a good chance that this will be rectified later in the year as the larger sunspot groups become more complex and active. Solar flux levels should vary between the 80's and, at times, up to the 120's. The 90 day solar flux average should continue to rise steadily and by the end of the year to around the one hundred mark. Geomagnetic activity will be at quiet levels on most days. Coronal hole disturbances will diminish as the year goes on. Therefore, most of any magnetic storms will result from coronal mass ejections. These type of storms tend to be larger than coronal hole type disturbances, but do not repeat month after month every 27 or 28 days.

So how will all this effect propagation? In general, HF conditions will gradually improve but will have to wait until after the summer months and into next autumn to witness a real improvement. By then 28MHz should be open to most continents on a regular basis. Remember that the F2 maximum usable frequencies are not as high in the summer as they are during the winter months. Also, during the summer months, the daily highs take place during the evening unlike the winter months that occur around local noon. The summer Sporadic-E season normally take place from the end of April to the middle to late August. Even though it takes place at any time during the day and occasionally at night, the most favoured times are mid-morning and again in the early evening. Higher up in frequency, at the VHF part of the spectrum, the usual well forecasted meteor showers will take place. Any prolonged weather patterns with a high pressure over the UK then tropospheric propagation can be expected to take place and including the UHF bands. Obviously, these can not be predicted weeks or months in advance but some of the largest and intense

openings have occurred during the autumn.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

RAF Waddington ARC is starting an Intermediate Course on Wednesday 19 January. For more information, or to book a place, please contact Bob Pickles, G3VCA, on 01522 528708 or email robert@pyewipe.co.uk.

On Monday 10 January Gloucester Amateur Radio & Electronics Society is having an illustrated talk by Ian Hollingsbee, G3TDT, on his exploits as VK3BIH. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 10 January South Birmingham Radio Society is discussing aerials for field day contests. Contact Don, on 0121 458 1603.

On Monday 10 January Stratford Upon Avon District Radio Society is having a guide to contesting by G3MXH. Contact G0CHO, on 01608 664488.

On Monday 10 January Sutton Coldfield Amateur Radio Society has its first meeting of the New Year. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday 11 January Loughborough & District Amateur Radio Club is having a computer night. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 11 January Welland Valley Amateur Radio Society is having an operating night and junk sale. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Wednesday 12 January Hinckley Amateur Radio Society is taking part in the 80m Club Calls SSB contest. Details from John, M0JAV, on 07836 731544.

On Wednesday 12 January Lincoln Short-Wave Club is holding its AGM. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 12 January Midland Amateur Radio Society is holding a committee meeting and training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 12 January Telford & District Amateur Radio Society is looking at the progress and updates of Society projects. Contact Mike,

G3JKX, on 01952 299 677.

On Thursday 13 January South Birmingham Radio Society has training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 14 January Bromsgrove & District Amateur Radio Club commences its New Year construction project. Contact Chris, M0BQE on 01905 776 869.

On Friday 14 January Coventry Amateur Radio Society is holding its annual dinner at the Beechwood Hotel. Booking is essential. Contact John, G8SEQ, on 07958 777363.

On Friday 14 January Nunsfield House Amateur Radio Group is having a talk on the path plotting and prediction program Radio Mobile by Ian Brown, G3TVU. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 14 January South Birmingham Radio Society Friday is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 15 January Hinckley Amateur Radio Society is taking part in the AFS Contest. Details from John, M0JAV, on 07836 731544.

On Saturday 15 January Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

A note to all the clubs in the North West Region that entries for the RSGB Club of the Year regional heats have to be submitted by midnight on 25 January. The winner will receive the Region 3 plaque, generously donated by LAM Communications. All Regional winners then go forward to the National final, the winner of which receives a cash prize of ?1,000 and a fabulous trophy. The National event is sponsored by Waters and Stanton. None of last year's national winners were from Region 3 so let's see if we can change that this year.

Bury Radio Society will be starting an Advanced Course on 25 January, with the exam on 16 June. If you are an Intermediate licensee and are interested please contact Norman Ball, G1HHU on 07525 932729 or via e-mail to g1hhu.norman@gmail.com. A Foundation course will commence in August.

On Monday 10 January Angel of the North Amateur Radio Club is having a talk on operating procedure and best practice by Nancy Bone. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 10 January Bolton Wireless Club is holding its AGM. For details, send an email to boltonwireless@gmail.com.

On Monday 10 January Sheffield Amateur Radio Club is having a talk on light waves by Barry, G8AGN. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 10 January Thornton Cleveleys Amateur Radio Society is on the air and having a natter night. Contact Colin Hirst, G0EPY, by email to colmay@sky.com.

On Tuesday 11 January Halifax & District Amateur Radio Society re-commences its Foundation and Intermediate licence training courses at the Church of the Good Shepherd, Mytholmroyd. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 12 January Hornsea Amateur Radio Club is having a shack activity night. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 12 January Maltby & District Amateur Radio Society is on the air. Contact Keith, G1PQW, on 07701 156 678.

On Thursday 13 January Ripon & District Amateur Radio Society is on the air. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 13 January South Manchester Radio and Computer Club is having a talk on the fundamentals of radio by Ron, G3SVW. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 14 January East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 11 January Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 12 January Glenrothes and District Radio Club is having part two of the talk on PCB layout by John, MM0MBC. Details from Dave Francis, on 01383 823878.

On Wednesday 12 January Lothians Radio Society is having a video evening with Peter Dick, GM4DTH. Contact Andy Sinclair, by email to lrs_secretary@moosedata.com.

On Wednesday 12 January West of Scotland Amateur Radio Society is working on construction projects & licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Friday 14 January Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

On Friday 14 January West of Scotland Amateur Radio Society has presentations, guest speakers, a raffle and quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Monday 10 January Coulsdon Amateur Transmitting Society has its New Year Dinner. Contact Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 10 January Felixstowe & District Amateur Radio Society is closed. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Monday 10 January Surrey Radio Contact Club is having a talk by Chris Whitmarsh, G0FDZ on the GB3VHF story. Contact John, G3MCX, on 020 8688 3322.

On Monday 10 January West Kent Amateur Radio Society is having a talk by Malcolm, G8MCA, on his experiences in the Royal Signals TA. More information from Les, G6UBM, by email to westkentars@googlemail.com.

On Tuesday 11 January Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 11 January Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 11 January Harwell Amateur Radio Society is preparing for the rally and having a quiz night. Contact Malcolm, G8NRP, on 01235 524844.

On Tuesday 11 January Leiston Amateur Radio Club is having a quiz night. Contact Dave, G4HUP, on 0777 764 8448.

On Wednesday 12 January Chelmsford Amateur Radio Society is holding a committee meeting at Danbury Village Hall. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 12 January Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 12 January Farnborough & District Radio Society is having a surprise from G3KND. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

On Wednesday 12 January Harwich Amateur Radio Interest Group is having a members' show and tell night. Details from Kevan, 2E0WMG, on 07766 543784.

On Wednesday 12 January Havering & District Amateur Radio Club is having a talk on Summits on the Air by Dave, M0TAZ and John, M0UKD. Contact John, M0UKD, on 07817 365354.

On Wednesday 12 January South Essex Amateur Radio Society is making preparations for the rally, led by Dave, G4UVJ. Contact Norman, M0FZW, on 01268 692776.

On Wednesday 12 January Southgate Amateur Radio Club is having a talk on Morse code by Nigel, G0RPM. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 12 January Worthing & District Amateur Radio Club is having a discussion evening. Details from Phil, G4UDU, on 01903 816684.

On Thursday 13 January Bittern DX Group is having an informal meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 13 January Chelmsford Amateur Radio Society commences its Foundation course in Danbury Village Hall. Contact Martyn, G1EFL, on 01245 469 008.

On Thursday 13 January Echelford Amateur Radio Society is having a natter night, bring & buy sale and CW practice. Contact John, G4GSC, on 01784 451898.

On Thursday 13 January Edgware & District Radio Society is holding its AGM. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 13 January Lowestoft & District PYE Amateur Radio Club is having its annual dinner. Details from Lee, 2E1LJL, on 01502 564242.

On Thursday 13 January Reading & District Amateur Radio Club is having a talk by Tony Crake, G0OVA, on powerful transmitters in the BBC. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 13 January Shefford & District Amateur Radio Society is having a welcome back meeting. Details from David, G8UOD, on 01234 742 757.

On Friday 14 January Cambridge & District Amateur Radio Club is holding its AGM. Contact Ron Huntsman, on 012233 501712.

On Friday 14 January Loughton & Epping Forest Amateur Radio Society is having a video night. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Friday 14 January Mid-Sussex Amateur Radio Society is discussing the forthcoming year. Contact Peter, G4AKG, on 01444 239371.

On Friday 14 January Radio Society of Harrow is having a talk on PSK31. More information from Linda, G7RJL, on 0208 386 8586.

On Friday 14 January Wimbledon & District Amateur Radio Society is on the air and running Morse and Foundation training. Contact Andrew Maish, G4ADM, on 020 8335 3434.

On Saturday 15 January Chelmsford Amateur Radio Society is running the CARS 80 Metre Contest. Contact Martyn, G1EFL, on 01245 469 008.

On Saturday 15 January Loughton & Epping Forest Amateur Radio Society commences its weekend Foundation Licence course and exam. Contact Marc Litchman, G0TOC, on 020 8502 1645.

NEWS FOR THE SOUTH WEST

On Monday 10 January Exeter Amateur Radio Society is having a club night. Contact Nick, on 01363 775756.

On Tuesday 11 January Blackmoor Vale Amateur Radio Society is having a talk on receiver measurements by Jim, G3RTD. Contact Tony, G0GFL, on 01258 860741.

On Tuesday 11 January Mid Somerset Amateur Radio Club is having part one of a talk on digital modes by Dave, M0SXZ. More information from Nick, M6NJB, on 01749 346320.

On Wednesday 12 January Blackmoor Vale Amateur Radio Society is holding a committee meeting. Contact Tony, G0GFL, on 01258 860741.

On Wednesday 12 January Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 13 January South Bristol Amateur Radio Club is having a technical topics forum. Contact Len, G4RZY, on 01275 834 282.

On Thursday 13 January Swindon & District Amateur Radio Club is having a talk on the Channel Tunnel by Deryck, G3YKC. Contact Den, M0ACM, on 07810 317750.

On Thursday 13 January Yeovil Amateur Radio Club is having a talk on radio astronomy by G0VFK. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 14 January Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

Mold and District Amateur Radio Club in Flintshire North Wales will be starting an Advanced course on 19 January, leading to the exam on 6 April. If you are an Intermediate licensee and can get to Mold Rugby Club on Wednesday nights please contact Steve Studdart, GW7AAV or Keith Williams, GW4OKT via the email addresses on QRZ.com. Further Foundation and Intermediate exam courses will be run during the year. Candidates will be asked to join the radio club and pay a small contribution towards course costs, which excludes project costs and RSGB exam fees.

On Sunday 9 January Aberystwyth & District Amateur Radio Society is having a junk sale. Details and space bookings from Ray, GW7AGG, on 01970 611853.

On Tuesday 11 January Marches Amateur Radio Society is holding its Christmas event. For more information contact Dave, MW0AYM, on 01691 777242.

On Thursday 13 January Aberystwyth & District Amateur Radio Society is closed. Details from Ray, GW7AGG, on 01970 611853.

27. 4050 Solutions manual and Test banks to Chemistry and Chemical Engineering Books

Newsgroup: rec.radio.amateur.misc

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=1P9GUXB1

I do not review the forums, just send me an email.

- Chemistry and Chemical Engineering :

Solution manual An Introduction to Mass and Heat Transfer : Principles of Analysis and Design (Stanley Middleman)
Solution manual Principles and Modern Applications of Mass Transfer Operations (Jaime Benitez)
Solution manual Diffusion : Mass Transfer in Fluid Systems (2nd Ed., Cussler)
Solution manual Separation Process Principles (1st Ed, Seader & Henley)
Solution manual Separation Process Principles (2nd Ed, Seader & Henley)
Solution manual Separation Process Principles (3rd Ed, Seader, Henley & Roper)
Solution manual Analysis, Synthesis and Design of Chemical Processes (3rd Ed., Turton, Bailie, Whiting & Shaeiwitz)
Solution manual Principles of Chemical Separations with Environmental Applications (Richard D. Noble)
Solution manual Product and Process Design Principles : Synthesis, Analysis, and Evaluation (2nd Ed., Seider, Seader & Lewin)
Solution manual Product and Process Design Principles : Synthesis,

Analysis, and Design (3rd Ed., Seider, Seader, Lewin & Widagdo)
Solution manual Principles and Practices of Automatic Process Control (3rd Ed., Smith & Corripio)
Solution manual Process Systems Analysis and Control (3rd Ed. Donald Coughanowr, Steven LeBlanc)
Solution manual Process Dynamics and Control (2nd Ed., Seborg, Edgard & Mellichamp)
Solution manual Process Dynamics and Control (3rd Ed., Seborg, Edgard, Mellichamp & Doyle)
Solution manual Process Control : A First Course with MATLAB (P.C. Chau)
Solution manual Plant Design and Economics for Chemical Engineers (5th Ed., Peters & Timmerhaus)
Solution manual Basic Principles and Calculations in Chemical Engineering (7th Ed., Himmelblau)
Solution manual Unit Operations of Chemical Engineering (6th Ed., McCabe & Smith)
Solution manual Unit Operations of Chemical Engineering (7th Ed., McCabe & Smith)
Solution manual Transport Phenomena in Biological Systems (1st Ed., George Truskey, Fan Yuan & David Katz)
Solution manual Transport Phenomena in Biological Systems (2nd Ed., George Truskey, Fan Yuan & David Katz)
Solution manual Transport Phenomena : A Unified Aprroach (Robert S. Brodkey & Harry C. Hershey)
Solution manual Modeling in Transport Phenomena : A Conceptual Approach (2nd Ed., Ismail Tosun)
Solution manual Transport Phenomena (2nd Ed., Bird & Stewart)
Solution manual Solutions to Class 1&2 - Transport Phenomena (Bird)
Solution manual Chemical Engineering Design (Gavin Towler)
Solution manual Chemical Engineering Design (Coulson & Richardson's Chemical Engineering - Volume 6) - (4th Ed., Sinnott)
Solution manual Chemical Engineering Design - SI Edition (5th Ed., Sinnott & Towler)
Solution manual Fundamentals of Nuclear Reactor Physics (Elmer Lewis)
Solution manual Nuclear Energy : An Introduction to the Concepts, Systems, and Applications of Nuclear Processes (6th Ed., Raymond L. Murray)
Solution manual Chemical Engineering Design and Analysis : An Introduction (Duncan & Reimer)
Solution manual Chemical Reactor Analysis and Design (3rd Ed., Gilbert Froment, Kenneth Bischoff, Juray De Wilde)
Solution manual Introduction to Chemical Reactor Analysis (R.E. Hayes)
Solution manual Kinetics of Catalytic Reactions (Albert Vannice)
Solution manual An Introduction to Chemical Engineering Kinetics and Reactor Design (Charles G. Hill)
Solution manual Chemical Reactions and Chemical Reactors (George W. Roberts)
Solution manual Chemical Reaction Engineering (3rd Ed., Levenspiel)
Solution manual Fundamentals of Chemical Reaction Engineering (1st

Ed., Davis)
Solution manual Conceptual Design of Distillation Systems (1st Ed., Doherty & Malone)
Solution manual Fluid Mechanics for Chemical Engineers (3rd Ed., Noel de Nevers)
Solution manual Introduction to Chemical Processes : Principles, Analysis, Synthesis (1st Ed., Regina M. Murphy)
Solution manual Optimization of Chemical Processes (2nd Ed., Edgar & Himmelblau)
Solution manual Two-Phase Flow : Theory and Applications (Clement Kleinstreuer)
Solution manual Chemical and Engineering Thermodynamics (3rd Ed., Stanley I. Sandler)
Solution manual Chemical, Biochemical, and Engineering Thermodynamics (4th Ed., Stanley I. Sandler)
Solution manual Introduction to Chemical Engineering Thermodynamics (6th Ed., Smith & Van Ness)
Solution manual Introduction to Chemical Engineering Thermodynamics (7th Ed., Smith & Van Ness)
Solution manual Engineering and Chemical Thermodynamics (Koretsky)
Solution manual Introduction to Chemical Principles (9th Ed., Stephen Stoker)
Solution manual Basic Chemistry (2nd Ed., K. Timberlake & W. Timberlake)
Solution manual Phase Equilibria, Phase Diagrams and Phase Transformations : Their Thermodynamic Basis (2nd Ed., Mats Hillert)
Solution manual Principles of Chemical Kinetics (2nd Ed., James House)
Solution manual Elementary Principles of Chemical Processes (3rd Ed., Felder & Rousseau)
Solution manual Elements of Chemical Reaction Engineering (3rd Ed., Fogler)
Solution manual Essentials of Chemical Reaction Engineering (H. Scott Fogler)
Solution manual Principles Of Polymer Systems (5th Ed., by Ferdinand Rodriguez, Claude Cohen, Christopher Ober, Lynden Archer)
Solution manual Group Theory with Applications in Chemical Physics (Patrick Jacobs)
Solution manual Food Analysis (3rd Ed., Suzanne Nielsen)
Solution manual Introduction to Physical Chemistry (3rd Ed., Ladd)
Solution manual General Chemistry: Principles and Modern Applications (10th Ed., Ralph H. Petrucci, F. Geoffrey Herring, Jeffry D. Madura, Carey Bissonnette)
Solution manual Virtual ChemLab : General Chemistry Student Lab Manual / Workbook, v2.5, 3rd Ed. (Brian Woodfield & Matthew Asplund)
Solution manual Introductory Chemistry (2nd Ed., Nivaldo J. Tro)
Solution manual Introductory Chemistry (3rd Ed., Nivaldo J. Tro)
Solution manual Conceptual Integrated Science (Hewitt, Lyons, Suchocki & Yeh)
Solution manual Introductory Chemistry: Concepts and Connections (4th Ed., Charles Corwin)

Solution manual Prentice Hall Lab Manual Introductory Chemistry (4th Ed., Charles Corwin)
Solution manual Modern Organic Synthesis : An Introduction (George S. Zweifel, Michael H. Nantz)
Solution manual General, Organic and Biological Chemistry : Structures of Life (2nd Ed., Karen Timberlake)
Solution manual Chemistry : An Introduction to General, Organic, and Biological Chemistry (9th Ed., Karen Timberlake)
Solution manual Chemistry : An Introduction to General, Organic, and Biological Chemistry (10th Ed., Karen Timberlake)
Solution manual Conceptual Chemistry (3rd Ed., John A. Suchocki)
Solution manual Explorations in Conceptual Chemistry : A Student Activity Manual (Jeffrey Paradis)
Solution manual Criminalistics : An Introduction to Forensic Science (9th Ed., Richard Saferstein)
Solution manual Physical Chemistry (Thomas Engel & Philip Reid)
Solution manual Physical Chemistry for the Life Sciences (Engel, Drobny & Reid)
Solution manual Quantum Chemistry and Spectroscopy with Spartan Student Physical Chemistry Software (Thomas Engel & Philip Reid)
Solution manual Themodynamics, Statistical Thermodynamics, and Kinetics (Thomas Engel & Philip Reid)
Solution manual Physical Chemistry (7th. Ed., Peter Atkins & Julio de Paula)
Solution manual Physical Chemistry (2nd Ed., Robert Mortimer)
Solution manual Physical Chemistry (3rd Ed., Robert Mortimer)
Solution manual Chemistry (4th Ed., Olmsted & Williams)
Solution manual Chemistry : Structure and Dynamics (3rd Ed., Spencer, Bodner & Rickard)
Solution manual Chemistry : Structure and Dynamics (4th Ed., Spencer, Bodner & Rickard)
Solution manual Chemistry : Structure and Dynamics (5th Ed., Spencer, Bodner & Rickard)
Solution manual Chemistry (3rd Ed., Catherine E. Housecroft & Edwin Constable)
Solution manual Chemistry (4th Ed., Catherine E. Housecroft & Edwin Constable)
Solution manual General Chemistry : The Essential Concepts (4th Ed., Raymond Chang)
Solution manual Principles of General Chemistry (2nd Ed., Martin Silberberg)
Solution manual Chemistry : The Molecular Nature of Matter and Change (3rd Ed., Martin Silberberg)
Solution manual Chemistry : The Molecular Nature of Matter and Change (5th Ed., Martin Silberberg)
Solution manual General, Organic and Biochemistry (3rd ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual General, Organic and Biochemistry (4th ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual General, Organic and Biochemistry (5th ed., Katherine

Denniston, Joseph Topping & Robert Caret)
Solution manual General, Organic and Biochemistry (6th ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual Introduction to General, Organic and Biochemistry in the Laboratory: Laboratory Manual (8th Ed., Hein, Peisen, Ritchey, Pattison & Arena)
Solution manual Introduction to General, Organic and Biochemistry in the Laboratory: Laboratory Manual (9th Ed., Hein, Pattison, Arena & Best)
Solution manual Introduction to General, Organic and Biochemistry (8th Ed., Hein, Best, Pattison & Arena)
Solution manual Introduction to General, Organic and Biochemistry (9th Ed., Hein, Pattison, Arena & Best)
Solution manual General, Organic and Biological Chemistry : An Integrated Approach, Laboratory Experiments (Macaulay, Bauer & Bloomfield)
Solution manual General, Organic, and Biological Chemistry : An Integrated Approach (1st Ed., Kenneth W. Raymond)
Solution manual General, Organic, and Biological Chemistry : An Integrated Approach (2nd Ed., Kenneth W. Raymond)
Solution manual General, Organic, and Biological Chemistry : An Integrated Approach (3rd Ed., Kenneth W. Raymond)
Solution manual General, Organic, and Biological Chemistry : A Guided Inquiry (Michael Garoutte)
Solution manual Biophysical Chemistry (James P. Allen)
Solution manual Fundamentals of Chemistry (3rd Ed., David Goldberg)
Solution manual Fundamentals of Chemistry (4th Ed., David Goldberg)
Solution manual Fundamentals of Chemistry (5th Ed., David Goldberg)
Solution manual Chemistry : A Guided Inquiry (4th Ed., Richard Moog & John Farrell)
Solution manual Chemistry : Matter and Its Changes (4th Ed., Brady & Senese)
Solution manual Chemistry : The Study of Matter and Its Changes (5th Ed., Brady & Senese)
Solution manual Chemistry : The Study of Matter and Its Changes (6th Ed., Jespersen, Brady, Hyslop)
Solution manual Chemistry : An Everyday Approach to Chemical Investigation (Sally Solomon, Susan Rutkowsky & Charles Boritz)
Solution manual Organic Chemistry (8th Ed., T. W. Graham Solomons & Craig B. Fryhle)
Solution manual Organic Chemistry (9th Ed., T. W. Graham Solomons & Craig B. Fryhle)
Solution manual Organic Chemistry (10th Ed., T. W. Graham Solomons & Craig B. Fryhle)
Solution manual Advanced Organic Chemistry Part A : Structure and Mechanisms (5th Ed., Francis Carey & Richard Sundberg)
Solution manual Advanced Organic Chemistry Part B : Reaction and Synthesis (5th Ed., Francis Carey & Richard Sundberg)
Solution manual Modern Analytical Chemistry (Harvey)
Solution manual General Chemistry Lab Manual (Petra A. M. van Koppen)

Solution manual Organic Structure Determination Using 2-D NMR Spectroscopy : A Problem-Based Approach (Jeffrey Simpson)
Solution manual Practical Interfacing in the Laboratory : Using a PC for Instrumentation, Data Analysis and Control (Stephen E. Derenzo)
Solution manual Bioprocess Engineering Principles (Pauline M. Doran)
Solution manual Isotopes : Principles and Applications (3rd Ed., Gunter Faure & Teresa Mensing)
Solution manual Fundamentals of Forensic Science (Max Houck & Jay Siegel)
Solution manual Chemistry Case Studies for Allied Health (Colleen Kelley & Wendy Weeks)
Solution manual The Extraordinary Chemistry of Ordinary Things (4th Ed., Carl Snyder)
Solution manual The Art and Science of Chemical Analysis (Christie Enke)
Solution manual Spectrometric Identification of Organic Compounds (7th Ed., Robert Silverstein, Francis Webster, David Kiemle)
Solution manual Bioinstrumentation (John G. Webster)
Solution manual Medical Instrumentation Application and Design (4th Ed., John G. Webster)
Solution manual Microscale General Chemistry Laboratory : with Selected Macroscale Experiments (2nd Ed., Zvi Szafran, Ronald Pike, Judith Foster)
Solution manual Microscale Organic Laboratory : with Multistep and Multiscale Syntheses (4th Ed., Dana Mayo, Ronald Pike, Peter Trumper)
Solution manual Laboratory Manual for Principles of General Chemistry (8th Ed., Jo Allan Beran)
Solution manual Laboratory Manual for Principles of General Chemistry (9th Ed., Jo Allan Beran)

- Industrial Engineering, Business, Accounting, Economics and Finance :

Solution manual Basics of Engineering Economy (1st Ed., Leland T Blank & Anthony Tarquin)
Solution manual Engineering Economy (5th Ed., Leland T Blank & Anthony Tarquin)
Solution manual Engineering Economy (6th Ed., Leland T Blank & Anthony Tarquin)
Solution manual Contemporary Engineering Economics (4th Ed., Chan Park)
Solution manual Contemporary Engineering Economics (5th Ed., Chan Park)
Solution manual Fundamentals of Engineering Economics (2nd Ed., Chan Park)
Solution manual Fundamentals of Engineering Economics : International Version (2nd Ed., Chan Park)
Solution manual Engineering Economy (13th Ed, Sullivan, Wicks & Luxhoj)
Solution manual Engineering Economy (14th Ed, Sullivan, Wicks & Koelling)

Solution manual Engineering Economics : International Version (14th Ed., Sullivan, Wicks & Koelling)
Solution manual Recursive Methods in Economic Dynamics (C. Irigoyen)
Solution manual Engineering Design (Rudolph J. Eggert)
Solution manual Engineering Design : A Project-Based Introduction (2nd Ed., Clive L. Dym & Patrick Little)
Solution manual Engineering Design : A Project-Based Introduction (3rd Ed., Clive L. Dym & Patrick Little)
Solution manual Tools and Tactics of Design (Dominick, Demel, Lawbaugh, Freuler, Kinzel & Fromm)
Solution manual Introduction to Statistical Quality Control (5th Ed., Douglas C. Montgomery)
Solution manual Introduction to Statistical Quality Control (6th Ed., Douglas C. Montgomery)
Solution manual Managing, Controlling, and Improving Quality (Douglas Montgomery, Cheryl Jennings, Michele Pfund)
Solution manual An Introduction to Investment Banks, Hedge Funds, and Private Equity : The New Paradigm (David Stowell)
Solution manual Financial and Economic Analysis for Engineering and Technology Management (2nd Ed., Henry E. Riggs)
Solution manual Introduction to Operations Research (7th Ed., Hillier and Lieberman)
Solution manual Introduction to Operations Research (8th Ed., Hillier and Lieberman)
Solution manual Introduction to Operations Research (9th Ed., Hillier and Lieberman)
Solution manual Methods, Standards, and Work Design (11th Ed., Niebel & Freivalds)
Solution manual Niebel's Methods, Standards and Work Design (12th Ed., Freivalds & Niebel)
Solution manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kealton)
Solution manual Simulation Modeling and Analysis with Expertfit Software (4th Ed., Averill Law)
Solution manual Quality Control (8th Ed., Dale Besterfield)
Solution manual Introduction to Optimum Design (2nd Ed., Jasbir Arora)
Solution manual Numerical Optimization (2nd Ed., Jorge Nocedal & Stephen Wright)
Solution manual Optimization : Foundations and Applications (Ronald E. Miller)
Solution manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution manual Introduction to Applied Optimization (2nd Ed., Urmila Diwekar)
Solution manual Exploring Engineering : An Introduction to Engineering and Design (1st Ed., Philip Kosky, George Wise, Robert Balmer & William Keat)
Solution manual Exploring Engineering : An Introduction to Engineering

and Design (2nd Ed., Philip Kosky, Robert Balmer, William Keat & George Wise)
Solution manual Quantitative Methods For Management (William E. Pinney, Donald B. McWilliams, Joe Ormsby, Mark Atchison)
Solution manual Modern Methods For Quality Control and Improvement (2nd Ed., Wadsworth, Stephens, Godfrey)
Solution manual Managing Engineering and Technology (4th, Morse & Babcock)
Solution manual Managing Engineering and Technology (5th, Morse & Babcock)
Solution manual Quality Planning and Analysis : From Product Development through Use (4th Ed., Gryna)
Solution manual Juran's Quality Planning and Analysis for Enterprise Quality (5th Ed., Gryna, Chua & DeFeo)
Solution manual Quality (4th Ed., Summers)
Solution manual Quality (5th Ed., Summers)
Solution manual Quality Management (2nd Ed., Summers)
Solution manual Quality Management (5th Ed., Goetsch & Davis)
Solution manual Quality Management for Organizational Excellence : Introduction to Total Quality (6th Ed., David Goetsch & Stanley Davis)
Solution manual Applied Econometric Time Series (2nd Ed., Walter Enders)
Solution manual Applied Econometric Time Series (3rd Ed., Walter Enders)
Solution manual Statistics and Econometrics : Methods and Applications (Ashenfelter, Levine & Zimmerman)
Solution manual Econometric Analysis (5th Ed., William H. Greene)
Solution manual Econometric Analysis (6th Ed., William H. Greene)
Solution manual Management : A Practical Introduction (4th Ed., Angelo Kinicki & Brian Williams)
Solution manual Forest Management and Planning (Pete Bettinger, Kevin Boston, Jacek Siry & Donald Grebner)
Solution manual Foundations of Multinational Financial Management (5th Ed., Shapiro)
Solution manual Foundations of Multinational Financial Management (6th Ed., Shapiro & Sarin)
Solution manual Multinational Financial Management (8th Ed., Shapiro)
Solution manual Multinational Financial Management (9th Ed., Shapiro)
Solution manual Doing Statistics for Business with Excel : Data, Inference, and Decision Making (2nd Ed. Pelosi & Sandifer)
Solution manual Data, Statistics, and Decision Models with Excel (Harnett & Horrell)
Solution manual Modern Portfolio Theory and Investment Analysis (7th Ed., Elton, Gruber, Brown & Goetzmann)
Solution manual Modern Portfolio Theory and Investment Analysis (8th Ed., Elton, Gruber, Brown & Goetzmann)
Solution manual Accounting : What the Numbers Mean (6th Ed., David Marshall, Wayne McManus, Dan Viele)
Solution manual Accounting : What the Numbers Mean (7th Ed., David Marshall, Wayne McManus, Dan Viele)

Solution manual Accounting : What the Numbers Mean (8th Ed., David Marshall, Wayne McManus, Dan Viele)
Solution manual Accounting : What the Numbers Mean (9th Ed., David Marshall, Wayne McManus, Dan Viele)
Solution manual Global Accounting and Control : A Managerial Emphasis (Gray, Salter, Radebaugh)
Solution manual International Accounting and Multinational Enterprises (6th Ed., Radebaugh, Gray, Black)
Solution manual Quality : A Corporate Force, Managing for Excellence (C. Harold Aikens)
Solution manual Quality Inspired Management : The Key to Sustainability (C. Harold Aikens)
Solution manual Value Driven Product Planning and Systems Engineering (H. E. Cook & L. A. Wissmann)
Solution manual Work Systems : The Methods, Measurement & Management of Work (Mikell Groover)
Solution manual Design and Analysis of Lean Production Systems (Askin & Goldberg)
Solution manual Occupational Safety and Health for Technologists, Engineers, and Managers (5th Ed., Goetsch)
Solution manual Occupational Safety and Health for Technologists, Engineers, and Managers (6th Ed., Goetsch)
Solution manual Manufacturing Facilities Design and Material Handling (3rd Ed., Meyers & Stephens)
Solution Manual Manufacturing Facilities Design and Material Handling (4th Ed., Stephens & Meyers)
Solution Manual Fundamentals of Forensic Science (Max Houck & Jay Siegel)
Solution Manual Project Management for Business and Engineering : Principles and Practice (2nd Ed., John Nicholas)
Solution Manual Project Management for Business and Engineering : Principles and Practice (3rd Ed., John Nicholas)
Solution Manual CIMA Official Learning System Integrated Management (4th Ed., Ann Norton)
Solution Manual CIMA Official Learning System Enterprise Management (6th Ed., Ann Norton & Jenny Hughes)
Solution Manual CIMA Official Learning System Financial Operations (6th Ed., Jo Watkins)
Solution Manual CIMA Official Learning System Financial Management (6th Ed., Luisa Robertson)
Solution Manual CIMA Official Learning System Enterprise Strategy (6th Ed., Neil Botten)
Solution Manual CIMA Official Learning System Fundamentals of Business Maths (4th Ed., Graham Eaton)
Solution Manual CIMA Official Learning System Financial Analysis (4th Ed., Catherine Gowthorpe)
Solution Manual CIMA Official Learning System Fundamentals of Financial Accounting (2nd Ed., Henry Lunt)
Solution Manual CIMA Official Learning System Fundamentals of Financial Accounting (6th Ed., Henry Lunt)

Solution Manual CIMA Official Learning System Performance Management (6th Ed., Jo Avis)
Solution Manual CIMA Official Learning System Fundamentals of Management Accounting (2nd Ed., Janet Walker)
Solution Manual CIMA Official Learning System Management Accounting Financial Strategy (4th Ed., John Ogilvie)
Solution Manual CIMA Official Learning System Financial Strategy (6th Ed., John Ogilvie)
Solution Manual CIMA Official Learning System Organisational Management and Information Systems (4th Ed., Bob Perry)
Solution Manual CIMA Learning System Enterprise Operations (Bob Perry)
Solution Manual CIMA Learning System Management Accounting - Performance Evaluation (4th Ed., Robert Scarlett)
Solution Manual CIMA Official Learning System - Performance Operations (6th Ed., Robert Scarlett)
Solution Manual CIMA Official Learning System Fundamentals of Business Economics (2nd Ed., Steve Adams & Paul Periton)
Solution Manual Operations Management in Context (2nd Ed., Rowbotham, Azhashemi & Galloway)
Solution Manual Accounting for Business Studies (Aneirin Sion Owen)
Solution Manual ISO 9001 : 2000 Quality Registration Step-by-Step (3rd Ed., Fred Dobb)
Solution Manual Systems for Planning and Control in Manufacturing (D. K. Harrison & D. J. Petty)
Solution Manual Facilities Planning (3rd Ed., Tompkins, White, Bozer & Tanchoco)
Solution Manual Facilities Planning (4th Ed., Tompkins, White, Bozer & Tanchoco)
Solution Manual Facilities Planning and Design (Alberto Garcia-Diaz & J. MacGregor Smith)
Solution Manual Planning and Control of Manufacturing Operations (John Kenworthy)
Solution Manual Professionalism: Real Skills for Workplace Success (Anderson & Bolt)
Solution Manual Customer Service : Career Success Through Customer Loyalty (4th Ed., Timm)
Solution Manual Customer Service : A Practical Approach (3rd Ed., Harris)
Solution Manual Customer Service : A Practical Approach (4th Ed., Harris)
Solution Manual Serving Internal and External Customers (Anne Swartzlander)
Solution Manual The Theory of Interest (3rd Ed., Stephen G. Kellison)
Solution Manual Customer Relationship Management : The Bottom Line to Optimizing Your ROI (Anton & Petouhoff)
Solution Manual Engineering Economy and the Decision-Making Process (Joseph C. Hartman)
Solution Manual Engineering Management : Challenges in the New Millennium (C. M. Chang)
Solution Manual Cost Analysis and Estimating for Engineering and

Management (Phillip F. Ostwald & Timothy S. McLaren)
Solution Manual Supply Chain Management (3rd Ed., Sunil Chopra & Peter Meindl)
Solution Manual Supply Chain Management (4th Ed., Sunil Chopra & Peter Meindl)
Solution Manual Supply Chain Management : From Vision to Implementation (Stanley E. Fawcett, Lisa M. Ellram, Jeffrey A. Ogden)
Solution Manual Industrial Safety and Health Management (5th Ed., C. Ray Asfahl)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Jon S. Stenerson & Kelly Curran)
Solution Manual Introduction to Management Science (8th Ed., Bernard W. Taylor)
Solution Manual Introduction to Management Science (9th Ed., Bernard W. Taylor)
Solution Manual Introduction to Management Science (10th Ed., Bernard W. Taylor)
Solution Manual Operations Research : An Introduction (8th Ed., Taha)
Solution Manual Decision Support Systems and Intelligent Systems (7th Ed., Turban, Aronson, Ting-Peng Liang)
Solution Manual Decision Support and Business Intelligence Systems (8th Ed., Turban, Aronson, Ting-Peng Liang & Sharda)
Solution Manual Introduction to Information Systems : Canadian Edition (Rainer, Turban, Splettstoesser-Hogeterp, Sanchez-Rodriguez)
Solution Manual Introduction to Information Systems : Supporting and Transforming Business (1st Ed., Rainer, Turban, Potter)
Solution Manual Introduction to Information Systems : Supporting and Transforming Business (2nd Ed., Rainer, Turban)
Solution Manual Information Technology for Management : Transforming Organizations in the Digital Economy (5th Ed., Turban, Leidner, McLean, Wetherbe)
Solution Manual Information Technology for Management : Transforming Organizations in the Digital Economy (6th Ed., Turban, Leidner, McLean, Wetherbe)
Solution Manual Information Technology for Management : Improving Performance in the Digital Economy (7th Ed., Turban & Volonino)
Solution Manual Operations Management (7th Ed., Krajewski, Ritzman)
Solution Manual Operations Management : Process and Value Chains (8th Ed., Krajewski, Ritzman & Malhotra)
Solution Manual Operations Management : Process and Supply Chains (9th Ed., Krajewski, Ritzman & Malhotra)
Solution Manual Operations Management : Process and Supply Chains - Global Edition (9th Ed., Krajewski, Ritzman & Malhotra)
Solution Manual Operations Management (8th Ed., Jay Heizer & Render)
Solution Manual Operations Management (9th Ed., Jay Heizer & Render)
Solution Manual Operations Management (10th Ed., Jay Heizer & Render)
Solution Manual Introduction to Operations and Supply Chain Management with Advanced Decision Support Tools (1st Ed., Cecil Bozarth)
Solution Manual Introduction to Operations and Supply Chain Management (2nd Ed., Cecil Bozarth, Robert B. Handfield)

Solution Manual Managing Business Process Flows : Principles of Operations Management (2nd Ed., Anupind, Chopra, Deshmukh, et al)
Solution Manual Principles Of Operations Management (6th Ed., Heizer & Render)
Solution Manual Principles Of Operations Management (7th Ed., Heizer & Render)
Solution Manual Principles Of Operations Management (8th Ed., Heizer & Render)
Solution Manual Foundations of Operations Management (Ritzman & Krajewski)
Solution Manual Foundations of Operations Management - Canadian Edition (2nd Ed., Ritzman, Krajewski, Malhotra & Klassen)
Solution Manual Basic Marketing : A Marketing Strategy Planning Approach (16th Ed., Perreault, Cannon & McCarthy)
Solution Manual Basic Marketing : A Marketing Strategy Planning Approach (17th Ed., Perreault, Cannon & McCarthy)
Solution Manual Foundations of Financial Management (11th Ed., Block & Hirt)
Solution Manual Foundations of Financial Management (12th Ed., Block & Hirt)
Solution Manual Foundations of Financial Management (13th Ed., Block, Hirt & Danielsen)
Solution Manual Decision Modeling with Microsoft® Excel (6th Ed., Moore & Weatherford)
Solution Manual Managing Quality : Integrating The Supply Chain (3rd Ed., S. Thomas Foster)
Solution Manual Six Sigma : Basic Tools and Techniques (Donna C.S. Summers)
Solution Manual A First Course in Quality Engineering (KS Krishnamoorthi)
Solution Manual Statistical Quality Design and Control (2nd Ed., DeVor, Chang & Sutherland)
Solution Manual Economics : A Tool for Critically Understanding Society (7th Ed., Riddell, Shackelford, Stamos & Schneider)
Solution Manual Economics : A Tool for Critically Understanding Society (8th Ed., Riddell, Shackelford, Stamos & Schneider)
Solution Manual Introduction to Economic Reasoning (6th Ed., William D. Rohlf, Jr.)
Solution Manual Introduction to Economic Reasoning (7th Ed., William D. Rohlf, Jr.)
Solution Manual Economics (9th Ed., Michael Parkin)
Solution Manual Essential Foundations of Economics (3rd Ed., Robin Bade & Michael Parkin)
Solution Manual Essential Foundations of Economics (4th Ed., Robin Bade & Michael Parkin)
Solution Manual Understanding Modern Economics (Roger LeRoy Miller)
Solution Manual The Economics of Macro Issues (3rd Ed., Roger LeRoy Miller & Daniel K. Benjamin)
Solution Manual Foundations of Economics (3rd Ed., Robin Bade & Michael Parkin)

Solution Manual Foundations of Economics (4th Ed., Robin Bade & Michael Parkin)
Solution Manual International Economics (8th Ed., Dominick Salvatore)
Solution Manual International Economics (9th Ed., Dominick Salvatore)
Solution Manual International Economics (10th Ed., Dominick Salvatore)
Solution Manual Introduction to International Economics (1st Ed., Dominick Salvatore)
Solution Manual Introduction to International Economics (2nd Ed., Dominick Salvatore)
Solution Manual Economics Today (13th Ed., Roger LeRoy Miller)
Solution Manual Economics Today (14th Ed., Roger LeRoy Miller)
Solution Manual Economics Today (15th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View - Canadian Edition (4th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View (13th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View (14th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View (15th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View - Canadian Edition (4th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View (13th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View (14th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View (15th Ed., Roger LeRoy Miller)
Solution Manual Economics (Michael A. Leeds, Peter von Allmen & Richard C. Schiming)
Solution Manual Economics : Private Markets and Public Choice (7th Ed., Ekelund, Jr., Ressler & Tollison)
Solution Manual Principles of Economics, 7th Ed. (Roy J. Ruffin & Paul R. Gregory)
Solution Manual The Economics of Public Issues (14th Ed., Miller, Benjamin & North)
Solution Manual The Economics of Public Issues (15th Ed., Miller, Benjamin & North)
Solution Manual Macroeconomics (7th Ed., Michael Parkin)
Solution Manual Macroeconomics (8th Ed., Michael Parkin)
Solution Manual Macroeconomics (9th Ed., Michael Parkin)
Solution Manual Foundations of Microeconomics (3rd Ed., Robin Bade & Michael Parkin)
Solution Manual Foundations of Microeconomics (4th Ed., Robin Bade & Michael Parkin)
Solution Manual Foundations of Macroeconomics (3rd Ed., Robin Bade & Michael Parkin)
Solution Manual Foundations of Macroeconomics (4th Ed., Robin Bade & Michael Parkin)
Solution Manual Microeconomic Theory (Andreu Mas-Colell, Michael D.

Whinston, Jerry R. Green)
Solution Manual Microeconomics MyEconLab Homework Edition (Leeds, von Allmen & Schiming)
Solution Manual Macroeconomics MyEconLab Homework Edition (Leeds, von Allmen & Schiming)
Solution Manual Microeconomics (7th Ed., Michael Parkin)
Solution Manual Microeconomics (8th Ed., Michael Parkin)
Solution Manual Microeconomics (9th Ed., Michael Parkin)
Solution Manual Microeconomics (6th Ed., Robert Pindyck & Daniel Rubinfeld)
Solution Manual Microeconomics (7th Ed., Robert Pindyck & Daniel Rubinfeld)
Solution Manual Macroeconomics (2nd Ed., Stephen D. Williamson)
Solution Manual Macroeconomics (3rd Ed., Stephen D. Williamson)
Solution Manual Macroeconomics Update Edition (5th Ed., Andrew B. Abel, Ben S. Bernanke)
Solution Manual Macroeconomics (6th Ed., Andrew B. Abel, Ben S. Bernanke & Dean Croushore)
Solution Manual Macroeconomics (10th Ed., Robert J. Gordon)
Solution Manual Macroeconomics (11th Ed., Robert J. Gordon)
Solution Manual Macroeconomics - Canadian Edition (3rd Ed., Olivier Blanchard & David R. Johnson)
Solution Manual Macroeconomics (4th Ed., Olivier Blanchard)
Solution Manual Macroeconomics - Canadian Edition (4th Ed., Olivier Blanchard & David R. Johnson)
Solution Manual Macroeconomics (5th Ed., Olivier Blanchard)
Solution Manual Systems Engineering and Analysis (5th Ed., Benjamin Blanchard & Wolter Fabrycky)
Solution Manual Economic Growth (1st Ed., David N. Weil)
Solution Manual Economic Growth (2nd Ed., David N. Weil)
Solution Manual Money, the Financial System, and the Economy (5th Ed., R. Glenn Hubbard)
Solution Manual Money, the Financial System, and the Economy (6th Ed., R. Glenn Hubbard)
Solution Manual Money, Banking and Financial Markets (2nd Ed., Stephen G. Cecchetti)
Solution Manual The Economics of Money, Banking and Financial Markets (8th Ed., Frederic S. Mishkin)
Solution Manual The Economics of Money, Banking and Financial Markets (9th Ed., Frederic S. Mishkin)
Solution Manual Principles of Money, Banking, and Financial Markets (11th Ed., Ritter, Silber & Udell)
Solution Manual Principles of Money, Banking, and Financial Markets (12th Ed., Ritter, Silber & Udell)
Solution Manual Fundamentals of Corporate Finance (Parrino & Kidwell)
Solution Manual Financial Institutions, Markets, and Money (9th Ed., Kidwell, Blackwell, Whidbee & Peterson)
Solution Manual Financial Institutions, Markets, and Money (10th Ed., Kidwell, Blackwell, Whidbee & Peterson)
Solution Manual International Economics (3rd Ed., James Gerber)

Solution Manual International Economics (4th Ed., James Gerber)
Solution Manual International Economics (5th Ed., James Gerber)
Solution Manual International Economics (7th Ed., Steven Husted & Michael Melvin)
Solution Manual International Economics (8th Ed., Steven Husted & Michael Melvin)
Solution Manual International Economics (3rd Ed., W. Charles Sawyer & Richard L. Sprinkle)
Solution Manual World Trade and Payments : An Introduction (9th Ed., Caves, Frankel & Jones)
Solution Manual World Trade and Payments : An Introduction (10th Ed., Caves, Frankel & Jones)
Solution Manual International Economics : Theory and Policy (7th Ed., Krugman & Obstfeld)
Solution Manual International Economics : Theory and Policy (8th Ed., Krugman & Obstfeld)
Solution Manual International Money and Finance (7th Ed., Michael Melvin)
Solution Manual Economic Development (9th Ed., Todaro & Smith)
Solution Manual Microeconomics (4th Ed., Jeffrey M. Perloff)
Solution Manual Microeconomics (Don E. Waldman)
Solution Manual Microeconomics : Theory and Applications with Calculus (Jeffrey M. Perloff)
Solution Manual Microeconomic : Theory and Applications (9th Ed., Browning & Zupan)
Solution Manual Microeconomic : Theory and Applications (10th Ed., Browning & Zupan)
Solution Manual Environmental Economics and Policy (5th Ed., Tom Tietenberg)
Solution Manual Environmental and Natural Resource Economics (7th Ed., Tom Tietenberg)
Solution Manual Health Economics (3rd Ed., Charles E. Phelps)
Solution Manual Industrial Organization : Theory and Practice (3rd Ed., Waldman & Jensen)
Solution Manual Modern Industrial Organization (4th Ed., Carlton & Perloff)
Solution Manual Modern Labor Economics : Theory and Public Policy (9th Ed., Ehrenberg & Smith)
Solution Manual Law and Economics (4th Ed., Cooter & Ulen)
Solution Manual Law and Economics (5th Ed., Cooter & Ulen)
Solution Manual Market Regulation (Roger Sherman)
Solution Manual Public Finance and the American Economy (2nd Ed., Neil Bruce)
Solution Manual The Economics of Sports (2nd Ed., Leeds & von Allmen)
Solution Manual The Economics of Sports (3rd Ed., Leeds & von Allmen)
Solution Manual Introduction to Econometrics, Brief Edition (James H. Stock & Mark W. Watson)
Solution Manual Introduction to Econometrics (2nd ed., James H. Stock & Mark W. Watson)
Solution Manual Econometrics : A Modern Introduction (Michael P.

Murray)
Solution Manual Using Econometrics : A Practical Guide (5th Ed., A.H. Studenmund)
Solution Manual Mathematical Methods for Economics (2nd Ed., Michael Klein)
Solution Manual Personal Finance with Financial Planning Software (3rd Ed., Jeff Madura)
Solution Manual Finance : Investments, Institutions, and Management - Update (2nd Ed., Stanley G. Eakins)
Solution Manual Introduction to Finance (Lawrence J. Gitman & Jeff Madura)
Solution Manual Principles of Managerial Finance Brief (4th Ed., Lawrence J. Gitman)
Solution Manual Principles of Managerial Finance (11th Ed., Lawrence J. Gitman)
Solution Manual Corporate Finance (Jonathan Berk & Peter DeMarzo)
Solution Manual Corporate Finance (7th Ed., Stephen A. Ross, Randolph W. Westerfield, Jeffrey Jaffe)
Solution Manual Principles of Corporate Finance (7th Ed., Richard A. Brealey, Stewart C. Myers)
Solution Manual Risk Takers : Uses and Abuses of Financial Derivatives (John Marthinsen)
Solution Manual Theory of Asset Pricing (George Pennacchi)
Solution Manual Multinational Business Finance (10th Ed., Eiteman, Stonehill & Moffett)
Solution Manual Multinational Business Finance (11th Ed., Eiteman, Stonehill & Moffett)
Solution Manual Fundamentals of Multinational Finance (1st Ed., Moffett, Stonehill & Eiteman)
Solution Manual Fundamentals of Multinational Finance (2nd Ed., Moffett, Stonehill & Eiteman)
Solution Manual Fundamentals of Multinational Finance (3rd Ed., Moffett, Stonehill & Eiteman)
Solution Manual Cases in International Finance (2nd Ed., Dufey & Giddy)
Solution Manual Fundamentals of Investing (9th Ed., Gitman & Joehnk)
Solution Manual Fundamentals of Investing (10th Ed., Gitman & Joehnk)
Solution Manual OTIS : Online Trading (Wharton Learning Lab)
Solution Manual Derivatives Markets (2nd Ed., Robert L. McDonald)
Solution Manual Principles of Risk Management and Insurance (9th Ed., George E. Rejda)
Solution Manual Principles of Risk Management and Insurance (10th Ed., George E. Rejda)
Solution Manual Financial Markets and Institutions (5th Ed., Frederic S. Mishkin & Stanley G. Eakins)
Solution Manual Financial Markets and Institutions (6th Ed., Frederic S. Mishkin & Stanley G. Eakins)
Solution Manual Statistical Analysis of Financial Data in S-PLUS (Rene A. Carmona)
Solution Manual Statistics and Finance : An Introduction (David

Ruppert)
Solution Manual Mathematical Statistics for Economics and Business (Ron C. Mittelhammer)
Solution Manual Job Hazard Analysis (James E. Roughton & Nathan Crutchfield)
Solution Manual Managerial Issues of Enterprise Resource Planning Systems (David L. Olson)
Solution Manual Business Driven Technology (1st Ed., Haag et al.)
Solution Manual Business Driven Technology (2nd Ed., Haag et al.)
Solution Manual Operations Management : An Integrated Approach (2nd Ed., R. Dan Reid & Nada Sanders)
Solution Manual Operations Management : An Integrated Approach (3rd Ed., R. Dan Reid & Nada Sanders)
Solution Manual Operations Management (4th Ed., R. Dan Reid & Nada Sanders)
Solution Manual Commercial Banking : The Management of Risk (3rd Ed., Gup & Kolari)
Solution Manual Essential Statistics for Economics, Business and Management (Teresa Bradley)
Solution Manual Calculus for Business, Economics, and the Social and Life Sciences (8th Ed., Hoffmann & Bradley)
Solution Manual Calculus for Business, Economics, and the Social and Life Sciences (9th Ed., Hoffmann & Bradley)
Solution Manual Calculus for Business, Economics, and the Social and Life Sciences, Brief Edition (10th Ed., Hoffmann & Bradley)
Solution Manual Applied Calculus for Business, Economics, and the Social and Life Sciences, Expanded Edition (10th Ed., Hoffmann & Bradley)
Solution Manual Accounting for Governmental and Nonprofit Entities (12th Ed., Wilson & Kattelus)
Solution Manual Accounting for Governmental and Nonprofit Entities (13th Ed., Wilson & Kattelus)
Solution Manual Accounting for Governmental and Nonprofit Entities (14th Ed., Wilson, Kattelus & Reck)
Solution Manual Accounting for Governmental and Nonprofit Entities (15th Ed., Wilson, Reck & Kattelus)
Solution Manual Accounting Theory : Text and Readings (7th Ed., Schroeder, Clark & Cathey)
Solution Manual Financial Accounting Theory and Analysis : Text Reading and Cases (8th Ed., Schroeder, Clark & Cathey)
Solution Manual Financial Accounting Theory and Analysis : Text and Cases (9th Ed., Schroeder, Clark & Cathey)
Solution Manual Financial Accounting in an Economic Context (6th Ed., Jamie Pratt)
Solution Manual Financial Accounting in an Economic Context (7th Ed., Jamie Pratt)
Solution Manual Principles of Engineering Economic Analysis (5th Ed., White, Case, Pratt)
Solution Manual Financial Accounting (Michael Jones)
Solution Manual Financial Accounting : A Valuation Emphasis (Hughes,

Ayres, Hoskin)
Solution Manual Financial Accounting : A Decision-Making Approach (2nd Ed., King, Lembke & Smith)
Solution Manual Financial Accounting (4th Ed., Weygandt, Kieso & Kimmel)
Solution Manual Financial Accounting, with Annual Report (5th Ed., Weygandt, Kieso & Kimmel)
Solution Manual Financial Accounting (6th Ed., Weygandt, Kimmel & Kieso)
Solution Manual Financial Accounting (7th Ed., Weygandt, Kimmel & Kieso)
Solution Manual Financial Accounting : IFRS Edition (1st Ed., Weygandt, Kimmel & Kieso)
Solution Manual Acive Learning Edition for Financial Accounting : Tools for Business Decision Making (3rd Ed., Kimmel, Weygandt & Kieso)
Solution Manual Financial Accounting : Tools for Business Decision Making, with Annual Report (3rd Ed., Kimmel, Weygandt & Kieso)
Solution Manual Financial Accounting : Tools for Business Decision Making (4th Ed., Kimmel, Weygandt & Kieso)
Solution Manual Financial Accounting : Tools for Business Decision Making (5th Ed., Kimmel, Weygandt & Kieso)
Solution Manual Managerial Decision Modeling with Spreadsheets : Canadian Edition (1st Ed., Render, Stair, Balakrishnan & Smith)
Solution Manual Managerial Decision Modeling with Spreadsheets (1st Ed., Render, Stair, Balakrishnan)
Solution Manual Managerial Decision Modeling with Spreadsheets (2nd Ed., Balakrishnan, Render & Stair)
Solution Manual Introduction to Managerial Accounting (2nd Ed., Brewer, Garrison. Noreen)
Solution Manual Introduction to Managerial Accounting (3rd Ed., Brewer, Garrison. Noreen)
Solution Manual Introduction to Managerial Accounting (4th Ed., Brewer, Garrison. Noreen)
Solution Manual Introduction to Managerial Accounting (5th Ed., Brewer, Garrison. Noreen)
Solution Manual Managerial Accounting (Balakrishnan, Sivaramakrishnan & Sprinkle)
Solution Manual Managerial Accounting : Tools for Business Decision Making, Active Learning Edition (2nd Ed., Weygandt, Kieso & Kimmel)
Solution Manual Managerial Accounting : Tools for Business Decision Making (3rd Ed., Weygandt, Kieso & Kimmel)
Solution Manual Managerial Accounting : Tools for Business Decision Making (4th Ed., Weygandt, Kimmel & Kieso)
Solution Manual Managerial Accounting : Tools for Business Decision Making (5th Ed., Weygandt, Kimmel & Kieso)
Solution Manual Managerial Accounting : Creating Value in a Dynamic Business Environment (6th Ed., Ronald Hilton)
Solution Manual Managerial Accounting : Creating Value in a Dynamic Business Environment (7th Ed., Ronald Hilton)
Solution Manual Managerial Accounting : Creating Value in a Dynamic

Business Environment (8th Ed., Ronald Hilton)
Solution Manual Managerial Accounting (2nd Ed., James Jiambalvo)
Solution Manual Managerial Accounting (3rd Ed., James Jiambalvo)
Solution Manual Managerial Accounting (4th Ed., James Jiambalvo)
Solution Manual Accounting : Tools for Business Decision Making (2nd Ed., Kimmel, Weygandt & Kieso)
Solution Manual Accounting : Tools for Business Decision Making (3rd Ed., Kimmel, Weygandt & Kieso)
Solution Manual Intermediate Accounting (4th Ed., Spiceland, Sepe & Tomassini)
Solution Manual Intermediate Accounting (5th Ed., Spiceland, Sepe, Nelson & Tomassini)
Solution Manual Intermediate Accounting (6th Ed., Spiceland, Sepe & Nelson)
Solution Manual Intermediate Accounting : Principles and Analysis (2nd Ed., Warfield, Weygandt & Kieso)
Solution Manual Intermediate Accounting (11th Ed., Kieso, Weygandt, Warfield)
Solution Manual Intermediate Accounting (12th Ed., Kieso, Weygandt, Warfield)
Solution Manual Fundamentals of Intermediate Accounting (Kieso, Weygandt, Warfield)
Solution Manual Accounting Principles (6th Ed., Weygandt, Kieso & Kimmel)
Solution Manual Accounting Principles (7th Ed., Weygandt, Kieso & Kimmel)
Solution Manual Accounting Principles (8th Ed., Weygandt, Kieso & Kimmel)
Solution Manual Accounting Principles (9th Ed., Weygandt, Kieso & Kimmel)
Solution Manual Advanced Accounting (Bline, Fischer & Skekel)
Solution Manual Advanced Accounting (2nd Ed., Jeter & Chaney)
Solution Manual Advanced Accounting (3rd Ed., Jeter & Chaney)
Solution Manual Advanced Accounting (4th Ed., Jeter & Chaney)
Solution Manual Advanced Financial Accounting (7th Ed., Richard Baker, Valdean Lembke, Thomas King, Cynthia Jeffrey)
Solution Manual Advanced Financial Accounting (8th Ed., Richard Baker, Valdean Lembke, Thomas King, Cynthia Jeffrey)
Solution Manual Project Management : A Managerial Approach (6th Ed., Meredith & Mantel)
Solution Manual Project Management : A Managerial Approach (7th Ed., Meredith & Mantel)
Solution Manual Operations Management for MBAs (3rd Ed., Meredith & Shafer)
Solution Manual Operations Management for MBAs (4th Ed., Meredith & Shafer)
Solution Manual Project Management in Practice (3rd Ed., Mantel, Meredith, Shafer & Sutton)
Solution Manual Wiley Pathways Project Management (1st Ed., Portny, Mantel, Jr., Meredith, Shafer, Sutton & Kramer)

Solution Manual Core Concepts : Project Management in Practice (2nd Ed., Mantel, Meredith, Shafer & Sutton)
Solution Manual Advanced Project Management : Best Practices on Implementation (2nd Ed., Harold Kerzner)
Solution Manual Project Management Case Studies (3rd Ed., Harold Kerzner)
Solution Manual Project Management : A Systems Approach to Planning, Scheduling, and Controlling (9th Ed., Harold Kerzner)
Solution Manual Project Management : A Systems Approach to Planning, Scheduling, and Controlling (10th Ed., Harold Kerzner)
Solution Manual Information Technology Project Management : Providing Measurable Organizational Value (2nd Ed., Jack Marchewka)
Solution Manual Information Technology Project Management (3rd Ed., Jack Marchewka)
Solution Manual Core Concepts of Government and Not-for-Profit Accounting (Granof & Wardlow)
Solution Manual Government and Not-for-Profit Accounting : Concepts and Practices (3rd Ed., Granof)
Solution Manual Government and Not-for-Profit Accounting : Concepts and Practices (4th Ed., Granof)
Solution Manual Government and Not-for-Profit Accounting : Concepts and Practices (5th Ed., Granof)
Solution Manual Business Communication Essentials, First Canadian Edition (Bovee, Thill, Schatzman & Scribner)
Solution Manual Business Communication Essentials, Second Canadian Edition (Bovee, Thill & Scribner)
Solution Manual Business Communication Essentials (2nd Ed., Bovee & Thill & Schatzman)
Solution Manual Business Communication Essentials (3rd Ed., Bovee & Thill)
Solution Manual Business Communication Essentials (4th Ed., Bovee & Thill)
Solution Manual Business Data Communications (5th Ed., William Stallings)
Solution Manual Business Data Communications (6th Ed., William Stallings)
Solution Manual Business Data Communications and Networking (8th Ed., FitzGerald & Dennis)
Solution Manual Business Data Communications and Networking (9th Ed., FitzGerald & Dennis)
Solution Manual Business Data Communications and Networking (10th Ed., FitzGerald & Dennis)
Solution Manual Operations Management (1st Ed., Andrew Greasley)
Solution Manual Operations Management (2nd Ed., Andrew Greasley)
Solution Manual Operations Management : Quality and Competitiveness in a Global Environment (5th Ed., Russell & Taylor)
Solution Manual Operations Management : Creating Value Along the Supply Chain (6th Ed., Russell & Taylor)
Solution Manual Auditing Cases (3rd Ed., Beasley, Buckless, Glover & Prawitt)

Solution Manual Auditing Cases: An Interactive Learning Approach (4th Ed., Beasley, Buckless, Glover & Prawitt)
Solution Manual Auditing and Other Assurance Services, Canadian Tenth Edition (10th Ed., Arens, Elder, Beasley & Splettstoesser-Hogeterp)
Solution Manual Auditing and Assurance Services : An Intergrated Approach (11th Ed., Arens, Elder & Beasley)
Solution Manual Auditing and Assurance Services : An Intergrated Approach (12th Ed., Arens, Elder & Beasley)
Solution Manual Auditing and Assurance Services : An Intergrated Approach (13th Ed., Arens, Elder & Beasley)
Solution Manual Modern Auditing : Assurance Services and the Integrity of Financial Reporting (8th Ed., Boynton & Johnson)
Solution Manual Investments : Analysis and Management (9th Ed., Charles Jones)
Solution Manual Investments : Analysis and Management (10th Ed., Charles Jones)
Solution Manual Investments : Analysis and Management (11th Ed., Charles Jones)
Solution Manual The Art of Modeling with Spreadsheets : Management Science, Spreadsheet Engineering, and Modeling Craft (Powell & Baker)
Solution Manual Management Science : The Art of Modeling with Spreadsheets (2nd Ed., Powell & Baker)
Solution Manual Management Science : The Art of Modeling with Spreadsheets, Excel 2007 Update (Powell & Baker)
Solution Manual Wiley Pathways Introduction to Database Management (Gillenson, Ponniah et al.)
Solution Manual Advanced Theory and Practice in Sport Marketing (Eric Schwarz & Jason Hunter)
Solution Manual Sport and the Media : Managing the nexus (Matthew Nicholson)
Solution Manual Sport Facility Operations Management : A Global Perspective (Eric Schwarz, Stacey Hall & Simon Shibli)
Solution Manual Sport Management : Principles and Application (Russell Hoye, Aaron Smith, et al.)
Solution Manual International Business : The Challenge of Global Competition (10th Ed., Ball, McCulloch, Geringer, Minor & McNett)
Solution Manual International Business : The Challenge of Global Competition (11th Ed., Ball, McCulloch, Geringer, Minor & McNett)
Solution Manual International Business : The Challenge of Global Competition (12th Ed., Ball, McCulloch, Geringer, Minor & McNett)
Solution Manual Statistics for Business (Derek Waller)
Solution Manual Mergers, Acquisitions, and Other Restructuring Activities (4th Ed., Donald DePamphilis)
Solution Manual Mergers, Acquisitions, and Other Restructuring Activities (5th Ed., Donald DePamphilis)
Solution Manual Contemporary Tourism : An international approach (Chris Cooper & Michael Hall)
Solution Manual Nation branding : Concepts, Issues, Practice (Keith Dinnie)
Solution Manual International Business : A Global Perspective

(Katsioloudes & S. Hadjidakis)
Solution Manual Managing Cultural Differences : Global Leadership Strategies for the 21st Century (7th Ed., Moran, Harris & Moran)
Solution Manual Marketing Plans : How to prepare them, how to use them (6th Ed., Malcolm McDonald)
Solution Manual Human Resource Management for the Hospitality and Tourism Industries (Dennis Nickson)
Solution Manual Exploring Employee Relations : An International Approach (2nd Ed., Mike Leat)
Solution Manual Introduction to Financial Technology (Roy Freedman)
Solution Manual Managing Innovation : New Technology, New Products, and New Services in a Global Economy (2nd Ed., John Ettlie)
Solution Manual Enterprise : Entrepreneurship and Innovation : Concepts, Contexts and Commercialization (Lowe & Marriott)
Solution Manual Strategic Management : Global Cultural Perspectives for Profit and Non-Profit Organizations (Marios Katsioloudes)
Solution Manual e-Business and e-Commerce How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual Introduction to e-Business : Management and Strategy (Colin Combe)
Solution Manual Managing People and Organizations in Changing Contexts (Graeme Martin)
Solution Manual Sustainable Tourism (David Weaver)
Solution Manual Knowledge Management in Theory and Practice (Kimiz Dalkir)
Solution Manual Fixed Income Markets and Their Derivatives (3rd Ed., Suresh Sundaresan)
Solution Manual Introduction to Human Resource Management (2nd Ed., John Stredwick)
Solution Manual Organisations and the Business Environment (2nd Ed., David Campbell & Tom Craig)
Solution Manual Strategic Operations Management (2nd Ed., Brown, Lamming, Bessant & Jones)
Solution Manual Worldwide Destinations : The Geography of Travel and Tourism (4th Ed., Boniface & Cooper)
Solution Manual Worldwide Destinations : The Geography of Travel and Tourism (5th Ed., Boniface & Cooper)
Solution Manual Worldwide Destinations Casebook : The Geography of Travel and Tourism (2nd Ed., Boniface & Cooper)
Solution Manual Marketing in Travel and Tourism (4th Ed., Middleton, Fyall, Morgan & Ranchhod)
Solution Manual Strategic Marketing Planning (1st Ed., C. Gilligan & R. Wilson)
Solution Manual Strategic Marketing Planning (2nd Ed., C. Gilligan & R. Wilson)
Solution Manual Strategic Marketing Management : Planning, Implementation and Control (3rd Ed., Wilson & Gilligan)
Solution Manual Marketing Communications Management : Concepts and Theories, Cases and Practices (Paul Copley)
Solution Manual Auction Theory (2nd Ed., Vijay Krishna)

Solution Manual Principles of Financial Engineering (1st Ed., Salih Neftci)
Solution Manual Principles of Financial Engineering (2nd Ed., Salih Neftci)
Solution Manual A Behavioral Approach to Asset Pricing (2nd Ed., Hersh Shefrin)
Solution Manual Managing Finance : A Socially Responsible Approach (D. Crowther)
Solution Manual Customer Relationship Management (2nd Ed., Francis Buttle)
Solution Manual Introduction to Knowledge Management : KM in Business (Groff & Jones)
Solution Manual Principles of Retailing (J. Fernie, S. Fernie & Moore)
Solution Manual Business Strategy (2nd Ed., Campbell, Stonehouse & Houston)
Solution Manual Market-Led Strategic Change (3rd Ed., Nigel Piercy)
Solution Manual Market-Led Strategic Change (4th Ed., Nigel Piercy)
Solution Manual International Hospitality Management : Concepts and cases (Alan Clarke & Wei Chen)
Solution Manual Electronic Commerce : Principles and Practice (Hossein Bidgoli)
Solution Manual Financial Management for Hospitality Decision Makers (Chris Guilding)
Solution Manual Accounting Essentials for Hospitality Managers (2nd Ed., Chris Guilding)
Solution Manual Global Business Leadership (E.S. Wibbeke)
Solution Manual Strategic Marketing : Planning and Control (2nd Ed., Drummond, Ensor & Ashford)
Solution Manual Project Finance in Theory and Practice : Designing, Structuring, and Financing Private and Public Projects (Stefano Gatti)
Solution Manual Hotel Convention Sales, Services and Operations (Pat Golden-Romero)
Solution Manual Contemporary Financial Intermediation (2nd Ed., Greenbaum & Thakor)
Solution Manual Intermediate Financial Theory (2nd Ed., Danthine & Donaldson)
Solution Manual Essential Law for Marketers (Ardi Kolah)
Solution Manual Introduction to Health and Safety at Work (4th Ed., Phil Hughes & Ed Ferrett)
Solution manual An Introduction to the Mathematics of Financial Derivatives (2nd Ed., Salih Neftci)
Solution manual Introduction to Emergency Management (3rd Ed., Haddow, Bullock & Coppola)
Solution manual Food and Beverage Management (4th Ed., Davis, Lockwood, Pantelidis & Alcott)
Solution manual Maritime Security : An Introduction (Michael McNicholas)
Solution manual Contemporary Logistics (8th Ed., Paul R. Murphy, Donald Wood)
Solution manual Contemporary Logistics (9th Ed., Paul R. Murphy,

Donald Wood)

List of Solutions Manuals and Test Banks

----

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=1P9GUXB1

I do not review the forums, just send me an email.

- Materials Engineering :

Solution manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (3rd Ed., Mikell Groover)
Solution manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (4th Ed., Mikell Groover)
Solution manual Fundamentals of Manufacturing (2nd Ed., Philip D. Rufe)
Solution manual Principles of Metal Manufacturing Processes (Beddoes & Bibby)
Solution manual Materials Science for Engineering Students (Traugott Fischer)
Solution manual Essentials of Modern Materials Science and Engineering (James Newell)
Solution manual Materials Science and Engineering : An Introduction (6th Ed., William Callister)
Solution manual Materials Science and Engineering : An Introduction (7th Ed., William Callister)
Solution manual Materials Science and Engineering : An Introduction (8th Ed., William Callister)
Solution manual Fundamentals of Materials Science and Engineering : Integrated Approach (2nd Ed., William Callister)

Solution manual Fundamentals of Materials Science and Engineering : Integrated Approach (3rd Ed., William Callister)
Solution manual Science and Design of Engineering Materials (2nd Ed., Schaffer, Saxena, et al)
Solution manual Manual of Mineral Science (23rd Ed., Cornelis Klein & Barbara Dutrow)
Solution manual Materials and Processes in Manufacturing (9th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution manual DeGarmo's Materials and Processes in Manufacturing (10th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution manual Foundations of Materials Science and Engineering (3rd Ed, Smith)
Solution manual Foundations of Materials Science and Engineering (4th Ed, Smith & Hashemi)
Solution manual Foundations of Materials Science and Engineering (5th Ed, Smith & Hashemi)
Solution manual Engineering Materials Science (Milton Ohring)
Solution manual Metal Fatigue in Engineering (2nd Ed., Stephens, Fatemi & Fuchs)
Solution manual Mechanical Behavior of Materials (3rd Ed. Dowling)
Solution manual Mechanical Behavior of Materials (W.F. Hosford)
Solution manual Mechanical Behavior of Materials (Keith Bowman)
Solution manual Deformation and Fracture Mechanics of Engineering Materials (4th Ed., Richard Hertzberg)
Solution manual From Polymers to Plastics (A.K. van der Vegt)
Solution manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution manual Principles Of Polymer Systems (5th Ed., by Ferdinand Rodriguez, Claude Cohen, Christopher Ober, Lynden Archer)
Solution manual Introduction to the Thermodynamics of Materials (4th Ed. David Gaskell)
Solution manual Structure and Properties of Engineering Materiales (5th Ed., Daniel Henkel & Alan Pense)
Solution manual Plastics : Materials and Processing (3rd Ed., Strong)
Solution manual Engineering Materials : Properties and Selection (8th Ed., Budinski)
Solution manual Engineering Materials : Properties and Selection (9th Ed., Budinski)
Solution manual Introduction to Materials Science for Engineers (6th Ed., Shackelford)
Solution manual Introduction to Materials Science for Engineers (7th Ed., Shackelford)
Solution manual Introduction to Materials Science for Engineers - International Edition (7th Ed., Shackelford)
Solution manual Creative Design of Products and Systems (Saeed Niku)
Solution manual Materials : Engineering, Science, Processing and Design (1st Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution manual Materials : Engineering, Science, Processing and Design (2nd Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution manual Engineering Materials Vol. 1 : An Introduction to

Properties, Applications and Design (3rd Ed., Michael Ashby & David Jones)
Solution manual Engineering Materials Vol. 2 : An Introduction to Microstructures, Processing and Design (3rd Ed., Michael Ashby & David Jones)
Solution manual Materials and the Environment : Eco-informed Material Choice (Michael Ashby)
Solution manual Principles of Corrosion Engineering and Corrosion Control (Zaki Ahmad)
Solution manual Analysis and Performance of Fiber Composites (3rd Ed., Bhagwan Agarwal, Lawrence Broutman & K. Chandrashekhara)
Solution manual Basic Engineering Plasticity : An Introduction with Engineering and Manufacturing Applications (David Rees)
Solution manual Steels : Microstructure and Properties (3rd Ed. Bhadeshia & Honeycombe)
Solution manual Theory of Plasticity (3rd Ed. Jagabanduhu Chakrabarty)
Solution manual Plastics : Microstructure and Engineering Applications (3rd Ed., Nigel Mills)
Solution manual Laser Processing of Engineering Materials : Principles, Procedure and Industrial Application (John Ion)
Solution manual Sintering : Densification, Grain Growth and Microstructure (Suk-Joong Kang)
Solution manual Biomaterials : An Introduction (3rd Ed., Joon Park & R.S. Lakes)
Solution manual Biomaterials : The Intersection of Biology and Materials Science (Temenoff & Mikos)
Solution manual Biomaterials Science : An Introduction to Materials in Medicine (2nd Ed., Ratner, Hoffman, Schoen & Lemons)
Solution manual Tissue Engineering (Bernhard O. Palsson & Sangeeta N. Bhatia)
Solution manual Tissue Engineering (Clemens van Blitterswijk, et al.)
Solution manual Introduction to Materials Management (6th Ed., Arnold, Chapman & Clive)
Solution manual Fundamentals of Solid State Engineering (2nd Ed., Manijeh Razeghi)
Solution manual Smart Electronic Materials : Fundamentals and Applications (Jasprit Singh)
Solution manual Composite Materials : Science and Engineering (2nd Ed., Krishan K. Chawla)
Solution manual Laminar Composites (George Staab)
Solution manual Physical Metallurgy and Advanced Materials (7th Ed., R.E. Smallman & A.H.W. Ngan)

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 9 JANUARY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with regret that it has to be announced that the keys of two radio amateurs became silent recently, they are: Flip Louw, ZS6BSI, brother of Willem, ZS6BPD, early on Monday 3 January 2011. Flip leaves his YL Poppie. J Theron, ZS6JMT, of the East Rand Radio Club, also on 2 January 2011 in Springs.

To their relatives and friends, our sincerest sympathies.

JOIN THE SARL FOR ONLY R200

SA AMSAT CUBESAT PROJECT NEEDS PROGRAMMERS

AMATEUR ACTIVITY MORNING AT THE NARC

HOST AN AMATEUR RADIO STATION AT SUN CITY

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

JOIN THE SARL FOR ONLY R200

We invite non-members to get six months' membership of the SARL for only R200. All new applicants will also receive the November/December issue of Radio ZS. Download application forms from www.sarl.org.za. Applications will be processed from 12 January when the national office reopens. Persons who have not renewed their current membership are excluded from this offer.

All applications received by 15 January 2011 will be entered into the Lucky Membership draw for the chance of winning one of two 2011/2012 SARL memberships. The draw will take place at the NARC on 15 January at noon. Get your applications in or bring them on Saturday 15 January 2011.

SA AMSAT CUBESAT PROJECT NEEDS PROGRAMMERS

The development team for the planned South African CubeSat project is taking shape nicely. Amateurs with diverse specialist skills are offering their expertise from all over. "However, we still need a person with experience in programming PIC or 8051 microprocessors," Hannes Coetzee, ZS6BZP, told SARL News.

"This person will be a critical member of the team and will be responsible for the development of the onboard controller software. Other amateurs who are interested in the development of the satellite and would like to join the development team are still welcome to send their Amateur Radio CVs to saamsat@intekom.co.za," Hannes said.

There will be an informal discussion at the SA AMSAT Satellite Forum at the NARC on Saturday 15 January at 10:00. The team will meet for its first formal teleconference on Wednesday evening 26 January 2011 at 20:00. Team members will receive a formal notification. Eddie, ZS6BNE, will show how to build a simple satellite antenna.

AMATEUR ACTIVITY MORNING AT THE NARC

There will be a number of events at the NARC on Saturday 15 January 2011 from 10:00. Besides the Satellite Forum, you can come and look at the Space Weather Monitor or try out D-STAR communication with the D-Star repeater being installed at the NARC. A number of books on amateur radio will also be on sale. To see a list of available books, go to www.amateurradio.org.za/books.htm. Books can be ordered online and paid for and collected at the NARC on Saturday or can be purchased in cash. No card facilities are available for book sales.

If you are not a member of the SARL yet, use the opportunity to sign up for R200 and enter a competition in which free memberships can be won.

HOST AN AMATEUR RADIO STATION AT SUN CITY

Radio clubs are invited to submit proposals to set up an HF and VHF amateur radio station at the IARU Region 1 Conference at Sun City. The conference will run from 11 to 19 August 2011 with delegates arriving on 12 August. The special call sign will be ZS11IARU and will be operational for the week.

The hosting club must provide a portable tower with an HF beam complete with rotator and cables, inverted V antennas for 40 and 80 metres, 70 cm and 2 m antennas, and at least one full-time operator to oversee activity. All delegates who are licensed in their own country will receive automatic permission to operate while in South Africa for the conference. Radio equipment will be supplied if required.

Full board and accommodation for two persons sharing will be provided for the duration of the event.

If your club can undertake the project, please email details of how you will execute the project, experience of the operator or operators and the person who will oversee the project to iaru2011@sarl.org.za by 28 February 2011. Please include contact telephone numbers.

CONTEST NEWS

The PEARS National VHF/UHF contest will take place on 21 to 23 January 2011. It is open to all licensed amateurs in South Africa and the neighbouring states of Namibia (V5), Botswana (A2), Zimbabwe (Z2), Mozambique (9), Lesotho (7P), and Swaziland (3DA). Only contacts with these states will count.

The aim of a VHF/UHF contest is to make many long-distance contacts, establish new records, encourage the improvement of equipment and have fun. This is a 44-hour dual contest for digital and analogue modes. Amateurs are requested to participate in both contests if possible and thus keep the bands alive. Activity will take place on 6, 4 and 2 metres as well as on 70 and 23 cm using FM, SSB and digital modes.

The first 22-hour session of the VHF/UHF contest starts at 18:00 CAT on Friday 21 January and closes at 16:00 CAT on Saturday 22 January. The second 22-hour leg starts at 16:01 CAT on Saturday 22 January and ends at 14:00 CAT on Sunday 23 January.

A valid contact consists of an exchange of call signs, signal reports and location such as the six-digit Maidenhead Locator or co-ordinates. Participation can be as a Base station, a Field station, a Club or Multi-Operator station or a Limited Category station. The complete rules can be found in the 2011 SARL Contest Manual and on the PEARS website at www.zs2pe.co.za/Contests/vuhf.htm.

SARL 80-METRE CLUB CONTEST

Only four logs were received for the November leg of the SARL 80 metre Club Contest. The Antique Wireless Association submitted two logs and 12 points, taking first place, the West Rand ARC submitted two logs with 10 points.

The overall results for all six legs are: 1st West Rand ARC, 341 points and 32 logs; 2nd ZS Contest Group, 186 points and 7 logs; 3rd The Antique Wireless Association, 166 points with 15 logs.

SARL NATIONAL FIELD DAY

The contest committee received 19 logs for the November SARL National Field Day made up of two single operators, 11 multi-operators and six general stations. The results are as follows:

Single operator 1st Johan de Witt, ZR5JF, 17 520 points 2nd Eddie Leighton, ZS6BNE, 6 075 points

Multi-operator 1st West Rand ARC, ZS6WR, 72 180 points 2nd Sasolburg ARC, ZS4SRK, 71 060 points 3rd Sandton ARC, ZS6STN, 65 900 points

General 1st Philip Esterhuizen, ZS4PJ, 62 010 points 2nd Pierre van Deventer, ZS6BB, 50 112 points 3rd Anton de Beer, ZR6ATN, 22 752 points

The complete and combined results will be published in HF Happenings during the week.

YOUNG AMATEURS CONTEST

YACHT, the Young Amateurs Contest Ham Team, once again invites all South African radio amateurs, especially young people, to participate in their weekly Echolink Youth Roundtable. From the 9th of January the new time is 21:00 CAT on Sundays, Echolink node 481872, the W8PIF repeater in Menominee, Michigan.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspots 1 140 and 1 142 remain visible although Sunspot 1 142 is rapidly fading away. The effective sunspot number is expected to be less than 25 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be fair towards Europe on 15 m, later to be followed by fair 20 m openings. Early evening 15 m contacts with the USA are possible. Contacts with Australia are possible on 20 m at sunrise and during the afternoons. 15 and especially 20 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings, 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally, 40 m is the workhorse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons and also over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

15 January - Satellite forum and other activities day at the NARC, starting at 10:00. 20 January 2011 - Closing date for submission for application for the May 2011 RAE bursaries; visit www.amateurradio.org.za for application forms. 20 January - Closing date for submission of proposals and synopses of papers for 2011 SA AMSAT Space Symposium to saamsat@intekom.co.za. 20 January - Cubesat project team teleconference at 20:00. 21/32 January - PEARS VHF/UHF contest. 30 January 2011 - Closing date for phase 1 of the construction

competition. 28 February - Offers to host a station at Sun City during IARU Region conference to be in to iaru2011@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Hester van der Walt.

Thank you for listening, 73.

/EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 9th January 2011

Counties Contest

The 80 metres EI/GI counties contest on Monday last was well supported, with almost all counties on the air at some stage during the 3 hour event. Our correspondents report that some counties - in particular Wexford and Tyrone - represented "rare DX" on the day, so stations from these and other rare counties would have been in great demand.

Although the majority of stations heard were from EI and GI, there was also a good level of support from mainland Britain. As daylight receded, some continental European stations began to take an interest in the contest.

As can be expected, operators had to contend with high noise levels most of the time. This encouraged some of the participants to switch to CW for extended periods: there seemed to be more CW activity this year than in previous years, especially during the final hour. In particular quite a few mainland British stations were heard looking for CW contacts.

The deadline for logs is 2nd February, logs should be sent to contestmanager /at/ irts.ie as soon as possible.

IRTS Radio News

Due to personal time constraints this will be the final bulletin produced by Charlie EI8JB who had to step down as news editor, this position has been filled by Aidan Noone EI7JC.

News from LEARC

Lough Erne Amateur Radio Club is delighted that that its county Fermanagh was well represented in the IRTS 80 metre counties contest.

Eight members set up the Club station on a hill-top in Cavanacaw. Sharing round the microphone, they logged 73 contacts and 28 counties.

Adding other stations in Irvinestown, Ballinamallard, Lisbellaw and Rosslea made about 120 Fermanagh contacts across Ireland.

Now the Club hopes that all 120 and more will come to Fermanagh in April for the thirtieth Lough Erne Rally.

Last year the Club's courses recruited a record 26 new members with Foundation licences. It is important that they progress in amateur radio. So it was good that half the Fermanagh operators were Foundation licensees.

What really counts now is to get all logs submitted by the deadline, to Thos at the above email address.

Cork Social Evening

Radio enthusiasts and their partners will meet at the Vienna Woods Hotel, Glanmire, Cork for dinner and a social evening on Saturday February 5th. A comprehensive menu is available to suit all tastes. Everybody is invited and it would be nice to meet some of the newer amateurs on the night.

Tickets are available from Dave Moore EI4BZ priced at 30.00 and you can contact him on 087-6290574 or by email at ei4bz at eircom.net. Previous events have been very successful and have been enjoyed by large attendances.

Theory Classes at DAR

Dundalk Amateur Radio Society will commence amateur radio theory classes Thursday February 3rd 2011. Classes will be held at the club premises 'Larkin House' EI7DAR, 113, Castletown Road, Dundalk.

This is an excellent opportunity for anyone interested in obtaining their amateur radio Licence in an adult learning relaxed environment.

For further information and details please contact ei4dib /at/ ei7dar.com or by text only to 086 4066660. Everyone welcome.

Region 4 Theory Classes

Following on from the successful classes last year, plans are being put in place for Radio Theory classes in Limerick.

Classes will also include lots of practical sessions and will be based on the revised syllabus as detailed on the IRTS website.

Classes will commence in February depending on numbers and those interested in attending should contact Ger McNamara EI4GXB on 087 2532512 or ei4gxb /at/ gmail.com

---

DX News

The first major expedition of 2011 was due to start on 5th January. This was the multinational team signing DX0DX from the Spratly Islands

in the South China Sea.

Due to various problems the start date has had to be moved several days but hopefully the expedition is now on the air. A total of over 30 amateurs will take part in the operation which is scheduled to last until early next month.

As well as being a rare one for your DXCC this expedition also counts as AS-051 for your IOTA Award. QSL manager will be N2OO

Andrew G7COD is back in the Maldive Islands and QRV as 8Q7AK. He will be there till 16th January and QSLs go via his home call.

Seth SM0XBI will be in Dominica in the Caribbean until mid-March. Look for him operating his J79XBI callsign.

VE6LB will be in the United Arab Emirates until 8th February and will be QRV as A6/VE6LB from Dubai. He will be running 100 watts to a G5RV.

The 'DX Magazine' carried out a survey of the 'most wanted' DXCC entities last autumn and the results have just been published. The top 10 most wanted DXCC are as follows:-

1. North Korea 2. Navassa 3. Bouvet 4. Yemen 5.
Heard Island 6. Amsterdam Island 7. Marion Island 8.
South Sandwich Islands 9. Crozet 10. Scarborough Reef

LY13 special event stations

Between 12-27 of January Lithuanian amateurs will be operating with a prefix of LY13 more details are available on the website http://www.lrmd.lt/index_en.htm

---

Radio Rallies

PHOENIX A.R.C.

Phoenix Amateur Radio Club annual rally will be held on Sunday 20th February 2011 in the usual venue, Coolmine Community School, Blanchardstown.

Doors open for Traders at 9.00 am Doors open to public 11.00am Admission 5 Euros. To book tables contact Tony at 0872439997 or Tom at 01-8211043.

Plenty of Parking, Refreshments and Bring and Buy Sale. All usual traders will attend.

This is the First Rally of 2011.

For further details on Rallies please see www.irts.ie/rallies

---

This week in History

1838 The first telegraph message was sent using Morse code.

1838 Samuel Morse publicly demonstrated his telegraph for the first time in Morristown, New Jersey.

1904 Marconi Co's CQD - Distress signal introduced. Replaced by SOS in 1906.

Items for inclusion in next weeks Radio News should be forwarded to Aidan EI7JC, preferably via e-mail to "news dot ei7jc at gmail dot com" Or by phone to 085 7100511 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, N1DG, NJ1Q, N2ZN, NG3K & ADXO, AA4NC, N4AA & QRZ DX, KH6BZF, K7CU, N7NG, K8GI, K8YSE, W8GEX (60m News), W0GJ, AT International, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, G7COD, I1JQJ/IK1ADH & 425 DX News, I2YSB, LY4Q, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SM3CVM, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 2nd-January, through Sunday, 9th-January there were 219 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VK9N, VP2V, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Operators Joesp/EA3BT and XYL Nuria/EA3WL will be active as 3B8/EA3BT and 3B8/EA3WL from Mauritius between January 23-29th. Activity will be on 40-10 meters, mostly SSB and the Digital modes, with some CW. QSL both calls via EA3BT. Their Web site is currently under construction

and can be found here at: http://ea3bt.ure.es

4A, REVILLAGIGEDO. An international team of operators will activate
Revillagigedo Archipelago (IOTA NA-030) as 4A4A sometime in March.
Operators mentioned are Mark/XE1B (team leader), Javier/EA5KM, Elmo/EA5BYP,
Javi/EC4DX, Fernando/EA5FX, Vicente/EA5AFP, Santos/EA4AK and John/N5NTP.
QSL via EB7DX. The operation's Web page is: http://www.revillagigedo2011.com
A 4A4A Twitter page is also available at: http://twitter.com/#!/4A4A2011

4V1, HAITI. Look for members of the Radio Club d'Haiti (RCH) to activate
the special callsign 4V1 between January 10-20th. Activity is in remem-
brance of those who lost their lives during the earthquake that struck
Haiti (NA-096) on January 12th, 2010. Operations are expected to take
place from different locations on the island at various times. Frequency
and times will be announced on 14300 kHz (Inter-Con and MM Net Frequency)
in recognition of the assistance the nets provided for months following
the massive earthquake. It is suggested to check 14300 kHz for operation
times and frequencies often. QSL via N3OS.

5C/CN, MOROCCO (IOTA/WFF Op). Italian operators Leopoldo/I8LWL (5C2L),
Alfredo/IK7JWX (5C2J), Ruggero/IK2PZC (5C2P), Simon/IZ7ATN (5C2SG) and
Toufelaz/CN8QY will be active as CN2LWL from Herne Island (AF-068),
located in the large bay of Dakhla, between February 1-5th. QSL Manager
for CN2LWL is I8LWL. The team "may" also activate the WFF Natural Park
of Dakhla (Ref. No. CNFF-007) using the callsign 5C2J, 5C2L and 5C2P.
QSL via their home callsigns. For updates and an online log search after
their DXpedition, visit the Web page at: http://www.i8lwl.it

7P, LESOTHO. Operators Frosty/K5LBU (7P8CF) and Wayne/W5KDJ (7P8KDJ)
will be active from the "Trading Post Lodge" in Roma between March 11-20th.
Activity will be on 160-10 meters using CW, SSB, RTTY and PSK. They plan
to have 2 full time stations on the air for the entire period using
a Tennadyne T6 at about 40 feet, a R7 vertical along with a Tennadyne
TD-160 which is a folded Dipole that is 126 feet overall in length.
QSL 7P8CF via K5LBU, direct or LoTW. QSL 7P8KDJ via W5KDJ, only direct
with SASE, LoTW and eQSL (No Bureau cards please). Visit their Web page
at: http://www.tdxs.net/lesotho2011.html
A log search Web page will be available after their return.

8Q, MALDIVES. Andrew, G7COD, is once again active as 8Q7AK from the
small island of Adaaran Select Hudhuranfushi, on the North Male Atoll,
until January 16th. He states that his operating time is limited to his
spare time because of work (he is not on holiday this time). According
to his Web page (edited): "Working conditions are an Icom IC7000, 100
watts output to a 135 ft. multiband doublet and a 9m high Rybakov vertical.
I will be QRV on 80 to 12 meters including the WARC bands using SSB and
CW. I will be transmitting on the following times and frequencies +/-
10 kHz to allow for QRM: 0730-0830z, 0900-1030z, 1300-1500z and 1730-1800z.
Suggested frequencies (+/- QRM) are:
CW - 3503, 7003, 10103, 14003, 18073, 21003 and 24893 kHz
SSB - 3795, 7063, 14190, 18133, 21253 and 24953 kHz"
QSL via his home callsign, direct (see Web page) or by the bureau.

Andrew now has a dedicated Web page at: http://8q7ak.freewebspace.com
IMPORTANT NOTE: Andrew, states, "I am completely up to date with the return of QSLs for those received direct from previous activations. If you have not received yours, please send your QSL again."

8th AAW IN FEBRUARY. Look for the 8th Antarctic Activity Week (AAW) to take place between February 21-27th. This event is promoted by Worldwide Antarctic Program (WAP) <http://www.waponline.it> each year to improve the world-wide attention about the Antarctic Continent and its related matters, with the aim of staying close to the researchers and personnel who are spending their time away from home and families, studying the Antarctic life and its secrets in the so many remote scientific stations in this icy continent. The WAP is also thankful for what the Nations and Research Foundations are doing to protect this still uncontaminated corner of the planet and to share a message of peace among the world. The AAW is a unique event world-wide where Hams (in any corners of the world) sign up and help promote the special attention given to the Antarctica. This year 2011, the AAW is at its 8th edition and as usual, is open to all radio amateur wishing to join them using a special callsign which help promote the Antarctica. All SES with a WAP reference number will qualify for WAP ASEA (Antarctic Special events Award). The WAP Ref. number for any special callsign requested/issued for this occurrence can be provided upon request by sending a E-mail to I1HYW (QRZ.com). The list of partici-pants is still open and is available at:
http://www.waponline.it/Default.aspx?tabid3

9H, MALTA. John, G8HWI, will once again be active as 9H3JS between January 18-30th. Activity will be holiday style mainly on 20 meters PSK31 using a "Small Wonder Labs" PSK-20 transceiver at 3 watts, or with an ICOM 703, usually at 8-10 watts. John states that almost all his operating will be either 6 feet above the sea, right at the edge, or about 20 feet above it, and 60 feet back from the edge. His antennas will be a wire dipole, an inverted Vee or a end fed half wave, strung vertically up a fiberglass fishing pole. QSL via his home callsign, direct or by the Bureau.

A6, UNITED ARAB EMIRATES. Gerry, VE6LB, will once again be active as A6/VE6LB from Dubai between January 12th and February 8th. Activity will be limited (holiday style) using 100 watts into a G5RV antenna (40-10m) and mainly on CW. QSL direct via his home callsign (QRZ.com address) or LoTW. Bureau QSLs can be requested via E-mail at:
ve6lb@telus.net
Visit his Web page at: http://www.telusplanet.net/public/telwest/ve6lb.htm
He hopes to have an on-line log at:
http://logsearch.de/index.php/online-logsearch

AO1, SPAIN (AAW Op). Operators Fernando/EA1GHT, Juanjo/EA1WX, Jose/EA1CUB, Javier/EC1KV, Daniel/EB1LA, Juan/EA1AUM and Jose/EA1CS will activate AO1AAW (WAP-203) during the 2011 Antarctic Activity Week (see 8th AAW above). Activity will be on 160-10 meters, including the 30/17/12 meters, using CW, SSB and the Digital modes. QSL via EA1GHT, direct, by the Bureau or

LoTW.

CE, CHILE. Didier, F6DXE, is currently here traveling throughout Chile. He is expected to be active as CE(?)/F6DXE using 100 watts into a vertical antenna. Didier is trying to be active at least one hour per day mostly when the propagation is good for Europe on CW (7025 or 14025 kHz) and SSB (7140, 14205, 21250 or 28450 kHz). He is travelling from CE7 to CE6, CE4, CE5 and CE3 until January 20th. QSL via his home callsign.

CQ3/CT9, MADEIRA ISLANDS. Helmut, DF7ZS, will be active as CT9/DF7ZS between March 22-29th. Activity will be holiday style and will focus on the WARC bands. QSL via DF7ZS. Also, he will be active as CQ3L during the CQWW WPX SSB Contest (March 26-27th) as a Single-Op/All-Band entry. QSL CQ3L via DJ6QT and CT9/DF7ZS via DF7ZS.

CW5, URUGUAY (Special Event). Members of the Centro Radio Aficionados Montevideo (CRAM) will use the special callsign CW5RV throughout the year 2011 in memory of Mr. Louis Varney (SK), ex-2ARV/G5RV/CX5RV, who invented the world-famous G5RV multi-band antenna. QSL via: P.O.BOX 6000, 11000 Montevideo, URUGUAY.

DXCC NEWS (PJ Certificates). It has been reported that Kathy Allison, KA1RWY, LoTW Specialist, states, "At this time, there will be no new PJ certificates or credits being accepted for the new PJ DXCC entities by LoTW. This is due to the large backlog of DXCC applications that were received for the December 31, 2010 deadline. It is anticipated that the backlog should be completed by mid to late February. We should be accepting new PJ certificates and credits for LoTW by March 1, 2011. We understand the anticipation for certificates and credits for the new PJ DXCC entities and are working hard to make this available as soon as possible."

DX0, SPRATLY ISLANDS. It seems that this operation has been delayed somewhat. As this was being typed, a report states that all the team members were still in Puerto Princesa (Palawan) Sunday morning and waiting in several hotels. The group is awaiting the last authoriza-tions to leave DU-land to DX0DX and hope to receive it on Monday. It is recommended to watch their Web site for updates at: http://www.dx0dx.net Also, checkout their Twitter page at: http://twitter.com/DX0DX#

H4, SOLOMON ISLANDS. Tom, VK4FTDX, will be on holiday in Vavaya Ridge, Honiara, on Guadalcanal Island (OC-047), between now and January 18th. Tom states that "this is not a DXpedition • will have radio equipment with me and will be active" sometime on the HF bands. He will use the callsign H44FT. QSL via VK4FTDX, by the Bureau or direct.

IOTA NEWS.....
OC-139. Andrey, VK5MAV, will be active as VK5MAV/5 from Kangaroo Island between February 15-21st. Activity will be holiday style and mainly on 40 and meters CW and some possible SSB. Suggested frequencies (if not in use or QRM) are 7012 kHz and 14012 kHz, listen up 1-2 kHz. SSB frequencies • no idea at the moment.

Suggested operating time: 0900z until propagation ends,
starting on 20m with later migration to 40m. He will use an
IC-7200 w/100 watts into 2 element vertical phased on 40m and
a G5RV for the rest of bands. For direct QSLs, read details
on QRZ.com. If you are not in a rush, all QSLs will be sent
via the QSL Bureau 6-7 months later. Free of charge!

OC-165. Operators John/9M6XRO and Steve/9M6DXX will be active as
9M6XRO/8 (CW) and 9M8Z/P (SSB), respectively, from Pulau
Satang Besar, between February 25-28th. They plan to use
two stations with amplifiers into a Hexbeam and verticals
located on the beach. QSL both 9M6XRO/8 and 9M8Z/P via M0URX,
by the Bureau, direct (w/SAE plus 1 IRC / 2 USDs) or LoTW.
QSL requests can be made using M0URX's OQRS form at:
http://www.m0urx.com/qsl-request-form

SA-031. By the time you read this, operators Cezar/VE3LYC and Johan/
PA3EXX will be active as CE9/VE3LYC and CE9/PA3EXX from
Wollaston Islands. Activity will be on 40/30/20/17/15 meters
using CW and SSB. The length of their stay is unknown at
this time, but the duo is expected to also activate Diego
Ramirez Islands (SA-097). It was announced earlier that they
were expected to be active between approx. January 7-22nd.
QSL via VE3LYC, by the Bureau or direct (mail or PAYPAL; see
Web page for details). For updates, check the following Web
page at: http://ce9iota.weebly.com/index.html
LAST MINUTE UPDATE: Just before going to print, CE9/PA3EXX/p
was spotted on 17 meters.

JW, SVALBARD. Jon, LA8HGA, and possibly others will be active as JW8HGA
from the JW5E club station in Longyearbyen, Spitsbergen Island (EU-026)
between February 4&#65533;8th. This will be a CW only operation on the HF bands.
QSL via LA8HGA, by the Bureau or direct (see QRZ.com). PLEASE NOTE: Jon
states, "I will need 2 USDs for Europe and 3 USDs for outside Europe in
return postage. (I have absolutely NO intention of making money on my
hobby, but unfortunately, the postage rates in Norway is this high.) All
direct cards without sufficient postage will be answered via the Bureau."

KH2, GUAM. Hisashi, JF2SKV/NH0S, will be active as NH0S/KH2 during the
ARRL DX CW Contest (February 19-20th) as a Single-Op/All-Band/High-
Power entry. JF2SKV accepts QSL cards via JARL (JA QSL Bureau). Please
DO NOT send your cards to his Saipan address or KH2(KH0) QSL Bureau.
Visit his Web page at: http://homepage2.nifty.com/jg3vei

KH6BZF PROPAGATION FORECAST/REPORT (For January 10-16th)....
Jan 10 AN SOLAR REFERENCE KEYS
Jan 11 AN --------------------
Jan 12 AN BN - Below Normal
Jan 13 AN AN - Above Normal/Geomagnetic Level is QUIET
Jan 14 AN LN - Low Normal
Jan 15 AN HN - High Normal/Geomagnetic Level is UNSETTLED

Jan 16 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LY13, LITHUANIA (Special Event). Look for Lithuanian radio amateurs to activate the following LY13 special event stations between 2200z, January 12th and 2200z, January 27th. Activity is to mark the 20th anniversary of the "January 13th" event, where the Soviet army in 1991 attempted to occupy the independent Lithuania - all communications were blocked and only radio amateurs were the first who help to spread out the information about invasion around the world. There will be no awards issued for this event. This operation is "in memory". They hope some amateurs around the world can still remember this night... For more information, see:
http://www.lrmd.lt/index_en.htm
Special event stations mentioned are:
LY13A op. LY5A LY13J op. LY3J LY13V op. LY3V
LY13B op. LY3BY LY13M op. LY3M LY13W op. LY3W
LY13E op. LY3NX LY13O op. LY8O LY13X op. LY3X
LY13G op. LY1G LY13Q op. LY4Q LY13Z op. LY2GV
LY13H op. LY2H LY13T op. LY2QT

MJ, JERSEY. Kazu, JK3GAD, will be active as MJ0CFW from Jersey (EA-013) between March 18-21st. Activity will be on 160-10 meters including an entry in the Russian DX Contest. QSL via LoTW or via M0CFW.

NCDXF PRESS RELEASE (Northern California DX Foundation 2010 Report). Glenn, W0GJ, Vice President of NCDXF, reports: "NCDXF sincerely appreciates all of the contributions we receive annually from many Radio Amateurs and DXer's. Contributions may be designated to the General Fund, the W6EEN Memorial Scholarship Fund, and/or the NCDXF Beacon Fund.
We particularly want to recognize those major contributors who were extremely generous in 2010:
http://www.ncdxf.org/pages/majorcontributors.html
NCDXF supported many DXpeditions in 2010 and many more in 2011. NCDXF also supported WRTC 2010 in Russia and plans to support WRTC 2014 in New England. See <http://www.ncdxf.org> for more details. NCDXF is a 501 (c) 3 and as such, contributions may be tax deductible."

THE NEW DXER'S HANDBOOK (Free!). Curt, K7CU, President of the Utah DX Association (UDXA), informs OPDX that a free small document (44 pages) is available online at: http://www.udxa.org
You will see it listed along the left side of the page, in the box labeled "About UDXA". At the bottom of the list you will see a link to the handbook (in PDF format). The handbook was put together by one of UDXA members who recently completed his stint as Immediate Past President (Bryce Anderson, K7UA) and is accomplished DXer.

OK, CZECH REPUBLIC (60m). According to the "W8GEX 60m News", operators OK1RP, OK1HAS, OK1IF, OK1KT, OK1FBH, OK1DOH and OK1DSS have been issued a license to operate on 60 meters. Their current license states it is valid until the end of 2011. Their 60m band is limited to: 5258.5 - 5261.5 MHz. They request that the U.S. hams please listen on 5258.5-5261.5 only, as there is some low activity from other countries working in that range. They will be listening on Channel 5.

P29, PAPUA NEW GUINEA (IOTA DXpedition/Update). Operators Luis/CT1AGF, Derek/G3KHZ, Mike/G3JKX, Martyn/G3UKV, Hans/SM6CVX, and non-ham Stig, will be going on another P29 DXpedition during the month of April. This is the tentative schedule for the following IOTA islands:
April 2-7th - Feni Island (OC-101); callsign P29VCX; QSL via SM6CVX.
April 8-14th - Nuguria Island (OC-257); callsign P29NI; QSL via G3KHZ.
April 15-18th - Green Island (OC-231); callsign P29VLR; QSL via SM6CVX.

Hans, SM6CVX, will activate the following himself:
April 22-25th - Misima Island (OC-117); callsign P29VCX; QSL via SM6CVX.
April 25-27th - Loloata Island (OC-240); callsign P29VCX; QSL via SM6CVX.

The team will use the M/V Barbarian to travel between the islands. Activity from all locations will be on all HF bands, including 6 meters, using CW, SSB and RTTY. They plan to have at least 4 stations on the air at all the time. For updates and more details, watch the Web page at: http://p29ni.weebly.com

PJ2, CURACAO. YL Gayle, K6GO, will be active as PJ2/K6GO from Signal Point Station on Curacao Island (SA-099, WLOTA LH-0942) between March 18-21st. Activity will be on the HF bands. QSL via her home callsign.

PJ2, CURACAO. Members of the Caribbean Contesting Consortium (CCC) will once again activate Signal Point Station on Curacao (SA-099, WLOTA LH-0942) between March 22nd and April 6th. Operators mentioned are: Geoff/W0CG (PJ2DX), Jack/N4RV, Marty/K2PLF and possibly others. Look for them to sign PJ2T during the CQWW WPX SSB Contest (March 26-27th) as a Multi-Single or Multi-2 entry. Outside the contest, operators will use PJ2/homecall or their personal PJ2 callsigns. QSL via their home callsigns. QSL PJ2T via N9AG or LoTW.

QSLS RECEIVED VIA THE BUREAU: A07AJR, D68BT, IM0/IK0FMB, JW/CT1BWW and OL7R

SI9, SWEDEN (Special Event). Special event station SI9AM from the King Chulalongkorn Memorial in Ragunda, Sweden, the largest Thai Pavilion in the world outside Thailand, will be active between January 26-31st. Operators will be Raf/ON5RZ, Dirk/ON7DS and Fons/ON4AWT. The trio plan to be an entry in the UBA DX Contest (January 29-30th). Activity will be on 160-10 meters using CW, SSB and FM. Suggested frequencies are: CW - 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz SSB - 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz FM - 145.550 MHz and repeater RV49 - 145.612. QSL via SM3CVM, direct or by the Bureau. For more information, visit the SI9AM Web page at: http://www.si9am.se

T70, SAN MARION (Party/Special Event). For its first year, "DxCoffee.com" is organizing a full weekend of radio and friendship in the San Marino Republic between February 11-13th. You can visit an amazing country, meet other Hams from around the world and operate the special event station T70DXC. The special event station will be on the air between February 1-13th. Activity will be on the HF bands and 6 meters. QSL Manager for T70DXC is Pasquale La Gamba, IZ8IYX. QSL is available by the Bureau, LoTW or direct at: Pasquale La Gamba, Via Affaccio 68, Vibo Valentia 89900, Italy. For the complete details on "DxCoffee's 1st Birthday Party" and operating from T70DXC, visit: http://www.dxcoffee.com/happybirthday

T8, PALAU. Tsutomu, JA1VND, will be active as T88TF from Palau Islands (OC-009) between January 14-18th. Activity will be on 160-10 meters using CW and SSB. QSL via his home callsign.

TO2, MAYOTTE. Brazilian operators Jose/PT9ZE, Ric/PY2PT, Anderson/PY2TNT, Alex/PY2WAS and Fernando/PY4BZ depart from Brazil on April 15th, and head to Paris and then onwards to Mayotte on the 17th. The group will use the special callsign TO2FH between April 18-25th. Their plans are to have three stations active simultaneously on 160-10 meters using CW and SSB. More details and the QSL route is forthcoming.

V3, BELIZE. Gerd/DJ4KW and Gisela/DK9GG will once again be active as V31YN and V31GW, respectively, from Belize between January 6th and February 27th. They will also once again be active as V31YN/p and V31GW/p, respectively, from Blue Marlin Lodge on Southwater Caye (NA-180), between February 2-8th. Operations will be on all bands and modes. Activities will also include the following contest: CQWW 160m CW, FOC Marathon, CQ

WPX RTTY, ARRL DX CW and CQ 160m SSB Contest. QSL via their home callsigns, direct or by the Bureau or LoTW. For more details about their operation, see: http://www.qslnet.de/member/dj4kw/v31yn.htm

V3, BELIZE. Ken, N2ZN, will be active as V31AM from Placencia (V31MD QTH) between March 2-8th. He plans to be in the ARRL DX SSB Contest (March 5-6th) as a Single-Op/All-Band/High-Power entry. Activity before and after the contest will be mainly on CW or possibly some Digital modes and on the 30/17/12 meter bands. QSL via N2ZN, direct or by the Bureau. PLEASE NOTE: Ken states that Bureau cards could take a very very long time because the NJDXA Bureau has stopped forwarding cards to the "Z" hams in the second district. He mentions that he will also get the logs on LoTW sometime after the contest.

V4, ST. KITTS. Mike, W1USN, will be in St Kitts from February 12-24th. Callsign will probably be V4/W1USN like last time he was there. He will try to get on 60 meters while there. QSL via his home callsign.

V8, BRUNEI. Operators John/9M6XRO and Steve/9M6DXX, will be active from Brunei (OC-088) for 2 days between February 22nd and March 2nd, while travelling to and from IOTA OC-165 (see above). Their callsigns are yet to be confirmed, but they may be signing V85/GD3OOK and V85/G4JVG or V85/9M6XRO and V85/9M8Z. QSL both callsigns via M0URX, direct (w/SAE plus 1 IRC/2 USDs), by the Bureau, or LoTW. Alternatively, QSLs may be requested using M0URX's OQRS form at: http://www.m0urx.com/qsl-request-form

VP8/O, SOUTH ORKNEY ISLANDS. A "VP8ORK Press Release #4" was sent out this past week by James Brooks, 9V1YC, and states: "The VP8ORK DXpedition is fast approaching and all systems are go for an on-time sailing. Our container of cargo is already in Southern Argentina, and the Braveheart is ahead of schedule to meet us when we all arrive in a few weeks. We expect to be on the air with 7 stations, including the 80m and 160m, no later than January 27. Our operating frequencies are now listed here: http://vp8o.com/vp8freqs.html
As has been said before, major DXpeditions to remote Antarctic islands take an enormous amount of money to execute. Chartering a ship, obtaining environmental permits, food, provisions, heat, shelter, generators, life support... all of this adds up to an unbelievable expense just to hand out a 'new one' to the DXer at home. This means we need support from each and every one of you out there to make this happen. No amount is too small, so please consider donating. Details on how to make an easy contribution by PAYPAL can be found on our website at: http://www.vp8o.com
We look forward to hearing you on the bands in a few weeks."

VQ5, TURKS AND CAICOS ISLANDS. Operators Stan/AC8W, Jim/KB8TXZ and Lee/N8LJ will be active as VQ5D from the Turks and Caicos Islands during the ARRL DX CW Contest (February 19-20th) as a Multi-Single entry. Activity is in remembrance of Hank, K8DD. QSL via AC8W.

YASME EXCELLENCE AWARDS. Wayne Mills, N7NG sent out the following press release on January 4th, to announce the "Yasme Excellence Awards": "The Yasme Excellence Awards are given to individuals who through their own

service, creativity, effort and dedication have made a significant contribution to amateur radio. <http://www.yasme.org/excellence.html> The contribution may be in recognition of technical, operating or organizational achievement as all three are necessary for amateur radio to grow and prosper. The YASME Foundation recognizes the following individuals in order to inspire them and others on behalf of amateur radio now and in the future.
* Ram&#65533;n Santoyo V, XE1KK, who is recognized for his work in advancing Mexican ham radio and representation within the international radio community. In addition, Ram&#65533;n serves as IARU Region 2 Secretary. He has been a tireless advocate of amateur radio in Central America and a strong proponent of radiosport and the World Radiosport Team Championships. Voices like Ram&#65533;n's help the amateur community work together worldwide, strengthening our position and reputation as important members of the wireless community.

* Makoto (Mako) Mori, JE3HHT, who deserves much credit for popularizing RTTY by writing the MMTTY software modem and making it available for integration into logging software. He also wrote MMVARI, which implements other popular digital modes, and several other digital mode software products. MMTTY is a great product and Mako has exhibited great ham spirit with a huge effect as can be observed as RTTY operation continues to be the fastest growing mode of HF digital operation.

* Bruce Horn, WA7BNM, who continues to generate useful and innovative web sites including a complete upgrade of his excellent contest calendar Web site. Bruce supports contesting with a web site that enables contesters to convert paper and other forms of contest logs to Cabrillo format. His 3830 score reporting and compilation service has changed the nature of radiosport. Bruce was also a key player in the initial efforts to develop methods of exchanging scoring information in the web-friendly XML format.

* Rick Meuthing, KN6KB, for developing the new WINMOR sound-card digital mode software now gaining wide use in the worldwide Winlink 2000 system. Many attempts at approaching the performance of the proprietary PACTOR III protocol and hardware failed before WINMOR, attesting to the difficulty of the problem. Rick also invented an improved 'channel busy' detector that senses many different types of modulation and will drastically reduce the inter mode QRM common from other semi-automated digital protocols.

* Mikael Styrefors, SM2O, who has developed the Remote Radio Interface. The ability to connect radios and operators transparently and robustly over the Internet is a key technological element of putting top-grade remote HF stations on the air - something more common every day. Remote stations will undoubtedly be important and popular in making and keeping amateur radio available to urban and suburban amateurs as they deal with mounting antenna restrictions and an increasingly noise-filled and interference-prone electromagnetic environment.

* Alex Shovkoplyas, VE3NEA, for developing DX Atlas, Morse Runner, HAM-CAP, CW Skimmer, Rocky and other innovative software. Alex's products are making a remarkable impact on the competitive HF operating environment. The quality of the software is remarkable, and having it available to the amateur community at little or no cost demonstrates excellent ham spirit. Programs like these are rapidly expanding the technological frontier of radio in general and are prime examples of how amateurs can continue to make contributions.

* Pepe Ardid, EA5KB, who makes it possible for many Latin American DXers, who are in many cases saddled with deficient postal services and QSL Bureaus, to confirm contacts with attractive and unique QSL cards. Confirmations are rapid and he confirms not only direct but via bureau as well. Pepe contributes countless hours of service in support of his fellow amateurs so they can continue to participate in one of amateur radio's most cherished traditions.

For additional information about the Yasme Foundation see:
http://www.yasme.org "

ZS8, MARION ISLAND (Update). Pierre, ZS1HF/ZS8M, is reportedly active from the new base on Marion Island. One reports that he is using the emergency antenna there to avoid the heavy QRN problems, and he sounded somewhat weaker than on the Stepper IR vertical. QSNs show this past week that Pierre has been on 40/20/17/15 meters.

(VIA the IARU Bulletin)

Hi

Noel Donawa, 9Y4NED, Area E Director of IARU Region 2, has reported; that Caribbean Emergency & Weather Net (CEWN), has built their new Web page.

This CEWN'S Web page has been built by the Webmaster, Waine J73WA.

The purpose of the CEWN is to handle all forms of Amateur Radio traffic, pass weather information, and emergency traffic.

The CEWN is doing meetings twice daily at 10:30 and 22:30 UTC on frequency 3.815 MHz. During emergencies, extended their sessions, and will be conducted on 7.162 as conditions dictate.

Please follow the link for more information:

(direct: dj5av@darc.de)

A6 - United Arab Emirates: Gerry, A6/VE6LB, will be on the air January 12th through February 9th. It will be a holiday style operation mainly CW with some digital, running 100W to a 40-10m G5RV antenna. QSL via homecall (direct, bureau or LoTW). Internet: www.telusplanet.net/public/telwest/ve6lb.htm & http://logsearch.de/index.php/online-logsearch .

CE - Chile: Didier, CE/F6DXE, is travelling through Chilean call aereas CE7 CE6, CE4, CE5 and CE3 until January 20th. Look for him on 7.025, 14.025 MHz CW and 7.140, 14.205, 21.250, and 28.450 MHz SSB using 100 watts and a vertical. QSL via home call.

D2 - Angola: Laci, OM5AM, is active as D2AM from Luanda until March 17th. So far he has been on 20 m RTTY and SSB. QSL via home call, direct or via bureau.

FR - Reunion: Look for Frederic, ex-F5INL, as FR8NE from Reunion (AF-016) using 20/17/15/12/10 m mostly on CW through July 2012. QSL direct to: Frederic Bossu, 2 Chemin des Grenadiers, 97490 Sainte Clotilde, Reunion, or via bureau.

H4 - Solomon Islands: Once again Bernhard, DL2GAC, will spend 3 months in Honiara, Salomonen (Guadalcanal, OC-047), January 13th through April 12th. He will use a Yaesu FT-857, an Ameritron 500M linear, 4ele 5 band beam for 14, 18, 21, 24 and 28 MHz, dipoles for 40 and 80 m, and maybe an inverted-L for 160 m at the 18 m Spiderbeam mast. Bernhard operates mainly SSB again, but will give RTTY and PSK a try this time. Probably he will stay in the capital Honiara, he might look for a IOTA activity after arrival. QSL as always via home call/bureau or direct to DL2GAC.

PJ4 - Bonaire: Hennie, PJ4/PE1MAE, left Bonaire because of problems in his family, there is no information when he might continue his activity.

T8 - Palau: Find Tsutomu, JA1VND, as T88TF on Palau (OC-009) January 14th through 18th using 160 through 10 m on CW and SSB. QSL via home call.

V31 - Belize: Gerd (DJ4KW/V31YN) and Gisela (DK9GG/V31GW) should now be in in Belize for a vacation until late February. Gerd will otimise the antenna for 160 m and take part in the 160 m CQWW contest. Probably he will go to Southwater Caye (NA-180) February 2nd through 8th as V31YN/p. QSL via home call, direct, via bureau or LoTW, Gisela also uses eQSL on request. Find them in the Internet at www.qslnet.de/member/dj4kw/v31yn.htm .

Darren, VA3EGG, will be on as V31DI this month (no exact date) on Maya Beach, Placencia, using 160 through 6 m, mainly 6, 20 and 40 m on SSB. QSL via home call, "direct only".

VK9X - Christmas-Island : A group of Japanese OPs, Takeo/JA3BZO (VK9XA), Hiroko/ JH3PBL (VK9XL), Shimatake/JI3DNN (VK9XN), Masumi/JA3AVO (VK9XO), Nakasako/ JA3UJR (VK9XJR), Kunio/JA1CJA (VK9XXY), and Nishimura/JA3HJI (call not yet known), will be active January 14th through 20th from Christmas Island (OC-002). They will operate on 160 through 6 m using CW, SSB and digital modes. QSLs via home calls. Find more information at www.nakade.jp/vk9x.htm .

3D2 - Fiji: Udo, DL9HCU, again will be in Pacific Area for 2 months, this time with no island hopping but operating as 3D2HC on OC-017, using his QRP rig. Find him on 14.002 or 14.025 MHz on CW, or using SSB on 14.183 MHz from 0500 through 0800 UTC, sometimes also in the ANZA Net. QSL via DL9HCU, via bureau or direct to: Udo Moeller, Mienenbuettel 4, 21629 Neu Wulmstorf, GERMANY.

5R - Madagascar: Look for 5R8HL on AF-013 and on Nosy Be Island (AF-057) activated by Andy/SM1IRS, Al/SM4HAK, and Eric/SM1ALH, January 17th through February 4th. They will be on 80 through 10 m using CW and SSB. QSL via SM1ALH, direct or via bureau.

Paolo, IK2QPR, will also visit Nosy Be Island January 17th through 25th as 5R8PR "holidaystyle" on 40 through 10 m on CW, SSB and RTTY. QSL via home call, direct, via bureau or by LoTW.

Pacifik: Hermann/DL2NUD and Stefan/DL9GRE will be QRV January 16th through 26th as FK/DL2NUD and FK/DL9GRE from New Caledonia (OC-032, aka Grande Terre). Stefan will be on the HF bands, Hermann will look for 2 m, 70 and 23 cm (EME). They will continue in Vanuatu, January 27th through February 2nd, requested calls YJ8HP and YJ8GR. QSLs via home calls, ok via bureau.

Southeastern Asia trip: Hans, DF5UG, will be active from South Eastern Asia again foir 1 month, starting January 15th using his calls 9M2QQ, 9M8QQ, and HS0ZFU. Additionally he intends a trip to Brunei as V85QQ.
QSL via DF5UG, also via bureau.
Haiti, special call: Find the "Radio Club d'Haiti" on different QTHs using the special call 4V1 January 10th through 20th commemorating people killed by the earth quake of January 12th, 2010 mainly near 14.300 MHz.

QSL via N3OS.

Lithuania, special call: January 13th, 1991 the Sowiet Army tried to occopy
independent Lithuania. All radio traffic was disturbed, radio amateurs
told the world about the invasion. In rememberance to this historical
night these special stations will be active from January 12th, 2200 UTC,
through January 27th, 2200 UTC:

LINKS:
Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
Correction to DXNL 1706: The correct link for online QSL request of
OH0/DL6UAA is: www.dl6uaa.de/oh0 .

Tom, K8CX, did collect DX Sound Bites in 2010 again. Look for them at
http://hamgallery.com/dx2010 and also for "Rare DX Sound Clips"
from the last years, and from the 60th and 70th, a museum collection of
QSL cards and other information.

UPCOMING CONTESTS
----
15. January: LZ Open Contest (www.lzopen.com);
15./16 January: HA DX Contest;
15./16. January: U.K. DX RTTY Contest.

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AN-010, Various, South Shetland Islands: Find Diego/LU8DIP now through
about middle of March as LU8DIP/Z and LU1ZS on Base Teniente Camara
Half Moon Island. QSL via LU4DXU.

AS-013, 8Q, Maldive Islands: Andrew/G7COD is active again through January
16th as 8Q7AK on Hudhuran Fushi Island (North Male Atoll) on 80-10 m
using CW and SSB. QSL via home call (d/B). More information at
http://8q7ak.freewebspace.com .

NA-062, W4, FL State (Florida Keys) Group: Wade/AA8LL and Roger/K0RMK are
AA8LL/4 and K0RMK/4 on Key Largo January 10th through 17th. QSL via
home calls (d/B/LoTW/eQSL).

OC-005, VK9, Norfolk Island: Alan/VK3XPD, Kevin/VK4UH and Mike/VK3KH are active from Norfolk as VK9NA until January 20th. QSL via VK3KH (d/B).

OC-244, DU1-4, Luzon's Coastal Islands: Christian/EA3NT and Bjoern/SM0MDG are planning an activity as DU1/home call on Tablas Island. QSL for DU1/EA3NT and DU1/SM0MDG via EA3NT (d/B).

Clusters Network and VK3FY for the following DX information.
```

DX0, SPRATLY ISLANDS (DX0DX POSTPONEMENT). A press release posted on the DX0DX Web page (dated Jan. 12, 2011 • 0506 GMT) states the following:
"To the DX Community at large - It's with regret that as Team Leader, I have to announce the postponement of the DX0DX Spratly Islands DXpedition 2011, due to circumstances beyond the control of the DX0DX Team.
Our situation began when our original mode of transport by ship was terminally damaged back in late October 2010. We then went to our contingency
plan which was to fly in, as there were no ships deemed to be safe and provided facilities for safe passage to Pag-Asa, available.
We hand landing permission and booked the correct sized aircraft and with the security cleared pilots. To simplify it, there was conflicting agreements and hence the aircraft could not get approval of its flight plan.
The bottom line is this. We have a licence, we have authority to land via ship, hence when the ship becomes available in the near future, it is my intention to activate this entity in 2011.
The team has worked tirelessly to remove the hurdles that were placed before the team in the last minute.
As time was running out for this window of opportunity, and before more operators become stuck here in Palawan, the decision was made to postpone the activation.
A call was placed to PARA advising them that a postponement of the activation would be sought to a date in in the near future, where the activation will look at again taking place.
All equipment will need to be exported out of Philippines to comply with current Philippine Customs Law in which it was brought into the country.
The plan is to be re-assessed so the current operators have the first opportunity to be on this future trip.

Once more information is at hand, I will advise the DX Community.

Regards
Chris de VK3FY (Team Leader DX0DX)"

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-01-13
We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page
http://www.mmmonvhf.de/latest.php - welcome and enjoy ...

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF Trophy: "Best VHF DX Expedition" of the Year 2010 **

As in the past years, as well the VHF DX Portal MMMonVHF start
to find the "Best VHF DX Expedition of the Year 2010".
The best expedition on 144 MHZ in the sector MS and/or EME will
be voted in the first 3 weeks of january 2011 as past years: Voting
is open from 01.01.2011 00:00UTC till 20.01.2011 23:59UTC
Link to the: http: Voting Page: http://www.mmmonvhf.de/dxvote.php
PS: The VOTING will of course only include Expeditions which was
spread out on the 2010 LATEST NEWS at Make More Miles on VHF!
If you interesting to see the results of past year:

** Solar Cycle Prediction (Updated 2011/01/03) **

NASA has released a new forcast for solar cycle 24 on Jan 3rd.
This prediction for the next sunspot cycle maximum gives a
smoothed sunspot number maximum of only about 59 in June/July
of 2013. This means that cycle 24 will be sunspot wise only half
as strong as the previous one. All in detail have a look at:

Summer VHF-UHF Field Day reminder

A reminder: the Summer VHF-UHF Field Day will be held next weekend
Janary 15/16. The due date for logs will be Monday, January 31. A
copy of the rules is available on the contest web page by clicking
here. As well as the normal certificates, operators on 1296 MHz
and higher bands are also eligible for an extra ï¿½Microwave
Challengeï¿½ certificate. These certificates will include details
of the rank order of stations on 1296 MHz and higher bands, plus
recognition for DX contacts on the microwave bands. If you wish to
enter for the ï¿½Microwave Challengeï¿½, please download the special
scoring sheet from the contest web page. It includes the normal
scoring sheet plus an extra page for entrants to record the
greatest distances worked on each microwave band. Distances worked
can be calculated using software that is available for download on
the contest web page. Activity will no doubt be affected by the
terrible floods. To all those affected by this disaster, I can
only say - stay safe. SOURCE: John VK3KM via [VK-VHF]

** Island Activity around Papua New Guinea during April **

Hans SM6CVX, Derek G3KHZ, Luis CT1AGF, Mike G3JKX, Martyn G3UKV
and Stig (none ham) will be active from several island groups of
Papua New Guinea during the month of April 2011. Plans are to be
QRV on 160-6m CW, SSB and RTTY, using 4 active stations at all the
times. Schedule: Feni Island (IOTA OC-101, Grid Loc. QI65),
Bismarck Archipelago, on 2-7th April, using the callsign P29VCX.
Nuguria Island (IOTA OC-257, Grid Loc. QI76), Bougainville
district, on 8-14th April,using the callsign P29NI. Green Island
(IOTA OC-231, Grid Loc. QI75), North Solomons, Papua New Guinea,
on 15-18th April, using the P29VLR. Following this expedition
Hans, SM6CVX, (and Stig) will activate Misima Island (IOTA OC-117,
Grid Loc. QH69), Louisiade Archipelago, on 22-25th April; and

Loloata Island (IOTA OC-240, Grid Loc. QI30) on 25-27th April,
using the callsign P29VCX. QSL P29VCX and P29VLR via SM6CVX,
QSL P29NI via G3KHZ. Further info can be found on their website

** Craig K2LZQ is going to Chile begin 2011 and qrv 50 MHz **

LATEST NEWS from Lance, W7GJ, dated 2011-01-10:
We are all set for the next Chile trip. We arrive in CE7 (FE44BG)
on January 23 and should be operational that evening if everything
arrives in one piece. When not fishing we will operate on 50.200
first. We have no internet but I will have my satellite phone.
We will be using an IC7000, M2 KW and an 8 element LFA antenna
with elevation. Will keep you advised , Craig K2LZQ
SOURCE: Craig, K2LZQ via Lance, W7GJ, direct to MMMonVHF

** DX0DX DXpedition to Spratly Islands in January 2011 posponed **

To the DX Community at large - Its with regret that as Team Leader,
I have to announce the postponement of the DXï¿½DX Spratly Islands
DXpedition 2011, due to circumstances beyond the control of the
DXï¿½DX Team. Our situation began when our original mode of transport
by ship was terminally damaged back in late October 2010. We then
went to our contingency plan which was to fly in, as there were no
ships deemed to be safe and provided facilities for safe passage
to Pag-Asa, available. We hand landing permission and booked the
correct sized aircraft and with the security cleared pilots. To
simplify it, there was conflicting agreements and hence the air
craft could not get approval of its flight plan. The bottom line
is this. We have a licence, we have authority to land via ship,
hence when the ship becomes available in the near future, it is
my intention to activate this entity in 2011. The team has worked
tirelessly to remove the hurdles that were placed before the team
in the last minute. As time was running out for this window of
opportunity, and before more operators become stuck here in
Palawan, the decision was made to postpone the activation. A call
was placed to PARA advising them that a postponement of the
activation would be sought to a date in in the near future, where
the activation will look at again taking place. All equipment will
need to be exported out of Philippines to comply with current
Philippine Customs Law in which it was brought into the country.
The plan is to be re-assessed so the current operators have the
first opportunity to be on this future trip. Once more information
is at hand, I will advise the DX Community. Regards Chris
SOURCE: Chris, VK3FY Team Leader DXï¿½DX via [mediterraneodxclub]

** T70, SAN MARION (Party/Special Event) **

For its first year, "DxCoffee.com" is organizing a full weekend
of radio and friendship in the San Marino Republic between
February 11-13th. You can visit an amazing country, meet other
Hams from around the world and operate the special event station
T70DXC. The special event station will be on the air between
February 1-13th. Activity will be on the HF bands and 6 meters.
QSL Manager for T70DXC is Pasquale La Gamba, IZ8IYX. QSL is
available by the Bureau, LoTW or direct at: Pasquale La Gamba,
Via Affaccio 68, Vibo Valentia 89900, Italy. For the complete
details on "DxCoffee's 1st Birthday Party" and operating from
T70DXC, visit: http://www.dxcoffee.com/happybirthday

==> + ARRL IN ACTION: NEW AMATEUR RADIO BILL INTRODUCED IN CONGRESS

The Amateur Radio Emergency Communications Enhancement Act, which
died at the end of the 111th Congress, has been reintroduced in the
112th Congress as HR 81
<http://www.thomas.gov/cgi-bin/query/D?c112:2:./temp/%7Ec1129bpLP1::>.
The sponsor is Representative Sheila Jackson Lee (D-TX-18). The new
bill -- which was introduced on January 5 -- has been referred to the
House Committee on Energy and Commerce. "We are hopeful that this early
start will lead to success in the new Congress," commented ARRL Chief
Executive Officer David Sumner, K1ZZ.
```

Rep Jackson Lee first introduced the bill -- HR 2160
<http://www.arrl.org/hr2160> -- in the 111th Congress in April 2009
<http://www.arrl.org/news/houston-representative-introduces-amateur-radio-bil
l-in-congress>.
It gained an additional 41 cosponsors but did not progress out of the
committee of jurisdiction. A similar bill introduced in the Senate -- S
1755
<http://www.arrl.org/news/senate-introduces-companion-bill-to-hr-2160>
-- made it all the way through that body in December 2009, but likewise
was not taken up by the House. The objective of the bill -- which is
supported by the ARRL -- is for the Secretary of Homeland Security to
study the uses and capabilities of Amateur Radio communications in
emergencies and disaster relief and to identify and make
recommendations regarding impediments to Amateur Radio communications,
such as the effects of private land use regulations on residential
antenna installations.

==> + FCC NEWS: FCC SENDS LICENSE RENEWAL FOR K1MAN TO ADMINISTRATIVE
LAW JUDGE

The FCC has issued a Hearing Designation Order
<http://www.fcc.gov/Daily_Releases/Daily_Business/2011/db0112/DA-11-58A1.pdf>
to determine, among other things, if the Amateur Radio license of Glenn
A. Baxter, K1MAN, of Belgrade Lakes, Maine, should be renewed.
According to the Order, "Baxter has apparently willfully and repeatedly
engaged in unlawful Commission-related activities, including causing
interference to ongoing communications of other amateur stations,
transmitting communications in which he had a pecuniary interest,
failing to file requested information pursuant to an Enforcement Bureau
(Bureau) directive, engaging in broadcasting without communicating with
any particular station and failing to exercise control of his station."

Baxter, whose amateur license expired in 2005, filed a timely renewal
on July 22, 2005; his license expired on October 17. Because of the
timely renewal, Baxter's license remained in effect past the expiration
date. The FCC said it "believe[s] that Baxter's apparent continuing
course of misconduct raises a substantial and material question of fact
as to whether he possesses the requisite character qualifications to be
and remain a Commission licensee."

==> + PUBLIC SERVICE: MIDWESTERN HAMS SPOT, TRACK TORNADOS AS 2011
BEGINS

In the final hours of 2010, tornados swept across Missouri, Illinois
and Arkansas, leaving at least seven people dead. Hams in Missouri --
one of the hardest hit areas -- activated nets and provided real-time
weather observations to the National Weather Service. According to a
timeline of events in the St Louis Post-Dispatch, hams in the towns of
Pacific, Ballwin and Sunset Hills in Missouri, as well as a ham in
O'Fallon, Illinois, were among the many who spotted and reported
twisters and severe weather to their local NWS offices.

Steve Runnels, KD4OPZ -- the Warning Coordination Meteorologist at the NWS office in Springfield, Missouri -- said that he was impressed by "the amount of Amateur Radio support we received during the overnight and into the early morning hours. This proves that the Amateur Radio community is always ready. It also shows the strength of their commitment to the communities they live in and the National Weather Service's mission to protect life and property." Read more here <http://www.arrl.org/news/midwestern-hams-spot-track-tornados-as-2011-begins> .

==> + ON THE AIR: AIM HIGH IN THE ARRL JANUARY VHF SWEEPSTAKES

VHF operators will be on the bands in force the weekend of January 22-24 as the ARRL January VHF Sweepstakes hits the airwaves. This contest gives the VHFer in all of us a chance to do some contesting during the winter months. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, January may not seem like the ideal time to hold a VHF+ contest, but sometimes he said, the propagation gods like to surprise and confound. "There have been plenty of QSOs made via sporadic-E in the colder months this winter, including a surprise opening from the Midwest and Western US to Australia and New Zealand just this week! QSOs on other forms of enhancement exist as well, thanks to tropospheric ducting and auroral propagation. Because of the advent of WSJT software, making QSOs via meteor scatter in the wee hours of the morning on 6 and 2 meters has never been easier. There are plenty of opportunities to make long-haul QSOs on the VHF+ bands in January." Read more here <http://www.arrl.org/news/aim-high-in-the-arrl-january-vhf-sweepstakes>.

==> ON-THE AIR: ARRL OUTGOING QSL SERVICE ANNOUNCES NEW RATE STRUCTURE

Effective January 17, 2011, a new pricing structure will go into effect for the ARRL Outgoing QSL Service. With the new rate structure, amateurs will no longer need to count outgoing cards and then guess as to what to pay based upon a half-pound rate; a simple weighing of the cards is all that is necessary to determine what amount to send to the Bureau. This new structure also accommodates a small rate increase in response to recent postage, shipping and handling costs. Read more here <http://www.arrl.org/news/arrl-outgoing-qsl-service-announces-new-rate-structure>.

==> + AMATEUR RADIO IN THE CLASSROOM: ARRL EXECUTIVE COMMITTEE APPROVES GRANTS FOR FIVE SCHOOLS

In December 2010, the ARRL Executive Committee reviewed grant applications for the ARRL's Education & Technology Program (ETP), awarding equipment valued at nearly $5000 to five schools. More than 525 schools across the country have received support from the ETP in the form of grants for equipment, curriculum and resources, as well as teacher in-service training through the Teachers Institute on Wireless Technology. Applications for equipment and resource grants are accepted twice each year; application deadlines are May 1 and November 1. Applications for 2011 summer sessions of the Teachers Institute are

currently being accepted. Read more here
<http://www.arrl.org/news/arrl-executive-committee-approves-grant-funding-for
-five-schools>.

==> + ARRL BOARD OF DIRECTORS TO MEET NEXT WEEK

The ARRL Board of Directors will hold its 2011 Annual Meeting on
January 21-22 in Windsor, Connecticut. Directors, Vice Directors and
ARRL Board Officers will be in attendance, including two new Vice
Directors who will be at their first Board meeting: Southeastern
Division Vice Director Andrea Hartlage, KG4IUM, and West Gulf Division
Vice Director John Robert Stratton, N5AUS. The Board will also welcome
IARU Secretary Rod Stafford, W6ROD, and Radio Amateurs of Canada
President Geoff Bawden, VE4BAW. The meeting will be preceded on
Thursday, January 20 with meetings of the Board's Administration and
Finance Committee and the Programs and Services Committee. At its
January 2010 meeting, the ARRL Board of Directors decided to make the
agendas of Board and Executive Committee meetings available on the ARRL
website. The agenda for the 2011 Annual Meeting is available here
<http://www.arrl.org/attachments/view/News/56557>. Per the Articles of
Association <http://www.arrl.org/arrl-articles-of-association> the ARRL
Board of Directors meets twice a year, in January and July.

==> + ARRL FOUNDATION SCHOLARSHIP APPLICATIONS AND TRANSCRIPTS DUE
FEBRUARY 1

Students planning to apply for the more than 60 scholarships
administered by the ARRL Foundation should be aware that the deadline
is fast approaching. All materials -- including transcripts -- are due
February 1. Beginning this year, applicants must submit all material
electronically. No paper forms will be accepted. Read more here
<http://www.arrl.org/news/arrl-foundation-scholarship-applications-and-transc
ripts-due-february-1>.

==> SOLAR UPDATE

Tad "I'm melting in the Sun
<http://www.youtube.com/watch?v=8t7QQ_DrIpA>" Cook, K7RA, reports: The
average daily sunspot numbers declined 12 points to 38 during the week
of January 6-12. The average daily solar flux declined by nearly 6
points to 83.8. The latest forecast shows solar flux at 80 on January
13-15, 78 on January 16-19 and back to 80 on January 20-35, then rising
to nearly 90 by the end of the month. The same forecast has planetary A
index for January 13-22 at 5, 8, 7, 5, 5, 5, 5, 7, 7 and 5. Geophysical
Institute Prague sees unsettled geomagnetic conditions on January
14-15, quiet to unsettled January 16, unsettled January 17-18, quiet to
unsettled January 19 and quiet on January 20. The STEREO mission's
coverage of the entire Sun <http://stereo.gsfc.nasa.gov/> is nearly
complete, with continuous images showing more than 99.2 percent of our
nearest star. By Sunday evening in North America, the project will have
passed 99.34 percent coverage. The black band of unseen area is now
just a tiny sliver, and magnetically active areas over the entire Sun

may now be observed live from any place with an Internet connection at any time of the day or night. Look for more information on the ARRL website on Friday, January 14. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by INXS <http://en.wikipedia.org/wiki/Inxs>' Melting in the Sun <http://www.youtube.com/watch?v=8t7QQ_DrIpA>.

==> + AMATEUR RADIO FUN: BE A STAR! ENTER THE ARRL VIDEO CONTEST

If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its first-ever video contest <http://www.arrl.org/video-contest>! We are looking for ARRL members to shoot and submit videos that showcase how fun and electrifying our hobby is; extra points will be awarded for a video showing someone, young or old, licensed or not, making their first contact. Videos will be judged on overall quality and composition, and prizes will be awarded. The video author/producer must be an ARRL member; however, the people who appear in your video can be non-members. This contest is intended for amateur videographers. If you are a professional, please do not apply. Check out all the details -- including the fine print -- on the ARRL Video Contest Rules and Guidelines web page <http://www.arrl.org/video-contest>.

==> AMATEUR RADIO FUN: NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll include:

- Do you use a computer to send or receive CW?
- Do you subscribe to any publications that you read online?
- Do you have a separate room in your home that's dedicated strictly to your ham station?
- When operating SSB, do you use a speech processor?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the April 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> SILENT KEY: FORMER WESTERN MASSACHUSETTS SECTION MANAGER BILL VOEDISCH, W1UD (SK)

William Voedisch, W1UD, of Leominster, Massachusetts, became a Silent Key on January 1. He was 78. Voedisch was an avid CW operator who especially enjoyed operating in the CW National Traffic System nets. In recent years, he was the Manager of the NTS First Region CW net and

almost nightly represented the First Region in the Eastern Area Net. He
was also active in the Transcontinental Corps, relaying messages to
other regional nets around the country. Read more here
<http://www.arrl.org/news/former-western-massachusetts-section-manager-bill-v
oedisch-w1ud-sk>.

==> THIS WEEK ON THE RADIO

This week:

- January 14 -- NCCC Sprint Ladder
- January 15 -- LZ Open Contest, Feld Hell Sprint
- January 15-16 -- North American QSO Party (SSB), Hungarian DX
Contest, UK DX Contest (RTTY)
- January 17 -- Run for the Bacon QRP Contest
- January 20 -- NAQCC Straight Key/Bug Sprint

Next week:

- January 21 -- NCCC Sprint Ladder
- January 22-23 -- BARTG RTTY Sprint

RAC Bulletin 2011-001E : Doug Mein VA3DM appointed Special Advisor to the RAC Field Organization
2011-01-13

I am very pleased to announce the appointment of Doug Mein VA3DM, Special Advisor to the Radio Amateurs of Canada Field Organization. Doug has been a Ham for many years and holds basic, morse and advanced qualification.

Doug has an extensive background and is retired from Transport Canada after 33 years of service. During the Sept 11 terrorist attacks on the United States, Doug was Director of Transport Canada's Air Navigation Services and Airspace Branch in Ottawa, playing a key role in coordinating department operations and taking decisive action on behalf of the Canadian Government. In addition, Doug was the chief architect behind the creation of NAV Canada. Doug resides in Alliston, Ontario.

Doug';s focus will be with strategic matters that effect the Radio Amateurs of Canada Field Organization nationally.

I know that you will all join me in welcoming Doug.

73

Doug Mercer VO1DTM
Vice President Field Services
Radio Amateurs of Canada
P.O. Box 1042 Goulds
Newfoundland Labrador
A1S 1H2

Amateur Radio Newsline(tm) Report 1744 - January 14 2011

Amateur Radio Newsline report number 1744 with a release date of
Friday, January 14, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The Amateur Radio Emergency Communications
Enhancement Act gets another chance in Congress, the long awaited
Spratley Island DX0DX is put on indefinite hold, repeaters in Italy are
accused of interfering with ham radio space operations and the story of
a 10 year old who discovers a supernova exploding star in a galaxy far,
far away. Find out the details on Amateur Radio Newsline(tm) report
number 1744 coming your way right now.

RADIO POLITICS: AMATEUR RADIO EMERGENCY COMMUNICATIONS ENHANCEMENT ACT
REINTRODUCED BEFORE CONGRESS

New life for a ham radio emergency communications measure. This as the
Amateur Radio Emergency Communications Enhancement Act is re-introduced
before Congress. Norm Seeley, KI7UP, reports:

--

The Amateur Radio Emergency Communications Enhancement Act, which died
at the end of the 111th Congress, has been reintroduced in the 112th
Congress as HR 81. According to an ARRL credited posting on Facebook,
the sponsor is Representative Sheila Jackson Lee of Texas.

The objective of the bill which is supported by the ARRL is for the
Secretary of Homeland Security to study the uses and capabilities of
Amateur Radio communications in emergencies and disaster relief. Also
it would identify and make recommendations regarding impediments to
amateur radio communications, such as the effects of private land use
regulations on residential antenna installations.

Representative Jackson Lee first introduced the bill as HR 2160 in the
111th Congress in April 2009. It gained an additional 41 co-sponsors
but did not progress out of the committee of jurisdiction. A similar
bill introduced in the Senate as S 1755 as made it all the way through
that body in December 2009, but likewise was not taken up by the House.
Now, in 2011, a lot of hams are hoping that this latest version will
make it though both houses of Congress and become the law of the land.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, In Scottsdale, Arizona.

--

The new bill which was introduced by Jackson Lee on January 5th has been referred to the House Committee on Energy and Commerce. (ARRL)

**

DX ADVISORY: DX0DX OPERATION ON INDEFINITE HOLD

Some disappointing news for DX'ers. The long awaited DX0DX operation from the Spratley Islands appears to be on indefinite hold and nobody can say exactly when it will take place.

According to a posting on DX World dot net by Team Leader Chris Dimitrijevic, VK3FY, the decision to abort the attempt at this time was brought about by what he termed as circumstances beyond the control of the DX0DX Team.

VK3FY said that the situation leading to the decision to postpone the operation began when the expedition's transport by ship was damaged back in October of 2010. They then opted to fly in, as there were no ships deemed to be safe to make the voyage to Pag-Asa available.

VK3FY says that they had landing permission and booked an aircraft with security cleared pilots. However, there was conflicting agreements and the aircraft could not get approval of its flight plan. As time was running out for this window of opportunity, and before more operators became stuck in Palawan in the hope of making the last leg of the voyage, the decision was made to postpone the operation.

The authorities overseeing access to the islands has been advised of the postponement. Also, all of the equipment that was to be used for the operation will be exported out of Philippines to comply with current Philippine Customs Law.

VK3FY ends by noting that his team has a license as well as the authority to land via ship. He says that when a ship becomes available, it is his intention to activate this entity sometime in 2011.

More on this story is on line at dx-world.net. We will have more DX news later on in this weeks Amateur Radio Newsline report. (DX-World)
**

RESTRUCTURING: RSGB ANALYZING FUTURE OF HAM RADIO IN THE UK SURVEY

It looks like there could be some long nights ahead for officials of the Radio Society of Great Britains leadership. This as it wades through the myriad of responses to its recently concluded survey of UK hams on the future of the service and the society itself. GB2RS News Reader Jeremy Boot, G4NJH is here with the details:

--

The RSGB Questionnaire on the status of amateur radio within the United Kingdom closed on 31 December 2010. Over 3,000 responses were completed, well in excess of expectations, so the Society is very grateful for those who gave their time to have a go at the Questionnaire.

It was particularly good to get feedback from several hundred lapsed members as well as a sizeable number of people who had never joined the Society.

The analysis task has now started. Whilst there are some statistics that can be established quickly and easily some of the data, particularly the textual comments will take many hours to gather, categorize and collate.

I'm Jeremy Boot, G4NJH and you are listening to the Amateur Radio Newsline.

--

The timetable for the analysis is to complete the analysis by the summer. This, so that the key findings can be used in long term planning by the RSGB. (GB2RS)

**

HAM RADIO IN SPACE: ITALIAN REPEATERS ALLEGED TO BE INTERFERING WITH HAMSATS

According to a report in the Southgate News, both F-M and D-Star repeaters in Italy are showing up in the Amateur Satellite segment 145.8 from 146.0 MHz. These machines are said to be government approved by Italy's Communications Regulatory Authority and are causing considerable interference to amateur radio satellites and the International Space Station contacts

Some of the Italian repeaters identified in the article as operating in the 2 meter Amateur Satellite allocation are said to include F-M machine IRE0CK on 145.85 MHz plus D-Star systems IR3UEF on 145.8 Mhz and IR0CD on 145.975 Mhz.

The Southgate story says that it would appear that Italy's telecommunications regulator permits repeaters anywhere within the 2 meter band on a provisional basis for 60 days. Authorization may become permanent if no complaints are received. The article calls on hams worldwide to make sure that the Italian telecommunications regulatory body is made aware of any problems.

This is not the first time that there have been interlopers into the ham satellite spectrum. Over the years there have been numerous reports of terrestrial business communications using these frequencies and eventually disappearing. Most of these reports came out of third world developing nations. The situation in Italy will be quite different if its proven that the repeaters alleged to be interfering with ham radio space operations have government approval to do so.

The Complete story of this repeater versus ham radio satellite interference is on-line at tinyurl.com/497bag7. The website for Italy's Italy Communications Regulatory Authority in the Italian language is www2 dot agcom dot it. And we will have more ham radio space related news later on in this weeks Amateur radio Newsline report. (Southgate)

ENFORCEMENT: FCC DESIGNATES K1MAN LICENSE RENEWAL FOR HEARING

The FCC has designated the Amateur Service station license of Glenn A. Baxter, K1MAN, for a hearing to determine if it should be renewed. In its January 10th Hearing Designation Order, the Commission stated that the proceeding will be held before a Commission Administrative Law Judge to determine whether a pending application filed by Baxter for renewal of his license for Amateur Radio Station K1MAN should be granted.

The Hearing Designation Order continues with the FCC stating that the record before it indicates that Baxter has apparently willfully and repeatedly engaged in unlawful Commission-related activities. These include causing interference to ongoing communications of other amateur stations, transmitting communications in which he had a pecuniary interest, failing to file requested information pursuant to an FCC Enforcement Bureau directive, engaging in broadcasting without communicating with any particular station, and failing to exercise control of his station.

The Order continues by stating that based on the information before it, the FCC believes that Baxter's apparent continuing course of misconduct raises a substantial and material question of fact as to whether he possesses the requisite character qualifications to be and remain a Commission licensee. Accordingly, it has designated his pending renewal application for a hearing.

Baxter had filed an application to renew the license for station K1MAN on July 22, 2005, but this application had been set aside by the FCC pending further action. His license expired on October 17, 2005, but under Administrative Law he has been permitted to continue to operate his station until the matter of his license renewal has been fully adjudicated.

The Hearing Designation Order was issued on Monday, January 10th and released on Wednesday, January 12th. In it, Baxter was given 20 days in which to respond and state whether or not he will attend a hearing on his license renewal at a time and place to be determined in a subsequent order. Those of you interested can read the entire K1MAN license renewal Hearing Designation Order at tinyurl.com/45vve38 (FCC)

COMMUNICATIONS POLITICS: FCC RELEASES FIRST LAB REPORT ON WIRELESS TRENDS

The Federal Communications Commission has released the first in a series of reports by the Office of Engineering & Technology Laboratory which looked at trends in cutting-edge wireless devices.

The report shows that the number of wireless transmitters authorized by the FCC in 2010 was nearly 12,000. This is an increase of almost four times the amount from a decade ago. Its also a 700% increase since 2008 in the number of devices with three or more transmitters. That's up from 7% of total devices in 2008 to more than 50% today.

The report also notes that new devices are becoming more useful and technologically advanced. It found that the number of new increasingly sophisticated devices entering the marketplace with multiple transmitters, enabling access to 4G networks, Bluetooth, Wi-Fi and other types of connections, will continue to present more options for consumers.

The complete text of the report is available at the FCC website. Its in cyberspace as a Word document at tinyurl.com/45d67p4 or directly at http://www.fcc.gov/oet/info/documents/reports/wirelessdevice s.doc (FCC)

**

RESCUE RADIO: FLORIDA COMPANY PLANS NEW NETWORK USING TV ATSC THAT INCLUDES EMERGENCY ALERTS

A new way to alert the public to emergencies while entertaining them is being introduced to the airwaves, and it uses the current digital television spectrum. Jim Davis, W2JKD, has the details.

--

Ludwig Enterprises Inc., headquartered in Pompano Beach, Florida, is building a network of affiliates for what it's calling a nationwide world radio network with emergency warning ability. The company says it has developed and patented a portable handheld radio that receives signals from the digital television ATSC format and features 50 channels of digital radio programming.

Ludwig says that its main programming will consist of 40 channels of ethnic talk radio such as Filipino, Pakistani, Hebrew, Chinese, Greek and Russian. The remaining 10 channels are English-language channels that include old-time radio shows, news, audio books, educational and religious programs and classical music. It says it is targeting U.S. multicultural, youth and over 55 markets with its content in particular.

But what sets this concept apart from others is it will also be able to provide an emergency alert system as well. According to Ludwig, its radio receives can receive local, regional and national emergency broadcast warnings. Specific national emergency and weather broadcasts can be customized to those localized areas, according to the company.

According to Ludwig Radio, its plan calls for agreements with broadcasters to lease transmit capacity. It says that with minor modifications to the existing transmitter site and no changes in FCC licensing this broadcasting network could allow the company to broadcast non-competing formats over existing broadcast spectrum.

I'm Jim Davis, W2JKD

--

More about the new receiver and the company behind it is on line at www.ludwigent.com. (RW)

**

COMMUNICATIONS POLITICS: W7EQI VOWS TO OVERTURN NET NEUTRALITY ACTION

Representative Greg Walden, W7EQI, the incoming chair of the House Communications Subcommittee, says that the FCC has overstepped its bounds in regard to Net Neutrality. His opinion came in a Tuesday, December 28th in a conference call with reporters about the FCC's 3-2 party line vote to expand and codify network neutrality guidelines.

According to news reports, Walden was joined by Energy & Commerce Committee Chair Fred Upton, Communications Subcommittee Vice Chairman Lee Terry and committee/subcommittee member Marsha Blackburn in pledging to get all the commissioners to Capitol Hill to explain the move. At the same time it was revealed that the legislators would work

to overturn the controversial FCC decision by any legislative means necessary.

Confirming Upton's promise in an interview with Multichannel News, the three legislators vowed a series of hearings on the process, the legal underpinnings and the policy, the last which they characterized as a job-killing, investment killing, congress-bypassing, regulatory overreach. They also said they would look into at least three ways to block implementation of the order, which would be legislation, defunding the FCC appropriation, or a special congressional resolution that would nullify the rules. (Published news reports)

**

NAMES IN THE NEWS: DAVID HUNT APPOINTED FCC INSPECTOR GENERAL

Some names in the news. First up is David Hunt was officially named Federal Communications Commission Inspector General on Monday, January 10th. This after holding the position on an interim basis since June of 2009.

Before entering law school, Hunt ran his own computer firm building software and hardware systems for the healthcare industry. He received a B.A. from George Washington University and a J.D. from Georgetown University.

Hunt joined the FCC in 1996 and served as Senior Attorney in the Enforcement Bureau from 1999 through 2006. Hunt then transferred to the Inspector General's office in 2006 as Assistant Inspector General for Investigations. During his tenure in that position, he received the FCC's prestigious Gold Award. (FCC)

**

NAMES IN THE NEWS: YASME FOUNDATION NAMES EXCELLENCE AWARD WINNERS

The YASME Foundation which has named seven hams from around the globe to be the recipients of its Yasme Excellence Awards. This years list of winners include Ramon Santoyo, XE1KK; Makoto Mori, JE3HHT; Bruce Horn, WA7BNM; Rick Meuthing, KN6KB; Mikael Styrefors, SM2O; Alex Shovkoplyas, VE3NEA and Pepe Ardid, EA5KB.

The Yasme Excellence Awards are presented to individuals who through their own service, creativity, effort and dedication, have made a significant contribution to Amateur Radio. Their contribution may be in recognition of technical, operating or organizational achievement.

The Yasme Excellence Award program is sponsored by the YASME Foundation of Castro Valley California. This is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DX'ing and the introduction and promotion of Amateur Radio in underdeveloped countries. (Yasme Foundation Release)

**

NAMES IN THE NEWS: N6R TO CELEBRATE FORMER PRESIDENT REAGAN'S 100th BIRTHDAY

To celebrate what would have been former President Ronald Reagan's 100th Birthday, the Ventura County Amateur Radio Society will activate Special Events Station "N6R" from Thousand Oaks, California. This, from Saturday, February 5th through Monday, February 7th.

According to Peter Heins, N6ZE, who is the clubs Public Information Officer, operation is planned continuously from 0800 through 1800 PST on Sunday, February 06, 2011 and intermittently at other times on Saturday through Monday. Operation will use CW and SSB on 80 through 10 meters for world-wide c contacts as well as FM on both simplex and repeaters for local area contacts.

Requests for schedules may be sent to n6rn6r at aol dot com. QSL with a self addressed stamped envelope to N6ZE at his Callbook or QRZ.com address. Sorry but no electronic QSL's will be accepted for this operation. More is on-line at www dot qrz dot com stroke db stroke n6r.

And for those not aware, the special N6R callsign has been used for many years in a multi-club Field Day operation from the grounds of the Ronald Reagan Presidential Library and Museum which is located in Simi Valley, California. (N6ZE)

**

THE SOCIAL SCENE: PALM SPRINGS HAMFEST JANUARY 29

Turning to the ham radio social scene. This years Palm Springs California Hamfest is slated for Saturday, January 29th. Gates open to the public at 9:30 AM and the event runs until 4:30 PM Pacific Standard Time. Admission is only $1. More information including directions to the hamfest venue is on-line at desertrats.am/pshamfest2011.html (Desert RATS Club of Palm Springs)

**

THE SOCIAL SCENE: DAYTON TOP BAND DINNER MAY 20

The 22nd annual Dayton TopBand Dinner is slated for Friday night, May 20th in conjunction with the 2011 Dayton Hamvention. The venue will be the Crowne Plaza Hotel on East 5th Street in downtown Dayton. The social hour starts at 6:15 PM with dinner served at 7:30 PM. Tickets will be available starting in February. Keep an eye on www.topbanddinner.com for the latest details. (W8UVZ, K8GG, K3LR)

EMERGING TECHNOLOGY: MISSISSIPPI JAILS TO EXPAND INMATE CELLPHONE BLOCKING

Mississippi corrections officials say a new inmate phone-block system has worked so well at the Parchman penitentiary they will expand it to other state prisons.

Corrections Commissioner Christopher Epps told The Clarion-Ledger newspaper that the use of the technology has blocked more than 600,000 unauthorized texts and cell-phone calls originating inside Parchman since August.

Last fall, the state Department of Corrections announced it had signed a contract with its telecommunications provider for a program designed to immobilize illegal cell phones used by inmates at the Parchman prison. Epps said the system stops cell transmissions in defined areas from being completed but does permit specifically authorized and 911 emergency calls.

Since 2007, officials said, more than 8,700 cell phones have been confiscated at Mississippi jails and prisons. Epps said those cell phones have been used to plan escapes or to bring contraband into the prisons. He adds that the system will be installed at Central Mississippi Correctional Facility and the South Mississippi Correctional Institution by May. (Clarion-Ledger)

**

EMERGING TECHNOLOGY: ESPN TO LAUNCH ALL 3D TV NETWORK

ESPN will launch the broadcast industry's first 3-D television network. Called ESPN 3-D, the new network will showcase a minimum of 85 live sporting events during its first year, beginning with the FIFA World Cup match on June 11th that will pit South Africa vs. Mexico. Other events to be produced in 3-D include the Summer X Games, college basketball and college football. Additional events will be announced at a later date.

Sean Bratches is ESPN's executive vice president of sales and marketing. He describes the new venture to be a meaningful step to drive adoption of 3-D television sets and at the same time afford opportunities for its affiliates to create value through new product offerings.

According to its press release, ESPN has been testing its 3-D technology for more than two years. Last fall the network produced the USC vs. Ohio State college football game in 3-D. It was shown in select theaters as well as to 6,000 fans at the Galen Center on USC's

campus. (ESPN, B&C)

**

HAM RADIO IN SPACE: TURKEY TO LAUNCH VOICE HAMSAT IN 2012

Turkey plans to send its first ham radio communications satellite into orbit in September of 2012. This according to a December 28th report published by the semi-official Anatolia news agency.

The report says that the satellite is to be called 3USAT. Also that it is being developed at the Department of Space Engineering of the Istanbul Technical University. The project will be launched by Turkey's satellite communications operator Turksat.

Alim Rustem Aslan heads up the team manufacturing the satellite. He says that it will provide wireless voice transmission over an amateur band between two groups of people at two distant locations, but he did not specify which bands or what modes the new bird will operate on. (W7HTL, Xinhua via COMTEX)

**

HAM RADIO IN SPACE: PROGRAMMER NEEDED FOR SOUTH AFRICAN CUBESAT PROJECT

The planned South African CubeSat project is in need of a volunteer with expertise in the area of programming PIC or 8051 microprocessors. According to Hannes Coetzee, ZS6BZP, this person will be a critical member of the CubeSat team and will be responsible for the development of the onboard controller software. Anyone interested in volunteering for this mission or any other aspect of the satellites development should send a resume by e-mail to saamsat at intekom dot co dot za. (SA AMSAT)

**

HAM HAPPENINGS: COMMEMORATING THE FIRST MOONBOUNCE EXPERIMENT

The Nashua Telegraph newspaper reports on the anniversary of the first Moonbounce transmissions that took place on January 10, 1946. That's when the U.S. Army Signal Corps performed an experiment dubbed Project Diana to see if a radio signals could be sent into space and then received back by on Earth bouncing them off the Moon.

The transmissions took place at Camp Evens, Wall Township New Jersey using an antenna that resembled a pair of bed springs. This experiment has been commemorated on a web page sponsored by the Ocean-Monmouth Amateur Radio Club. You can find it in cyberspace at www.omarc.org/diana1.htm. (OMARC, Southgate)

**

HAM HAPPENINGS: INTERNATIONAL MARCONI DAY DATE CHANGE FOR 2011

A date change for this years International Marconi Day. As the event would have fallen on Easter weekend the organizers have changed the date to Saturday April 30th for this year only. Look for details on International Marconi Day 2011 to be posted on-line at www.gb4imd.uk in the near future. (Southgate)

**

QSL CORNER: ARRL TO INSTITUTE NEW OUTGOING QSL SERVICE RATE STRUCTURE

Effective January 17th, a new pricing arrangement will go into effect for the ARRL Outgoing QSL Service. With the new rate structure, amateurs will no longer need to count outgoing cards and then guess as to what to pay based upon a half-pound rate. Instead a simple weighing of the cards is all that is necessary to determine what amount to send to the Bureau. This new structure also accommodates a small rate increase in response to recent postage, shipping and handling costs. More is on-line at tinyurl.com/4gprmnb (ARRL)

**

DX

In DX, SP2FUD will be on the air portable 3B8/SP2FUD from Mauritius Island between February 8th and the 17th. He will then move on and operate portable 3B9 from Rodrigues Island between February 18th through the 22nd. Activity from both places will be on the HF bands using SSB and RTTY. QSL via his home call sign.

DL9HCU is once again in the Pacific and will be active as 3D2HC from Fiji. He likes 20 meters CW so listen out for him on 14 dot 002 or 14 dot 025 MHz between 0500 to 0800 U-T-C. Also, watch oyut for him on 14.183 MHz after 05:00 UTC as he will sometimes check into the ANZA Net. QSL via DL9HCU, either direct or vuia the bureau

UT5EO will be active as 4L0A from Obcha during the CQ 160-Meter CW Contest slated for January 28th to the 30th. This, as a Single-Operator High Power entry. If you work him please QSL electronically via Logbook of the World.

SM6LRR will be active from Sri Lanka between January 22nd and February 5th as 4S7LRG. His operation will be holiday with a focus on 160, 80 and 40 meters. QSL via his home SM6LRR callsign.

Lastly, N3ME and W3UR will be active from Barbados as 8P9ME and 8P9UR, respectively, between January 26th and February 14th. Their operation will be on all HF bands using CW, SSB, PSK and RTTY. QSL via their home callsigns, direct, by the Bureau or electronically using Logbook of the World.

(Above from various DX News sources)

THAT FINAL ITEM: 10 YEAR OLD DISCOVERS SUPERNOVA

And finally this week, the story of a 10 year old Canadian girl who is being credited as the youngest person ever to discover supernova. Bill Pasternak, WA6ITF, is in the newsroom with her story:

--

Kathryn Aurora Gray, of Fredericton, New Brunswick, Canada, made her discovery this past New Year's Eve. This, after noticing what was later determined to be a magnitude 17 supernova, or exploding star.

The supernova took place in the distant galaxy known as UGC 3378 which is about 240 million light years away from Earth. The Royal Astronomical Society of Canada says that at age 10, Kathryn is definitely the youngest person ever to make such a discovery. A finding which has since been verified by amateur astronomers in Illinois and Arizona. It also has been reported to and confirmed by the International Astronomical Union.

Kathryn's father, Paul Gray, helped her make the discovery by taking the steps to rule out asteroids and checking the list of current known supernovas. Paul Gray is also an amateur astronomer. He says that his daughter expressed an interest in the field last year after learning that a 14 year-old had once discovered a supernova.

Paul Gray gave Kathryn a test run last November using some old files. When she did it on her own on New Years Eve she made her discovery after going through only the fourth of 52 images that had been e-mailed to her father by amateur astronomer Dave Lane of Stillwater Lake, Nova Scotia.

Talk about a little girl with a big future in the world of scientific and astronomy. We say congratulations.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

The last known supernova in our galaxy occurred several hundred years ago. The new one discovered by Kathryn has been named 2010LT. (Science OnLine)

GB2RS NEWS

Sunday 16th January 2011

The news headlines:

Cadets' usage of 5MHz WSPR is clarified

IARU Technical Consultant appointment

South African Radio League proposal

Non-amateur cadet stations have been getting long-distance reports of their 5MHz transmissions using the amateur Weak Signal Propagation Reporting network but problems have arisen with their unusual callsign formats. Consultation between the RSGB 5MHz working group and the cadet organisations has resolved these.

CCF, ACF, and ATC cadets are permitted to communicate with amateurs on the 5MHz channels and some have been trying the WSPR mode on the 5288.5 kHz channel. A large number of amateur stations worldwide monitor this channel and report the signals heard via the wsprnet.org website. However, the WSPR transmission format is only capable of coding regular amateur callsigns of the prefix, digit, suffix format, but the cadet callsigns are not in this form. After some initial trials by cadets it was clear that any ad-hoc modification of cadet callsigns could cause trouble.

To avoid the possibility of misleading or confusing callsigns being seen on WSPR, the RSGB 5MHz working group has suggested that the cadets modify their callsigns by transposing the digits and the letters in the cadet callsign and in some cases adding an initial letter M. This creates a dummy amateur callsign in the form M89X or M89YZ. The cadet organisations have agreed to implement this suggestion, which will make it possible to correctly identify transmissions from these cadet stations.

IARU President Tim Ellam VE6SH/G4HUA has appointed Ian Greenshields, G4FSU, as an IARU Technical Consultant, to represent IARU at various regulatory meetings such as ITU meetings and to promote IARU objectives at those meetings.

The South African Radio League is preparing documentation to gain access to additional spectrum on the 160 meter band for amateur communication in that nation. South African radio amateurs are being invited to make input by sending their views as to why it is necessary to expand the

very narrow allocation currently available. Responders are asked to include items such as propagation studies and of what benefit an expanded 160 meter allocation will be. The South African Radio League proposal will be presented at the next SARL and the Independent Communications Authority of South Africa liaison meeting, planned for February of 2011.

In just under a week an exciting nine day fund-raising event will start. SOS Radio Week was created to raise money for the Royal National Lifeboat Institution. Anyone can participate, be they clubs, individuals, adults or youths. Simply register on the event web site, download a sponsorship form and raise at least ?5. As an encouragement there are over ?700 worth of prizes from Icom, the SRC Young Persons award, a radio from Martin Lynch and four antennas from Sigma Euro-Comm to give away. There are currently 47 stations registered. In addition there is an award scheme for amateur radio operators that work registered SOS Radio Week stations during the event. The event starts at 00:00 on 22 January and concludes at 23:39 on the 30th. Further details can be found at www.sosradioweek.org.uk.

HM Queen Elizabeth II has awarded the Tristan Government Treasurer Lorraine Repetto, ZD9CO an MBE for services to the community of Tristan da Cunha in the New Year's Honours List published on 31 December 2010.

And now for the details of rallies and events for the coming week

Dover Radio Rally will be held today, 16 January, at Whitfield Village Hall, Dover CT16 3LY, which is on the A2 just outside of Dover. The event was revived last year and was such a success that extra space has been arranged for the rally this year. The focus will be on radio related items, rather than other electronic bits and bobs. The website www.doverradiorally.com has all the usual information.

The Red Rose Winter Rally will be held at the George H Carnall Leisure Centre, Kingsway Park,

M41 7FJ today, 16 January. There is free car parking and doors open at 11am. There will be trade stands, a Bring and Buy as well as an RSGB bookstall. Details from Steve on 07502 295 141.

Advance notice now for the next rally, due to take place on 30 January. The Horncastle Winter Rally will be held in the Horncastle Youth Centre, Lincolnshire LN9 6DZ. Doors open at 10.30am and admission will be ?1.50. Details from Tony, G3ZPU on 01507 527835, or email G3ZPU@yahoo.co.uk.

Now for the news of special events

The Porthmadog and District Amateur Radio Society is supporting SOS Radio Week again this year. The club will be operating on 22 and 23 January from 10am to 6pm both days from Criccieth life boat station. And on 29 and 30 January from 10am to 6pm the club will be operating from the Porthmadog Yacht club The society will be using the callsign GB0PLB. All visitors will be welcome to come along and join in or support.

Crewe Heritage Centre Amateur Radio Club will also be taking part in the SOS Radio week, using GB4CHC on Sunday 23, Saturday 29 and Sunday 30 January. The Club will have two HF stations, one on SSB and one on digimodes. They are being sponsored per country contacted and money raised will go to the RNLI.

And now the HF DX news compiled from 425 DX News and other sources

Diego, LU8DIP will be on various South Shetland Islands from now to about middle of March as LU8DIP/Z and LU1ZS on Base Teniente Camara Half Moon Island. QSL via LU4DXU.

Alan, VK3XPD, Kevin, VK4UH and Mike, VK3KH are active from Norfolk Island, which is IOTA reference OC-005, as VK9NA until 20 January. QSL via VK3KH either direct of via the bureau.

Now the contest news

The UHF UK Activity Contest takes place on 18 January from 2000 to 2230UTC. Using all modes on the 1.3 and 2.3GHz bands, the exchange is signal report, serial number and locator. Please note that there are rule changes to the UKACs this year, including new entry categories for 10 watt stations, and active users of the DX cluster and chat channels such as ON4KST. There is also a change to the locator squares multiplier rule. To ensure you enter the right category and avoid claiming the wrong score, please check the full rules on the Contest Committee website at www.rsgbcc.org/vhf before the start.

The data leg of the 80m Club Championships takes place on 20 January from 2000 to 2130UTC. The exchange is signal report and serial number. Remember the maximum power allowed in Club Champs is 100 watts, but for Foundation licensees and those who enjoy low power operation there's also a 10 watt category.

The BARTG RTTY Sprint Contest takes place on 22 and 23 January from 1200 to 1200UTC on all bands from 3.5 to 28MHz. Single band entries are not allowed in this event and BARTG have an interesting rule whereby any single operator station that has been placed in the Top 10 in any BARTG contest in the past three years must enter the `expert' category. The contest exchange for this event is serial number only.

Now the solar report and forecast compiled by Martin Harrison, G3USF.

Solar activity has remained low to very low, with just two small C-class flares reported on the 3rd and 4th. They had little or no impact on propagation. The solar flux recovered from the low levels of the Christmas period, reaching 92 on the 3rd before falling back to average 87 over the week ending January 9th. The 90-day average, which is the best pointer to underlying trends, gained one point to 84. This time last year it was 75. The X-ray flux averaged A8.0. For most of the time geomagnetic activity remained at the low levels of recent weeks, but a brief magnetic disturbance on the 7th reached minor storm level, depressing MUFs at HF and bringing radio aurora in the early hours of the 7th, when most European operators were probably asleep. Solar wind

speeds increased from 285klm/sec on the 3rd to 690km/sec on the 9th, when Earth was within a recurring high-speed coronal stream. Particle densities briefly reached 70 per cubic centimetre but were otherwise in single figures, while the interplanetary magnetic field varied between plus14 and minus 16 nanoTeslas around the same time. It, too, showed only minor variation during the quieter periods. Overall, the HF bands were generally in good shape, with MUFs at times reaching 28MHz, which was open on several days. 160 and 80 metres provided good openings to North America during the breakfast period, while the West Coast was workable on 7MHz by the long path around 1600UTC.

Now the forecast. Solar activity is likely to remain low or very low during the coming week, with only occasional C-class flares. The solar flux looks likely to be in the mid-to-high 80s and geomagnetic activity is expected to remain low. In short, though the Sun can always spring a surprise, conditions during the coming week will probably show little change. The low bands will still be close to their seasonal best, while MUFs at equal latitudes will reach around 25MHz in the south and 22MHz in the north. Darkness hour lows will be around 8MHz. Paths to the Middle East will have a maximum usable frequency in the region of 25MHz. The optimum working frequency at which there should be a 90 per cent chance of a contact, will be about 21MHz. The path should be workable between around 0800 to 1600UTC with 1000 to 1400 the optimum times.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 17 January Gloucester Amateur Radio & Electronics Society is operating on VHF. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 17 January South Birmingham Radio Society is holding a committee meeting and putting the shack on the air. Contact Don, on 0121 458 1603.

On Tuesday 18 January Derby & District Amateur Radio Society is having a video show. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 18 January Loughborough & District Amateur Radio Club is having a video evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 19 January Hinckley Amateur Radio Society is looking at digital control of the FT-847. Details from John, M0JAV, on 07836 731544.

On Wednesday 19 January Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 19 January Midland Amateur Radio Society is having an open meeting, putting the shack on the air and running training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 19 January Telford & District Amateur Radio Society is planning portable events. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 20 January Cheltenham Amateur Radio Association is having a video evening. Contact Derek Thom, G3NKS, on 01242 241099.

On Thursday 20 January South Birmingham Radio Society is holding training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 21 January Bromsgrove & District Amateur Radio Club is having a committee meeting. Contact Chris, M0BQE on 01905 776 869.

On Friday 21 January Coventry Amateur Radio Society is having a video evening. Contact John, G8SEQ, on 07958 777363.

On Friday 21 January Melton Mowbray Amateur Radio Society is having a talk on Worked all Britain by Dave Brooks G4IAR. For more information contact Geoff, G3STG, on 01664 480 733.

On Friday 21 January Nunsfield House Amateur Radio Group is having a junk sale. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 21 January South Birmingham Radio Society Friday is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 22 January Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

Scarborough Amateur Radio Society is changing its venue for January, February and March. The club will meet in the Festival Suites as the main Pavilion is closed until April.

On Monday 17 January Angel of the North Amateur Radio Club is having a talk on operating procedure and best practice by Nancy Bone. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 17 January Bolton Wireless Club is having its New Year get together at the Watergate Toll Toby Carvery, Over Hulton. For details, send an email to boltonwireless@gmail.com.

On Monday 17 January Scarborough Amateur Radio Society is having a talk on sunspots and HF propagation by Mario Brashill, G2DPA. Details from

Jerry Scarr, G6LBL, on 01751 476601.

On Monday 17 January Sheffield Amateur Radio Club is running a mini flea market followed by an open forum. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 17 January Thornton Cleveleys Amateur Radio Society is having a talk on heath & safety by John, G8RDP. Contact Colin Hirst, G0EPY, by e-mail to colmay@sky.com.

On Monday 17 January Workington and District Radio and IT Group is having a talk on baluns, traps and dipoles by Jim, G3ZPD. For more information get in touch with Barry Easdon, G0RZI, on 01946 812092.

On Tuesday 18 January Chester & District Amateur Radio Society is having a bring and tell at Burley Hall. Details from Barbara Green on 07957 870770.

On Tuesday 18 January Halifax & District Amateur Radio Society is having a presentation by Richard, M0RBG on the RSGB 80m Club Contest and computer logging. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 19 January Hornsea Amateur Radio Club is having a talk by G3TLI. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 19 January Maltby & District Amateur Radio Society is holding a computer clinic. Contact Keith, G1PQW, on 07701 156 678.

On Thursday 20 January Ripon & District Amateur Radio Society is having a night on the air. Contact Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 20 January South Manchester Radio and Computer Club is revisiting antenna analysers with Dave, G4UGM. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 20 January Wakefield & District Radio Society is holding a committee meeting and is on the air. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 21 January East Cleveland Amateur Radio Club is having a bring in something interesting evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 22 January Wakefield & District Radio Society commences its Intermediate course at 1.30 pm. The cost will be ?75 per candidate, which includes the course itself, a course manual, the exam fee, refreshments and temporary membership of the Society for the duration of the course. Candidates will also be required to pay for any construction materials they use for the course project and for a basic tool kit. The Society's excellent shack and antenna facilities will be available during the course for those that wish to use them. More details are on the web at www.wdrs.org.uk or contact the Chairman, Ken Quinn, 2E0SSQ on 07900 563 117.

NEWS FOR NORTHERN IRELAND

All RSGB affiliated clubs in Northern Ireland are reminded that the closing dates for entries for the Regional section of RSGB's Club of the Year award is 25 January 2011. Further details from Peter, mi5jyk, by email to mi5jyk@rsgb.org.uk.

NEWS FOR SCOTLAND

On Tuesday 18 January Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, on 07740 946192.

On Wednesday 19 January Glenrothes & District Radio Club is holding an EGM. Details from Dave Francis, on 01383 823878.

On Wednesday 19 January West of Scotland Amateur Radio Society is working on construction projects & licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 20 January Aberdeen Amateur Radio Society is holding its AGM. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 21 January West of Scotland Amateur Radio Society is having presentations, guest speakers, a quiz and a raffle. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

Advance notice now that the Hastings Electronics & Radio Club has been obliged to cancel its repeater group auction planned for 29 January due to a lack of items for sale. Donations to Hastings Repeater Group are still urgently required to keep GB3ES and GB3HE on the air this year. For more information contact Gordon on 01424 431909.

On Monday 17 January Basingstoke Amateur Radio Club is holding a junk sale. Details from Clive, G4ODM, on 01256 326050.

On Monday 17 January Burnham Beeches Radio Club continues the talk on propagation by Dave, G8XCK. Contact Dave, G4XDU, on 01628 625 720.

On Tuesday 18 January Andover Radio Amateurs Club is having a club night and holding a committee meeting. Details from Martin, M0MWS, on 07776 181646.

On Tuesday 18 January Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 18 January Bromley & District Amateur Radio Society is holding its AGM. Details from Andy, G4WGZ, on 01689 878089.

On Tuesday 18 January Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 19 January Havering & District Amateur Radio Club is having an informal evening. Contact John, M0UKD, on 07817 365354., john@m0ukd.com

On Wednesday 19 January Worthing & District Amateur Radio Club is having a DVD evening. Contact Phil, G4UDU, on 01903 816684.

On Thursday 20 January Cray Valley Radio Society Club is having an activity planning meeting. Details from Bob, M0MCV, on 020 8265 7735 after 8pm.

On Thursday 20 January Horsham Amateur Radio Club is having a social evening. Details are on the web at www.harc.org.uk.

On Thursday 20 January Shefford & District Amateur Radio Society is having a rig checkout and taking part in the Data Mode Contest. Details from David, G8UOD, on 01234 742 757.

On Thursday 20 January Sutton & Cheam Radio Society is having the story of GB3VHF by Chris Whitmarsh, G0FDZ. More information from John, G0BWV, on 020 8644 9945.

On Friday 21 January Cambridge & District Amateur Radio Club is looking at Morse for all abilities. More information from Ron Huntsman on 012233 501712.

On Friday 21 January Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239371.

On Friday 21 January Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 22 January Harwell Amateur Radio Society is holding its annual dinner. Contact Malcolm, G8NRP, on 01235 524844.

On Sunday 23 January Hastings Electronics and Radio Club is holding its annual luncheon at the Kings Arms, Ninfield, from noon. Contact Ron, G4VBK, on 01424 428428.

On Sunday 23 January Loughton & Epping Forest Amateur Radio Society is having its New Years' lunch at the Metropolitan Police Sports Club, Chigwell. Contact Marc Litchman, G0TOC, on 020 8502 1645.

NEWS FOR THE SOUTH WEST

On Monday 17 January Appledore & District Amateur Radio Club is having a natter night with QSL Cards. Contact Brian Jewell, M0BRB, on 01237 473251 for more information.

On Tuesday 18 January Blackmoor Vale Amateur Radio Society is having an HF evening in the club shack. Contact Tony, G0GFL, on 01258 860741.

On Tuesday 18 January West Devon Radio Club is having a bring and buy sale. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 19 January Taunton & District Amateur Radio Club is holding its Christmas and New Year dinner. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 19 January Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417048.

On Wednesday 19 January Trowbridge & District Amateur Radio Club is holding its AGM. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 20 January Newquay & District Amateur Radio Society is having a beginner's guide to local ATV by Keith Holland, G3MCD. Contact Joe Bell, M6JOE, on 01726 891557.

On Thursday 20 January South Bristol Amateur Radio Club is having a training session on shack equipment. Contact Len, G4RZY, on 01275 834 282.

On Thursday 20 January Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750.

On Thursday 20 January Yeovil Amateur Radio Club is having a talk on the RA17 by G7LNJ. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 21 January Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

Rhondda Amateur Radio Society is due to begin new Foundation and Intermediate courses soon. Could those interested come along to the club on Tuesday evenings from 7pm. The club meets at St Barnabus Church Hall, Penygraig, Rhondda. Contact John Howells on 01443 432542.

WIANEWS FOR WEEK COMMENCING JAN 16 2011.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING JANUARY 16 2011.

Intro - Graham Kemp WIA News studios Brisbane

Thanks Graham, well under the circumstances it's probably the very least that we can do to help by taking a bit of the load off your

studios. And I must say it's great to hear of the level cooperation that exists between the news networks and various stations with

studio facilities and such as yours making facilities available to others to help get the news out.

Well it has been one horrendous week for many folk in VK4. Giving some thought to what to include in this broadcast, it seemed

appropriate to perhaps contact a few amateurs in or near the affected areas to get a few reports first hand. The devestation of the

floods has been simply enormous and a massive cleanup effort is now underway.

I'd like to introduce Graham Martin VK4RD, Graham comes from BILOELA in central Queensland(questions to Graham)

Good morning Graham ..
Now Graham how have you been effected by the floods ?
And what damage have seen as you have been driving around ?
And the flood waters are they now subsiding ?
So has that road become inaccessible?
That's pretty significant, well thanks Graham for your quick report from Biloela

Now Gavin Reibelt VK4ZZ has been taking some time out to tour around Australia but things have kind of ground to a halt for a bit, (questions to Gavin)
Good morning Gavin-
Gavin now we understand you are currently mobile or rather mobile stationary, what part of VK4 do you come from and where are you now
?
Well thanks for that quick overview regarding the bottom bit of VK4, and I hope things improve for you as well take care Gavin..

Now moving up north of Brisbane I caught up with Gordon Taylor VK4VP..(questions to Gordon)

Good morning Gordan ..How are you ?
Gordon what part of VK4 are you from ?
And how have the floods affected your area ?
That's pretty fortunate, has there been any call to help with communications during the last week ?
Well that's pretty understandable, well thanks Gordon for your quick report from the Sunshine Coast.

And going even further north I caught up with Jack Chomley VK4JRC(questions to Jack)
Good morning Jack
How are you fairing ?
Now what part of VK4 are you from Jack ?
And how have the floods affected you ?
And how are the food supplies holding up ?
And the devastation because of the floods in your area ?
And personally have you experienced any damage ?
And amateur radio has that played a part for you over the last week or two ?
If you could pass on regards to your club members and those in your community from the Wireless institute of Australia that would be

appreciated and thanks Jack for chatting with me..
And yes .. it has been pretty wet down here in VK3 as well but not quite as severe as VK4

Now we move back down south to Brisbane where I have Peter Schrader VK4EA on the line ..(questions to Jack)
Good morning Peter..
And your home QTH Peter ?
And I hear you have been assisting with the flood relief ?
So are you at the relief centre at the moment ?
Can you describe for our listeners the flood damage in the area ?
That's great amateur radio operators using their experience and skills to help man the radio network, I guess that would be not only

VHF /UHF but possibly HF as well ?
Well that's great and good to hear that our new band works well, well thanks Peter for

catching up with us on WIA National news.

Thanks again guys for taking my calls to you and giving us some first hand accounts of what is one of Australia's worst natural
disasters.

It really is quite hard to know what to say or how to respond at a time like this, we are joined by our WIA president Michael Owen-.

This is Michael Owen VK3KI

On this day I have a simple message.

All of us in Australia have been aware of the unfolding tragedy of the floods in Queensland, and for me that awareness has been very

personal, particularly for all those people in Rockhampton, as well as Ipswich.

For myself, for the WIA, for the national news service and all amateurs please know that our thoughts are with you at this time.

HAMS ACROSS AUSTRALIA.

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news

The first ARNSW - T & T event for the year will be on Sunday the 30th of January at the VK2WI site.

Some of the major items available for sale can be viewed on the ARNSW web site.

You might like to note the other T & T dates for the remainder of the year.

March 27; May 29; July 31; September 25; November 27.

(Tim VK2ZTM)

The next meeting of the Radio Homebrew and Experimenters Group will be after the Trash and Treasure at Dural on Sunday 30 of January.

The presentation will be about designing and building HF Transmitters and Receivers.

A number of members of the homebrew group will present aspects of building HF equipment and ideas will be canvassed for a group project.

As usual, the meeting will start with the usual show and tell segment where members of the group or even just visitors can get up show others what they have been doing.

So for those interested in building their own equipment, experimenting with radios or just looking for a new aspect of amateur radio, get along to Dural on Sunday the 30th.

The homebrew group also looks forward to seeing you at the Central Coast Field Day in Wyong in February.

(Peter VK2EMU Coordinator ARNSW Radio Homebrew and Experimenters Group).

Jan 16 vk3 Western & Northern Suburbs Amateur Radio Club Family Day
Bundoora Park on now!
www.wansarc.org.au/downloads/FILES/Family%20Day%202011.pdf

The countdown continues to the Centre Victoria RadioFest with its family friendly and interesting program.

The commercial traders have loads of stock to sell at competitive prices, all in the dedicated Traders Hall.

There will be plenty on offer too at the second-hand market tables and car-boot space alley.

What sets this event apart from others is that it includes a mini-lecture program and activities.

The organisers thank the guest presenters:

Jack Bramham VK3WWW talking on the IARU Region 3 Regional Foxhunting Championships coming to Victoria.

A leading exponent on optical light beam communications Rex Moncur VK7MO who will illuminate that interesting subject.

And the DX0DX DXpedition team on their return from The Spratlys, won't they have a story or two tell!

Put it in your diary now. The Centre Victoria RadioFest at the Kyneton Racecourse on Sunday the 13th of February.

I'm Bruce Lees and you're listening to VK1WIA.

EMDRC White Elephant Sale..date finalised.

The EMDRC's annual White Elephant Sale will be held at the usual venue, the Great Ryrie Primary School, Heathmont, on Sunday, March 13th, 2011.

Don't forget to slot that date into your 2011 Events Calendar.
More details are up on the EMDRC WebSite.

Go to: www.emdrc.com.au

Click on "Calendar" and then select March.

March 13th has a link entitled: "Details - WES 2011" which has the contact information.

TARC to do Australia Day

Get out your corked hats and throwing thongs - TARC will be out in the field for Australia Day (provided the venue does not get too aquatic) at the famous Loam Island ARDF Grounds and Shelter from 11-30am Wednesday January 26th.

BYO everything and engage in aussie fun and mirth - and even do some radio things too!

Bring the family, bring the lagerphone, bring the esky but don't bring the mozzies !

VK7

There is a Foundation Training day that will be held on Saturday January 22 for at least six aspiring Foundation Licence holders in Tassie.

If you are interested in attending then please register your interest with Reg VK7KK on 0417 391 607, or email on assessor@reast.asn.au.

(Reg VK7KK, REAST Education Officer and Assessor)

Amateur Radio - The first technology-based social network

The WIA is pleased to announce details for the 2011 WIA National Field Day with this years event to be held on Sunday the 17th of
April 2011

Feedback received from many operators participating in the 2010 event requested a change away from the October date. The WIA being

mindful of selecting a date that did not clash with other major VK related contests and activities, considered several ideas put

forward with the suggestion to have the event close to IARU World Amateur Radio Day, April 18th, seeming to provide a news worthy

story. The IARU have announced the theme for the 2011 World Amateur Radio Day to be "Amateur Radio: The first technology-based social
network"

Therefore aligning with the IARU celebration, the WIA has also adopted "Amateur Radio: The first technology-based social network" as

the theme for the 2011 WIA national Field Day.

Rules and guidelines will be announced in early 2011. Clubs are encouraged to highlight the 17th of April on their calendars and to

start considering eye-catching locations during the seasonal holiday period.

Remember this event is a Public Relations activity aimed at maximising public exposure for the hobby of Amateur Radio and for your
club.

New WIA Membership Brochure

Did you know the WIA has a new membership brochure?

Produced for the WIA by Roger Harrison VK2ZRH and Robert Broomhead VK3DN with Illustrations by Ivan Smith, the new DL size brochure

carefully sets out the many valuable benefits of WIA membership in an easy to read, easy to understand format. The brochure is

intended for those who are yet to become a WIA member, or members who are considering renewal. The full colour brochure with it's eye

catching cover is ideal for display and distribution at hamfests, field days etc. Easily obtainable clear plastic DL brochure stands

are perfect for displaying the new membership brochure, whilst it's small size format makes it ideal for keeping a copy in the car

glovebox or door pocket along side the Calling CQ brochure.

Copies of the brochure can be easily obtained from the WIA National office, simply send an email to nationaloffice@wia.org.au

Support the organisation supporting your hobby - Encourage someone new to join the WIA today !

WIA Emergency Comms Training - Registrations Filling Quickly

Registrations are filling quickly for the first WIA Emergency Communications Operators courses. With over 20 registrations received

to date since the announcement of the course just over a week ago, this is a reminder that limited places are available at each

course. The courses are being organised and delivered by the WIA's Registered Training Organisation Trainsafe Australia, with each

training program will be held over four days.

Africa - 7 Contacts.

On VHF/UHF you need 20 VK7 stations with at least one contact made in each of the Southern, Northern and North Western regions. Repeaters may be utilised.

On IRLP - contact with 30 VK7 stations.

http://reast.asn.au/awards.php#devil

2010 DX Sound Bites

Tom, K8CX, has done it again. He has provided DXers with 131 memorable DX sound clips from 2010.

Visit Tom's famous "Ham Gallery" Web at: http://hamgallery.com/dx2010

While there also check out some of his other features on his Web page, such as: 13 years of "Rare DX Sound Clips" of the past as well as some clips from the 1960's and 1970's, QSL Card Museum, Dayton Photo Galleries and Tribute to Silent Key Ham Operators.

Tom states, "If anyone has any old HF recordings, I would be interested in hearing from them."

EI8CC, the former Honorary Secretary of the Irish Radio Transmitting Society and new Irish ambassador to Lesotho will soon be on the air from that nation on CW and SSB as 7P8CC.
The final items of his station have been shipped so expect to hear him on the air from Lesotho in the not to distant future.

ZS6TQ is now active as 9Q0HQ/6 from the Republic of the Congo.
His operation is primerally on weekends and during the week after 1800 UTC.
Listen out for him on 40 through 6 meters using CW, SSB and PSK31.
QSL via K3IRV.

DC9TH is now on the air as 8Q7TH from Baa Atoll in the Maldives.
He's reporetedly been heard on 20 meter SSB.
If you work him, please QSL to his home callsign.

VO1AU will be active stroke 9M6 from, East Malaysia between March 2nd and the
15th. His operation will include the Commonwealth and ARRL DX SSB Contests.
QSL via VO1MX.

ENGLAND, G.

Special event station GB 65 ISWL is active throughout 2011 in celebration of
65 years of service to both licensed amateurs and short wave listeners.
The station will be active from various locations.
QSL GB 65 ISWL via G6XOU.

The excitement of rare DX appearing on the band often creates confusion and
on six metres early January was no exception.

VK0KEV on Macquarie Island and H40FN in the Temotu Islands both appeared on
the same frequency, at the same time and as you would expect utter bedlam
broke out with the end result very few worked either of them.

However, through the reigning chaos Norm VK7AC in Launceston did manage to
work VK0KEV plus one or two VK5's before the signal faded away.

No one secured a contact at all with H40FN who was buried under the confusion.

(sourced to vk2wi news)

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

ANALOGUE MULTIMETERS
There are probably many owners of good quality analogue mul-timeters of
30,000Ω/V sensitivity or similar. Bob, vk3bwz says many of these multimeters
require a 15V battery for the high ohms range.

Unfortunately the small 15V battery is no longer available.

Physicaly, they look like a short AAA battery. However, a 12V battery
(energizer A23) is similar in diameter and with two hearing aid type batteries
(1.4V) sticky taped to the end of the A23 battery in series gives 15V and
better yet fits perfectly into the battery com-partment of a "TMK" multimeter.

WW SPECIAL INTEREST GROUP --- NAVAL

Australian Naval Amateur Radio Society -

John Garvey VK5OJ was/is President of the now defunct Society known as the ANARS (Australian Naval Amateur Radio Society).

In a recent posting he said " How sad it has been to see the demise of the A.N.A.R.S. Perhaps one day it will rise again in a better shape with more enthusiasm for the hobby, many will keep the friendship as I do"

Long time enthusiast and the guy who kept us informed here on the WIA news and in QNEWS over the years is Kevin VK2CE who said " It is very sad indeed to see the society cross the bar. I always believed it had the potential to become quite a significant group in the ham radio world but unfortunately this was not to be.

Two names come to mind when one thinks of significant contributions to the Society over the years, Tony Musson vk2cam, and Craig Carlisle, vk4cwc. These two ran the nets right up until recent times. They were there virtually every day with very little time off for other commitments. Others also contributed in their own way and it all helped to keep the group going for 17 years".

Please think of the environment before printing this email

==========
WIANews - we've reported...YOU decide.

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

44. SARL NEWS - SUNDAY 16 JANUARY 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-01-15 20:00:18 UTC
From: website@sarl.org.za
Message-ID: <20110115200005.94AF133C35@panix2.panix.com>
Source record: 5084
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 16 JANUARY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

SARL MEMBERSHIP TOUCHES 1500

NOMINATIONS FOR SARL COUNCIL

IS YOUR CLUB CALLSIGN STILL VALID?

SARL NATIONAL CONVENTION ON VAAL

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SARL MEMBERSHIP TOUCHES 1 500

The SARL membership this week stood at 1 492, touching the 1 500 mark. If you have not yet joined, we invite you to take up the six-month R200 membership offer. Get the details on www.sarl.org.za or call Mariska at 011 675 2393. Just think of the additional benefits members enjoy, like a discount on courses. For example, SARL members pay only R350 for the PIC Programming course instead of the R500 paid by non members. Another two exciting courses are coming, namely Programming in Windows and Advanced Home Construction.

NOMINATIONS FOR SARL COUNCIL

Members are reminded that the closing date for nominations to the SARL Council and motions for the AGM is drawing close. The final date for acceptance of nominations and motions is 31 January 2011. Get the details on the home page of the members only section at www.sarl.org,za. Select 'Members Only' at the top right-hand of the home page and enter your PIN.

SARL NATIONAL CONVENTION ON VAAL

The Sasolburg and Vaal Triangle Radio Clubs present: The SARL National Convention 2011. This year it takes place on 15 and 16 April. Come and enjoy the beauty of the Vaal. There is an exciting line-up, starting on the Friday evening with a wonderful Vaal River cruise down Millionaires' Bend. Enjoy a fantastic dinner and the company of good radio friends until late that evening!

On Saturday morning the SARL AGM takes place at the Vaal University of Technology. A huge flea market will be held for radio enthusiasts, while a nature drive at Emerald Casino Resort will keep non-amateur partners suitably entertained. The two clubs are aiming to make the Convention the biggest get-together of radio amateurs in years. Saturday afternoon has been earmarked for a visit to the Bloemendal medium wave radio broadcast station near Meyerton. Come and experience what a 500 kW RF transmitter is capable of doing, and see how the systems for such a shortwave broadcast station operate and service the world from South Africa.

The Convention's highlight is on the Saturday evening at the Riviera Hotel. This year, the SARL Gala evening is going to be a formal black tie affair. Our guest speaker is Prof. Alwyn Louw from VUT, a fantastic speaker! Gerald Klatzko, ZS6BTD, will be giving a riveting presentation on his satellite contact experiences. The annual prizegiving will be hosted by Tjerk Lammers, ZS6P. Thereafter the Broken Stream band fires up the dance music and the party begins.

Registration for the Boat cruise and the Gala evening is essential as there are limited seats available. Bookings should be done through the club secretary of ZS4SRK by visiting www.qsl.net/zs4srk to complete the forms.

IS YOUR CLUB CALLSIGN STILL VALID?

Clubs are reminded to check if the licence fee for their club callsign has been paid. Although the licence is registered in the Club's name, one of the club members is the sponsor and is responsible for the callsign and its use. Remember to inform ICASA in writing after your club committee elections who the new responsible person is and the address where the account must be sent to. Send the information by email to dkuhrau@icasa.org.za.

BOOK NOW FOR PIC IN GAUTENG

Booking for the PIC course to be held at the National Amateur Radio Centre on 29 January is now open. Do not miss the last opportunity to attend this popular course in Gauteng. The course is filling up fast! Get details on www.sarl.org.za and select RTA.

FREE RADIO AMATEUR COURSE IN PRETORIA

The Pretoria Amateur Radio Club (PARC) is presenting a free course to all persons interested in becoming radio amateurs. The course is three

months, and lectures will be at the University of Pretoria. Tuition and study material are free of charge.

The course starts on Thursday 20 January at 19:30 at the University. The lecture room is situated on the south-eastern corner of the campus, corner University Rd and Lynnwood Rd. Use the entrance in University Rd and follow the route markers from there. It is not necessary to register before starting the course.

Amateur radio is a fascinating hobby. Radio amateurs make radio contacts all over the world and also provide radio communication services to the civil authorities during emergencies.

The aspiring radio amateur writes an elementary exam on radio theory and regulations (purpose of this course) and receives a call sign and a licence to go on the air. Licences are issued only to persons that have passed the exam and are at least twelve years of age.

More information on amateur radio is available at the website of the SA Radio League, www.sarl.org.za, or on the website of the Pretoria Amateur Radio Club, www.parc.org.za. You can also call Fritz Sutherland, 012 811 3875 or 083 304 0028 or Pierre Holzhausen, 082 575 5799 or 012 655 0726.

AMATEUR RADIO TODAY TO FEATURE A WEEKLY TECHNOBYTE

Amateur Radio TODAY, the programme replacing Amateur Radio Mirror International, will feature TechnoBYTE, a weekly technology cameo written and presented by John Willescroft, ZS6EF. Today John discusses the PL259 connector. The audio file will also be available for downloading on Sunday evening and may be rebroadcast on local nets with acknowledgement to SARL Amateur Radio TODAY.

US CONGRESS TO CONSIDER AMATEUR RADIO BILL

The Amateur Radio Emergency Communications Enhancement Act, which ceased at the end of the 111th Congress, has been reintroduced in the 112th Congress as HR 81. The sponsor is Representative Sheila Jackson Lee. The new bill - which was introduced on January 5 - has been referred to the House Committee on Energy and Commerce. "We are hopeful that this early start will lead to success in the new Congress," commented ARRL Chief Executive Officer David Sumner, K1ZZ.

The bill is supported by the ARRL. The Secretary of Homeland Security will study the uses and capabilities of amateur radio communications in emergencies and disaster relief. Impediments to amateur radio communications, such as the effects of private land use regulations on residential antenna installations, will also be addressed.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. The face of the sun is nearly spotless as Sunspot 1140 has rotated onto the western limb and Sunspot 1146 is struggling to remain

visible. The effective sunspot number is expected to be less than 20 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be fair towards Europa on 15 m, later to be followed by fair 20 m openings. Early evening 15 m contacts with the USA are possible. Contacts with Australia are possible on 20 m at sunrise and during the afternoons. 15 and especially 20 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 20 and 30-m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

20 January 2011 - Closing date for submission for application for the May 2011 RAE bursaries; visit www.amateurradio.org.za for application forms. 20 January - Closing date for submission of proposals and synopses of papers for 2011 SA AMSAT Space Symposium to saamsat@intekom.co.za. 20 January - Free amateur radio course at University of Pretoria. 21/23 January - PEARS VHF/UHF contest. 30 January 2011 - Closing date for phase 1 of the construction competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio TODAY every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Hester van der Walt.

Thank you for listening, 73.

/EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 16th January 2011

IRTS AGM Annual Dinner and Rally 2011

A reminder that the IRTS AGM weekend, including Annual Dinner and Rally will be held this year on Saturday March 26th and Sunday March 27th. The event will be hosted by the Limerick Radio Club. The venue is the Radisson Blu Hotel, Ennis Road, Limerick. For more information contact, Ger McNamara EI4GXB on 087 2532512 or ei4gxb/ at /gmail/ dot/ com.

IRTS Committee Meeting

The next IRTS committee meeting will be held on February 5th in Portlaoise. All affiliated clubs representatives are encouraged to attend.

ECHO IRELAND

The deadline for submitting articles, advertising, etc, to Echo Ireland is February 5th 2011. Everyone is encouraged to submit articles to this journal for consideration for publication.

Engineers Week

This year Engineers Week, organised by Engineers Ireland, runs from 14 - 20 February. Once again the Society plans to participate in centres through the country. Currently under consideration are Athlone, Cork, Cavan, Dundalk., Mayo and Limerick. If you would like to participate please contact S&#65533;amus ei8bp / at / eircom /dot/net.

Your Club Listing on IRTS Website

Club Secretaries S&#65533;amus EI8BP as Web Editor is preparing to update the Clubs page on the Website. Some of this information is somewhat outdated. Please have a look at your club's entry on the IRTS Website and contact S&#65533;amus by Email at ei8bp / at / eircom / dot / net with any changes. The Website information is an important point of contact for prospective club members and an opportunity to promote your club.

Counties Contest

A reminder that your log for the EI/GI Counties Contest needs to be sent to the contestmanager / at/ irts/ dot/ ie. All logs to be received by deadline February 2nd 2011. Your co-operation is much appreciated.

Cork Social Evening

Radio enthusiasts and their partners will meet at the Vienna Woods Hotel, Glanmire, Cork for dinner and a social evening on Saturday February 5th. A comprehensive menu is available to suit all tastes.

Everybody is invited and it would be nice to meet some of the newer amateurs on the night.

Tickets are available from Dave Moore EI4BZ priced at 30.00 and you can contact him on 087-6290574 or by email at ei4bz /at / eircom / dot / net. Previous events have been very successful and have been enjoyed by large attendances.

Region 4 Theory Classes

Following on from the successful classes last year, plans are being put in place for Radio Theory classes in Limerick.

Classes will also include lots of practical sessions and will be based on the revised syllabus as detailed on the IRTS website.

Classes will commence in February depending on numbers and those interested in attending should contact Ger McNamara EI4GXB on 087 2532512 or ei4gxb / at /gmail / dot /com.

Theory Classes at DAR

Dundalk Amateur Radio Society, EI7DAR, will commence amateur radio theory classes Thursday February 3rd 2011. Classes will be held at the club premises 'Larkin House', 113, Castletown Road, Dundalk.

This is an excellent opportunity for anyone interested in obtaining their amateur radio Licence in an adult learning relaxed environment.

For further information and details please contact ei4dib / at /ei7dar/ dot/ com or by text only to 086 4066660. Everyone welcome.

Mt. Leinster EI7MLR Voice Repeater

The EI7MLR voice repeater on Mt. Leinster which operates on 430.950 MHz plus 7.6MHz shift is back up and running. It was off air for the past month for essential repairs. Reports to: repeaters/ at / searg / dot / com.

International Marconi Day 2011

The 2011 International Marconi Day will be held on April 30th. The North Cork Radio Group are pleased to announce that they will be active from the Marconi Signal Station at Mizen head where Marconi sent many of his first test transmissions to America. Further details will be posted nearer the event, however, please pencil the day free if you'd like to attend or work the station.

DX News

The Spratly Island expedition unfortunately ran into some local difficulties and has had to be postponed. The team which had assembled in the Philippines will now try to re-schedule the DX0DX trip later this year.

Zanzibar Island can be heard until 24th January as Sam F6AML operates again as 5H1Z. He is QRV all bands 10-80m CW and SSB. The IOTA reference is AF-032 and QSLs go via the home call.

The husband and wife team of Josep EA3BT and Nuria EA3WL will activate the Island of Mauritius signing 3B8/EA3BT and 3B8/EA3WL from 23rd to 29th January. QSLs for both calls go via EA3BT.

Those looking for a contact with Barbados will have the opportunity of working the editor of 'The Daily DX' Bernie W3UR and/or his father Tony N3ME when they air the calls 8P9UR and 8P9ME respectively from 26th January till 14th February.

The 7th Asian Winter Games take place in Kazakhstan this year with the starting date 30th January. To celebrate the event at least 8 special event stations will be active during the games. Look out for the special prefix UP2011.

For those who still need Curacao look for PJ2/OE3JAG who will be operating mainly CW between 30th January and 11th February 2011. Curacao is one of the four new DXCC entities that count from 10th October 2010.

Lough Erne ARC, Fermanagh

Members and families gather today (Sunday 16th January) for the Lough Erne Amateur Radio Club's winter lunch in the Hunting Lodge, Irvinestown. Attendance is expected to double last January's due to the large number of new members who joined or re-joined last year. Many came from the Club's two very successful Foundation courses.

The guests of honour will be Mr & Mrs Raymond Ashe. Raymond, GI8RLE played an essential and major part in setting up the Club's very

successful Repeater, GB3CP.

Being a family social event, not all the chat will be about radio. However, sure of a mention are the Club's plans for an Intermediate course on three February weekends and the historic thirtieth Lough Erne rally on Sunday 17 April, just before Easter.

WAI Awards Scheme

Terry G4POP is looking for testers who use HRD Version 5.0 and also taking part in the WAI awards scheme? Terry has developed the awards side of the program and has just finished the WAI definition which he would like someone to test in earnest.

It displays WAI by grid or county and provides a matrix displaying grids/counties worked and also totals etc.

Terry can be contacted via email on tgenes /at /btintermet/ dot / com.

Radio Rallies

PHOENIX A.R.C.

Phoenix Amateur Radio Club annual rally will be held on Sunday 20th February 2011 in the usual venue, Coolmine Community School, Blanchardstown.

Doors open for Traders at 9.00 am Doors open to public 11.00am Admission 5 Euros. To book tables contact Tony at 0872439997 or Tom at 01-8211043.

Plenty of Parking, Refreshments and Bring and Buy Sale. All usual traders will attend.

This is the First Rally of 2011.

For further details on Rallies please see www.irts.ie/rallies

---

Did you know....

It is reputed that in 1892 Nathan B. Stubblefield made a voice transmission four year before Marconi transmitted radio signals!

This Week in History

On January 18th 1923, the first radio telegraph message was sent from the Netherlands to the Dutch East Indies.

Items for inclusion in next weeks Radio News should be forwarded to Aidan EI7JC, preferably via e-mail to "news / dot ei7jc / at / gmail / dot / com". Or by phone to 085 7100511 News can also be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

January 17, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W1HEO, KH2AR/W4, K3LR, K3USC, NG3K & ADXO, KY4P, N4AA & QRZ DX, KH6BZF, K8YSE, KG8P, W8GEX (60m News), W0GJ, AT International, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DX-World.Net, F6AJA & Les Nouvelles DX, G3NKC, I1JQJ/IK1ADH & 425 DX News, I2YSB, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PU2TEA, PS7AB, RSGB IOTA Web Site, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 9th-January, through Sunday, 16th-January there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J7, J8, JA, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T33, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VK9N, VK9X, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

8Q, MALDIVES. Ivan, UR9IDX, is once again active as 8Q7VR from Naifaru Island (AS-013). His length of stay not known at this time. Activity over the past few days have been on 80 and 12 meters CW. QSL via UR9IDX, only direct. Ivan has posted some pictures on his QRZ.com page.

BX5, TAIWAN. Jimmy, BX5AA, will be active during the CQWW WPX SSB Contest (March 26-27th) as a Single-Op/All-Band/High-Power entry. Jimmy states that BX5 is a rare prefix for Taiwan (CQ 24). QSL via BX5AA. Visit his Web page at: http://blog.yam.com/bx5aa

C3, ANDORRA. Salvador, C31CT, will be active during the CQWW 160m SSB Contest (February 25-27th) as a Single-Operator/Low-Power entry. QSL via EA3QS.

D2, ANGOLA. Laci, OM5AM, is now active as D2AM from Luanda until March 17th. Activity has been mainly 20 meters SSB with some RTTY. QSL via his home callsign, direct or by the Bureau.

DAYTON HAMVENTION NEWS.....
* Contest University 2011 - Tim Duffy, K3LR, announced that registration for the 2011 event is open. This will the 5th year of holding the event at Dayton. CTU USA will be held on Thursday, May 19th, at the Crowne Plaza Hotel in downtown Dayton, OH.
For CTU USA 2011 details, registration and more information, go to: http://www.contestuniversity.com
Please make sure that you click on the registration page. They expect Dayton's CTU 2011 student registration slots will fill up fast. Space is limited. CTU 2011 registration fee:
* 75.00 USDs early bird sign up -- until 1/31/11
* 85.00 USDs between 2/1/10 and 2/28/11
* 90.00 USDs between 3/1/10 and 5/03/11
* No sign ups at the door!
* Sorry, no refunds.
Scholarships available for those 25 years old or younger - contact them for info.

* CONTEST DINNER BANQUET - Tim, K3LR, Dayton Contest Dinner Chairman for the North Coast Contesters, reports (edited): "The North Coast Contesters are proud to announce the 19th Annual Dayton Contest Dinner. The 2011 Contest Dinner tickets are on sale now exclusively via our Web site. Thanks to Scott, KA9FOX, and QTH.com for designing, building and running the Web site <http://contestdinner.com>.
Master of Ceremonies for the Dayton Contest Dinner is CQ Contest Hall of Fame member and World Wide Radio Foundation Chairman John Dorr, K1AR.
The 2011 CQ Contest Hall of Fame Inductions will be formally announced by the CQ WorldWide Contest Director Bob Cox, K3EST.
Our excellent keynote dinner speaker will be announced later.
The Contest Dinner will be held on Saturday night, May 21, 2011, at 6:30 PM, cash bar opens at 5:30 PM, located at the Crowne Plaza Hotel (Official Contester Hotel), 5th and Jefferson Streets (Next to the Convention Center), Dayton (Downtown), Ohio, in the VAN CLEVE BALLROOM.
Seating is random. Tables are set in rounds of 10. You can purchase an entire table for your group. Tickets are only available on: http://contestdinner.com
Many contest operators from around the world attend this event. If

you enjoy radio contesting, you do not want to miss the Contest Dinner in Dayton, Ohio.
You are also invited to attend the Contest Super Suite (Beckel and Miami Ballrooms) which is open for FOUR nights.
See <http://contestsupersuite.com> for all of the nightly activities and details. We expect a quick sell out for the Contest dinner. Get your tickets early!..... 73! Tim K3LR"

* DX DINNER BANQUET. Joe Pater, W8GEX, Secretary for the SouthWest Ohio DX Association, reports (edited): "The SOUTHWEST OHIO DX Association (SWODXA) is pleased to again sponsor the DX Dinner &#65533;, held in conjunction with the 2011 Dayton Hamvention&#65533;. The dinner will be held on Friday, May 20th, 2011. This year the dinner will be at the Dayton Marriott, 1414 S. Patterson Blvd., Dayton, OH 45409.
We are excited about our new venue. It is less than five minutes from our previous location, has a much larger capacity, and the dining room is on the ground floor so there are no steps. There is ample, free, on-site parking.
As in the past, there will be some major door prizes. And there is always great anticipation as to who will be named the &#65533;DXpedition of the Year&#65533;. Program details and a list of the prizes will be available soon at <http://www.swodxa.org> or <http://www.swodxa.blogspot.com>.
There will be a cash bar starting at 5:30 p.m., with dinner served at 7:00. Tickets are 40 USDs each, payable in U.S. funds. Sorry, we do not process Paypal or credit card payments. If a vegetarian meal is desired, it must be indicated when tickets are ordered. We attempt to honor group seating requests when tickets are ordered together. Each table seats ten, and seats are assigned as the requests are received. Check or money orders, payable to SWODXA, should be sent to Kirk Swallow, W8QID, at: 3137 Compton Rd, Cincinnati, OH 45251. Be sure to include a SASE for ticket return.
The Marriott is a large hotel with many room choices. Should you need accommodations, their phone number is 937 223-1000 or the Web site is: http://www.marriott.com/hotels/travel/dayoh-dayton-marriott
Following the meal, there will be a separate room and cash bar available for more fellowship. This is an excellent opportunity to meet and renew old acquaintances. We look forward to seeing everyone at the DX Dinner&#65533; at the Marriott and at Hamvention&#65533;. Good Dxing!"

EF8, CANARY ISLANDS. Val, RD3AF, will be active as EF8M from Santa Maria de Guia, Las Palmas Gran Canaria (AF-004, DIE S-005, WLOTA L 0969), during the CQ 160-Meter CW Contest (January 28-30th) as a Single-Op/All-Band/High-Power entry. QSL via UA3DX.

ER4, MOLDOVA. Vlad, RA4LW, will be active as ER4A during the CQ 160-Meter CW Contest (January 28-30th) as a Single-Op entry. QSL via RA4LW direct only.

FJ, ST. BARTHELEMY. Wim, OS1T/ON4CIT, will be active as FJ/OS1T from St. Barthelemy Island (NA-146, DIFO FJ-001, WLOTA LH-0377) between May 14-22nd. Activity will be on 40-6 meters using mainly SSB and RTTY.

The suggested frequencies are:
SSB - 7072, 14192, 18132, 21292, 24972, 28492 and 50115 kHz
RTTY - 7042, 10142, 18102, 21082, 24922 and 28082 kHz
QSL via his home callsign, by the Bureau or direct (see QRZ.com).
Visit his FJ/OS1T Web page at:
http://on4cit.webs.com/fjos1texpedition2011.htm

H4, SOLOMON ISLANDS. Darren, VK4FEAT, is now active as H44DX. His length of stay on the island was not provided. Activity over the past week has been on 40/20/10m SSB. QSL via VK4FEAT and not via OH2BN as listed on QRZ.com.

IOTA NEWS.....
AF-032. Sam, F6AML, is once again active from Jambiani on Zanzibar Island (WLOTA 1080) until January 24th. He is signing as 5H1Z and using a FT-857 into a HF9V vertical and dipole, so look for him on 80-10 meters using CW and SSB. Suggested frequencies are:
CW - 3525, 7025, 10120, 14005, 18085, 21005, 24905 and 28005
SSB - 3755, 7055, 14260, 18128, 21260, 24935 and 28460 kHz
QSL via his home callsign, by the bureau or direct (QRZ.com).

EU-012. Members of the "Worked All Britain" (WAB) are planning to activate Fair Isle, Scotland, using the callsign GS4WAB and GS7WAB
between August 16-22nd. They plan to activate the rare WAB squares
HZ16, HZ17, HZ26 and HZ27. Fair Isle is the only piece of land within the very rare HZ 100 km Ordnance Survey Grid Square. GS4WAB will be established at the South Lighthouse on the island, while GS7WAB will be used for portable activations on other parts of the island, including the North Lighthouse. QSL via G4IAR, by the Bureau, or direct. If direct (outside the UK), please enclose SAE and 2 USDs. UK stations use a SAE and 2x first class stamps please. If no or insufficient return postage is sent, cards will be acknowledged, but via the Bureau. More details are forthcoming. Also, visit the WAB Web page at:
http://www.worked-all-britain.co.uk

NA-122. (Op Cancelled) Adriano, IK2GNW, who was expected to be active as HI9/IK2GNW from Levantado Island in the Dominican Republic for 2 months starting January 27th, has cancelled his operation.

OC-138/
OC-171. Craig, VK4LDX, will be on an IOTA DXpedition again starting in April. His next trip will be to Horn Island (OC-138) between April 22&#65533;27th. This will be followed by another trip to Magnetic
Island (OC-171) [he was there in December] between on April 29th and May 2nd. Craig states that he has retired his old Butternut HF9V vertical and will now use a Spiderbeam for 20/15/10 meters mounted on a 10m aluminium pole using a tripod.

Look for more details to be forthcoming.

SA-024. Members of the S&#65533;o Paulo Association of Radioamadores (APRE)
along with some guest operators will be active as PR2R from
Ilha Comprida (Comprida Island; DIB SP03), located in the
southern state of Sao Paulo, between January 28-30th. Activity
will be on 80/40/20/15/10/6/2 meters. Operators mentioned are:
Paulo/PY2ZZ, Euclides/PY2EV, Claudio/PY3NZ, Cristiano/PY3UK,
Ronan/PY2RAR, Marcelo/PY2OX, Filipe/PU2TEA and Rafael/PU2RFS.
QSL via Manager PY2OP (see QRZ.com for details. The activation
of this island corresponds to a project of more complex
dimensions that consist of placing on the air all blockhouses,
islands and lighthouses of the State of S&#65533;o Paulo. More
detailed
information will be available soon at: http://www.apre.com.br

SA-097. As this was being written, operators Cezar/VE3LYC and Johan/
PA3EXX are now active as CE9/VE3LYC and CE9/PA3EXX from
Ganzolo Island, in the Diego Ramirez Islands chain. Activity
will be on 40/30/20/17/15 meters using CW and SSB. The length
of their stay is unknown at this time, but activity could last
until January 22nd. QSL all QSOs via VE3LYC, by the Bureau or
direct (mail or PAYPAL; see Web page for details). For updates,
check the following Web page at:
http://ce9iota.weebly.com/index.html

IT9, ITLAY. Saulius, LY5W, will be active as IT9/LY5W from Sicily Island
(EU-025, IIA SC-001, MIA MI-107, WLOTA 1362) during the CQ 160-Meter CW
Contest (January 28-30th) as a Single-Op or Multi-Op entry. QSL via LY5W,
by the Bureau or direct.

JX, JAN MAYEN (Update/Changes). The Jan Mayen DXpedition set between
July 6-14th, 2011, (see OPDX.949) and led by Stan, SQ8X, has announced
their group callsign will be JX7VPA. Currently, the team consists of:
Stan/SQ8X (team leader), Pete/SQ9DIE, Vicky/SV2KBS, Decan/EI6FR, Leszek/
NI1L, Tomek/SQ9C, Bernie/HB9ASZ, Pekka/OH2TA and Deon/K6WH Deon. The
group plans to be on the air for 8 days with 2-3 stations. Stan also
states, "Due to polar summer season at Jan Mayen Island with broad day-
light 24/7 the team will not operate on 160-80 meters &#65533; those bands will
be totally dead at that time. The DXpedition will focus on 30-6 meters,
and our main modes will be CW and RTTY/PSK, with some SSB if conditions
will be good enough to operate as much as we wish to. The team will also
check conditions on the 40m band, but the band may also be not usable at
that time of the year. The team will have a professional TV crew on board
that will prepare a broadcast documentary about the project and the
island." Updated details such as operators and QSL route will be available
soon on the following Web page (currently under construction) at:
http://janmayen2011.org

KH2, GUAM. Operators Nobu/JR3STX and Take/JS6RRR will be active as
W3STX/KH2 and KH2/JS6RRR, respectively, from Guam (OC-026) between

2200z, February 10th and 0300z, February 15th. Activity will be on 160-6 meters using CW, SSB, FM, RTTY and PSK31. QSL W3STX/KH2 via JR3STX and KH2/JS6RRR via JS6RRR, by the Bureau or direct (SASE).

7-16 and "K" index will be 3 or less

NCDXF PRESS RELEASE. Glenn Johnson, W0GJ, Vice President of NCDXF, sent out the following press release on January 14th: "ARRL & NCDXF Scholarships • Deadline February 1, 2011: This year the Northern California DX Foundation is proud to be sponsoring THREE scholarships for deserving young hams. http://www.ncdxf.org/pages/scholarships.html
The ARRL Foundation administers the granting of over 60 scholarships each year, three of which are sponsored from the W6EEN Memorial NCDXF Scholarship Fund.
The deadline is fast approaching. All materials -- including transcripts -- are due February 1. Beginning this year, applicants must submit all material electronically. No paper forms will be accepted.
Each applicant must submit a transcript from their high school or college to complete their application. Applications must be submitted via the ARRL web site <http://www.arrl.org/scholarship-application> and transcripts sent via E-mail to: foundation@arrl.org
If you have college bound children, grand children or know of a deserving young ham, get them to apply now. There are just two weeks before the deadline. Don't put this off until the last minute."

P4, ARUBA. Dee, W1HEO, will be active as P4/W1HEO from the P49V contest station on Aruba (SA-036) between April 3-16th. Activity will be on 160-10 meters, using CW and SSB, with an emphasis on the higher HF and 30/17/12 meter bands. Although this is a semi-holiday outing, major effort will be devoted to maximizing on-air operating time. Operations on the IOTA frequencies will include: CW - 14040, 18098, 21040 and 28040 kHz; SSB - 14260, 18128, 21260 and 28460 kHz. A special color postcard/QSL will be available. QSL direct only to the W1HEO, by the QRZ.com address or by the Bureau.

PACIFIC TRIP (In Preparation For Conway Reef). Hrane, YT1AD, will be heading to the South Pacific to make do some logistical preparations (boat and some equipment) for the 3D2C Conway Reef DXpedition later this year during September and October. According to the updated news on the 3D2C Web page <http://www.yt1ad.info/3d2c/news.html>, Hrane plans to visit Samoa (5W) between January 18-22nd, and be active as 5W8A. He will also visit American Samoa (KH8), between January 22-25th, and be active as KH8/N9YU. His travels will end at Fiji (3D2) between January 26-29th, and he will also be active as 3D2AD. For updates, watch the above Web page.

POSSIBLE NEW ENTITY (Southern Sudan referendum)? BBC is reporting that "early results from Southern Sudan's referendum indicate the region has voted overwhelmingly to split from the north and form a new country. Full results of the poll are not due until next month, but the region is widely expected to choose to secede." To read the complete report, go to: http://www.bbc.co.uk/news/world-africa-12201063

PR150, BRAZIL (Special Event). Look for special event station PR150PLM to be on the air between January 16-31st. Activity is to celebrate the 150th anniversary/birthday of the Brazilian scientist, inventor and radio pioneer, Roberto Landell de Moura. Operations will be on 80/40/30/ 20/17/15/10 meters using CW, SSB and the Digital modes. QSL via PR7AYE, direct (QRZ.com) or by the Bureau. For more details, see QRZ.com. Also, see the Web page: More informations: www.landelldemoura.com.br

ARRL OUTGOING QSL SERVICE (New Rates). The ARRL announced that "Effective January 17, 2011, a new pricing structure will go into effect for the ARRL Outgoing QSL Service. With the new rate structure, amateurs will no longer need to count outgoing cards and then guess as to what to pay based upon a half-pound rate; a simple weighing of the cards is all that is necessary to determine what amount to send to the Bureau. This new structure also accommodates a small rate increase in response to recent postage, shipping and handling costs.
The last rate revision for the Outgoing QSL Service was in January 2007. Even though international shipping costs have remained flat over the last 4 years, domestic shipping costs have risen more than 16 percent since 2007, while material and handling costs continue to climb 1 to 2 percent each year.
The new rate will be:
* 2 USDs for 10 or fewer cards in one envelope.
* 3 USDs for 11-20 cards in one envelope, or
* 75 cents per ounce, for packages with 21 or more cards. For example, a package containing 1.5 pounds -- 24 ounces, or about 225 cards -- of cards will cost $18.
If you have any questions concerning the ARRL Outgoing QSL Service or the rates to use the service, please send them via E-mail to: buro@arrl.org ."

LOTW NOW SUPPORTS VUCC. It was announced this past week that the "ARRL's Logbook of the World (LoTW) -- an online system for amateurs to confirm two-way contacts that can be used for various ARRL awards -- has been upgraded to support awards based on Maidenhead grid squares, such as VUCC and the Fred Fish Memorial Award.
To take advantage of the new features, you need to log in to your LoTW account. (Don't have an LoTW account? It's easy to sign up. Go to: http://www.arrl.org/instructions
VUCC is an open-ended award in that hams can work on throughout their lifetime, just like DXCC. But, like the Worked All States (WAS) award, the VUCC rules require all the contacts to be made from a defined area. For VHF and UHF QSOs on 1296 MHz and below, this distance must be within 200 km on 1296 MHz and below. For SHF awards, contacts must be made from a single location, defined as within a 300 meter diameter circle. As such, the VUCC support in LoTW allows you to make the rule -- or rules -- necessary to find the QSLs in LoTW that satisfy the VUCC rules." For the complete announcement, go to:
http://www.arrl.org/news/view/logbook-of-the-world-now-supports-vucc

S79K QSL STATUS. Dave, G3NKC, reports: "Following postal delays getting QSLs from the printer; I rapidly turned around all of the QSLs that had arrived to me (around 400). I am still getting a steady stream of requests,
that I should turn around pretty fast. However, I am still seeing a large number of items arriving that were posted well before Christmas. The UK postal service (and in particular, my local sorting office!) is somewhat in disarray at present, and I have been told that they have a significant backlog to deal with. If anyone has applied for a card, but not received one, please QRX; it will come eventually. You can E-mail me to enquire if

you are concerned! I will also accept PayPal to cover return postage which will cut down on half of the journey, but please send me an E-mail to confirm that you are doing this, and ensure that I receive sufficient funds to return a QSL to you." His E-mail address is: g3nkc@yahoo.co.uk

S92SS LOG NOW ON LOTW. Charles, KY4P, reports: "I have typed up my old S92SS paper log (quite a chore!) and have uploaded it to LoTW. That operation was way back in 1992 to 1997. The log contains 1,506 160M CW QSOs. There are many 160M log entries that bear no indication that QSLs were exchanged."

QSLS VIA LoTW: 4Z4KX, 9J2CA, EA1DR, EA5BZ, HB10DX, IQ8PQ, J48S, K1SE, K9DX, K9DX, MW2I, ON4ATW, ON4AW, OR2T, RX9FW, S53XX, SP2JNK and SV2FPU/8

QSLS RECEIVED VIA MAIL: 5V7T, 9U0A, C50C, CP4BT, D2QV, E20MDN, EJ4II, EJ8GQB, FM/JE1JKL/P, KG6SL, LU1ZD, MD0CCE, OX/DL2VFR, PJ2/N2MF, PJ2T, PJ4D, PJ4E, PJ4I, PJ4W, PJ5/K1XM, PJ5/SP6IXF, PJ7/K1GI, PJ7/K1XM, PJ7E, PQ0F, R1ANH, RI1FJ, ST2AR, TO5T, V51AS, VK3ZL, VK4LDX/p, ZL7/W1SY and ZS8M

QSLS RECEIVED VIA THE BUREAU: 5T5BV, D44TXR, DS5USH, J5V, KH0/JR2DOL, V51AS/L and ZK2NX

SILENT KEY. It was reported that Ken Stenback, W8KS (ex-AI8S), became a Silent Key (SK) on January 1st, at the age of 63. He was an avid DXer with 343 confirmed on the ARRL DXCC standings. Ken was the driving force behind the Ashtabula County Amateur Radio Club's many activities and served many terms as its President. OPDX and its readers would like to send out our deepest sympathy to the family and friends of W8KS.

SV/A, MOUNT ATHOS. Monk Apollo, SV2ASP/A, was heard active this past weekend on 40 and 17 meters SSB. QSL direct to his home callsign.

T31, CENTRAL KIRIBATI (Update). An international team will activate T31A from Kanton Island (OC-043) between April 17-28th. The transportation has been arranged, all licenses are assigned and the permit is in its final stages. They plan to have 6 stations on the air, operating on 160-10 meters. The following operators have been mentioned: Carlos/EA1IR, Jim/K6ZH, Dave/N1EMC, Arnie/N6HC, Bud/N7CW, John/N7CQQ, Mike/N9NS, Paul/UX2HO, Jay/W2IJ, Charlie/W6KK, Phil/W9IXX and Hrane/YT1AD. The pilot stations will be Eduardo/EA3NY and San/K5YY. Suggested frequencies are:
CW - 1826, 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024 kHz
SSB - 1843, 3798, 7084, 14195, 18145, 21295, 24945 and 28495 kHz
RTTY - 3582, 7043, 10140, 14080, 18100, 21080, 24920 and 28080 kHz
6m - 50099/CW and 50120/SSB
IOTA Frequencies to be used are:
CW - 3530, 7030, 10113, 14040, 18098, 21040, 24920 and 28040 kHz
SSB - 3765, 7055, 14260, 18128, 21260, 24950 and 28460 kHz

QSL via QSL Manager W2IJ, by the Bureau or direct to: Jay Kobelin, 10628 Grandview Drive, Rancho Cucamonga, CA 91701. Current plans are: "Two team members will arrive in Apia on April 6, 2011, to inspect the

equipment shipped from California and operate from 5W as time allows. The team will leave Apia on April 13, 2011, and sail approximately 4 days. Upon arrival at Kanton, we'll setup 2 sites and begin operation. We plan 11-12 days of operation. We'll depart Kanton and arrive back in Apia on May 2, 2011. The T31A Web page is now active and available at: http://www.T31A.com

T7, SAN MARINO. Ivo, 9A3A/E73A, will activate the Amateurs Radio Republic of San Marino (A.R.R.S.M.) club station T70A during the CQ 160-Meter CW Contest (January 28-30th) as a Single-Op/High-Power entry. QSL via T70A.

TF, ICELAND. Richard, K5NA, will activate the TF4M club station in Otradalur, using the callsign TF4X during the CQ 160-Meter CW Contest (January 28-30th) as a Single-Op/High-Power entry. QSL via G3SWH.

TJ, CAMEROON (Update). An international team composed of members of the Provins ARC (F6KOP) will be active as TJ3C from Kribi between February 10-20th (See OPDX.992). It was reported this past week that the TJ3C Web page is now active and online at: http://www.tj3c.fr

TO5, MARTINIQUE (NA-107). Al, F5VHJ, will once again be active as TO5A, but this time during the CQWW WPX SSB Contest (March 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ, direct or by the Bureau. Logs will be uploaded to LoTW.

TT8, CHAD. Baldur, DJ6SI, will once again return to Chad and operate as TT8DX between February 14&#65533;24th. Activity will be mainly CW. QSL via his home callsign.

V3, BELIZE. Torsten, DG7RO, will be active as V31TF from Belize between February 9th and March 1st. Activity will be holiday style on 160-10 meters using mainly SSB and RTTY, and possibly CW. He will use a FT-857 w/100 watts into a dipole and longwire antenna. Also, look for him to be active in the CQ WPX RTTY Contest (February 12-13th), ARRL DX CW Contest (February 19-20th) and CQWW 160M SSB Contest (February 25-27th), possibly as V31GW.

V5, NAMIBIA. Members of the Lufthansa Amateur Radio Club (LARC) will be active as V55DLH from Omaruru between February 5&#65533;12th. Operators mentioned are: Georg/DD8ZX, Bernd/DF1FF, Juergen/DH0RAK, Juergen/DH6ICE, Frank/DJ3FK, Rudi/DK7PE and Bernhard/DK7TF. Activity will be on 160-10 meters using CW, SSB and RTTY. Visit the V55DLH Web page at: http://wp.larc.ws/?page_id&#65533;
VK9X, CHRISTMAS ISLAND (Update/Reminder). A group of JA operators on a DX holiday to Christmas Island (OC-002) is now active until January 20th. The updated operators list include the following (with their own VK9X callsign) are: Tatsuo/JA3ARJ (JA3ARJ/VK9), Takeo/JA3BZO (VK9XA), Hiroko/JH3PBL (VK9XL), Shimatake/JI3DNN (VK9XN), Masumi/JA3AVO (VK9XO), Nakasako/JA3UJR (VK9XJR), Kunio/JA1CJA (VK9XXY) and Nishimura/JA3HJI (VK9XJ). Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via the operator's home callsign. A Web site is currently available at: http://www.nakade.jp/vk9x.htm

VP8O, SOUTH ORKNEY ISLANDS. Members of the Microlight Penguins have begun to head south to Argentina. This is where the team will start their trip on board the "RV Braveheart" to head to South Orkney Islands (AN-008) and be active as VP8ORK between January 27th and February 8th. They expect to be on the air with 7 stations on all HF bands 160-10 meters using SSB, CW and RTTY. If you want a QSL card, there are three ways available to receive one: OQRS direct (on the VP8O Web page), OQRS Bureau (on the VP8O Web page) and direct by mail via VE3XN [w/SASE/Green Stamps/IRC(s)]. For more details and updates, visit the VP8O Web page at: http://www.vp8o.com

VP9, BERMUDA. Seppo, OH1VR, will once again be active as OH1VR/VP9 from Bermuda (NA-005) between January 27th and February 1st. Activity will include the CQWW 160m CW Contest (January 28-30th), probably as a Single-Op/Low-Power entry. QSL via his home callsign. Visit his home page at: http://www.oh1vr.net

ZS8, MARION ISLAND (Update). Pierre, ZS1HF/ZS8M, reports on QRZ.com and the ZS8M Web page <http://www.iz8epy.it/html/zs8m.html> (edited): "The polar supply ship arrives on March 15th, 2011. This means the ZS8M SSB operation will most likely end on this date, BUT there is a possibility that PSK operations will continue until May 11th, 2011. If I am able to operate after this date, it will be a bonus. The ZS8M DXpedition will definitely end on May 5th, 2011. On this date our team departs Marion Island for Cape Town." Pierre suggests to keep monitoring the above Web sites for updates.

DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Mike, DJ5AV
(direct: dj5av@darc.de)

Editors Note: Fredy, DE0MST, and Helmut, DL7MAE, want to finish
their work as editors this summer and are looking for successors.
==========

DX0 - Spratly-Islands: The DX0DX DXpedition to the Spratly Islands has been
postponed "due to circumstances beyond the control of the DX0DX team".
The complete press release is available at www.dx0dx.net .

T8 - Palau: Tack, JE1RXJ, will be active January 21st through 26th as T88RX
from "West Plaza Rental Shack by the Sea Hotel" in Koror (OC-009)
holidy style using 160 through 6 m on CW and SSB with a focus on the
low bands CW. QSL via JE1RXJ, direct or via JA bureau.

ZS8 - Marion & Prince Edward: Pierre, ZS8M, had to fight interferences
with non ham radio equipment. Now he uses an emergency antenna instead
of the Stepper IR vertical. During the last days he was reported on
40/20/17/15 m. He will be QRV through March 15th on SSB and continue
on PSK until May 5th, the day of departure of the team from Marion
Island.

3B8 - Mauritius: Josep, 3B8/EA3BT, and Nuria, 3B8/EA3WL, will be active
January 23rd through 29th from Mauritius Island (AF-049). They will
operate mainly SSB and digital modes, plus some CW, on 40 through 10 m.
QSL via EA3BT, also via bureau. Find more informations at
http://ea3bt.ure.es .

4S - Sri Lanka: Find Mats, SM6LRR, as 4S7LRG from Sri Lanka January 22nd
through February 4th. He will focus on 160. 80, and 40m with a
possible "serious participation" in the CQ WW 160m DX contest.
QSL via SM6LRR, direct, or via bureau.

5H - Tansania: Sam, F6AML, is active as 5H1Z through January 24th from
Jambiani, Zanzibar (AF-032, WLOTA-1080). He operates CW and SSB on

these frequencies: 3.525, 3.755, 7.025, 7.055, 10.120, 14.005, 14.260,
18.085, 18.128, 21.005, 21.260, 24.905, 24.935, 28.005, and 28.460 MHz.
His rig is an FT-857D, HF6V antenna and dipoles. QSL via home call, ok
via bureau or direct with 1 IRC or 2 US $.

9H - Malta: John, G8HWI, will be on the air as 9H3JS from EU-023 holiday
style mainly on 20 m PSK31 January 18th through 30th. He will be
running 3 through 10 Watts to dipoles and an inverted vee antenna.
QSL direct or via bureau to his home call.

Brasilia, special call: PR150PLM is another special call to be used
January 16th through 31st to comemmorate the 150th birthday of the
Brasilian scientist and radio pioneer Roberto Landell de Moura.
Find the station on 80/40/30/20/17/15/10 m using CW, SSB, and
digital modes. QSL via PR7AYE, direct, or via bureau. Further
informations at www.landelldemoura.com.br .

New Zealand, special call: Meet Graeme, ZL1ANH, as ZL50GH through out this
year for his 50 years as radio amateur. He uses a Yaesu FT-1000 MKV,
SB-220 PA, and 4-el Yagi for 20/15/10 m, and wire antennas for the
other bands. QSL via bureau, LoTW or direct with 2 US$ to ZL1ANH.

Switzerland, special call: USKA-Section Luzern presents HB60LU to be used
throughout 2011 for their 60 years' jubilee. The QSOs count for a 5
points joker with the "Old Lucerne Award". QSL manager is Leo, HB9DWL.
Find further informations at www.award.hb9lu.qrv.ch .

Uruguay, special call: The call CW5RV commemorates the 100th birthday of
Louis Varney, G5RV/CX5RV (1911-2000), the inventor of the famous
G5RV aerial. QSL to POBox 6000, 11000 Montevideo, Uruguay.

Pacific: Hrane, YT1AD, will be on a Pacific tour January 18th through 29th
for logistic preparations of a large DXpedition to Conway Reef (3D2C),
planned for September/October - as presented at
www.yt1ad.info/3d2c/news.html .
His tour will touch Western Samoa, US-Samoa and Fidji with activity
Western Samoa 5W8A 18.-22. January,
US-Samoa KH8/N9YU 22.-25. January,
Fidji 3D2AD 26.-29. January.
QSLs for all to YT1AD, Dr. Hrane Milosevic, 36206 Vitanovac, Serbia.
He needs 1IRC or 1 US$ for a standard letter or 2 US $ for air mail.
He promised also QSLing via bureau.

Silent Keys:

These DXers became silent keys during the last weeks: S. Hasan Mahmood Zaidi
(AP2ZH), R. John Gardner (GW4KVJ), Bruno Fornelli (I1YLM), Dario Laurindi
(IZ0MTV), Peter Eames (M0AXD), A. George Spencer (VE3AGS), Bill Voedisch
(W1UD), John P. Basilotto (W5GI), Leonard Andrew "Woody" Woodward (W7KOP)
at 99 years of age, and Ken Stenback, W8KS (ex-AI8S).

LINKS:
Current SOTA activities (mountain summits) are announced at:

http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

22./23. January: BARTG RTTY Sprint.

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:

HS & XU Island-Tour (IOTA-Operation): Eddy/ON4AFU will be active as HS0ZJF
and XU7AFU during the next months from
AS-101 Koh Samui HS0ZJF/8 20.01.-10.02.
AS-126 Butang Grp. HS0ZJF/9 11.-20.02.
AS-053 Koh Yao Yai HS0ZJF/8 10.-22.03.
AS-133 Koh Russei XU7AFU 23.02.-08.03.
QSL via home call (d/B).

OC-009, T8, Palau Islands: Find Tsutomu/JA1VND January 14th through 19th
as T88FF from Koror Island. QSL via home call (d/B).

SA-099, PJ2, Curacao Islands: Look for Jeff/K8ND and Jim/W8WTS January 20th
through February 3rd using PJ2/home call (im CQWW DX 160 m CW Contest
as PJ2T) from Signal Point Contest Station on Curacao. QSL via home
call (d/B). QSL PJ2T via N9AG (d/LoTW).

Lighthouse activities (WLOTA/ARLHS/ILLW)

51. Battery Question

Newsgroup: rec.radio.amateur.misc
Date: 2011-01-17 20:44:06 UTC
From: Tuuk <abra@cadabra.com>
Message-ID: <iS1Zo.30991$bd2.29181@newsfe12.iad>
Source record: 5091

Hi

With the smaller batteries such as AA and AAA for things like Camera or MP4 players or MP3 players what is better? The rechargable or disposible?

If not used daily or even weekly which is better? I know the LI are now better than the Ni cad.

I am noticing the MP4 and MP3 are very particular, the NiCad batteries lose their voltage. The AAA are 1.5v but after a couple years they only become 1.3v and the electronic things are finicky and shut themselves down.

Any good deals or suggestions?

I want to get a little charger and keep about 6 of each batteries going. Or should forget the charger and use disposible?

Any suggestions are great, thnx

Nickel-Cadmium batteries produce 1.2 volts per cell, not 1.5. Their discharge curve is flatter than carbon-zinc cells whose voltage drops off quickly. If the equipment was made to operate with this dropping voltage, using NiCd cells may result in longer life. NiCd cells self-discharge fairly quickly while Lithium Ion cells hold their charge for quite a while if not used. See the Wiki page for more information about NiCd cells.

73, Dr. Barry L. Ornitz WA4VZQ

53. The ARRL Contest Update for January 19, 2011

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

January 19, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- This Rover's No Dog - ARRL January VHF Sweepstakes
- Top Band Fun For All - CQ WW 160 CW Contest
- LOTW Meets VUCC
- A Global Science Fair
- Titanic Thunderstorm Tales
- Contest Analysis by ON5ZO
- Fuses for Amplifiers
- Coping With Cycle 24
- Whither Single-Op?

NEW HF OPERATORS - THINGS TO DO

FYBO - that stands for "Freeze Your Butt Off" and it's the winter Field
Day-style event sponsored the QRP AZSQRPions
<http://www.azscqrpions.com>in a couple of weeks on Feb 5th. Not every
HF event is totally serious, you know! Since one of the scoring inputs
is the temperature of your operating location, the zeroes have
home-field advantage!

BULLETINS

WPX SSB log checking reports are available. If you submitted a log, you
should have received an email from WPX Contest Director K5ZD
(k5zd@charter.net).

BUSTED QSOS

The K9VV mentioned in the previous issue's story about SDR web sites
was actually N9VV. (Thanks, Dan K1TO and Art K6XT)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

January 22-23
```

- ARRL January VHF Sweepstakes
- NAQCC Monthly QRP Sprint--CW (Jan 20)
- Locust QSO Party--CW (Jan 20)
- YLISSB QSO Party--Phone
- BARTG RTTY Sprint

January 29-30

- CQ WW 160 Meter Contest--CW (starts Jan 28)
- REF French Contest--CW
- UBA Contest--Phone
- Winter Field Day
- WAB Top Band Phone Contest
- Classic Exchange--CW (Jan 31)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The big story of the past two weeks is welcome news for VHF+ contesters as the ARRL's online Logbook of the World (LOTW) now supports VUCC awards <http://www.arrl.org/news/logbook-of-the-world-now-supports-vucc>. The ARRL Web article reviews the changes and answers some of the immediate questions about getting started. LOTW will also support the Fred Fish Memorial Award <http://www.arrl.org/ffma> - earned by only two grid-chasing stations so far! The ARRL Outgoing QSL Service, for those who prefer paper to programs, announced new rates effective this week. <http://www.arrl.org/news/arrl-outgoing-qsl-service-announces-new-rate-structure>

While the ARRL LOTW site does have a lot of supporting instructions, Dave, AA6YW, author of DXLab Suite, has created his own complementary set of instructions <http://www.dxlabsuite.com/dxlabwiki/CreateStationLocation> for adding locations to your TQSL software configuration - a key element of successful LOTW use. (Thanks, Peter N5UWY)

The North Coast Contesters <http://www.northcoastcontesters.com/> have announced the 19th Annual Dayton Contest Dinner <http://contestdinner.com/> and are taking ticket orders. This is the venue for CQ Contest Hall of Fame inductions and the keynote speaker is always enjoyable. The dinner will be held on Friday, May 21st, at the Crowne Plaza Hotel. (Thanks, Tim K3LR)

In discussing participation in the ARRL 10 Meter Contest by Mexican stations, Ramon XE1KK and Hector XE2K contributed additional information about Mexican licensing. Perhaps the clearest explanation of the complicated process is available from Christian DL6KAC <http://ham-blog.de/reciprocal-licence-xe-permit/> - it applies for both resident and visiting hams. How does this stack up to other ITU Region 2 licensing? The comparison <http://bit.ly/dMgclE> shows that it's tough to be an XE licenseholder with the highest fees of any Region 2 country! Mexican ham radio licensing rules <http://www.qsl.net/oh2mcn/xelawen.pdf> have been translated into English by George XE1/N9VIU. Note that no Mexican national may allow

any other person to use his or her call sign. Both Ramon and Hector remind us that, like in many other countries, abuse of the rules by visitors helps keep restrictive regulations in place.

Does it seem hot in here? Only about a million, more or less. Is that F or C? Scientists are making good use of the new solar observatory satellites to learn just how the corona gets so hot <http://news.sciencemag.org/sciencenow/2011/01/really-hot-doins-discovered-on-t.html>! Since the corona is the source of many solar phenomena that affect radio propagation, understanding its mechanics has a lot of practical use right here on terra firma.

The group managing the ARRL Frequency Measuring Tests (FMT) has announced a new format for the April 12th (April 13th UTC) exercise. More information will be printed in the March issue of QST or you can keep an eye on FMT manager Connie K5CM's web site <http://www.k5cm.com/> for more information.

The Minnesota QSO Party <http://MN%20QSO%20Party%20County%20Activity%20Map> (Feb 5) is working hard to be sure all 87 counties are activated - even roving in frigid temperatures <http://www.youtube.com/watch?v=UIdHj735id4> that would freeze a sine wave! The MN QSO Party County Activity Map is color-coded to show expected county activations and clicking on a county shows call signs "signed up" to activate it. The web site will also track the rovers in real-time via APRS as the contest progresses. Pretty cool! (Thanks, Bob K0RC)

Alberto LU1DZ writes in with notification of a new web site for the CW World Wide South America Contest <http://www.wwsatest.org/>. Results of previous contests will be published here when they are available.

W3KM has updated his Cabrillo Log Evaluator <http://www.dxzone.com/cgi-bin/dir/jump2.cgi?ID=11571> software - it's very useful for contest sponsors that use the Cabrillo log format for submissions. If your club sponsors a contest, why not encourage the use of the standard format and make your log-checking life a bit easier? Individual contesters may find the Cabrillo Log Checker <http://www.contestlogchecker.com/> to be helpful in converting and managing their logs. (Thanks, John WA2HIP and Bob N6TV)

Web Site of the Week - Science fairs are a lot of fun for the technically-inclined student and encourages them on their way to a career in engineering or science. Google has launched its own Global Science Fair <http://www.google.com/events/sciencefair/> project for entrants between the ages of 13 and 18. Each project is created as a Google web site and the judges will be actual scientists and technical professionals. Maybe that new antenna or digital protocol would catch their eye?

WORD TO THE WISE

Endurance - this is a plus for both contesters, DXpeditioners, and sailors. With some of our contesting compadres headed for the South Orkneys <http://www.vp8o.com/> this week, Endurance by Caroline Alexander about the explorer Shackleford's adventures in the same area might be a good read while waiting for them to reach the island. Says, Rus K2UA, "So many lessons for all of us about teamwork, faith, and the human spirit in the face of incredible adversity [that] the Southern Ocean dishes out even in the summer."

==> SIGHTS AND SOUNDS

If it seems like the QRN from a thunderstorm is curiously strong, perhaps it's just the echoes of matter-antimatter annihilation! It turns out that thunderstorms can actually create antimatter and gamma rays <http://svs.gsfc.nasa.gov/vis/a010000/a010700/a010706/index.html> like a giant particle accelerator. The NASA story has lots of interesting graphics and animations to explain how this happens. You'll never look at big cumulonimbii the same way!

What is it like to land on a remote Pacific atoll? Take a look at this cockpit video <http://indiatube.apnicommunity.com/video/L8BD8DEpr2Y/Gulfstream-G1-Approach-and-Landing-on-Palmyra-Atoll-AVI.html?sms_ss=email&at_xt=4d33a5337cbca75f%2C0> of a Gulfstream twin-engine coming in over the lagoons and reefs. (Thanks, Katie Stadler)

The Hallicrafters SCR-299/HT-4 transmitter did yeoman's service in World War II and was a legendary surplus item in the post-war years. Here's a long video <http://www.youtube.com/watch?v=Jps0_2adUvo&feature=player_embedded> looking back at a ham radio icon. (Thanks, John W7KCN)

==> RESULTS AND RECORDS

A very nice analysis of the 2010 UBA contests <http://www.uba.be/sites/default/files/uploads/hf_contests/uba_contest_info.pdf> with notes about logs and log checking has been posted by our Belgian correspondent, Franki ON5ZO.

The results of the 2010 Ohio State Parks on the Air Contest <http://parks.portcars.org/ospota/wp-content/uploads/2010/12/results-29dec.pdf> are online. (Thanks, Joe W8KNO)

SYLRA Contest 2010 Final Results <http://contestclubfinland.com/CCF/index.php?option=com_content&task=view&id=94&Itemid=2> are ready online - congratulations to all the trophy winners! (Thanks, Janne OH6LBW/OH6M)

LZ DX Contest 2010 preliminary results <http://lzdx.bfra.org/results2010bg.html> are now on-line and become official on 15 Feb. (Thanks, Wally LZ2CJ)

OPERATING TIP

How to Build A Pot, by Festus - "Most people just don't know how to make good coffee. In the first place, they boil the water before they put the coffee in. Any fool knows you gotta put the coffee in the cold water and bring them both to a boil together. That way you get all of the flavor. Worst thing they do, they throw away the old grounds after using them once. What they don't know is that they are throwing away the best part. You got to keep them old grounds and you add a little fresh coffee every morning and let her boil. Shoot, you don't make a cup, you build a pot. You don't really get a good pot until you've been usin' it about a week. Then it's coffee!" - Festus was a memorable character played by Ken Curtis on the Gunsmoke TV show.

==> TECHNICAL TOPICS AND INFORMATION

Amplifier fuses may not be the usual glass-cartridge style. If yours uses ceramic cartridge fuses, you can often find them as "microwave oven fuses". They are also available from electronic suppliers, such as Mouser Electronics <http://www.mouser.com/>. Don't substitute glass fuses as they are not rated to handle or interrupt the same current and voltage. (Thanks, Jim W7RY and Vic K2VCO)

Looking up the connections of a microphone can be maddening - there are so many, the manufacturers all use different conventions, signal names are different. Ugh. To the rescue rides Roy, G4WPW with his amazing compilation of microphone connector wiring and schematics <http://homepage.ntlworld.com/rg4wpw/date.html>. Three cheers for the compilers of information among us!

Speaking of (or into) microphones, if you are the type that enjoys putting the end of a vacuum cleaner hose next to the cat and making growly noises into the other end, you might enjoy learning that a toilet paper tube placed over certain microphones can have interesting effects on the resulting transmitted audio. This was a regular "enhancement" for the Kenwood MC-60 desk mike, for example. Will it improve your score? The reply is somewhat hazy!

If you have a Pelican hard-shell equipment case, but need foam inserts <http://www.foamerica.com/SearchResults.asp?Cat=21> for cushioning equipment, Dan KI4YZE recommends Foamerica.com as having a complete selection.

Here's a way to evenly space any number of radials around an antenna base. First, find the circumference of the circle that contains the shortest radial: C = 2*pi*r, where r is the length of the shortest radial. Divide C by the number of radials. This is the distance between the radials as they cross the circle. Using this method, even an irregular area can be covered with evenly-spaced radials. (Thanks, Rod WN8R)

At the other end, to what do you connect the radials? There are all sorts of suggestions from pre-drilled and threaded radial connection plates to scavenging bent aluminum wheel rims from an auto body shop. Dave AB7E reminds us that while it looks pretty, the electrons don't

care if the radial attachment is made in a circle - you can use short lengths of bus bar or flashing strip around the antenna to make several radial connections as a strip or with the ends connected together forming a polygon.

Reminder - call before you dig! No matter where you live in the U.S. there is a phone number you can call to check for buried cables and pipes before the first shovel of dirt is turned. Call your local utility to find out who does the job in your area.

Technical Web Site of the Week - Are you suffering through the oh-so-slow beginnings of solar cycle 24? Paul VE1DX offers some Cassidic-inspired wisdom featuring the Palos Verdes Sundancers <http://www.southgatearc.org/dx_stories/palos_verdes_sundancers.htm>. If you want something to occupy you until the cycle has progressed a little farther, read this interesting paper <http://arxiv.org/pdf/1005.5303v3> about orbital resonances of the outer planets and their effects on the Sun. (Thanks, Rich KL7RA)

==> CONVERSATION

Whither, Single-Op?

In the last issue, I discussed how radio is changing from a one-at-a-time to everybody-at-once. ("Parallel to Serial", 5 Jan 2011) That makes a big difference in how we think of what we do and how we compete. Another big game-changer is the ability of software to compete with the "wet-ware" between our ears. Just this past week, in a practice round Watson, the IBM-designed supercomputer, beat the all-time Jeopardy champs at their own game <http://www.computerworld.com/s/article/9205158/IBM_supercomputer_wins_first_Jeopardy_dust_up>.

Does the relentless advance of computers put our own game in jeopardy? No more than the advent of steam-power eliminated sailing competitions. Nor has technology relegated sailing to the back-benches of re-enactment hobbies. Read through the reporting on the America's Cup sailing yacht races and you will find competition as intense as any cutting-edge sport. Yet, it is important to clearly identify what technological apples are being compared. Indeed, a race of the sailing against engine-powered vessels would not be much of a draw. We need to make the same set of distinctions in radiosport. As always, definitions are important.

First, let's start with the word "assisted" as it is found in category definitions. Although contest rules for "Single-Op Assisted" categories are clear, there is lots of confusion. The only thing to which the term "assisted" applies is to receiving information about other contest operation from outside your station boundary and via something else than the contest bands and modes. It does not apply to devices or persons that help you make a bigger score. This was once clear and understood by pretty much everybody, but there is that word with all

its superfluous connotations. It really needs to be changed.

The discussion about "assisted" categories and "assistance" actually covers two completely distinct things; the first is the use of information I just described, usually from what is referred to as a "spotting network." (This is still called "packet", although the use of actual packet radio links to carry the information is rapidly disappearing in favor of Internet links.) The information itself consists of any data about the operation of another contest station, such as frequency, time, exchange, or call sign. The second thing is the use of non-human devices in support of one's operating. Mixing these two different topics in one category definition is guaranteed to make for a difficult conversation. (The additional consideration of single- versus multi-operator, I'll leave for another column.)

Confusion about the first topic can be defused by using a more appropriate title for the category. For example, "Single-Operator with Spotting Network" (SO-SN). Say what you mean and mean what you say. If an operator uses information from the spotting network, that is an SO-SN entry. If we want to be completely general and refer to the information alone - a better definition - then a more appropriate name for the category might be "Single-Operator - Connected" although the inevitable "connected to what?" arises. Nevertheless, in this category the operator is allowed to use information about the operation of other stations received from sources outside the station boundary.

Defining "assistance" from non-human devices is not quite as straightforward. After all, electronic keyers were a huge leap forward when they were introduced. A clever layout of paper dupe sheets was certainly helpful - isn't the ARRL's version, after all, called "Operating Aid Number Six"? (What happened to aids one through five and was there a seventh?) And what about computer logging?

Having been immersed in this argument for some time, it is apparent to me that the crux of the argument is technology that replaces a crucial human function - that of turning an audio stream into the information required to make a record of a contest contact. i.e. automated decoding or "copy". (Realize that the rest of this discussion must necessarily exclude radiosport using digital modes since humans are not capable of copying digital transmissions. Yes, we all have heard the story about the RTTY operator who could recognize call signs...)

At present, with the exception of CW Skimmer and the occasional code reader, there is no device in the amateur shack that turns Morse code's on-off patterns of audio tones into characters. Similarly, there is no device (outside of certain large government agencies) that reliably translates the audio of human speech into characters. Thus, we have a key, well-defined "bottleneck" through which all operation can be constrained to pass in order to qualify for a specific category. If "copy" is defined as translating audio into alphanumeric characters, then "manual copy" is a human performing the copying function. An appropriate category name for such operation might be "Single-Operator,

Manual Copy" (SO-MC) and one for which copying devices are allowed, "Single-Operator, Automated Copy" (SO-AC)

So now we have three potential categories; SO-MC, SO-AC, and SO-SN. Do we really need all three? Not really, in my opinion. The trend in contest operating is clearly to add more technology and more information. In the face of such upheaval, it's important to provide an entry category for "sail-powered radio" and the savvy salts that steer them. Almost equally important, the category names should not make value judgments about the style of operating - we're all very good at doing that ourselves, thanks. I propose the following two names for our categories: Single-Operator, Manual Class (SO-MC) and Single-Operator, Cyber Class (SO-CC).

SO-MC consists of a single human operator, receiving no information from outside a physical station boundary except on the bands and modes permitted for contest contacts and using no devices that translate the information carried by transmitted signals into the characters required for a record of the contact. Band scopes and spectrum analyzers are fine. Code readers, CW Skimmers and other automated decoders in any mode that extracts and evaluates a signal's information, speech-to-text translators, and so forth are excluded. SO-CC consists of a single human operator but no limits are placed on the information that can be used or its sources. I'm sure contest sponsors would need to refine those definitions but they are a start.

The wind-sailor and motor-boater have managed to get along for nearly 200 years, sharing waterways and devising rules of navigation that allow all to share the rights of way. Competitions are enjoyed by all for what they are. Surely we can do the same.

73, Ward N0AX

==> CONTESTS

19 January to 1 February

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

NAQCC Monthly QRP Sprint--CW, from Jan 20, 0130Z to Jan 20, 0330Z. Bands (MHz): 3.5-14. Frequencies: Monthly on 2nd Tuesday or 3rd Wednesday (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://home.windstream.net/yoel/>

Locust QSO Party--CW, from Jan 20, 0200Z to Jan 20, 0300Z. Bands (MHz): 3.5-7. Frequencies: 3.553, 7.053. Exchange: Name, state or province or 'DX'. Logs due: Jan 31. Rules <http://www.k6vva.com/lqp>

YLISSB QSO Party--Phone, from Jan 22, 0000Z to Jan 23, 2359Z. Bands (MHz): 1.8-28. Exchange: Call sign, RS(T), ISSB number. Logs due: Mar 18. Rules <http://www.ylsystem.org/>

BARTG RTTY Sprint--Digital, from Jan 22, 1200Z to Jan 23, 1200Z. Bands (MHz): 3.5-28. Exchange: Serial. Logs due: Mar 1. Rules <http://www.bartg.org.uk/>

CQ WW 160 Meter Contest--CW, from Jan 28, 2200Z to Jan 30, 2200Z. Bands (MHz): 1.8. Exchange: RST and S/P/C. Logs due: Feb 28. Rules <http://www.cq160.com/>

REF French Contest--CW, from Jan 29, 0600Z to Jan 30, 1800Z. Bands (MHz): 3.5-28. Exchange: RST and serial or department ID. Logs due: 30 days. Rules <http://www.ref-union.org/concours>

UBA Contest--Phone, from Jan 29, 1300Z to Jan 30, 1300Z. Bands (MHz): 3.5-28. Exchange: RS, serial, and ON province. Logs due: 2 weeks. Rules <http://www.uba.be/en/hf>

Winter Field Day--Phone,CW,Digital, from Jan 29, 1700Z to Jan 30, 1700Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, RS(T), category, local temp. Logs due: Feb 28. Rules <http://www.spar-hams.org/>

WAB Top Band Phone Contest--Phone, from Jan 29, 1900Z to Jan 29, 2300Z. Bands (MHz): 1.8. Exchange: See Web site. Logs due: 21 days. Rules <http://www.worked-all-britain.co.uk/contest>

Classic Exchange--CW, from Jan 31, 1400Z to Feb 1, 0800Z. Bands (MHz): 1.8-28, 50, 144, Frequencies: CW 1.810, 3.545, 7.045, 14.045, 21.135, 28.050, 50.100, 144.100 . Exchange: RST, QTH, model of rcvr and xmtr. Logs due: 30 days. Rules <http://www.classicexchange.org/>

VHF+ CONTESTS

ARRL January VHF Sweepstakes--Phone,CW, from Jan 22, 1900Z to Jan 24, 0400Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Feb 24. Rules <http://www.arrl.org/contests>

Winter Field Day--Phone,CW,Digital, from Jan 29, 1700Z to Jan 30, 1700Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, RS(T), category, local temp. Logs due: Feb 28. Rules <http://www.spar-hams.org/>

==> THE VIEW FROM THE OZARKS

Ozarks New Year's Eve Tornado Outbreak Involves SKYWARN, ARES®

The past year ended on a tragic note as killer storms swept across southwestern Missouri. At least nine tornadoes, two of which produced fatalities and numerous severe thunderstorms pounded the Missouri Ozarks over 14 hours on December 30 into New Year's Eve. The SW Missouri Regional SKYWARN Net was activated by Net Coordinator Jim Sellars, N0UAM, on the 145.49 MHz N0NWS repeater at 10:30 PM on Thursday as the first severe storms were entering into the National Weather Service (NWS) forecast area in Stone County just south of Table Rock Lake.

First responders, SKYWARN mobile intercept spotters, other SKYWARN spotters and emergency managers throughout the region provided critical reports to the NWS via Amateur Radio. Taney County Emergency Coordinator Don Birk, NA9X, and the K0EI station operating from the Stone County 911 Center provided critical real time severe weather observations from their local nets via Amateur Radio to the NWS as three severe storms that produced four tornadoes lashed the Table Rock Lake area into the early hours of New Year's Eve. Cody Hudson, KF5HLZ, observed a tornado and associated power flashes as the storm heavily damaged the condominiums and boat docks at the Indian Point area of Table Rock Lake and reported them directly into the Regional Net.

Tornadoes and severe thunderstorms continued north into Christian County where the county's ARES group was activated. Christian County Emergency Coordinator Pat Conway, WA6JGM, and his group passed information and spotter reports into the Regional Net. Conway along with Emergency Management/CERT liaison Rich Vogt, KB9YZE, assisted emergency management after a tornado caused EF-1 damage between Sparta and Fordland in the early morning hours.

Severe thunderstorms continued through the night across all of Missouri. As daybreak approached, additional super cell thunderstorms

developed and affected large areas of southwest and central Missouri, and tornadoes were reported in Polk, Pulaski, Phelps and Dent Counties including an EF-3 tornado within the sprawling Fort Leonard Wood military complex. ARES groups and emergency managers provided real time and relayed reports on the situation into the Regional SKYWARN Net. Groups in Polk, Webster, Douglas, Laclede, Pulaski, Wright and Phelps Counties tracked and reported on these dangerous storms. Texas County Emergency Coordinator Richard Wood, KB0MPO, and his group relayed their observations of the Fort Leonard Wood storm from their vantage point on the south side of the Fort in real time to the NWS enhancing the warning process and helping increase warning lead times.

Ken Baremore, W0KRB, Missouri Section Emergency Coordinator, said of the response: "Events like these prove the effectiveness of a well run SKYWARN operation. The ARES and spotter groups handled the transfer of information, data and spotter reports seamlessly as the storms crossed the various county areas of responsibility and effectively passed the information from their local nets into the regional net and then to the Weather Service." "This can only be accomplished via a coordinated and active SKYWARN and ARES organization. The weekly local and regional ARES/SKYWARN training nets help reinforce this proper reporting and coordinating of procedures."

Steve Runnels, KD4OPZ, Warning Coordination Meteorologist at the National Weather Service in Springfield, Missouri, added "The thing that struck me about this event was the amount of Amateur Radio support we received during the overnight and into the early morning hours. This proves that the Amateur Radio community is always ready. It also shows the strength of their commitment to the communities they live in and the National Weather Service's mission to protect life and property." SW Missouri SKYWARN can be heard when activated here <http://www.radioreference.com/apps/audio/?feedId=773>. - Jim Sellars, N0UAM [An additional tornado report from ARRL HQ can be found here <http://www.arrl.org/news/midwestern-hams-spot-track-tornados-as-2011-begins>.]

==> EMCOMM BILL REINTRODUCED IN NEW CONGRESS

The Amateur Radio Emergency Communications Enhancement Act, which died at the end of the 111th Congress, has been reintroduced in the 112th Congress as HR 81 <http://www.govtrack.us/congress/bill.xpd?bill=h112-81>. The sponsor is Representative Sheila Jackson Lee (D-TX-18). The new bill -- which was introduced on January 5 -- has been referred to the House Committee on Energy and Commerce.

Rep Jackson Lee first introduced the bill -- HR 2160 <http://www.arrl.org/hr2160> -- in the 111th Congress in April 2009 <http://www.arrl.org/news/houston-representative-introduces-amateur-radio-bill-in-congress>.
It gained an additional 41 co-sponsors but did not progress out of the committee of jurisdiction. A similar bill introduced in the Senate -- S 1755 <http://www.arrl.org/news/senate-introduces-companion-bill-to-hr-2160> -- made it all the way through that body in December 2009, but likewise was not taken up by the House. The objective of the bill -- which is supported by the ARRL -- is for the Secretary of Homeland Security to study the uses and capabilities of Amateur Radio communications in emergencies and disaster relief and to identify and make recommendations regarding impediments to Amateur Radio communications, such as the effects of private land use regulations on residential antenna installations.

"We are hopeful that this early start will lead to success in the new Congress," commented ARRL Chief Executive Officer David Sumner, K1ZZ.

==> HURRICANE, EMERGENCY MANAGEMENT CONFERENCES PROVIDE NETWORKING OPPORTUNITIES

Hurricane Season may seem a long way off, but it's not. It's less than six months away. Here are hurricane and emergency management conferences to attend for purposes of training and networking:

2011 National Hurricane Conference <http://www.hurricanemeeting.com/schedule.asp> - April 18-22, 2011, Hyatt Regency Hotel, Atlanta, Georgia. The ARRL is a Participating Organization.

Governor's Hurricane Conference <http://www.flghc.org/> - May 15-20, 2011, Greater Fort Lauderdale Broward County Convention Center, Florida

2011 Texas Emergency Management Conference
<http://www.txdps.state.tx.us/dem/conference/txEmerMgmtConf.htm> --
April 26-29, 2011, Henry B. Gonzalez Convention Center, San Antonio,
Texas

Count on a robust Amateur Radio/ARES presence at each of these
conferences. If you are associated with any of these meetings and have
information on Amateur Radio activities to be planned, please inform
your editor K1CE for inclusion in a future issue.

==> EAST BAY ADOPTS ARES STANDARDS OF TRAINING

Over the past year, ARRL East Bay (California) Section Emergency
Coordinator Herbert Cole, AI6AT, visited many ARES groups and presented
a vision for the future of ARES within the Section. (East Bay is
comprised of Napa, Solano, Contra Costa, and Alameda Counties). Working
in cooperation with, and at the behest of Section Manager Jim Latham,
AF6AQ, the East Bay Section leadership has been focused on establishing
a section-wide ARES protocol that better leverages the talents,
resources, training, and needs of the four-county area of
responsibility.

As a result of the work that has occurred over the past year, Cole
announced that the Section is adopting uniform training standards and
credentialing requirements in cooperation with the ARRL San Francisco
Section ARES program. The purpose of this action is to enhance their
public service mission by pursuing common training and credentials that
may be employed across section boundaries, and to establish the
foundation for a robust and viable ARES Mutual Assistance Team
(ARESMAT) capability should the need ever arise.

As provided by the ARRL, the only requirements for ARES membership
continue to be a valid Amateur Radio license and a sincere desire to
serve. There will now be two levels of East Bay Section ARES
membership: Full and Associate.

Those East Bay Section ARES members who have met specific training
requirements will be designated Full ARES Members. Full ARES members
will be issued photo ID cards free of charge by the Section Manager
upon completion of all required training. The training requirements
are:

IS-100 Introduction to the Incident Command System (ICS)
<http://www.training.fema.gov/EMIWeb/IS/IS100b.asp>
IS-200 ICS for Single Resources and Initial Action Incidents
<http://www.training.fema.gov/EMIWeb/IS/IS200b.asp>
IS-700 National Incident Management System (NIMS) An Introduction
<http://www.training.fema.gov/EMIWeb/IS/is700a.asp>
EC-001 Introduction to Emergency Communications - Level 1/Basic
<http://www.arrl.org/online-course-catalog>

("IS" courses are offered on line at no charge in the FEMA Emergency
Management Institute's Independent Study Program
<http://www.training.fema.gov/IS/>. "EC" courses are offered by the

ARRL to ARRL members and non-members for a small fee. [Note that the former ARRL Emergency Communications Level 1 course is being revised and will be released as "Introduction to Emergency Communications" early this year. Check for news of availability and enrollment information on the ARRL Web site. This introductory course will provide the basic information needed to participate in ham radio public service and emcomm activities -- ed.]

Full ARES Members will also be expected to complete any training that is required by ARES served agencies. East Bay Section ARES members who have not yet met the specified training requirements will be designated Associate Members. Associate members will be issued the standard ARRL ARES ID (form FSD-224) by their ECs. ARES members must have Full ARES Member status to qualify for ARES leadership appointments and must complete the following requirements within one year of their appointments. Current leadership appointees must attain Full ARES Member status and complete the following requirements by December 31, 2011.

Emergency Coordinator (EC) and Official Emergency Station (OES) appointees:

Full ARES Member requirements plus:
IS-800 National Response Framework, An Introduction
<http://www.training.fema.gov/EMIWeb/IS/IS800b.asp>
IS-802 Emergency Support Function (ESF) #2 Communications
<http://www.training.fema.gov/EMIWeb/IS/IS802.asp>
and either of these two courses:
a. EC-002 Amateur Radio Emergency Communications Course Level II*
b. EC-016 Public Service and Emergency Communications Management for Radio Amateurs <http://www.arrl.org/online-course-catalog>

Assistant District Emergency Coordinators (ADEC) appointees and above:

Full ARES Member and EC/OES requirements plus either of these two courses:
a. EC-003 Amateur Radio Emergency Communications Course Level III*
b. EC-016 Public Service and Emergency Communications Management for Radio Amateurs <http://www.arrl.org/online-course-catalog>

*Courses EC-002 and EC-003 have been replaced by EC-016 and are no longer offered, but those members who have completed them may use them to meet requirements.

Cole looks forward to working with members to build their ARES program into a model for others across the country to emulate. -- Herbert Cole, AI6AT, Section Emergency Coordinator, East Bay, California [Note: All ARRL online courses (except EC-016) are currently under construction. ARRL HQ is changing platforms and will be offering courses beginning this year. Visit ARRL's Web site for updates and available courses in the future. The currently available Public Service and Emergency Communications Management for Radio Amateurs course (EC-016) will

continue to be offered online in its present format. Click here <http://www.arrl.org/ec-016-course> for more information].

==> N5FDL OPINION: THE EC'S MOST IMPORTANT JOB

What is the most important job of an ARES Emergency Coordinator? Some will say it's responding to emergencies, or writing emergency plans. Others will say it's recruiting ARES members or installing radios at served agencies. There are dozens of answers and all are important. One, however, really stands out.

What's the EC's Job #1? I say it's giving your ARES volunteers something to do on an ongoing and frequent basis. Why? Because the quickest way to lose volunteers is to not use them. This is the "use-it-or-lose-it" fitness maxim applied to another kind of muscle--volunteer power.

If you aren't regularly exercising your response capability, I'd suggest that you really don't have one. Your ARES group may look good on paper, but how will it perform in the field?

"But, we don't have many emergencies around here," I can hear you saying. Not all of us live in tornado alley, where spring days often end with SKYWARN call-outs. Hurricanes are a fact-of-life in our Gulf and Atlantic coasts and hams are part of those preparedness efforts. Earthquakes threaten our Pacific Coast, especially California. And if it's not an earthquake, it's wildfire--and hams respond to both.

However, if you don't live in a place where the big hazard is well-known and frightening enough to focus your efforts on, it may be hard to have an ongoing mission to keep your volunteers energized. If that's the case, you need to find something for your people to do. It doesn't have to be directly emergency-related, though that would certainly help.

If you are searching for activities, first make sure Amateur Radio is included in scheduled emergency drills in your area. Second, if you have Community Emergency Response Teams <http://www.citizencorps.gov/cert/> (CERT) where you live, link up with them. CERT is a natural partner for Amateur Radio and many groups do a great deal of training. As do Search-and-Rescue (SAR) teams.

The bike ride, marathon, Christmas parade, and other community events aren't emergency-related, yet provide useful training. Anything that gives you a reason to place people in the field and support them with a net is close enough to a real event to be useful. Maybe a local Scout troop could use Amateur Radio support for one of its events. My local CERT group is now providing canteen service and air bottle filling for the fire department. This is a wonderful assignment and it is being coordinated using Amateur Radio.

I haven't even mentioned ARRL events, such as Field Day <http://www.arrl.org/field-day> and the Simulated Emergency Test

<http://www.arrl.org/chapter-2-simulated-emergency-test-set>, that are intended to offer emergency communications training. And if you are out of strictly ham ideas, how about training for the Incident Command System, CPR, and advanced first aid? You can also develop your own drills and exercises, just to test various elements of your ARES emergency plan.

The point I want to make is that active, engaged volunteers are what we need. If we aren't doing something big every quarter and little things in between, our volunteer resource is not as robust as it should be. A good Emergency Coordinator must work hard to create activities to keep ARES members trained and interested. And that's the kind of ARES members that will be there--skilled and ready--when we need them.--David Coursey, N5FDL, Tracy, California [See also http://www.n5fdl.com <http://www.n5fdl.com/> - ed.]

==> EOC-TO-EOC EXERCISE THIS MONTH IN WASHINGTON STATE

Quarterly exercises are held in Washington state to promote Amateur Radio voice and data connectivity among the state's EOCs. All counties across the state are invited to participate. The Camp Murray EOC is involved in this month's state-wide exercise. (Camp Murray is located adjacent to Fort Lewis <http://en.wikipedia.org/wiki/Fort_Lewis>, Washington. It is home to the Washington National Guard <http://en.wikipedia.org/wiki/Washington_National_Guard>, Washington State Guard <http://en.wikipedia.org/wiki/Washington_State_Guard> and the Washington Air National Guard <http://en.wikipedia.org/wiki/Washington_Air_National_Guard>). For this month's exercise on January 29, state-wide participants will test the capability of using simplex frequencies to contact neighboring EOCs. In addition to using simplex, they will test performance and efficiencies with an EOC that is minimally staffed and using team members located at home or some other off-site location to augment EOC communications. For Camp Murray, the goal is preparation for a scenario in which support staff is unable to travel to the Camp Murray EOC due to damaged infrastructure. The exercise mission is to contact as many stations as possible and to contact as many remote Camp Murray team members as possible.

A VHF net will be conducted with the net control station using WebEOC <http://www.esi911.com/esi/index.php> software to log who checks into the net and when they leave, as checking out of a net properly is just as important as checking in.

The use of the Winlink <http://www.winlink.org/>messaging system will also be promoted. The Camp Murray RACES station W7EMD will be minimally staffed. Many members of the team will be operating from off-site locations and will be using the tactical call of "EMD" with their assigned number after that. A call for Camp Murray may be answered by one of these stations.

For this exercise, simplex coverage will be tested. All EOCs will switch from repeaters to simplex frequencies and try to contact other EOCs. The net control stations will log information into WebEOC and the information will be available for all WebEOC users. A formal net will also run on 75 meters for coordination purposes. -- John Rader, AA7ZV, Camp Murray Station Manager, Washington State

==> LIMITED EDITION ARES 75TH ANNIVERSARY PATCHES AVAILABLE

The ARRL has agreed to permit the League's West Gulf Division officials to produce a limited number of ARES 75th Anniversary patches. The magic word is "limited." One production of the patches will be run. Once the patches are sold, no more will be permitted to be produced. The ARRL has not produced and does not intend to produce any 75th Anniversary patches. So the only Anniversary patches that will ever exist, will be the ones produced in this run.

The patches will be 3.5" in diameter, in full color and will have the blue 75th Anniversary banner at the bottom of the patch. Click here to order <http://www.tarefund.org/anniversarypatch.htm> and pay through PayPal or download an order form and mail the order form with a check to the address on the order form. Delivery will be January/February. -- John Robert Stratton, N5AUS, ARRL West Gulf Division Vice Director

==> SAN DIEGO SEARCHES FOR ARES TRAINING OFFICER

The ARRL San Diego Section is looking for an ARES Training Officer. This position will be immediately responsible for coordinating the ARES training program. Emphasis will be on preparing to provide emergency communications for various agencies. Standard training topics will be covered: Personal Conduct, National Incident Management System (NIMS), Message Handling, Basic Radio Fundamentals, Operations, and Safety. Some specialty training will also be coordinated, such as First Aid/CPR, HIPAA <http://www.hhs.gov/ocr/privacy/>, Hospital Orientation, Web EOC <http://www.esi911.com/esi/index.php>, Driver Safety, Wild Fire Safety Training and CERT Topics. Persons interested in this responsibility should contact Steve Early, AD6VI <ad6vi@arrl.org>, or attend the monthly ARES meeting at Scripps Memorial Hospital. Click here <http://www.sdgares.net/> for more info. -- Steve Early, AD6VI, San Diego Section Manager

==> MISSOURI SEC CHANGES

Dale Bagley, K0KY, Missouri Section Manager, has announced with regret that Dennis Gedeon, KB0NHW, has stepped down from the post of Section Emergency Coordinator. "Gedeon served as SEC for over two years and accomplished much during that time," said Bagley. He appointed more than 60 ARRL members to ARES leadership positions by encouraging an increase in participation by all ARES personnel, and by promoting the training of the membership. Bagley thanked Gedeon for his excellent service to the Amateur Radio emcomm community in Missouri as SEC.

Bagley has nominated Kenneth Baremore, W0KRB, of Battlefield, Missouri, to serve as the new SEC: "Baremore is an excellent candidate owing to

his outstanding record as District "D" District Emergency Coordinator and EC for Green County. Bagley said he was impressed with Baremore for many years observing his ARES meetings/forums presented during numerous hamfests. Bagley said he believed that Baremore has "great ability and knowledge that will serve him and the Missouri Section ARES well as he takes the reins as SEC."

==> MICHIGAN GROUP HONORS ONE OF ITS OWN

The Muskegon County Emergency Communication Services <http://www.mcecs.net/>, Inc. a local non-profit amateur radio group involved in emergency communications in Muskegon County, Michigan has awarded James Meyers, KC8PCJ, the "Al Ronning Outstanding Service Award." The award is given each December to a member of the group that has gone above and beyond the call of duty to the organization. This recognition is given in memory of Al Ronning, K8AER, who was an inspiration to other members of the group in his tireless effort in public service. Ronning was a member of the group that died in an automobile crash in December 2006. James Duram, K8COP, Emergency Coordinator for Muskegon County, awarded the plaque to Meyers at their December meeting.

==> LETTERS: AUTOMATING ICS-213 FORMS

I have been working with John Blowski, KB2SCS, on a program to somewhat automate the ICS-213 form. Blowski has developed a 213 program that when run, gives users an on-screen 213 form to fill out. The user can then select to e-mail it. The program then takes the user through a SAVE and an E-MAIL ADDRESS block and opens the user's e-mail client, which can then be used for Winlink, allowing for pasting the form information in as text ready to send.

Another feature lets the user alternatively send it as an attachment. If the receiving end user is also running the program, it can be opened and then printed. I think many might find this a very helpful program with emcomm groups using Winlink e-mail functionality. Click here <http://www.qsl.net/kb2scs/radioics-213.html> for more information. -- John Galvin, N5TIM <http://www.n5tim.info/>, Allen, Texas

==> TRAINING: WHAT IS THE INCIDENT COMMAND SYSTEM?

The Incident Command System (ICS) is a standardized approach to incident management that:

- Enables a coordinated response among various jurisdictions and agencies.
- Establishes common processes for planning and managing resources.
- Allows for the integration of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure.

The National Incident Management System (NIMS) provides a systematic, proactive approach to guide departments and agencies at all levels of

government, nongovernmental organizations, and the private sector to work seamlessly to prevent, protect against, respond to, recover from, and mitigate the effects of incidents, regardless of cause, size, location, or complexity, in order to reduce the loss of life and property and harm to the environment.

The National Response Framework (NRF) is a guide to how the Nation conducts all-hazards response - from the smallest incident to the largest catastrophe. This key document establishes a comprehensive, national, all-hazards approach to domestic incident response. The Framework identifies the key response principles, roles, and structures that organize national response. It describes how communities, States, the Federal Government, and private-sector and nongovernmental partners apply these principles for a coordinated, effective national response. -- FEMA <http://www.training.fema.gov/>

==> EMERGENCY COMMUNICATIONS ADVISORY COMMITTEE ROSTER

The ARRL ECAC (Emergency Communications Advisory Committee) was established at the January 2010 Board of Directors meeting to provide the Board with expert advice on emcomm policy issues facing the League. Each of the 15 ARRL Divisions has a representative on the ECAC. There is also a representative from Radio Amateurs Canada, a Board of Directors liaison, HQ staff liaison, and administrative liaison.

The following committee members are exceptionally qualified and recognized members of the emergency communications community. The committee reports to the Board's Programs and Services Committee. The activities of the committee are limited to studies of emergency communications issues that are national in scope. Here are your representatives by ARRL Division:

==> NORTH CAROLINA AREA 11 DEC APPOINTS NEW EMERGENCY COORDINATOR

North Carolina ARES Area 11 District Emergency Coordinator (DEC) Gary Lang, K4GHL, recently announced the appointment of Jared Gohlke, KJ4WWG, to the position of Rowan County EC.

Gohlke, a 10 year resident of Kannapolis, North Carolina, is a certified Law Enforcement Officer with over nine years on the job working for the Kannapolis Police Department. He is a certified traffic crash reconstructionist, field training officer and a radar operator. He is a member of both Rowan and Cabarrus Amateur Radio Clubs.

Rowan County ARES consists of many members of the Rowan County Amateur Radio Society who assist not only local government entities but other non-governmental agencies as well, including the EH Dole Red Cross chapter and the United Way of Rowan County.

Rowan County ARES operations are not limited to communications support for government agencies, but also historically assist with bicycle races, foot races, and other general public events where radio communications are needed. Rowan County ARES holds a weekly on air training net on the N4UH repeater. More information here <http://www.rowancares.org>. -- Gary H. Lang, K4GHL, North Carolina ARES Area 11 District Emergency Coordinator

==> NEIGHBORHOOD DISASTER TABLETOP EXERCISES FOR CERTS, NEIGHBORHOOD WATCH PROGRAMS

A team of national, regional and state organizations invites Community Emergency Response Teams (CERT) and Neighborhood Watch programs along with Neighborhood Associations to participate in one of the scheduled disaster tabletop exercises being facilitated via the Internet.

These exercises have been designed specifically for organizations that work to support the disaster caused needs of community and neighborhood residents during and following a disaster. By participating in one or several of these exercises you will be able to assess your organization's existing disaster response capabilities. There is NO CHARGE for participation in any of the exercises. Six distinctive exercise scenarios are available:

- Earthquake
- Flood
- Hurricane
- Influenza Pandemic
- Tornado
- Wildfire

For additional information and registration click here <http://www.drc-group.com/project/footprint.html>. -- submitted by James Burrough, N5DTT, Bellaire, Texas [I have not vetted this program other than briefly assessing its Web site, but it looks like it is worth considering for exercise opportunities for ARES groups. Feedback would be welcomed. -- K1CE]

==> TIPS

Possible Solution for ARES Call-Up Tree

Here is a possible solution for ARES leadership needing a phone tree service for alerts and warnings: The One Call Now™ phone message service <http://www.onecallnow.com/Default.aspx?gclid=CN2tqIX9waYCFUJm7Aod4l0xIw>. According to its Web site, it "delivers automated phone calls, within minutes, to any group, large or small. Schools, congregations, sports teams, businesses and municipalities throughout the country rely on us

for routine reminders and emergency notifications. Our multi-dimensional and multi-lingual emergency notification service delivers your messages via voice, text to speech, SMS text, and e-mail."

Although I haven't personally tested the service, it might be worth considering for your group -- K1CE

How To Use a DSTAR Reflector

There is a good discussion of how to use a DSTAR Reflector System here <http://nefl-dstar.com/blog/2011/01/13/2559/>, courtesy of the Northeast Florida DSTAR Repeater Network

==> K1CE FOR A FINAL

I quickly fulfilled one of my New Year's Resolutions by becoming a proud ARRL Life Member this month! I have no idea why it it took so long to do it, having been a member of the League since 1976, but I am glad I finally took the plunge. See you next month! 73, Rick K1CE

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

Rare Square Activation - QE48 / Rex VK7MO has asked me to pass on the news that he will be active on Mt Poimena (QE48) in north-eastern Tasmania this Sunday 23/1 from about 11am local time. The coords of Mt Poimena are 41.198734S 148.012078E. Rex will have 2m 70cm, 23cm and 10GHz and will also, of course, be able to run JT65 on any of those bands, if required. The operation will require lugging equipment and generator up a 600m path to the summit, so it is unlikely to be repeated anytime soon. Rex will be in mobile range and should also be available on the VK Logger.

** Working K5QE (EM31CJ) in the ARRL VHF Contest **

Hello to everyone in the EME community. This year, the ARRL
January VHF Contest will be held Jan 22nd and 23rd. We want to
work as many EME stations on 2M and 432 as possible to increase
our grid count. Please help us with this event by working us on
JT65b or CW. Thank you very much. Read all about the Contest
activity in details at: http://www.mmmonvhf.de/latest.php?id=3672
SOURCE: tnx to Marshall, K5QE, direct to MMMonVHF

** KL7AA (BP51) qrv in the ARRL VHF Contest **

Running new EME stn at KL7AA Club site (BP51BE)
Active primarily 144mhz after 0800z 23jan2010.

** KB7Q/7 QRV from WY and ND on 6m EME? **

Hi Lance, I'm up to put ND and WY on 6M EME this summer - it would
be nice to know how much interest there is. It looks like early June
and then early July are the best windows, from what I quick run of
GJTracker tells me. I might just spring for a bigger Yagi too. Good
going on all the new EME contacts and the potential for more! Just
keep that freezing rain away! The weather is global warming crazy
Today Bozeman is 44 degrees and swampy - go figure. Anyhow, let the
EU boys know that I'm good for ND/WY this summer if I get enough
interest. and on we go...
SOURCE: Gene, KB7Q, via Lance, W7GJ, EME Magic-Band Reflector

** 6M EME TF3CY (HP94AD) QRV 20-23jan 2011 **

Hi all, I will be with my portable setup on a pretty good spot
during next low degradation period on 6m EME. Setup is limited
to wind ï¿½ and the forecast is bit iffy for the Tuesday/Friday ï¿½
but showing pretty calm weather for late Friday and sat/sun. So,
my aim is to get as many QSOï¿½s as possible ï¿½ and to give you TF
in the log ;) Read about the LOG and more details at our NEWS:

** M & M EME DXpedition 2011 **

Gents, glad to announce that the M & M - team will be on the road(?)
again for another multiband moonbounce DXpedition from May 28th to
June 5th 2011. The activity will cover the 23cm DUBUS contest, as in
previous years. The destination will not be disclosed in advance,
but it will be an interesting location with a hard to get license...
So keep this time frame free from other commitments, which might
keep you from giving us a shout off the rock. 73 de M & M

** Maya Beach, Placencia, V3, qrv HF and 50 MHz **

Darren, VA3EGG, will be on as V31DI this month (no exact date) on
Maya Beach, Placencia, using 160 through 6 m, mainly 6, 20 and 40m
on SSB. QSL via home call, "direct only".
SOURCE: [DXNL] DXNL 1710 (Dec 12, 2011)

** IOTA Activity of PR2R from SA-024 **

Members of the Sï¿½o Paulo Association of Radioamadores (APRE) along
with some guest operators will be active as PR2R from Ilha Comprida
(Comprida Island; DIB SP03), located in the southern state of Sao
Paulo, between January 28-30th. Activity will be on 80/40/20/15/10
/6/2 meters. Operators mentioned are: Paulo/PY2ZZ, Euclides/PY2EV,
Claudio/PY3NZ, Cristiano/PY3UK, Ronan/PY2RAR, Marcelo/PY2OX,
Filipe/PU2TEA and Rafael/PU2RFS. QSL via Manager PY2OP ,
(see QRZ.com for details. The activation of this island
corresponds to a project of more complex dimensions that consist
of placing on the air all blockhouses, islands and lighthouses of
the State of Sao Paulo. More detailed information will be
available soon at: http://www.apre.com.br
SOURCE: tnx to Bill, NG3K via Ohio/Penn DX Bulletin #994

** FJ, ST. BARTHELEMY qrv HF and 50 MHz in May **

Wim, OS1T/ON4CIT, will be active as FJ/OS1T from St. Barthelemy Island (NA-146, DIFO FJ-001, WLOTA LH-0377) between May 14-22nd. Activity will be on 40-6 meters using mainly SSB and RTTY.
The suggested frequencies are:
SSB - 7072, 14192, 18132, 21292, 24972, 28492 and 50115 kHz
RTTY - 7042, 10142, 18102, 21082, 24922 and 28082 kHz
QSL via his home callsign, by the Bureau or direct (see QRZ.com)
Visit his FJ/OS1T Web page at:
http://on4cit.webs.com/fjos1texpedition2011.htm
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #994

** Activity on HF and 50 MHz in April from T31 **

The expected QRV dates for the upcoming T31A DXpedition to Kanton Island (Central Kiribati, OC-043) [425DXN 1015] are 18-28 April. An international team of twelve operators (namely EA1IR, K6ZH, N1EMC, N6HC, N7CQQ, N7CW, N9NS, UX2HO, W2IJ, W6KK, W9IXX and YT1AD) will be active on 160-6 metres SSB, CW and RTTY from two operating sites. Two team members will arrive in Apia on 6 April to inspect the equipment shipped from California and operate from 5W as time allows. The entire team will leave Apia on the 13th, and sail approximately four days. QSL via W2IJ, direct or bureau. Further information can be found at www.t31a.com
SOURCE: [425ENG] 425 DX News #1028

** JX, JAN MAYEN qrv HF and 50 MHz in July **

The Jan Mayen DXpedition set between July 6-14th, 2011 and led by Stan, SQ8X, has announced their group callsign will be JX7VPA. Currently, the team consists of: Stan/SQ8X (team leader), Pete/ SQ9DIE, Vicky/SV2KBS, Decan/EI6FR, Leszek/NI1L, Tomek/SQ9C, Bernie/HB9ASZ, Pekka/OH2TA and Deon/K6WH Deon. The group plans to be on the air for 8 days with 2-3 stations. Stan also states, "Due to polar summer season at Jan Mayen Island with broad daylight 24/7 the team will not operate on 160-80 meters ? those bands will be totally dead at that time. The DXpedition will focus on 30-6 m. and our main modes will be CW and RTTY/PSK, with some SSB if conditions will be good enough to operate as much as we wish to. The team will also check conditions on the 40m band, but the band may also be not usable at that time of the year. The team will have a professional TV crew on board that will prepare a broadcast documentary about the project and the island." Updated details such as operators and QSL route will be available soon on the following Web page (currently under construction) at:

TURKEY TO FLY IN 2012

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING JANUARY 23 2011.

Commercial radio recognised in VK2 for emergency services info.

Chief executive officer of Commercial Radio Australia, Joan Warner has
welcomed the signing of a memorandum of understanding (MOU) with the
NSW Government, making commercial radio stations official providers of
emergency services information.

Ms Warner said the NSW MOU follows a similar arrangement with the Victorian, South Australian and Queensland Governments.

"The industry has argued for some time for commercial radio to be included and promoted as an official provider of information in emergencies, along with the ABC.

COPPER THIEVES FOIL COPPERS.

A major power failure caused rail delays on Victoria's Belgrave line, the cause was the theft of copper wire near Upper Ferntree Gully Station early in the morning, down by the station.

A unknown length of copper wire was dug out of the ground and cut free by thieves, this then cut power to the signalling system at Upper Ferntree Gully.

Trains between Upper Ferntree Gully and were replaced by buses until normal service could be resumed about 8.30am.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

22nd December last year the WIA advised that the ACMA had made amendments to the Amateur Licence Conditions Determination (LCD) and the Visiting Overseas Amateur Class Licence.

The WIA has now placed the consolidated versions of these amendments, for easier reading. Follow wia.org.au to Members/Legislation

All amateurs must make themselves aware of their licence conditions to avoid that "knock" on the door from ACMA Inspectors.

HAMS ACROSS AUSTRALIA.

VKG Roundup http://www.police.nsw.gov.au/news

Unknown 53.575mhz heard in Townsville

Mystery broadcast is coming from Snowy Mountains Amateur Radio Club On VK2RSM 6 meter repeater,

Signal reports have come in from VK2, VK3, VK4, VK5 and one VK9!

Plans to re-broadcast WIA National news latter this year on 2 meters.
Two new 2 meter repeaters, linking into their existing 2 meter repeater.

The new ones are in the Jindabyne area and Nimmitebel / Bomballa area this should give the southern NSW a greater ham coverage.

If any more info needed pls contact:-

Fred Staples

fred@highcountrycommunications.com.au

Next Sunday, the 30 th, will be the first Trash and Treasure at VK2WI Dural for this year. From about 0930 hours. Boot sales most welcome. The Home Brew Group will meet as usual in the afternoon with a technical presentation about designing and building HF transmitters and receivers. Exam assessments will be available in the morning. Next month at the Central Coast Hamfest - there will also be exam assessments.

February 4th, EMDRC's meeting in the Willis Room will be "Magnetic Loop Antenna's".
Dieter Pelz VK3FFB will explain all there is to know re HF Magnetic Loops.

(emdrc news)

Feb 14th the Annual Luncheon of the 160 Mtr Coffee Break Net Group will be In the Bistro at the Mountain View Hotel 186 Springvale Rd, Glen Waverley, Victoria.

All amateurs with an interest in 160 mts are welcome

Please RSVP to John VK3DQ@wia.org.au
by Friday 11th February

(www.mountainviewhotel.com.au)

This is a final call to commercial traders, Club Corner participants and second-hand sellers.

Time is quickly running out to be part of Centre Victoria RadioFest No. 4.

All is ready for the major event in Victoria.

Features this year are the DXpedition, yet to be held, light beam communications, emergency communications on display, heads up on the IARU-Region 3 Championships as well as the Bendigo Astronomical Society gazing at the solar surface.

See you at the Centre Victoria RadioFest, Kyneton Racecourse, just an hour from Bendigo, Ballarat and Melbourne.

Sunday the 13th February.

I'm Bruce Lees, VK3FFF and you're tuned to VK1WIA

Theft puts GB3JB off air

GB3JB, the 2m repeater located on the borders of Wiltshire, Somerset and Dorset, was powered by wind and solar power. The solar panel has been stolen from the site and so GB3JB was switched off on 3rd January.

The repeater keeper will be checking the site for damage to the batteries or the wind turbine.

The YASME Foundation supports the development and promotion of Amateur Radio around the world.

The YASME Excellence Awards are given to individuals who through their own service, creativity, effort and dedication have made a significant contribution to the cause of Amateur Radio.

Now we learn that a Canadian Amateur has won an YASME award, Alex VE3NEA for developing DX Atlas, Morse Runner, HAM-CAP, CW Skimmer, Rocky and other innovative software.

Alex's products are making a remarkable impact on the competitive HF operating environment. Making this software available to the amateur community at little or no cost demonstrates excellent ham spirit.

10 YEAR OLD DISCOVERS SUPERNOVA

Kathryn Gray, of Fredericton, New Brunswick, Canada, made her discovery this past New Year's Eve. This, after noticing what was later determined to be a magnitude 17 supernova, or exploding star.

The supernova took place in the distant galaxy known as UGC 3378 which is about 240 million light years away from Earth. The Royal Astronomical Society of Canada says that at age 10, Kathryn is definitely the youngest person ever to make such a discovery. A finding which has since been verified by amateur astronomers in Illinois and Arizona. It also has been reported to and confirmed by the International Astronomical Union.

The last known supernova in our galaxy occurred several hundred years ago.

The new one discovered by Kathryn has been named 2010LT.

ALLEGED HONEYBEE SHOOTER WAS A HAM

A ham believed to be the so called possible 'honeybee' shooter is dead.

KC9AWD, was shot with his own gun while apparently trying to rob an Illinois tanning salon.

Last October, three men were shot, one fatally, near the Illinois-Indiana border. The shootings appeared entirely random. One victim, a farmer, had a conversation with the shooter about honeybees before he was shot, earning the killer his nickname of the honeybee shooter.

An unnamed family friend alleges, KC9AWD showed no earlier signs of violence. But something apparently changed in the man from tiny downstate Rankin, Illinois this past summer after he lost his job at a Milford trucking company. By October, when the "honeybee" shootings started, he had cut off ties with even his closest friends.

Charlotte AM station ready in case of terrorist attack

WBT-AM (1110) in south Charlotte, North Carolina, is one of a dozen US commercial stations fitted out by the US government with an underground studio and transmitter, and a generator with 30-day fuel supply, designed to withstand a nuclear or terrorist attack.

WBT was selected because it reaches both of the Carolinas. At night, its 50,000-watt signal arcs like a blowtorch [sic] across the East from Canada to Cuba.

The installation is a result of Executive Order 13407, issued in 2006 by President George W Bush, which called on the Department of Homeland Security

to develop "a comprehensive system to alert and warn the American people in situations of war, terrorist attack, natural disaster or other hazards - and ensure that under all conditions the president can communicate with the American people."

NEWS FROM ARNEWSLINE USA

ITALIAN REPEATERS ALLEGED TO BE INTERFERING WITH HAMSATS

According to a report in the Southgate News, both F-M and D-Star repeaters in Italy are showing up in the Amateur Satellite segment 145.8 from 146.0 MHz.

These machines are said to be government approved by Italy's Communications Regulatory Authority and are causing considerable interference to amateur radio satellites and the International Space Station contacts

Some of the Italian repeaters identified in the article as operating in the 2 meter Amateur Satellite allocation are said to include F-M machine IRE0CK on 145.85 MHz plus D-Star systems IR3UEF on 145.8 MHz and IR0CD on 145.975 MHz.

The Southgate story says that it would appear that Italy's telecommunications regulator permits repeaters anywhere within the 2 meter band on a provisional basis for 60 days. Authorization may become permanent if no complaints are received. The article calls on hams worldwide to make sure that the Italian telecommunications regulatory body is made aware of any problems.

This is not the first time that there have been interlopers into the ham satellite spectrum. Over the years there have been numerous reports of terrestrial business communications using these frequencies and eventually disappearing. Most of these reports came out of third world developing nations.

The situation in Italy will be quite different if its proven that the repeaters alleged to be interfering with ham radio space operations have government approval to do so.

The Complete story of this repeater versus ham radio satellite interference is on-line at tinyurl.com/497bag7.

The website for Italy's Italy Communications Regulatory Authority in the Italian language is www2 dot agcom dot it. And we will have more ham radio space related news later on in this weeks Amateur radio Newsline report. (Southgate)

N6R TO CELEBRATE FORMER PRESIDENT REAGAN'S 100th BIRTHDAY

To celebrate what would have been former President Ronald Reagan's 100th Birthday, the Ventura County Amateur Radio Society will activate Special Events Station "N6R" from Thousand Oaks, California. This, from Saturday, February 5th through Monday, February 7th.

And for those not aware, the special N6R callsign has been used for many years in a multi-club Field Day operation from the grounds of the Ronald Reagan

Presidential Library and Museum which is located in Simi Valley, California.

MISSISSIPPI JAILS TO EXPAND INMATE CELLPHONE BLOCKING

Mississippi corrections officials say a new inmate phone-block system has worked so well at the Parchman penitentiary they will expand it to other state prisons.

Corrections Commissioner Christopher Epps told The Clarion-Ledger newspaper that the use of the technology has blocked more than 600,000 unauthorized texts and cell-phone calls originating inside Parchman since August.

Last fall, the state Department of Corrections announced it had signed a contract with its telecommunications provider for a program designed to immobilize illegal cell phones used by inmates at the Parchman prison.

Epps said the system stops cell transmissions in defined areas from being completed but does permit specifically authorized and 911 emergency calls.

Since 2007, officials said, more than 8,700 cell phones have been confiscated at Mississippi jails and prisons.

==========

RSGB NEWS FROM G4NJH

Cadets' usage of 5MHz WSPR clarified

Non-amateur cadet stations have been getting long-distance reports of their 5MHz transmissions using the amateur Weak Signal Propagation Reporting network but problems have arisen with their unusual callsign formats.

Consultation between the RSGB 5MHz working group and the cadet organisations has resolved these.

CCF, ACF and ATC cadets are permitted to communicate with amateurs on the 5MHz channels and some have been trying the WSPR mode on 5,288.5kHz. A large number of amateur stations worldwide monitor this frequency and report the signals heard via the wsprnet.org website. However, the WSPR transmission format is only capable of coding regular amateur callsigns of the prefix, digit, suffix format, but the cadet callsigns are not in this form. After some initial trials by cadets it was clear that any ad-hoc modification of cadet callsigns could cause trouble.

To avoid the possibility of misleading or confusing callsigns being seen on WSPR, the RSGB 5MHz working group has suggested that the cadets modify their callsigns by transposing the digits and the letters in the cadet callsign and in some cases adding an initial letter M. This creates a dummy amateur callsign in the form M89X or M89YZ. The cadet organisations have agreed to implement this suggestion, which will make it possible to correctly identify transmissions from these cadet stations.

22nd anniversary Ann Renton Memorial Net this Tuesday

One of the friendliest radio nets in the land happens Tuesday evenings from 7-30pm on the Townsville VHF Repeater ... the Ann Renton Memorial Ladies Net!

It is the 22nd anniversary of the establishment of the Townsville Ladies Net, so make sure you are on air to help celebrate this fantastic event!

The Tassie Trout Award is awarded for "kilograms of trout" or points from contacts made with Central Highlands Amateur Radio Club of Tasmania members.

The Club callsign gains you 3kg of trout, the President, 2kg, etc.

Once you have 14kg of trout you can claim the basic award,
25kg - gold award and 50kg - platinum award.

http://www.qsl.net/charct/award.htm

ALARA AWARD

The aim is to score 10 points to qualify for the Award.

This Award is available to YLs, OMs and SWLs contacting ALARA members on or after 1st July 2006.

Scoring VK/ZL: 10 contacts, including 4 Australian call areas.

DX: 5 contacts, including 3 Australian call areas.

All contacts must be made from the same call area.

Special endorsements available for Mixed, CW, Phone, 28MHz, etc.

To find out more Google ALARA or contact Kathy, VK3XBA

kathyg@spacelink.com.au

Diego, LU8DIP will be on various South Shetland Islands from now to the middle of March as LU8DIP/Z and LU1ZS on Base Teniente Camara Half Moon Island.

TURKEY TO FLY IN 2012

Turkey plans to send its first ham radio communications satellite into orbit in September of 2012. This according to a report published by the semi-official Anatolia news agency.

The report says that the satellite is to be called 3USAT. Also that it is being developed at the Department of Space Engineering of the Istanbul Technical University. The project will be launched by Turkey's satellite communications operator Turksat.

Alim Rustem Aslan heads up the team manufacturing the satellite. He says that it will provide wireless voice transmission over an amateur band between two groups of people at two distant locations, but he did not specify which bands or what modes the new bird will operate on.

(ARNEWSLINE)

FUNcube, plus your name in space

FUNcube Dongle Pro serial number #200 is being auctioned on EBay - the purchaser will also have their name or callsign sent into space.

Howard G6LVB writes:

"A few minutes after Friday's sale, I had a purchaser change their mind, so rather than add the spare unit to the next sale, I'm making it generally available with all proceeds from the sale going towards AMSAT-UK launches.

Although every FUNcube Dongle sold adds to the AMSAT-UK coffers, this special unit, serial number 200, is sold with the added bonus that your name or callsign will be etched into the FUNcube spacecraft when it's launched in the next few months".

See the EBay auction page at

Many drugs can only be absorbed in very specific parts of the intestine.

In a new paper, Brown University scientists describe a new system that can safely hold a magnetic gelatin capsule in place anywhere in the gastrointestinal tract of a rat. In humans, the system could improve drug delivery and pharmacological research.

Applied to people in the future, the technology could provide a new way to deliver many drugs to patients, including those with cancer or diabetes.

SILENT KEY: AMERICA'S OLDEST SCOUTER, WOODY WOODWARD, W7KOP (SK)

Leonard Andrew "Woody" Woodward, W7KOP, of Mapleton, Utah, passed away December 25, 2010. He was 99.

Woodward, who, according to the Boy Scouts of America, was the "longest continuously registered Scouter" was involved with scouting for more than 87 years.

BSA's Utah National Parks Council Program Director John Gailey called Woodward "an amazing man" and told the ARRL that his friend was still "very much active on the air weeks before his death."

At the age of 8 in 1918, Woodward built his own radio. At the time of his death, he was using the Internet to connect Amateur Radio operators around the world.

Woodward was known all over the world as an unofficial ambassador of America and Scouting through his radio contacts.

AMATEUR RADIO EMERGENCY COMMUNICATIONS ENHANCEMENT ACT REINTRODUCED BEFORE US CONGRESS

New life for a ham radio emergency communications measure.

The Amateur Radio Emergency Communications Enhancement Act, which died at the end of the 111th Congress, has been reintroduced in the 112th Congress.

The objective of the bill which is supported by the ARRL is for the Secretary of Homeland Security to study the uses and capabilities of Amateur Radio communications in emergencies and disaster relief. Also it would identify and make recommendations regarding impediments to amateur radio communications, such as the effects of private land use regulations on residential antenna installations.

(ARNEWSLINE)

REWIND

Queen's Speech: history of the royal Christmas broadcast

The Queen's grandfather King George V delivered the first royal Christmas broadcast live on the radio from Sandringham more than 75 years ago.

1932 he gave his first festive speech.

The original idea was suggested by Sir John Reith, the founding father of the BBC, to inaugurate the Empire Service, now the BBC World Service.

The fixed time of 3pm each year was chosen in 1932 because it was considered the best for reaching most of the countries in the British Empire by short wave.

It would reach, thanks to propagation, Australia, Canada, India, Kenya and South Africa.

It was the outbreak of war in 1939 which firmly established the tradition, when George VI sought to reassure people and boost morale.

Now of course the speech is available on TV, radio, internet, the Royal Channel on YouTube and in HD.

==> + FCC NEWS: ARRL FILES PETITION FOR PARTIAL RECONSIDERATION WITH
FCC REGARDING VANITY, CLUB CALL SIGNS
```

In October 2010, the FCC released a Report and Order, detailing rules changes to the vanity call sign system and call signs for Amateur Radio clubs. These new rules are scheduled to go into effect on February 14. The ARRL found that most changes made by the R&O are "reasonable codifications and clarifications of existing policies." But several amended Sections of Part 97 -- including ¬¬ 97.5 and 97.19 -- are unclear. As such, the ARRL filed a Petition for Partial Reconsideration, urging the FCC to reconsider and modify these portions "in order to reflect the intent of the Report and Order."

In the R&O, the FCC took into consideration some of the ARRL's comments, but not all. The ARRL found it "disappointing" that the

Commission refused to consider in this proceeding "a series of reasonable proposals aimed at increasing the available pools of Group A call signs." The ARRL, in its comments, asked the FCC to consider several changes that could be made "that would increase the number of desirable call signs available for assignment, both sequentially and in the vanity call sign program, and which would provide greater flexibility in the temporary assignment of special-event call signs in the Amateur Service." Read more here <http://www.arrl.org/news/arrl-files-petition-for-partial-reconsideration-with-fcc-regarding-vanity-club-call-signs>.

==> + BPL: IEEE EMC SOCIETY STANDARDS DEVELOPMENT COMMITTEE WITHDRAWS AS COSPONSOR OF IEEE BPL EMC STANDARD

Citing concerns about parts of its technical content, the IEEE EMC Society Standards Development Committee (SDCom) has voted to withdraw as the cosponsor of IEEE Standard for Power Line Communication Equipment -- Electromagnetic Compatibility (EMC) Requirements -- Testing and Measurement Methods (IEEE Standard 1775-2010). According to ARRL Laboratory Manager and BPL guru Ed Hare, W1RFI, this decision came about soon after the IEEE Standards Board approved publication of the standard over the technical concerns of the SDCom. Hare is an SDCom member and is a member of the IEEE Working Group that developed the standard. Read more here <http://www.arrl.org/news/ieee-emc-society-standards-development-committee-withdraws-as-cosponsor-of-ieee-bpl-emc-standard>.

==> + ON THE AIR: LOGBOOK OF THE WORLD NOW SUPPORTS VUCC

ARRL's Logbook of the World (LoTW) -- an online system for amateurs to confirm two-way contacts that can be used for various ARRL awards -- has been upgraded to support awards based on Maidenhead grid squares, such as VUCC and the Fred Fish Memorial Award. To take advantage of the new features, you need to log in to your LoTW account. VUCC is an open-ended award in that hams can work on throughout their lifetime, just like DXCC. But, like the Worked All States award, the VUCC rules require all the contacts to be made from a defined area. For VHF and UHF QSOs on 1296 MHz and below, this distance must be within 200 km. For SHF awards, contacts must be made from a single location, defined as within a 300 meter diameter circle. As such, the VUCC support in LoTW allows you to make the rule -- or rules -- necessary to find the QSLs in LoTW that satisfy the VUCC rules. Don't have an LoTW account? It's easy to sign up. Read more here <http://www.arrl.org/news/logbook-of-the-world-now-supports-vucc>.

==> AMATEUR RADIO IN SPACE: NASA SEEKS AMATEUR RADIO OPERATORS' AID TO LISTEN FOR NANOSATELLITE'S BEACON SIGNAL

On Wednesday, January 19 at 1630 UTC, engineers at Marshall Space Flight Center in Huntsville, Alabama confirmed that the NanoSail-D nanosatellite ejected from Fast Affordable Scientific and Technology Satellite (FASTSAT). According to NASA, the ejection event occurred

spontaneously; the ejection of NanoSail-D also has been confirmed by ground-based satellite tracking assets. NASA is asking radio amateurs to listen on 437.270 MHz for the signal and verify NanoSail-D is operating. Hams should send information to the NanoSail-D dashboard. As of Thursday, January 20, the NanoSail-D dashboard website is reporting that beacon data has been received, but NASA still wants amateurs to track and report the signals. Read more here <http://www.arrl.org/news/nasa-seeks-amateur-radio-operators-aid-to-listen-for-nanosatellite-s-beacon-signal>.

==> + ARRL BOARD OF DIRECTORS TO MEET THIS WEEKEND

The ARRL Board of Directors will hold its 2011 Annual Meeting on January 21-22 in Windsor, Connecticut. Directors, Vice Directors and ARRL Board Officers will be in attendance. The meeting will be preceded on Thursday, January 20 with meetings of the Board's Administration and Finance Committee and Programs and Services Committee.

The Administration and Finance Committee is chaired by Northwestern Division Director Jim Fenstermaker, K9JF. This committee reviews and makes recommendations for all administrative and financial matters of the League. Some of these duties include recommending the annual budget to the Board, making recommendations in regard to staff management and monitoring investment of ARRL funds. "The Administration and Finance Committee is involved in overseeing the 'business side' of Amateur Radio from the standpoint of the ARRL," Fenstermaker explained. "We are committed to ensuring that members' needs are being served while being fiscally prudent. This requires an understanding of the financial structure of the ARRL while, at the same time, working with the administration to implement cost effective and relevant programs. We are in a sound financial position and work to continue this status. Thanks to our headquarters staff for focusing on the trade-offs needed to foster this stability."

The Programs and Services Committee (PSC), headed by Atlantic Division Director Bill Edgar, N3LLR, studies, advises and makes recommendations for all programs and services provided by the League, including operating activities and the Field Organization. "In January, the Committee recommends to the Board who will receive various ARRL awards, such as the International Humanitarian Award and the George Hart Distinguished Public Service Award," Edgar said. "This year, we split the committee into two sub-committees. These two sub-committees are the Radiosport sub-committee and the Field Services sub-committee. The Radiosport sub-committee reviews the ARRL's contesting and awards programs, while the Field Organization sub-committee reviews the ARRL Field Organization, such as public service, education and other similar programs.

Edgar said that the PSC also oversees four advisory committees: the Contest Advisory Committee (CAC <http://www.arrl.org/arrl-staff-vuac-cac>), the DX Advisory Committee (DXAC <http://www.arrl.org/dx-advisory-committee>), the Emergency

Communications Advisory Committee (ECAC
<http://www.arrl.org/files/file/ECAC%20Roster%20for%20Web%282%29.doc>)
and the VHF UHF Advisory Committee (VUAC
<http://www.arrl.org/arrl-staff-vuac-cac>). Each Division Director
appoints a representative from their Division to participate on each
advisory committee. To serve on an advisory committee, the
representative must well-versed and respected in their particular area
of expertise."

The agenda for the 2011 Annual Meeting is available here
<http://www.arrl.org/attachments/view/News/56557>. Per the Articles of
Association <http://www.arrl.org/arrl-articles-of-association> the ARRL
Board of Directors meets twice a year, in January and July.

==> + FOCUS ON YOUTH: ARRL SEEKS NEW YOUTH EDITOR

The ARRL has a proud tradition of promoting youth involvement in
Amateur Radio. One of the ways we involve young people in our hobby is
through our Youth Editor. This person is responsible for writing a
monthly column for the ARRL website about youth and youth activities
within the Amateur Radio Service. We are looking for a new Youth
Editor. Do you know of someone who would be a good fit for this
position? Maybe they hold leadership positions either in their Section
or in their local club. The candidate must be an ARRL member and must
keep their membership current throughout their tenure in the position.
He or she will be required to write a monthly column of at least 1000
words and provide a minimum of three pictures (with captions) for each.
For this, they will receive a small stipend for each column. Read more
here <http://www.arrl.org/news/arrl-seeks-new-youth-editor>.

==> + ARRL FOUNDATION SCHOLARSHIP APPLICATIONS AND TRANSCRIPTS DUE
FEBRUARY 1

Students planning to apply for the more than 60 scholarships
administered by the ARRL Foundation should be aware that the deadline
is fast approaching. All materials -- including transcripts -- are due
February 1. Beginning this year, applicants must submit all material
electronically. No paper forms will be accepted. Read more here
<http://www.arrl.org/news/arrl-foundation-scholarship-applications-and-transc
ripts-due-february-1>.

==> SOLAR UPDATE

Tad "Like a comet pulled from orbit as it passes a Sun
<http://www.youtube.com/watch?v=H5WNeBZ4rBU>" Cook, K7RA, reports: The
average daily sunspot numbers dropped from 50 to 38 on January 6-12 and
now 21.3 on January 13-19. The average weekly solar flux over the same
three periods dropped from 89.5 to 83.8 to 80.4 over this past week.
The latest solar flux prediction shows a value of 82 for January 20-26
and 88 on January 27-30, followed by 87, 85, 85 and 84 on January
31-February 3. Geomagnetic predictions have the planetary A index at 5
over the next couple of weeks, except for a value of 7 on January 22

and February 2-4. Look for more information -- including updated indices, an article on a 3D model of the ionosphere and information on an online propagation prediction program using VOACAP for generating coverage maps and point-to-point MUF data -- on the ARRL website on Friday, January 21. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Stephen Schwartz's For Good <http://www.youtube.com/watch?v=H5WNeBZ4rBU> from the musical Wicked <http://en.wikipedia.org/wiki/Wicked_%28musical%29>.

==> THIS WEEK ON THE RADIO

This week:

- January 21 -- NCCC Sprint Ladder
- January 22-23 -- BARTG RTTY Sprint
- January 22-24 -- ARRL January VHF Sweepstakes <http://www.arrl.org/january-vhf-sweepstakes>
- January 26 -- SKCC Sprint
- January 27 -- NAQCC Straight Key/Bug Sprint

Next week:

- January 28-30 -- CQ 160 Meter Contest (CW)
- January 29-30 -- REF Contest (CW); BA DX Contest (SSB); SPAR Winter Field Day
- January 30-31 -- Classic Exchange (CW)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 28-29 -- ARRL Mississippi State Convention <http://www.msham.org/hamfest.php>, Jackson, Mississippi
- February 5 -- ARRL South Carolina Section Convention <http://www.arrl.org/hamfests/south-carolina-section-convention-1>, North Charleston, South Carolina; ARRL Virginia State Convention <http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2011>, Richmond, Virginia
- February 11-13 -- ARRL Southeastern Division Convention <http://www.arrl.org/hamfests/southeastern-division-convention-orlando-hamcation>, Orlando, Florida
- February 18-19 -- ARRL Arizona State Convention <http://www.arrl.org/hamfests/arizona-state-convention-yuma-hamfest-emergency-preparedness-show>,

Yuma, Arizona
- February 26 -- ARRL Vermont State Convention
<http://www.arrl.org/hamfests/vermont-state-convention-ham-con-1>,
Colchester, Vermont

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1745 - January 212011 Amateur Radio
Newsline report number 1745 with a release date of Friday, January 21,
2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. A writer for Worldradio Online says Morse
code use is on the rise, NASA ask hams to help monitor for NanoSai-D,
one of the Italian 2 meter repeaters interfering with ham radio space
communications goes QRT, Logbook of the World now available to hams who
use the world above 50 MHz and a ham radio legend is about to turn 100.
Find out who on Amateur Radio Newsline T report number 1745 coming your
way right now. (Billboard Cart Here)

RADIO SURVEY: WORLDRADIO COLUMNIST SAYS MORSE USE

UP

The use of Morse code is up. So says a writer for Worldradio Online
Magazine. Amateur Radio Newsline's David Black, KB4KCH, is in our
South-East bureau with the details:

--

In the current no-code era of amateur radio, you
might think no one's using code. But that's not
what an analysis by WorldRadio Online columnist
Randall Noon, KC0CCR, suggests.

The FCC dropped the Morse code testing
requirement back in 2007. Since then, Noon's
research indicates that levels of on-air ham
activity and Morse code usage have increased.

Noon writes about his analysis in February's
issue of WorldRadio Online. He looked at a
combination of FCC licensing statistics and
published results of ARRL Field Day activity from
2005 to 2009. He used Field Day data on the
assumption that Field Day participants are at
least minimally active ham radio operators.

Noon compared statistics for Field Day activity
with the total number of licensees. Noon
determined that both the raw number and the
percentage of licensed hams operating in Field

Day had increased since 2007. In addition, he finds that the number of Morse code contacts in Field Day have increased as well, hitting an all-time peak in 2009. That, he says, is significant, quote "because it is assumed that hams will use the same modes on Field Day that they do when operating at other times."

Since the FCC stopped requiring code tests, Noon concludes it appears that CW has gained in usage--that's because newer hams licensed since 2007 appear to be more actively engaged in the hobby, as the higher levels of Field Day participation suggest.

Noon is no stranger to Morse Code. He's also the magazine's FISTS columnist. FISTS is an organization that promotes the use of Morse code among hams, worldwide.

>From the South-East bureau in Birmingham, Alabama, I'm David Black, KB4KCH, reporting for the Amateur Radio Newsline.

--

Noon's complete analysis appears in the February 2011 issue of WorldRadio Online, which was to be posted on or about January 20 at www.worldradiomagazine.com. The magazine is available to readers on line, at no charge. (WorldRadio)

**

HAM RADIO IN SPACE: NASA ASKS HAMS TO VERIFY SIGNAL FROM NANOSAIL-D

The National Aeronautics and Space Administration is asking ham radio operators world-wide to help confirm that the NanoSail-D nanosatellite is working.

On Wednesday, January 19th at 11:30 a.m. EST, engineers at Marshall Space Flight Center confirmed that the NanoSail-D nanosatellite had ejected from Fast Affordable Scientific and Technology Satellite. The ejection event occurred spontaneously and was identified when engineers at the center analyzed onboard telemetry. The ejection of NanoSailD has also been confirmed by ground-based satellite tracking.

Amateur radio operators are asked to listen for the signal to verify NanoSail-D is operating. Its beacon signal can be found at 437.270 MHz. This information should be sent to the NanoSail-D dashboard at http://nanosaild.engr.scu.edu/dashboard.htm.

You can read the full NASA press release at http://www.nasa.gov/centers/marshall/news/news/releases/2011 /11-009.html

More on this in future Amateur Radio Newsline reports. (NASA)

**

HAM RADIO IN SPACE: INTERFERING ITALIAN D-STAR REPEATER ON 145.8 MHz SHUTS DOWN

According to a report attributed to the ISS Fan Club website, one of three Italy-based amateur repeaters reported on last week as allegedly operating in the satellite subband of 2 meters has gone off the air. This as the managers of DStar repeater IR3UEF have apparently shut it down of their own accord.

A report on the ISS Fan Club website says that the IR3UEF repeater operated by the Italian Amateur Radio Association and interfering with the ISS downlink on 145.8 MHz is now gone. Also, the Veneto Regional President of the Italian Amateur Radio Association, IZ3CLG, wrote the ISS support group to inform it that he shutdown of the VHF port of the IR3UEF repeater. He also noted that the repeater was only used for local D-Star tests. Also, that was properly authorized to do so by the government. IZ3CLG said that the decision to shut it down was taken solely in the name of cooperation and ham radio spirit.

As most hams are aware, 145.8 MHz is used by the Amateur Radio station on the International Space Station as a primary space to Earth communications channel, especially for educational school contacts. (ISS Fan Club)

**

INTRUDER WATCH: OVER THE HORIZON RADAR ON 7 AND 10 MHZ

The latest issue of the free IARU Monitoring System newsletter reports on Russian radar in 7 MHz. The newsletter says that the Over the Horizon Radar from Russia was active between 7000 and 7200 kHz with burst transmissions on 5 different frequencies on December 30th of 2010. The pulse rate was, as always 66.66 pulses per second. Meantime another Over the Horizon Radar that is based in Cyprus has been destroying communications on the 10 MHz band every afternoon. (IARUMS Region 1)

**

QSLING: ARRL LoTW NOW AVAILABLE TO VHF AND UHF OPERATORS

The ARRL has announced that its very popular Logbook of the World has been upgraded to support awards based on Maidenhead grid squares, such as VUCC and the Fred Fish Memorial Award.

Logbook of the World ins an online system for hams to use to confirm two-way contacts. It can also be utilized that can be used for various ARRL awards. Until now it has been limited to confirming contacts on the high frequency bands. Now members of the ham community who enjoy operation on 50 MHz and above can utilize its services as well.

To take advantage of the new features, you need to log in to your Logbook of the World has account or create one if you are not already as user of the service. After that, just follow the outlined procedures found on the Logbook of the World pages. More information on how to do this is at the ARRL website. Use www.tinyurl.com/5vw4nkd to take you directly there. (ARRL)

**

WASHINGTON HAPPENINGS: PRESIDENT CALLS FOR AGENCY STREAMLINING

The CGC Communicator reports that President Obama has signed an Executive Order instructing government agencies to modify, streamline, expand or repeal regulations that cause unnecessary burdens. As a result, a number of FCC Rules might be eliminated or improved. At this time which ones cannot even be speculated on. More on this latest development out of

Washington is on line at
tinyurl.com/WhiteHouseExecutiveOrder. (CGC)

**

RESCUE RADIO: FCC NOI SEEKS TO UPDATE 911
SERVICE

The FCC is looking at ways of improving 911
emergency response services. This, by allowing
input from text messaging, e-mail, video and
photos from both mobile and landline devices in
addition to traditional voice responses.

According to a Commission release, the agency
considers this an important step to
revolutionize America's 911 services for
consumers and first responders. To accomplish
this goal, it has issued a Notice of Inquiry
titled PS Docket No. 10-255. It seeks public
comment on how Next Generation 911 can enable
the public to obtain emergency assistance by
means of advanced communications technologies
beyond traditional voice devices in use today.
The entire be downloaded and read at

ENFORCEMENT: ICOM ASKS HELP IN STOPPING
COUNTERFEIT IC-V8 HT'S

Icom is out to stop whoever is supplying
counterfeit copies of its popular IC-V8 2 meter
hand-held radio. Amateur Radio Newsline's Norm
Seeley, KI7UP, has the details:

--

Fake transceivers, battery packs and chargers
began being reported in 2010. Icom says that
the difference between a real model IC-V8

handheld and the knock-off phony radios are so small that a blind user might not know they are using a fake radio.

For example, the number 2 key on the real IC-V8 is for the "P Beep" function. On the fake radio number 2 is "VOX". Also, on the back of the real Icom product the serial number tag is black while it is white on the fake radio.

Even accessories are being cloned. The F21 Battery Pack looks like an Icom but there are two differences. The fake does not have the ICOM logo, and carries the Part Number BP208 instead of BP209N as found on the real Icom battery. Lastly, the optional factory remote microphone is designated by Icom as the HM-133 while the counterfeit is HM-133V.
Icom says that a real HM-133V is for other radios in their product line.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Icom asks that if you find a product that you may suspect is counterfeit, please report it to the company's support center. You can contact Icom at 2380 116th Avenue NE, Bellevue, Washington, 98004 in the United States. Or by phone to area code 425-454-8155.

More about the products mentioned in this story is on-line at the following URL's: IC-V8 Handheld Radio

RADIO LAW: FCC SEEKING MEMBERS FOR CONSUMER ADVISORY COMMITTEE

The Federal Communications Commission is seeking applications for membership on its Consumer Advisory Committee which is now beginning its sixth 2-year term. Since its establishment in November 2000, the Committee has made many

valuable recommendations to the regulatory agency regarding consumer issues within the jurisdiction of the FCC. In addition, the Committee has helped to facilitate the participation of all consumers in proceedings before the Commission. This includes groups like people with disabilities and underserved populations such as Native Americans and persons living in rural areas

Applicants should be recognized authorities in their fields, including, but not limited to, organizations focusing upon consumer advocacy, disabilities, underserved populations, telecommunications infra-structure and equipment, telecommunications services including wireless and broadcast/cable services. Individuals who do not represent an organization, institution, or entity, but who possess expertise valuable to the Committee's work, are also welcome to apply. Such applicants should be aware, however, that government ethics rules may require financial and other disclosures.

Committee members, all of whom are volunteers, must be willing to commit to a two-year term of service, should be willing and able to attend 3 one-day meetings a year in Washington, D.C., and are also expected to participate in deliberations of at least one working group or subcommittee. Working groups meet via email or teleconference, and all meetings are accessible to people with disabilities.

The application deadline is February 11th. Full details on the Committee and how to apply for membership can be found on-line in Adobe file PDF format at tinyurl.com/4vx38d5. (FCC)

**

RADIO LAW: CALIFORNIA ANNOUNCES NEW WIRELESS DRIVING FINES

The cost of getting caught using a non hands free cellphone or texting while driving in California has gone up. As of the first of the year a first offense of driving while using a wireless phone not hands free will cost you $148 while each subsequent violation will tap your wallet at $256. Driving while wearing headphones

or earplugs that cover both ears is now a $178 offense as is placing anything that is considered as unlawful material on vehicle windows. Last, but most important, a first offense while driving while using a wireless device to send, read or write text will cost you $148 as a first offense, and while not stated in the article detailing the new level of fines, it appears as if it will be up to the court to determine the penalty for subsequent infractions of the states driving while texting rules. And less we forget, these amounts are base fees that do not include court costs and other fees that can add hundreds of dollars to the final amount you pay the court. (Published news reports)

**

NEW WAVE COMMMS: LISTENER DRIVEN RADIO ADDS NEW FEATURES

Listener Driven Radio, an interactive audio software platform for broadcasters, is adding of several new features. The company's SMS text messaging capabilities now make it possible for listeners to sign up for a text message to their mobile device when their favorite songs play. Listeners can also receive alerts via e-mail, AOL Instant Messenger, Yahoo Messenger, MSN Messenger, Jabber and Google Talk.

For those not aware, Listener Driven Radio is a new model for radio, shifting stations from broadcasts to what it calls crowdcasts. That's where listeners vote, and a stations programming is affected in real-time. More is online at www.ldrradio.com (Radio OnLine)

**

PUBLIC SERVICE: HAMS NEEDED FOR BOSTON MARATHON COMMUNICATIONS

Ham radio volunteer registration for the 2011 Boston Marathon is now open. The Marathon will be held on Monday April 18th with radio operators are needed to provide safety communications
and to assist the Red Cross. Assignments are available in Hopkinton, along the route, and in downtown Boston. To volunteer, go to marc.mmra.org and follow the instructions found

at the website. (K1IW)

**

THE SOCIAL SCENE: A LOUISIANA FAIS DO DO TO HAM RADIO

Turning to the ham radio social scene we begin with this event in Cajun country. Heres Don Wilbanks, AE5DW, with the details:

--

The Acadiana Amateur Radio Association will hold its 51st Annual Hamfest in Rayne, Louisiana. Among the features of this very Southern event will be the annual Crawfish Boil with the popular Fais-Do-Do and other dancing. For those of you who have never heard the term a Fais-Do-Do is a name for a Cajun dance party that originated just prior to World War 2. Basically, heres your little Cajun French lesson for the day.

Do-Do is basically sleep. You tell your kids to go nightnight or Do-Do and Fais is a negative in Cajun French, so Fais-Do-Do literally means that you don't sleep and dance all night.

The Hamfest will be open to the general public and ham community at 5:00 p.m. until 8:00 p.m on Friday, March 11th and again from 8:00 a.m. until 2:00 p.m. on Saturday, March 12th. All times given are Central Standard in the United States. For more information on this year's event please take your web browser to www dot w5ddl dot org stroke hamfest and keep an eye open for the latest updates.

Oh, you have a good time!!

Reporting from Cajun country, I'm Don Wilbanks,

AE5DW, for the Amateur Radio Newsline,

--

And now you see why we gave this one to Don.

HAM HAPPENINGS: 2011 DAYTON DX DINNER - MAY 20

Meantime, a couple hundred miles to the North, the SouthWest Ohio DX Association will again sponsor the DX Dinner to be held in conjunction with the 2011 Dayton Hamvention. The dinner will be held on Friday, May 20th, at the Dayton Marriott, which is located at 1414 S. Patterson Blvd. in downtown Dayton. As in the past, there will be some major door prizes along with the naming of the DXpedition of the Year. Reservation information, program details and a list of the prizes will be available soon at www.swodxa.org. (SWODXA)

NAMES IN THE NEWS: G4FSU NAMED IARU TECHNICAL CONSULTANT

Some names in the news. International Amateur Radio Union President Tim Ellam, VE6SH has appointed Ian Greenshields, G4FSU, as an IARU Technical Consultant. In this role, Greenshields can be called upon to represent the IARU at various regulatory meetings such as ITU meetings and to promote IARU objectives at those meetings. Greenshields joins Peter Chadwick, G3RZP, in this role, allowing an IARU presence where there are parallel meetings. (IARU)

**

NAMES IN THE NEWS: VA3DM NAMED RAC SPECIAL ADVISOR

Doug Mein, VA3DM, has been appointed as a Special Advisor to the Radio Amateurs of Canada Field Organization. Mein has an extensive background and is retired from Transport Canada after 33 years of service. During the September 11th 2001 terrorist attacks on the United States, Mein was Director of Transport Canada's Air Navigation Services and Airspace Branch in Ottawa. In this position, he played a key role in coordinating department operations and taking decisive action on behalf of the Canadian Government. In addition, he was the chief architect behind the creation of NAV Canada. (RAC)

**

NAMES IN THE NEWS: DJ9KR PUBLISHES 40 METER BROADCAST INTRUDER LIST

And Ulrich Bihlmayer, DJ9KR, of Tuebingen, Germany, has published a list of broadcast stations still operating in the 7.0 to 7.2MHz amateur service radio band. The list can be downloaded from in Adobe PDF format at tinyurl.com/4c8ootr. The latest version was published on January 11th. Using it as a handy reference you should be able to determine what station might be interfering with a QSO and where that station is located. (IARU)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

HAM RADIO IN SPACE: ARISSat-1 UPDATE

The ARISSat-1 amateur radio experimental satellite is now in Kazikstan. The NASA Phase 3

Safety Review for ARISSat was scheduled for last Thursday January 20th with the Russian Progress 41P launch carrying ARISSat-1 scheduled for liftoff late this month. Release of the ARISSat-1 satellite is scheduled for the end of February from the International Space Station.

Meantime, the Russian Soyuz manufacturer RSC Energia is also calling the ARISSat-1 satellite KEDR. This is in honor of Cosmonaut Yuri Gagarin's callsign and also in celebration during the 50th anniversary of the first manned space flight that took place on April 12th, 1961.

R-S-C Energia has information and photographs about the satellite at its news site. Sergey Samburov, RV3DR is shown in the photos with the satellite. The URL to see them is tinyurl.com/46altbf (WA4SXM)

HAM RADIO IN SPACE: RUSSIA TO RESUME SPACE TOURIST FLIGHTS IN 2013

Listen out for space tourists to once again operating onorbit from the International Space Station sometime in or after 2013. This after Russia announces that it will start selling multimillion-dollar tourist tickets to the International Space Station after a four-year hiatus.

Virginia-based Space Adventures has had no seats to sell for the zero-gravity voyage since billionaire Cirque du Soleil founder Guy Laliberte flew to the orbiting outpost back in October 2009. But according to recent news reports, beginning in 2013 it will again offer three 10 day trips per year to the space station aboard Russian Soyuz spacecraft. This, thanks to a deal between itself, the Russian space agency Roskosmos and Soyuz manufacturer R-S-C Energia.

Russia has again found room for paying private customers aboard the cramped three-seat Soyuz due to plans to increase annual production of the single-use craft from four to five in 2013. The Soyuz is carried to orbit by Russian rockets that are launched from the Bikenour Cosmodrome in Kazikstan. (Space Now)

**

WORLDBEAT: NEW LOOK FOR THE UK REPEATER WEBSITE

If you are planning a trip to Great Britain and will be taking a VHF or UHF radio with you, listen up. The United Kingdom repeater website been given a new look for the New Year, making it easier to find information. There are improved search facilities with separate database and document searching. The document search gives a more effective search of previous committee minutes and other reference material, while the database search allows for searching various repeater data fields for example keeper callsign, frequency, channel and mode. The site lists all United Kingdom FM, D-Star and ATV repeaters. Also, a new RSS news feed and Twitter posting are now available. See www.ukrepeater.net for more. (Southgate)

**

CONTEST CORNER: CONTEST UNIVERSITY 2011 REGISTRATION NOWQ OPEN

Turning to radiosport news, Tim Duffy, K3LR, has announced that registration for the Contest University 2011 is now open. This will the 5th year of holding the event just prior to the Dayton Hamvention. The date is Thursday, May 19th, at the Crowne Plaza Hotel in downtown Dayton, Ohio. For registration and other information, go to www.contestuniversity.com on the World Wide Web. (Contest University)

**

DX

In DX, word that OM5AM is active as D2AM from Luanda, Angola through March 17th. Operation is mainly 20 meters SSB with some RTTY. QSL via his home callsign, direct or by the Bureau.

BX5AA will be active from Taiwan during the CQ World Wide WPX SSB Contest on March 26th and 27th. If you work him QSL via BX5AA.

VK4FEAT is now active from the Solomon Islands as H44DX.
His length of stay on the island was not provided but his operation so far has been on 40, 20 and 10 meter SSB. QSL via VK4FEAT and not

via OH2BN as listed on QRZ dot com. And yes, that callsign to QSL to is VK4FEAT.

RD3AF to be active as EF8M from the Canary Islands during the CQ 160-Meter CW Contest rom January 28th to the 30th. This as a Single-Operator, all band high power entry. QSL via UA3DX.

And look for C31CT will be active from Andorra during the CQWW 160m SSB Contest from February 25th to the 27th as a single operator entry. QSL this one via EA3QS.

Lastly, UR9IDX is once again active as 8Q7VR from Naifaru Island in the Maldives. The length of his stay not known at this time but so far he's been heard on 80 and 12 meters CW. QSL via UR9IDX only direct.

(Above from various DX news sources)

**

THAT FINAL ITEM: QCWA ASKS HAM COMMUNITY TO HELP CELEBRATE THE 100TH BIRTHDAY OF WORLDRADIO FOUNDER W0GFQ

And finally this week, the founder of World Radio Labs, Leo I. Meyerson, W0GFQ, is about to celebrate his 100th birthday. And in his honor QCWA Chapter 154 in Palm Springs, California is holding a special celebration of this event. Bill Pasternak, WA6ITF, is in the Newsroom with more:

--

For those that are new to the hobby or simply do not remember Leo Meyerson, W0GFQ, owned and operated World Radio Laboratories in Council Bluffs, Iowa from the 1940's through the 1970's. During that period of time he also founded Globe Electronics and later on Galexy Electronics. Both companies manufactured gear used by ham radio operators around the world.

The Globe logo first appeared on the 1948 model Globe Champion transmitter. These early units produced 150 watts input on phone or CW with coverage from 160 to 10 meters.

Perhaps his most successful product was the Globe Scout 680 transmitter series that operated

on 80 through 6 meters. These gave many a new General or Technician his or her first taste of A-M phone operation at an affordable entry level price. For his many contributions to ham radio Leo Meyerson, W0GFQ, was named 1997 Radio Amateur of the Year by the Dayton Amateur Radio Association.

Now, to commemorate Leo Meyerson's personal centenary, the Quarter Century Wireless Association is requesting that hams world wide take a QSL card, write 'Happy 100th Birthday Leo' on it and send it to him. His direct mail address is Leo Meyerson, W0GFQ, 19 Park Lane, Rancho Mirage, California, 92270. We plan to send ours, right away.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

Bob Roske, N0UF, is the National President of the Quarter Century Wireless Association. He says that he hopes that
Leo gets hundreds or maybe even thousands of birthday cards. This, to help make this a very special day for a ham that has devoted so much of his life to our hobby. (QCWA)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, saying 73 and we thank you for listening.

Thanks for the information

I do need the battery that holds its 1.5v rating for longet time. I see
Walmart has the lithium iron or ion batteries which are the latest greatest
and pretty cheap actually. I will try a set of them.
Will the old charger that charged the NiCad and Metal Hylide also charge the
Lithium Iron or Ion? I don't suppose that information is available through
the electronics sales associate at the Walmart, but they have a good price
both at the store and their online store

thanks

GB2RS NEWS

Sunday 23rd January 2011

The news headlines:

Datamode groups join forces for contesting

Celebrating 85 Years of Hospital Broadcasting in the UK

GM0M-Z QSL manager change

The RSGB Contest Committee and the British Amateur Radio Teledata Group have joined forces to promote data modes in contesting. For the first time, the RSGB HF Championship this year will include non-RSGB contests, beginning with the BARTG Sprint this weekend. This means that data enthusiasts will now be able to participate in the RSGB HF Championship. For more details see the RSGB Contest Committee website, www.rsgbcc.org.

Hospital Broadcasting, also known as Hospital Radio, will be celebrating 85 years in 2011. The first station started in 1926 in York, and Hospital Radio has been entertaining patients in hospitals up and down the UK ever since. Hospital Radio stations are run by volunteers who give up a few hours of their time each week and also they get involved in their local communities to help promote that station and raise funds to keep their station on the air. To support Hospital Broadcasting Week it is planned to run a small number of Special Event stations from near the end of March to the beginning of April. These will be run on behalf of some of the Hospital Radio Stations. If you know of a local Hospital Radio Station and would like to help them to put on such a station, or would just like more information about this planned event, please e-mail m0jec@nadars.org.uk.

Michael Whitehead, GM0PHW is no longer the QSL submanager for the GM0M-Z series of callsign. The RSGB would like to thank him for his voluntary efforts. The QSL sub manager post has now been passed to Fred Roe, GM0ALS. All the cards in hand were sorted and bundled up prior to the changeover, so the transition should be seamless.

Amateur radio enthusiasts in Brazil established essential communication links in the aftermath of the recent mudslide and floods. Working closely with local civil defence forces, amateur services carried much-needed messages between rescue groups. According to some sources, amateur radio was the only way of getting messages across town. Emergency communications infrastructure has since been put into place by the military and is now providing some telephone and other services.

A minor error crept in to the RSGB AGM announcement in the February RadCom. The nearest motorway junctions to the venue are M1 junction 24 and 25, not 24 and 28 as printed. We apologise for any inconvenience this may cause.

And now for the details of rallies and events for the coming week

The Horncastle Winter Rally will take place on 30 January in the Horncastle Youth Centre, Lincolnshire LN9 6DZ. Doors open at 10.30am and admission will be ?1.50. Details from Tony, G3ZPU on 01507 527835, e-mail G3ZPU@yahoo.co.uk.

Now for the news of special events

Southport & District Amateur Radio Club will be running GB5LLB from Lytham Lifeboat Station on 29 January. The station is being run as part of SOS Radio Week and is being sponsored, with all monies received going to the RNLI. Contact can be made on 2m and whichever HF bands are open on the day. The club would like to express their thanks to Snowdonia Radio Company for supporting the station by supplying the vertical HF antennas that will be used. Further details can be found on the club's website at www.sadarc.org.uk.

Porthmadog and District Amateur Radio Society is supporting SOS Radio week again this year. The club will be operating today, 23 January, from 10am to 6pm from Criccieth life boat station and on 29 and 30 January from 10am to 6pm the club will be operating from the Porthmadog Yacht club. The society will be using the callsign GB0PLB. All visitors will be welcome to come along and join in or support.

Crewe Heritage Centre Amateur Radio Club will be taking part in the SOS Radio week using GB4CHC today, 23 January, as well as on Saturday 29 and Sunday 30 January. The Club will have two stations on HF, one running SSB and the other on digimodes. They are being sponsored at 10p per country contacted and money raised will go to the RNLI.

And now the HF DX news compiled from 425 DX News and other sources

DL9HCU is once again in the Pacific and will be active as 3D2HC from Fiji. He likes 20m CW so listen out for him on 14.002 or 14.025MHz between 0500 to 0800UTC. Also, watch out for him on 14.183MHz after 0500UTC as he will sometimes check into the ANZA Net. QSL via DL9HCU, either direct or via the bureau.

SM6LRR will be active from Sri Lanka until 5 February as 4S7LRG. His operation will be holiday style with a focus on 160, 80 and 40m. QSL via his home callsign, SM6LRR.

N3ME and W3UR will be active from Barbados as 8P9ME and 8P9UR, respectively, between 26 January and 14 February. Their operation will be on all HF bands using CW, SSB, PSK and RTTY. QSL via their home callsigns, direct, via the bureau or electronically using Logbook of the World.

Eddy, ON4AFU will be active as HS0ZJF/8 from Koh Samui, which is IOTA reference AS-101, until 10 February. QSL via his home callsign either direct or via the bureau.

Look for Jeff, K8ND and Jim, W8WTS operating as PJ2/homecall until 3 February from Signal Point Contest Station on Curacao, SA-099. QSL via their home callsigns either direct or via the bureau.

Now the contest news

The data leg of the 80m club championship takes place on 20 January from 2000 to 2130UTC. The exchange is signal report and serial number.

The 50MHz UK Activity Contest takes place on 25 January from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator. Please note that there are rule changes to the UKACs this year, including new entry categories for 10 watt stations and active users of the DX cluster and chat channels such as ON4KST. There is also a change to the locator squares multiplier rule. To ensure you enter the right category and avoid claiming the wrong score, please check the full rules on the Contest Committee web site at www.rsgbcc.org/vhf before the start.

The CQ WW 160m DX Contest takes place for the whole 48 hours of 29-30 January. Work the contiguous 48 States plus Canada only, giving a signal report and CQ Zone, for which the UK is 14. USA stations will send a signal report and their 2-letter State code, while Canadian stations will send a signal report and their 3-letter Province code. The final event of the month is the WAB 1.8MHz Phone Contest that takes place on the evening of the 29th. It's the usual WAB contest exchange of signal report, serial number and WAB area.

And now the solar factual data for the period from the 10th to the 16th of January, compiled by Neil Clarke, G0CAS on the 17th of January.

The solar disc had spots visible every day, but on the 15th a medium sized sunspot group rotated into view. This group was responsible for three small C class solar flares that occurred on the 14th and 15th. These had very little effect, if any, on propagation. The remaining days' activity was very low. Solar flux levels declined slightly from 83 units on the 10th and the 11th to 79 by the 14th. The average was 81 units. The 90 day solar flux average was 84 units. That's the same level as last week. X-ray flux levels increased slightly from A6.5 units on the 11th to B1 by the 15th. The average was A7.9 units. Geomagnetic activity was quiet every day. The average daily Ap index was 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 450 and 580 kilometres per second. Particle densities were low every day except for a brief increase to 18 particles per cubic centimetre during the afternoon of the 16th. Bz never varied more than minus and plus 7 nanoTeslas for the period.

And now the solar forecast. This week the slightly more active side of the Sun is expected to be looking our way. Solar activity will be at very low levels on some days but could increase to low levels on other

days. Solar flux levels are expected to increase and, later in the week, could be around the 90s. Geomagnetic activity should be quiet every day. MUFs during daylight hours at equal latitudes should be about 23MHz for the south and 20MHz for the north. Darkness hour lows are expected to be around 7MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of about 22MHz. The optimum working frequency with a 90 per cent success rate will be around 18MHz. The best time to try this path will be between 0900 and 1300 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 24 January Gloucester Amateur Radio & Electronics Society is having a workshop and construction evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 24 January South Birmingham Radio Society is planning for the Wythall radio rally in March. Contact Don, on 0121 458 1603.

On Monday 24 January Stratford Upon Avon District Radio Society has a soldering school by G1EIX, G8HJS andG0CHO on soldering RF connectors and surface mount components. Contact G0CHO, on 01608 664488.

On Tuesday 25 January Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 25 January Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 26 January Hinckley Amateur Radio Society is having a talk by John Rogers, M0JAV, on using the MiniVNA Pro analyser. Details from John, M0JAV, on 07836 731544.

On Wednesday 26 January Lincoln Short-Wave Club is watching a DVD on antennas for new amateurs with Jim, G0EJQ . For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 26 January Midland Amateur Radio Society has Foundation and Intermediate classes and laptop computer training, . Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 26 January Telford & District Amateur Radio Society is having a talk on eQSLs by G0CER. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 27 January South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 28 January Bromsgrove & District Amateur Radio Club is having an HF night. Contact Chris, M0BQE on 01905 776 869.

On Friday 28 January Coventry Amateur Radio Society is having a quiz night. Contact John, G8SEQ, on 07958 777363.

On Friday 28 January South Birmingham Radio Society Friday is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 29 January Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

On Monday 24 January Angel of the North Amateur Radio Club Come is having a natter night and is on the air. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 24 January Bolton Wireless Club is having an activity night on tests and measurements, including RF power, feeder losses and spectrum analysis, run by Bob, G8DTF et al. For details, send an email to boltonwireless@gmail.com.

On Monday 24 January Scarborough Amateur Radio Society is having a talk by Graham Walker. Note that the meetings until March are temporarily in the building next to the entrance. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 24 January Sheffield Amateur Radio Club is having a taster evening for new Foundation Licence candidates plus a social evening. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 24 January Thornton Cleveleys Amateur Radio Society is having a talk by Ian, G3ZRZ on the Top Band whip. Contact Colin Hirst, G0EPY, by e-mail to colmay@sky.com.

On Tuesday 25 January Chester & District Amateur Radio Society is conducting radio operations at Waverton Institute. Details from Barbara Green on 07957 870770.

On Tuesday 25 January Halifax & District Amateur Radio Society continues its Foundation and Intermediate training and will be discussing a new club project for UHF. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 26 January Hornsea Amateur Radio Club is having a computer maintenance evening with, Conor, 2E0CPT. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 26 January Maltby & District Amateur Radio Society is having a talk on radio astronomy by Bob Cochrane, G8DRQ. Contact Keith, G1PQW, on 07701 156 678.

On Thursday 27 January Maltby & District Amateur Radio Society is having its annual dinner. Contact Keith, G1PQW, on 07701 156 678.

On Thursday 27 January Preston Amateur Radio Society is having a talk on HF contesting. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 27 January Ripon & District Amateur Radio Society is having a night on the air. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 27 January South Manchester Radio and Computer Club is having a talk by the local RAYNET representative. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 27 January Wakefield & District Radio Society is having a rally planning meeting. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 28 January East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 29 January Wakefield & District Radio Society continues its Intermediate and Advanced Ccurses. Contact Ken, 2E0SSQ, on 07900 563117.

NEWS FOR NORTHERN IRELAND

On Monday 24 January Greenisland Electronics Amateur Radio Society is showing the 3B9C Rodreguez Island DVD at Knockagh Lodge, 236 Upper Road, Greenisland, County Antrim. For more information contact Peter, Mi5JYK, by e-mail to mi5jyk@rsgb.org.uk.

NEWS FOR SCOTLAND

On Tuesday 25 January Kilmarnock & Loudoun Amateur Radio Club is holding its AGM. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 25 January Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 26 January Glenrothes and District Amateur Radio Club is having a talk on PCB manufacture by John, MM0MBC. Please note that until further notice the club will be meeting at the ATC, Brewery Wynd, North Street,&#65533;Leven&#65533;KY8 4LX. This is due to the uncertainty regarding repairs to the Thornton clubhouse. Contact Dave Francis, MM0DYX on 01383 823878 for more information.

On Wednesday 26 January Lothians Radio Society is having a talk and demonstration on R1155 and T1154 restoration by Ian Ropper, GM0UHC. Contact Andy Sinclair, by email to lrs_secretary@moosedata.com.

On Wednesday 26 January West of Scotland Amateur Radio Society is working on construction projects and Licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 27 January Aberdeen Amateur Radio Society is having a construction and on the air evening. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 28 January West of Scotland Amateur Radio Society is having presentations, guest speakers, a raffle & quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Sunday 23 January Hastings Electronics and Radio Club is holding its annual luncheon at the Kings Arms, Ninfield, from noon. Details from Ron, G4VBK, on 01424 428428.

On Sunday 23 January Loughton & Epping Forest Amateur Radio Society is having its New Years' Lunch at the Metropolitan Police Sports Club, Chigwell. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Monday 24 January Felixtowe & District Amateur Radio Society is on the air. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Tuesday 25 January Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 25 January Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 25 January Dorking & District Radio Society is holding its AGM. Contact Garth, G3NPC, on 01737 359472.

On Tuesday 25 January Harwell Amateur Radio Society is having a shack activity night. Contact Malcolm, G8NRP, on 01235 524844.

On Tuesday 25 January Horndean & District Amateur Radio Club is having a quiz evening. Other clubs are invited to attend in teams of four. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 26 January Farnborough & District Radio Society is having a talk on the BBC's first outside broadcast satellite link by Tony Crake, G0OVA. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

On Wednesday 26 January Hastings Electronics and Radio Club is having a talk at the Taplin Centre on the International Short Wave League by ISWL Council member Arthur Kinson, G0KOC. Details from Gordon, on 01424 431 909.

On Wednesday 26 January Havering & District Amateur Radio Club is having a talk on 3D photography by Steve, M6AEI. Contact John, M0UKD, on 07817 365354.

On Wednesday 26 January Newbury & District Amateur Radio Society is having a surplus equipment sale. For more information contact Rob, G3LMW, on 01635 862737.

On Wednesday 26 January Worthing & District Amateur Radio Club is putting GX3WOR on the air. Contact Phil, G4UDU, on 01903 816684.

On Thursday 27 January Bittern DX Group is having an informal meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 27 January Echelford Amateur Radio Society is having a talk by Roger Western, G3SXW on3 the ham radio Olympics. Contact John, G4GSC, on 01784 451898.,

On Thursday 27 January Edgware & District Radio Society is meeting to collect subs. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 27 January Reading & District Amateur Radio Club is having a talk on the world of broadcast DXing by Robert Hanstock, G0LZB. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 27 January Shefford & District Amateur Radio Society Club is running its construction contest. Details from David, G8UOD, on 01234 742 757.

On Friday 28 January Cambridge & District Amateur Radio Club is on the air. Contact Ron Huntsman, on 012233 501712.

On Friday 28 January Loughton & Epping Forest Amateur Radio Society is on the air on HF. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Friday 28 January Mid-Sussex Amateur Radio Society is having a talk on 50 years of the Bluebell Railway by Chris, G4ZCS. Contact Peter, G4AKG, on 01444 239371.

On Friday 28 January Waterlooville Amateur Radio Club is having a natter night. Details from Rich, G4IBW, on 02392 680852.

On Friday 28 January Wimbledon & District Amateur Radio Society is having a talk on microwave beacons by Denis, G0OLX. Contact Andrew Maish, G4ADM, on 020 8335 3434.

NEWS FOR THE SOUTH WEST

On Monday 24 January Exeter Amateur Radio Society is having a club night. Details from Nick, on 01363 775756.

On Tuesday 25 January Blackmoor Vale Amateur Radio Society is having a talk on transmitter measurements by Jim, G3RTD. Contact Tony, G0GFL, on 01258 860741.

On Wednesday 26 January Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 27 January South Bristol Amateur Radio Club is on the air. Details from Andrew Jenner, G7KNA, on 07838 695471

On Thursday 27 January Swindon & District Amateur Radio Club is having a talk on Summits on the Air by Richard, G4ERP. Contact Den, M0ACM, on 07810 317750.

On Thursday 27 January Yeovil Amateur Radio Club is holding a committee meeting. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 28 January Torbay Amateur Radio Society is running its construction competition. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Tuesday 25 January Marches Amateur Radio Society is having a quiz with Malcolm, GW0WZZ. For more information contact Dave, MW0AYM, on 01691 777242.

Changes followed by "|".

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

66. SARL NEWS - SUNDAY 23 JANUARY 2011 You are listening to ZS6SRL, the

SARL NEWS - SUNDAY 23 JANUARY 2011 You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R. You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. SILENT KEY It is with deep regret that the passing of Henry Fourie, ZR4U, on Sunday 16 January 2011 must be announced. We extend our sincere condolences to his parents Barney, ZS4U/ZS6TQ, and Marie, ZS4YL, family and friends. (PAUSE) In the news today: D-STAR ACTIVE IN JOHANNESBURG SARL NATIONAL CONVENTION NOT TO BE MISSED LAST CHANCE TO BOOK FOR PIC PROGRAMMING COURSE You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items. D-STAR ACTIVE IN JOHANNESBURG The first digital repeater in Johannesburg is active on the air. The repeater is on loan from Multisource for demonstration purposes and is offering amateurs an opportunity to experiment with D-Star. The system was installed and demonstrated during the SA-AMSAT event last Saturday at the NARC. Thanks to Ronald, ZS6RVC, Riaan, ZS4PR and Frik, ZS6FZ D-STAR, the acronym for Digital Smart Technologies for Amateur Radio, is a digital voice and data protocol specification developed by the Japan Amateur Radio League. While there are other digital on-air technologies being used by amateurs, D-Star is one of the first on-air and packet-based standards. D-STAR offer clearer signals and uses less bandwidth than its non-digital counterparts. As long as the signal strength is above a minimum threshold, and no multi-path is occurring, the quality of the data received is better than an analogue signal at the same strength. D-Star compatible radios are available on VHF, UHF, and microwave amateur bands. In addition to the over-the-air protocol, D-Star also provides specifications for network connectivity, enabling D-Star radios to be connected to the Internet or other networks, with provisions for routing data streams of voice or packet data To operate the D-Star repeater switch any D-Star enabled digital radio to DV mode. Tune to 145.6875 MHz with the usual -600 kHz offset to talk via the repeater. In the radio menu ensure that R1 and/or R2 are set to ZS6TJ. The UR can be set to CQCQCQ, and MYCALL should be your own callsign. The SARL is looking for coverage, signal reports and comments. Send your comments to armi@sarl.org.za. SARL NATIONAL CONVENTION NOT TO BE MISSED The Sasolburg and Vaal Triangle Radio Clubs are hosting the 2011

SARL National Convention on 15 and 16 April. Enjoy the beauty of the Vaal, an evening cruise down Millionaires' Bend and a fantastic dinner in the company of good radio friends until late Friday evening! Saturday morning the SARL AGM at the Vaal University of Technology commences at 8 am with registration. The meeting starts at 9 am. In the afternoon a huge flea market will be held while a nature drive at Emerald Casino Resort will keep non-amateurs suitably entertained. The Sasolburg and Vaal Triangle Radio Clubs expect this to be the biggest get-together of radio amateurs in years! The afternoon also offers a visit to the Bloemendal Shortwave wave radio broadcast station near Meyerton. Experience what a 50 kW RF transmitter is capable of doing, and see how the systems for such a shortwave broadcast station operate and service the world from South Africa. The highlight of the convention takes place on Saturday evening at the Riviera Hotel. This year the SARL Gala evening will be a formal black tie affair, but suit and tie will also do! The guest speaker is Prof. Alwyn Louw from VUT. The well known band Broken Stream will supply the music while Gerald Klatzko, ZS6BTD, will be giving a riveting presentation on his experiences with MIR and the Space Station.. The annual prize giving will be hosted by Tjerk, ZS6P. Thereafter the dance music fires up and the party begins! Registration for the Boat cruise and the Gala evening is essential as there are only limited seats available. Bookings should be made through the club secretary of ZS4SRK by visiting www.qsl.net/zs4srk to complete the forms. There is also a link from www.sarl.org.za. LAST CHANCE TO BOOK FOR PIC PROGRAMMING COURSE Bookings for the PIC programming course on Saturday 29 January at the SARL National Amateur Radio Centre close on Wednesday afternoon. Get the details from www.sarl.org.za and click on RTA. This will be the only PIC Programming course in Gauteng during 2011. INNOVATION AND CONSTRUCTION COMPETITIONS CLOSE SOON Entries for both these competitions close on 31 January 2011. Full details are available from www.amateurradio.org.za. CONTEST NEWS The first SARL 80 m Club Contest for 2011 will be held on Wednesday 26 January 2011 starting at 19:30 CAT and ending 1 hour later. This will be a SSB contest using the segments 3 600-3 650 kHz and 3 700-3 775 kHz. The exchange is an RS report and a serial number starting at 001. Stations can participate as a single operator or multi-operator. Find the complete rules on page 20 of the 2011 SARL Contest Manual. On the weekend of 5 and 6 February, the Antique Wireless Association will host its CW Activity Day. The following weekend, 12 and 13 February, the first leg of the 2011 SARL National Field Day will take place. Find all the rules in the 2011 SARL Contest Manual. The Port Elizabeth ARS has released the results of the 2010 PEARS HF QSO Party held in early December. 10 unlimited and 1 restricted class log was received. Unlimited class 1st Wes Wessels, ZS2A, 107 points 2nd Jacques Vermeulen, ZS1WC, 98 points 3rd Otto du Plessis, ZS2Q, 95 points

Restricted Class Piet Delport, ZR6BVS, 12 points

No logs were received in the Novice and DX classes. Well done to the winners. PROPAGATION REPORT Hannes Coetzee, ZS6BZP, reports that the

solar activity is still at low levels. Sunspot 1147 persists in the northern hemisphere and a few tiny spots have formed just to the south of it. The effective sunspot number is expected to be less than 20 for the coming week. 15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be fair towards Europe on 15 m, later to be followed by fair 20 m openings. Early evening 15 m contacts with the USA are possible. Contacts with Australia are possible on 20 m at sunrise and during the afternoons. 15 and especially 20 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises. For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world. Locally 40 m is the workhorse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances. 80 m is the frequency of choice during the evenings. Please visit www.spaceweather.co.za for further information. DIARY OF EVENTS 23 January - Last day of the PEARS VHF/UHF Competition. 30 January - Closing date for phase 1 of the construction competition. 26 January - SARL 80 m club competition at 19:30. 5-6 February - CW Activityb day of the Antique Wireless Society. 12-13 Februariy - 1st leg of the SARL National Field Day. 28 February - Offers to host a station at Sun City during IARU Region conference to be in to iaru2011@sarl.org.za. SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date. The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League, compiled by Hester van der Walt. Thank you for listening, 73.

Please think of the environment before printing this e-mail
Nominations For NZART 2011 Elections For President and Council
Nominations closed today after the mail clearance in accordance with the requirements of the Associations Constitution.

The following nominations have been received

President (1 Required)
John Andrews ZL2HD

Ann Fraser ZL3TNT

Simon Lewis ZL4PLM

Roy Symon ZL2KH

Northern District (3 Required)
Neill Ellis ZL1TAJ

Stephen Hayman ZL1TPH

Vaughan Henderson ZL1TGC

Phil King ZL1PK

Central District (3 Required)
John Andrews ZL2HD

Warren Harris ZL2AJ

Fred Johnson ZL2AMJ

Midlands District (2 Required)
Ann Fraser ZL3TNT

Simon Lewis ZL4PLM

Southern Districts (1 Required)
No nominations received

Based on the above an election is required for both President & the Northern Electoral District.

Subject to the result of the election Council will need to consider the appointment of Councillors to represent those districts that will not be fully represented in accordance with the Associations Constitution.

Nominees who have not already done so should forward there biography with photo to the undersigned with a copy to the Break-In editor.

Evan T Sayer

Returning Officer

FMTAG NOTES FOR JANUARY 2011 INFOLINE
To view the FMTAG Applications Being Processed please go to:
http://www.nzart.org.nz/nzart/fmtag/fmtag-apps-being-processed/

PROPOSALS
Proposals published on the NZART website on 21st December:

Te Puke Branch 53 has applied to increase the power of its 7175 repeater located at Shaw Road, Topo50 map reference BE37 870.20 014.96. An Engineering Evaluation shows that the repeater transmit frequency can remain on 147.175 MHz and the repeater receive frequency on 147.775 MHz, and that there will be no interference to other stations.

Te Puke Branch 53 has applied to increase the power of its 855 repeater located at Shaw Road, Topo50 map reference BE37 870.20 014.96. An Engineering Evaluation shows that the repeater transmit frequency can remain on 438.550 MHz and the repeater receive frequency on 433.550 MHz, and that there will be no interference to other stations.

Te Puke Branch 53 has applied to up-link to Takaurunga 540 from its BBS at Totara Street, Topo50 map reference BD37 809.83 218.01. The link transmit frequency will be 144.800 MHz and the link receive frequency will be 145.400

MHz. An Engineering Evaluation shows that there will be no interference to other stations.

Tauranga Branch 39 has applied to link to Shaw Road 7175 and 855, from Minden 680, located at Topo50 map reference BD36 691.76 217.82. The link transmit frequency will be 433.550 MHz and the link receive frequency will be 438.550 MHz. An Engineering Evaluation shows that there will be no interference to other stations.

Proposal published on the NZART website on 1st January:

Wairarapa Branch 46 has applied to change the frequency of its National System UHF Link Station at Pariwhariki Trig, Topo50 map reference BP35 288.84 459.75. The new transmit frequency will be 434.975 MHz and the receive frequency will be 439.975 MHz. An Engineering Evaluation shows that there will be no interference to other stations.

FINAL RECOMMENDATIONS TO NZART CPOUNCIL
Proposals published in HQ Infoline 221:

The Radio Electronics Group has applied to move its 2-metre repeater to Peacockes Road, Topo50 map reference BD33 030.88 129.32. We have selected a repeater transmit frequency of 147.125 MHz and a repeater receive frequency of 147.725 MHz. An Engineering Evaluation shows that there will be no interference to other stations.

The Radio Electronics Group has applied to move its 70-centimetre repeater to Peacockes Road, Topo50 map reference BD33 030.88 129.32. We have selected a repeater transmit frequency of 438.875 MHz and a repeater receive frequency of 433.875 MHz. An Engineering Evaluation shows that there will be no interference to other stations.

COMMENTS AND APPLICATIONS
Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:
http://www.nzart.org.nz/nzart/fmtag/

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

END

Jock White Field Day Coming up:

minor rule changes have been made and doni¿½t forget to send in logs

Jock White Field Day 26th and 27th February
It is time to get your team together for Field Day. Get those antennas sorted and give the generator set a test run.

The single station 80/40 section will be continued on for 2011 after being a success last year.

Rule changes:
Rule 15.2.4: the number of CW contacts per band have been reduced from 25 to 20. In recent years a number of stations have made contacts in the 20-24 range per band which I have accepted as being sufficient to be claimed by others as a valid branch point for CW. Please note that I will be strict with the 20 contact threshold.

Rule 8.1: the maximum output power in the open section has been reduced from 150 back to 100 watts. By far the majority of transceivers both in JWFD use and on the market today have a 100 watt power output. This rule change is to keep the playing field level.

If you are using a fancy hands free microphone doni¿½t forget to get your microphone gain set correctly using the ALC meter and make sure your 13.8 volt DC supply does not sag at the terminals of the transceiver, we doni¿½t want any splatter or dirty signals!

Finally, it makes my job much easier if all stations that enter send in their logs and summary sheets. If your branch one of the few out for a social time and not wanting to enter officially, thati¿½s fine, but please send in your log sheets so I can use them for checking.

Have fun!

Stuart Watchman

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 23rd January 2011

Counties Contest

A final reminder that your log for the EI/GI Counties Contest needs to be sent to the contestmanager / at/ irts/ dot/ ie. All logs to be received by deadline February 2nd 2011. Your co-operation is much appreciated.

Request for Return of IRTS Trophies and Cups

It is time once again to recall all trophies presented at the 2010 IRTS, AGM held in Dundalk.

Trophies and Cups can be returned to the IRTS Stand at the Phoenix Radio Club Rally in Coolmine on Sunday February 20th 2011 or to any IRTS Committee Member before end of February 2011.

This will allow for any engraving to be done, or to allow any repairs as needed.

Early return will be appreciated. Peter EI4HX can be contacted on ei4hxperimental / at/eircom / dot/ net.

IRTS Awards Nominations.

The time is here again for nominations for the several awards for IRTS Trophies and cups that are required from within the membership, this includes the awards for,

1. Service to the Society or to Amateur Radio. Awards in this category can be to members or non-members.

2. Awards for other achievements.

Awards in this category [2] include the 4 and 6 Meter Shields, the SWL Award, and the awards for Quality Construction Projects. These are confined to members only.

When considering your nominations, please refer to previous successful winners as included in www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or Individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX and Pat EI9HX, or to Peter Grant EI4HX, Chair of Awards Committee, QTHR, or by e-mail to ei4hxperimental/ at/ eircom/ dot/ net.

Closing date for nominations is February 30th 2011.

IRTS AGM Annual Dinner and Rally 2011

You are reminded of the importance of attending the IRTS AGM weekend, including Annual Dinner and Rally will be held this year on Saturday March 26th and Sunday March 27th. The event will be hosted by the Limerick Radio Club. The venue is the Radisson Blu Hotel, Ennis Road, Limerick. For more information contact, Ger McNamara EI4GXB on 087 2532512 or ei4gxb/ at /gmail/ dot/ com.

IRTS Committee Meeting

The next IRTS committee meeting will be held on February 5th in Portlaoise. All affiliated clubs representatives are encouraged to attend.

ECHO IRELAND

The deadline for submitting articles, advertising, etc, to Echo Ireland is February 5th 2011. Everyone is encouraged to submit articles to this journal for consideration for publication.

Engineers Week

This year Engineers Week, organised by Engineers Ireland, runs from 14 - 20 February. Once again the Society plans to participate in centres through the country. Currently under consideration are Athlone, Cork, Cavan, Dundalk., Mayo and Limerick. If you would like to participate please contact S&#65533;amus ei8bp / at / eircom /dot/net.

Your Club Listing on IRTS Website

Club Secretaries S&#65533;amus EI8BP as Web Editor is preparing to update the Clubs page on the Website. Some of this information is somewhat outdated. Please have a look at your club's entry on the IRTS Website and contact S&#65533;amus by Email at ei8bp / at / eircom / dot / net with any changes. The Website information is an important point of contact for prospective club members and an opportunity to promote your club.

Region 4 Theory Classes

Following on from the successful classes last year, plans are being put in place for Radio Theory classes in Limerick.

Classes will also include lots of practical sessions and will be based on the revised syllabus as detailed on the IRTS website.

Classes will commence in February depending on numbers and those interested in attending should contact Ger McNamara EI4GXB on 087 2532512 or ei4gxb / at /gmail / dot /com.

Cork City Radio Museum

North Cork Radio Group would like to ask the amateur Radio community for donations on behalf of the Cork City Radio Museum. The Museum for those not aware is situated in the old Governors House at Cork City Gaol and houses a wonderful collection of artefacts, including the RTE restored 6CK Radio Broadcasting studio.

Some years ago the museum was in the early phases of modernisation by the late Larry O'Sullivan EI8FJB, and a lot of Larry's work is still in place although sadly unfinished. As a result the museum is in need of restoration and TLC, the centre at present is only open to requested visits.

It is our intention with the help of the community to help the declining facility reach Larry's goals in bringing such a wonderful place back into the public access zone.

If anyone can help in donating any form of equipment from the nostalgic golden era right up in to present it would be greatly appreciated.

Anyone who can help with surplus items can contact either Anthony EI3GAB or Pat EI2GHB via info /at/ ei1nc/ dot/ com or at any NCRG meeting on the first and third Wednesday of the month. Information on the group is available at www.ei1nc.com

---

Blackrock Castle Observatory Cork

North Cork Radio Group will be active EI1NC/P on February 19 and 20 from 10am until 5pm at Blackrock Castle Observatory a 16th century Castle located 4km from the heart of Cork city on the banks of the river Lee.

The Castle has seen many uses in its vast history and now houses the cutting edge of space and observation technology, more info on the Castle is available at www.bco.ie information on NCRG is available at www.ei1nc.com

---

Theory Classes at DAR

Dundalk Amateur Radio Society, EI7DAR, will commence amateur radio theory classes Thursday February 3rd 2011. Classes will be held at the club premises 'Larkin House', 113, Castletown Road, Dundalk.

This is an excellent opportunity for anyone interested in obtaining their amateur radio Licence in an adult learning relaxed environment.

For further information and details please contact ei4dib / at /ei7dar/ dot/ com or by text only to 086 4066660. Everyone welcome.

Bangor and District Amateur Radio Society

Michael Stevenson GI4XSF, writes and tells us that Bangor and District Amateur Radio Society meet on the 1st Thursday of every month in "The Boathouse", Groomsport at 8pm.

At 8pm on Thursday 3rd March 2011 we are hosting a talk from Brian Clarke "Mr Marconi's magic box", which is a history of Marconi's involvement with the merchant navy.

As always, visitors are most welcome.

More information from Mike GI4XSF on 048 4277 2383, or club website:

http://www.bdars.com

West Tyrone Amateur Radio Club GN4OMA

WTARC are running an amateur radio foundation course.

Registration Date, Tuesday February 1st 2011. at 8pm.

Course instruction will start Saturday February 19th, 2011 and Saturday February 26th 2011. That is two Saturday afternoons.

Examination Date is March 1st 2011.

The Venue is Technology Education Centre, 2 Spillers Place, Omagh, BT78 1FA.

Everyone welcome and more information can be obtained from club website www.wtarc.co.uk.

Shannon Basin Amateur Radio Club

The Shannon Basin Radio Club will be holding its AGM on Friday the 28th Jan in Hannons Hotel, Roscommon at 20:00. All Members are requested to attend. Everyone is welcome and is encouraged to attend. Anyone who wishes to find out more can contact Brian EI8IU at 0862514822.

DX News

Mats SM6LRR is at present QRV from Sri Lanka as 4S7LRG mainly on 160, 80 and 40m. He is there till 4th February. He hopes to take part in the CQ WW 160m CW Contest at the end of the month so anyone needing 4S7 on Top Band should keep a look out for him. QSLs go via his home call.

Three Swedish amateurs are active from Madagascar until early February. They are signing 5R8HL and are located on the mainland IOTA AF-013 and on Nosy Be Island IOTA AF-057 at various times.

For the Island chasers quite a rare one is due next month with CN2LWL being operated by a group of Italian amateurs from Herne Island IOTA AF-068. Dates are 1 - 5 February and QSL info is via I8LWL.

Gerd DJ4KW and Gisela DK9GG will operate from V31YN and V31GW respectively in Belize until the end of next month. During the period 2 - 8 February they hope to go to Southwater Caye (IOTA NA-180) using the call V31YN/P.

The Microlight Penguins Group are off on another trip down south where they will activate VP8ORK from the South Orkney Islands. This is a rare one for DXCC purposes and should be on the air from 27th January till 8th February.

Radio Rallies

PHOENIX A.R.C.

Phoenix Amateur Radio Club annual rally will be held on Sunday 20th February 2011 in the usual venue, Coolmine Community School, Blanchardstown.

Doors open for Traders at 9.00 am Doors open to public 3.00am Admission 5 Euros. To book tables contact Tony at 0872439997 or Tom at 01-8211043.

Plenty of Parking, Refreshments and Bring and Buy Sale. All usual traders will attend.

This is the First Rally of 2011.

For further details on Rallies please see www.irts.ie/rallies

---

Amateur Radio helps rescue co-ordination

Radio Amateurs in the Brazilian town of Nova Friburgo, have received high praise from the Brazilian civil defence authorities during the recent flooding there.

Lt Col Roberto Robadey, said, "without their help, we couldn't have done anything in those first two days," Radio amateurs took their radio

equipment to key points across the town to provide a communication link between rescue groups.

Radio History

On this day in 1909, the first Radio rescue at sea took place. The distress signal was CQD later to be replaced by SOS.

Items for inclusion in next weeks Radio News should be forwarded to Aidan EI7JC, preferably via e-mail to "news / dot /ei7jc / at / gmail / dot / com". Or by phone to 085 7100511 News can also be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor not later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 16th-January, through Sunday, 23rd-January there were 225 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T33, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VK9X, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2010 DX MARATHON REMINDER (Deadline Nears). John, K9EL, CQ DX Marathon Administrator, reports: "Just a reminder that log submissions for the 2010 DX Marathon must be in by 2359Z, 31 January 2011. Please visit <http://www.dxmarathon.com> for details on submitting your log. High

claimed scores will be posted on the website after the submission deadline. Plaque and Certificate winners for 2010 will be announced mid-year 2011 in CQ Magazine and on the website.
Please note that the DX Marathon E-mail server crashed and was down from 0500Z to 2200Z on January 19th. Any logs sent during that period are unfortunately lost and will need to be re-submitted. If you are not sure, a complete list of all logs received is posted on the website. If you do not see your call, please re-submit. We now have a backup E-mail server in place to prevent future problems. We apologize for any inconvenience caused.....73"

2011 DX PREFIX AND 10 BAND CHECKLISTS. Pete, G-13038, from Pete's DX Newsdesk, reports: "As you know the DXCC country total has recently increased from 338 to 340 countries. So, I have updated the various prefix and 10 band checklists on my DX Newsdesk Web page. If you go to the Web page at <http://www.dx-newsdesk.co.uk> you will see a button to click to access the lists. They are in Doc, Excel and PDF formats. Help yourself and feel free to pass them on to your friends. Please, E-mail me if you want the Zipped file (881 KB) sent direct as an E-mail attachment to: dx_newsdesk@yahoo.co.uk or pete@dx-newsdesk.co.uk "

4L, GEORGIA. Operator Omari, 4L5O, will be active during the CQ 160-Meter CW Contest (Janaury 28-30th) as a Single-Op entry. QSL via N3SL.

4Z20, ISRAEL. The Israel Amateur Radio Club (IARC) is proud to announce a special 3 month activity for the Holyland Contest's 20th anniversary, starting February 1st, through April 30th, 2359z. Look for the following honorary activations of two special prefixes/callsigns, 4X20HC and 4Z20HC. Activity will be used on CW, SSB and the Digital modes. QSL via 4Z4TL. For more details about the Holyland Contest, see: http://www.iarc.org/~4z4tl/4X20HC_fil.htm

5X, UGANDA. Nick, G3RWF, will once again be active as 5X1NH from Fort Portal in western Uganda, and will be there between February 20th and April 14th. Usually he is there to do voluntary work, so his activity is usually outside the work hours. He prefers to operate CW but plans to also be on the Digital modes with some SSB. Activity will be on all bands except 160m (no room for an antenna). His rig is a K3. QSL via his home callsign and LoTW.

8P, BARBADOS. Nathan, KA1YMX, will be active and on vacation from here between February 26th and March 5th. Activity will be on CW and SSB using an Elecraft K2. No other details are available. QSL via his home callsign.

8Q, MALDIVES. Andrew, G7COD, is once again active as 8Q7AK. This time from Embudu Island on the South Male Atoll, Maldives (AS-013), between February 5th and approximately February 18th. He states that this trip is a holiday and plans to be active on 80-10 meters, including 30/17/12 meters, using CW and SSB. The following are suggested times of operations: 0730-0830z, 0900-1030z, 1300-1500z and 1730-1800z. Suggested frequencies (+/- QRM) are:

CW - 3503, 7003, 10103, 14003, 18073, 21003 and 24893 kHz
SSB - 3795, 7063, 14190, 18133, 21253 and 24953 kHz"
He also hopes to have limited operation on the 160m band but this is not confirmed. QSL via his home callsign, direct (see Web page) or by the Bureau. Andrew now has a dedicated Web page at: http://8q7ak.freewebspace.com

9G, GHANA. Operators Kees/PE1KL and Lisa/PA2LS will be active as 9G5LK from a local clay beach house located near the village of Ampenyi, close to Cape Coast and Elmina, between April 28th and May 6th. Activity will be on 80-10 meters using SSB, PSK31 and RTTY. QSL via PA2LS. Visit their DXpedition Web site at: http://www.pe1kl-pa2ls.com
By the way, an award is available for working them. All you need is 2 QSOs with 9G5LK on 2 different bands or 2 different modes.

9K50, KUWAIT (Special Event). Look for amateur radio operators in Kuwait to use the special prefix "9K50" between January 26th and February 28th. Activity is to celebrate the 50th anniversary of Kuwait's independence. Also, 9K50NLD will be on the air between February 24-28th. Activity will be from the members of the Kuwait Amateur Radio Society (KARS).

ANZA NET. Lindsay, VK3WM, Team Boss for the "Australia, New Zealand and Africa DX Net" (ANZA), would like to bring the readers of the OPDX up-to-date on the operation of the ANZA net. He states, "The net runs every day on 20m on 14.183 kHz with a different net controller each day, and all nets start at 0515z and run for about one hour depending on the DX. Also, there is a 15m net on 21.205 kHz on Saturdays starting at 0445z. The line up is: Friday - John/VK4LJ, Saturday - Morris/ZL1ANF, Sunday - Col/VK4CC, Monday - Jamie/NH7U, Tuesday - Lindsay/VK3WM, Wednesday - Ray/VK4NH, Thursday - Rob/ZLIRD for 20m, and 15m Alan/VK3HGN. We also have a Web page at <http://anzadx.net>."

AO1, SPAIN (AAW Op). Spanish operators Fernando/EA1GHT, Gil/EA1HFM, Dani/EB1LA, Javi/EC1KV, Juan/Carlos EA1AUM, Juanjo/EA1WX, Carri/EA1CUB and Luis EA1CS will activate AO1AWW during the "8th Antarctic Activity Week" between February 21-27th. Reference Number is WAP-203. Activity will be on all bands and modes. QSL via EA1GHT. A full list of AAW participating stations can be found at: http://www.waponline.it/Default.aspx?tabid3

C6, BAHAMAS. Operators Bob/N4BP (C6AKQ) and Kevin/K4PG (C6APG) will once again be in Freeport, Lucaya, Bahamas, for the ARRL International DX CW Contest (February 19-20th) as individual entries (Bob/C6AKQ on 80 meters and Kevin/C6APG on 40 meters). A third operator "may" join them to operate on 160 meters, but that is not known at this time. Bob is expected to arrive early on February 15th and stay through February 22nd. While Kevin will arrive on February 17th and stay through February 21st. Prior to the contest, they will be operating on the 30/17/12 meter bands, HF bands using CW and probably the Digital modes. QSL direct to their home callsigns with SASE and/or LoTW.

CARIBBEAN TOUR. Spanish operators Marcos/EA1PP, Oscar/EB1HF and Recio/EC1DPM will be visiting two islands in the Caribbean during the first half of February. Activity will be holiday style from the following locations:
Bonaire (PJ4) - Callsign PJ4/EA1PP; February 5-10th
Curacao (PJ2) - Callsign PJ2/EA1PP; February 11-16th.
Operation will be on SSB and RTTY (bands not provided). Look for PJ2/EA1PP to be active during the CQ WPX RTTY Contest (February 12-13th). QSL both callsigns via EA1PP.

CN, MOROCCO. Operators Ahmed/CN8WK, IK1QBT, Stefano/IK2QEI, Matteo/IK2SGC, Flavio/IK1SPR, Fabio/IV3BAZ, Gianfranco/IV3JCC, Maurizio/IV3ZXQ and Saaid/CN8WW will be active as CN3A from Safi during the ARRL DX CW Contest (February 19-20th) as a Multi-2 entry. QSL via LoTW or via I2WIJ. Visit their Web page at: http://www.facebook.com/pages/CN3A/112969535390789

CQ NEWS (Press Release). Richard Moseson, W2VU, Editorial Director, sent out the following on January 18th: "WorldRadio Online Analysis Shows Ham Activity, Code Use, Both Up Since End of Code Testing -- An analysis by WorldRadio Online columnist Randall Noon, KC0CCR, suggests that levels of on-air ham activity and Morse code usage both have increased since the FCC dropped the requirement for Morse code testing in early 2007. Noon is the magazine's FISTS columnist. FISTS is an organization that promotes the use of Morse code among hams.
Writing in the February issue of WorldRadio Online, Noon based his analysis on a combination of FCC licensing statistics and published results of ARRL Field Day activity from 2005 to 2009. He used Field Day data on the assumption that 'people who participate in Field Day are at least minimally active hams.'
Comparing statistics for Field Day activity with the total number of licensees, Noon determined that both the raw number and the percentage of licensed hams operating in Field Day had increased since 2007. In addition, he found that the number of Morse code (CW) contacts in Field Day had increased as well, hitting an all-time peak in 2009. This is significant, he says, 'because it is assumed that hams will use the same modes on Field Day that they do when operating at other times.'
Since the FCC stopped requiring code tests, Noon concluded, 'it appears that the use of CW has gained in absolute usage because the newer hams licensed since 2007 appear to be more actively engaged in the hobby, as evident by the higher levels of participation in Field Day.'
Noon's complete analysis appears in the February 2011 issue of World-Radio Online, which will be posted on or about January 20 on <www.worldradiomagazine.com>. The magazine is available to readers at no charge.
WorldRadio Online is an advertiser-supported publication of CQ Communications, Inc., which also publishes CQ Amateur Radio, CQ VHF and Popular Communications magazines. Richard Fisher, KI6SN, is the Editor."

CTU (2011) WEBINAR. On Monday, February 7th, at 8:30 PM EST (Tuesday, February 8th - 0130z), Tim Duffy, K3LR, will present a look at Contest University (CTU) 2011, including the course line up and list of professors. Tim will review past years and tell you what makes CTU 2011 the best yet.

You will find out what previous students have had to say about CTU and why you should attend this year. Registration for this Webinar can be done at: https://www2.gotomeeting.com/register/741726946
A URL is also available at <http://www.pvrc.org> under "Upcoming Webinars".

D4, CAPE VERDE. John IK5CRH, Operators John/IK5BCM, Beppe/IK5CBE and Andrea will be active as D44TBE from Sal Island (AF-086) between February 2-9th. Activity will be on 80-10 meters, possibly 160m (depending on the space), using CW, SSB and the Digital modes. QSL via IK5CRH.

EA8, CANARY ISLANDS. Operators Andrea/IK1PMR and Claudia/PA3LEO are now active as EA8/homecall until March 8th. Activity will be holiday style on 160-6 meters. QSL via PA3LEO or to the LoTW.

FH, MAYOTTE. Bruno, DH1BL, is currently active as FH/DH1BL from Mayotte (AF-027) for the next 3 years. He hopes to get "FH" callsign in the near future. He uses a FT-920 w/100 watts into a 5-band antenna (20/17/15/12/10 meters) mounted 9m above the ground. Bruno was spotted this past week on 20 meters SSB around 14225 kHz after 1430z. QSL via his QSL Manager DL7BC, by the Bureau or direct. Cards will be printed once a FH callsign is issued to him, so please be patient when sending QSLs to his manager.

FJ, ST. BARTHELEMY. Daryl, W7TAE, will be active as FJ/W7TAE from St. Barthelemy (NA-146) between January 23-28th. Activity will be on 40/20/17 meter mainly SSB. QSL via his home callsign.

FM, MARTINIQUE. Rene, F5LGE, is now active FM/F5LGE until January 30th. Activity is 160 and 80 meters only and on CW. Operations seem to take place between 2330-0730z. QSL via F5LGE, by the Bureau or direct to: Courgibet Rene, 13 Ruelle Crepion, 51240 ST Germain la Ville, FRANCE.

FM, MARTINIQUE. Bernard, F5LBG (UFT member), is now active as FM/homecall from Rivi&#65533;re Sal&#65533;e until February 3rd. Activity will be holiday style, QRP and using 5 watts. Look for him daily around 1000z and 1800z. The suggested frequencies are: 10106, 14060 and 18096 kHz. QSL via F5LBG when he is back home, direct or by the Bureau.

FS, ST. MARTIN. Members of the Castalia Island DX Association, George/W4LW and Fred/K4FMD, will once again be active as FS/K4UP from St. Martin (NA-105) between January 28th and February 5th. Activity will be on 20/15/12/10 meters SSB, depending on the propagation. QSL direct to K4UP.

HI0, DOMINICAN REPUBLIC. Members of the Radio Club Dominicano Inc. invite you to celebrate the "Month of the Patria" beginning 0000z on January 26th, and ending at 2359z on February 27th, by working their special event station HI0RCD. Activity is to commemorate the birthday of their father of the Patria, Juan Pablo Duarte, and to celebrate their 167th anniversary of independence. A special QSL card will be sent to all the stations that have a contact with their 9 different circuit affiliate stations. QSL via Bureau. Activity will be on 160/80/40/20/17/15/10 meters using CW, SSB and the Digital modes. Look also for HI0RCD to be active on the AO-51 Satellite. For more details, see QRZ.com or visit Luis's, HI8LAM, Blog

page at: http://www.hi8lam.blogspot.com

HI, DOMINICAN REPUBLIC. Claudio, HB9OAU, will be active as HI7/HB9OAU from Bayahibe, Dominican Republic (NA-096), between February 6-18th. Activity will be holiday style on 80-10 meters using SSB. Claudio may possibly activate Saona and Catalina Islands, both IOTA NA-122 as HI2/HB9OAU. QSL via his home callsign, direct or by the Bureau.

HS8, THAILAND. Voravut, HS8JYX, from Paknum Muang Krabi, is planning to be in the CQ 160-Meter CW Contest (January 28-30th) as a Single-Op/Low-Power entry. QSL via HS8JYX, LoTW or eQSL. He states he will use an inverted L antenna and transmit the power limit at about 50 watts. Visit his Web page at: http://www.hs8jyx.com

IOTA NEWS.....
AS-069. Sergey, US0IW, hopes to activate the rare Iony Island in the Sea of Okhotsk sometime in July. Operation is in the early planning stages. More details are forthcoming.

NA-008. Jay, VY1JA, will once again be active as VY0JA from the CFS Alert Arctic base on Ellesmere Island for the last time starting February 26th. Operation will last about 5 weeks. Using a FT-990 at power and dipoles at 15 feet, look for Jay to be active on 30 meters, 40 meters, and 20 meters (in that order) during the evenings and weekends. The mode will be mainly CW, but Digital will be used and SSB can be requested by using the E-mail address at the top of the VY1JA QRZ.com page. QSL via N3SL; JA stations to JA3JM. This activity is also valid for the Arctic Challenge program.

NA-067. Operators Amanda/KI4IWS and Bill/KG4CXY will be active as W4OTN from Core Banks Barrier Island (USI NC033S, WLOTA 0596, Pamlico County, North Carolina) between July 29th and August 1st. Activity will include an entry in the RSGB IOTA Contest (July 30-31st). Outside of the contest, they will be active on 80-10 meters using CW and SSB. QSL W4OTN, by the Bureau or direct (QRZ.com).

NA-091. Christian, F5IDM, will be active as VE7/F5IDM from Quadra Island (CISA BC006, WLOTA 1757) between January 29-30th. Activity will be on the HF bands on or near the usual IOTA and island frequencies. QSL direct or KH6 bureau to F5IDM.

SA-046. Members of Casa do Radioamador de Pernambuco (CRAPE) will be active as PY7CRA from Itamaraca Island (DIB-018) between February 11-13th. Operators mentioned are Cris/PY7GK, Luiz/PY7LZ, Ben/PY7VI, Jim/PY7XC, Ciro/PY7ZY and Luiz/PU7RLM. Activity will be on all HF bands using CW and SSB. QSL via PY7CRA, direct or by the Bureau.

SA-055. Operators Ezequiel/LU1EEZ and Mark/LU7CAW will be active as homecall/D from Martin Garcia Island between February 23-28th. Activity will be on 80-10 meters. QSL LU1EEZ/D direct and

LU7CAW/D by the Bureau.

J7, DOMINICA (Update). Guy, N7UN, reports in "DX News Release #2": "The 'Buddies in the Caribbean' DXpedition (Team #1) which specializes in 100 watt or less low power radios and the Buddipole portable antenna systems will be on Dominica (J7), February 1-9th, 2011. We plan to stay at the Calibishie Cove hotel <http://www.calibishiecove.com> on the north shore of Dominica. The entire mini-DXpedition is limited to equipment that can fit in your airline suitcases (75 lbs / 34 kg max). With J7 licenses, the eight operators are: Budd/J79FF (W3FF), Chris/J79HFP (W6HFP), Dan/J79ZP (WZ1P), Paul/J79AVO (KB9AVO), Mike/J79VG (KC4VG), Steve/J79AT (wG0AT), Wey/J79EA (K8EAB), and Guy/J79UN (N7UN). There will be 3 hotel stations in operation at various times on 160-10 meters using CW, SSB, and RTTY. During the day, several teams will be battery-only, field portable either from Dominica beaches, scenic mountain tops, or national parks. 160m and 80m CW operations are planned, conditions permitting. QSL via LoTW, eQSL, or mail to the operator's home callsign (SASE required)."

J7, DOMINICA. Lars, SM0CCM, will be active as J73CCM from Dominica (NA-101) between February 21st and March 28th. Activity should be on all bands using CW, SSB, RTTY and PSK31. Look for Stig, SM3PHM, to join him in Dominica on March 14th, and be active as J79M. Stig's favorite band is 160 meters and CW. He will stay with Lars until March 28th, where both will travel back to Sweden together. QSL via their home callsigns. Bureau is preferred. Also QSL via LoTW.

KG4, GUANTANAMO BAY (60m Op). Tip, N4SIA (KG4AS) and a group of operators plan to activate this country as an all time new one on 60 meters between February 22nd and March 8th.

KH6BZF PROPAGATION FORECAST/REPORT (For January 24-30th)....
Jan 24 AN SOLAR REFERENCE KEYS
Jan 25 AN --------------------
Jan 26 AN BN - Below Normal
Jan 27 AN AN - Above Normal/Geomagnetic Level is QUIET
Jan 28 AN LN - Low Normal
Jan 29 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jan 30 AN-HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH8, AMERICAN SAMOA. Ron, WA8LOW, (along with others - not named) will be active as WA8LOW/KH8 from American Samoa between July 30th and August 14th. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. They plan to use high power stations with beam antennas (40-6m) and verticals on 160/80m. QSL direct to WA8LOW.

LX, LUXEMBOURG. Operator Marcus, DL1EKC, will be active as LX7I during the CQ 160-Meter CW Contest (January 28-30th) as a Single-Op/High-Power entry. QSL via LX2A. Logs will be put on the LoTW.

PJ2, CURACAO. Peter, DF7DQ, is now active as PJ2/DF7DQ from Curacao (SA-099, WLOTA LH-0942) for the next two months primarily on business, but also relaxation and ham radio. Activity this past week was mainly on 40 and 30 meters PSK. Peter plans to apply for a local PJ2 callsign. QSL PJ2/DF7DQ via EA5GVH by the Bureau or direct to: P.O.Box 651, Willemstad - Curacao - Netherlands Antilles. For pictures and updates: http://www.df7dq.de

QSL 4V1 via the QSL Manager N3OS.

HH/PA5M QSL STATUS. "DX-World.net" reports that Michael, PA5M, states, "The HH2/PA5M QSL cards finally arrived from printer after the first lot got lost in the mail. All who have sent direct cards with sufficient postage will have their cards answered soon! All Bureau cards will be answered soon after."

PIRATE ALERT (ZL9BS/ZL9BI). Phillip, ZL2TZE, would like to bring to the attention of the readers of OPDX News that this Pirate Station is active again on the CW section of 40 meters. This station has been heard over the last 2 or 3 weeks and is a Pirate .. 7008 to 7010 last worked 14th Jan @ 1442z 7010.. Please report any activity or better capture a 20 second MP3 audio file and post it to: IntruderWatch@googlegroups.com Please do not send green stamps etc for QSL cards. Phillip states, "We need to catch this person so please help us out....73"

RI1ANR QSL STATUS. Nick, RK1PWA, reports that after the termination of the DXpedition of the RI1ANR operation, he will begin mailing QSL cards. Approximately in April-May of 2011.

V31JZ QSLS. Please note that Art, NN7A, is the only QSL Manager for V31JZ. He states that "ONE" logbook for the year 1996 is not available

but all other logbooks between 1989-2010 are available.

PLEASE NOTE: Bob, W5KNE, has been getting questions about being the QSL Manager for the current VK9XN operation by a JA group. Bob states that he can only confirm QSOs for his 1992 VK9XN operation and NOT the JA group's operation.

YJ0VK QSL STATUS. Chris, VK3QB, reports that QSL cards arrived January 10th, from the printer. QSL Manager Allan, VK2CA, has confirmed that QSL requests are now being processed. For details visit the Web site at: http://yj0vk.vkham.com/news/default.html
Chris states, "The team apologizes for the lengthy delay in getting the cards together [illegible] it appears that there were problems with post and customs [illegible] but now they are on their way."

QSLS VIA LoTW: 6W7SK, 9A4RX, C6ANM, D2EB, DF2UU, DP4T, EA1DR, G4IIY, I0MWI, SV2FPU/8, TC03W, VE3OI, VP9/WW3S and YO3JF

QSLS RECEIVED VIA MAIL: 5N7M, 9L5VT, AT10BP, C5A, C50C, C56E, LA2GRA, MU/F5CWU, OH9AA/p, OX/DF9TM, OX/DL2SWW, PJ2/N2MF, PJ4A, PJ4D, PJ4W, PJ6A, PJ7/K1GI, PJ7E, PZ5T, S79K, VP9HE, YJ0HA, YJ0VK, Z21BB and ZD9AH

QSLS RECEIVED VIA THE BUREAU: 5B/UT0U, 5N0OCH, CT9/DJ0JE, DA0HC, DF0ESA, DG6HD, DK0DAN/LH, DL0FTP, DL0THR, DL1JEN, DL4JS/6W, DL6OO, DR4X, DR9P, DR2010L, EA1SB, EG5FUV, GI7AXB, HB0/OE9SDV, HF100ZHP, HF680TAR, IK4RUX/4, IK6CLD, IQ5FI, IZ4JMA, IZ8FRH, K3NEM, LZ1NK, MS0ZET, OL80OK, ON9DAMIAN, ON50RN, PA1EJ, PG3N, PI4NAF, RD3AF, RL6YXX, SN51OGP, SP3EWP, SP6VWX, SP7HJJ, SQ80MKW, TA3SA, TF3AO, TF4M, TP60CE and YP1WFF

RW2, KALININGRAD. Members of the UA2 Contest Club will be active as RW2F during the CQ 160-Meter CW Contest (January 28-30th) as a Multi-Op entry. QSL via DK4VW.

SILENT KEY. It was reported that Sigrid, DL7CN, became a Silent Key (SK) on December 24th, after a short illness. She together with Frank/DL7FT (SK 2004) had some DXpeditions in the Pacific area. OPDX and its readers would like to send out our deepest sympathy to the family and friends of DL7CN.

SPECIAL EVENT (Ronald Reagan Centennial). Look for two amateur radio clubs in California to activate special event stations in honor of the 100th birthday of former President Ronald Reagan on February 6th.
* The Ventura County Amateur Radio Society will operate N6R from Thousand Oaks, California, from 1600z on Sunday, February 6th, through 0200z Monday, February 7th, and intermittently at other times on Saturday (February 5th) and Monday (February 7th). Suggested frequencies are (+/- QRM):
CW - 3545, 7045, 14045, 21045 and 28045 kHz
SSB - 3820, 7260, 14255, 21320 and 28490 kHz
* As well as local repeaters and FM simplex.
More details are available at: http://www.qrz.com/db/n6r
E-mail scheduled requests for <n6rn6r@aol.com>. QSL via N6ZE, w/SASE (no eQSL or LoTW).

* The Santa Barbara Amateur Radio Club will operate W6R at various times
and from various locations on Friday, February 4th through Monday,
February 7th. Main operation will be on February 5th, from 0300-2100z.
In addition, a rover operation from the Reagan ranch is scheduled on
February 7th. For updates and QSL information, see the following Web
page at: http://www.sbarc.org/w6r.html

TC2011, TURKEY (Special Event). Look for special event station TC2011EWU
to be active during the 2011 World University Winter Games being held in
Erzurum, Turkey, between January 27th and February 6th. Members of the
Turkish Radio Club Station (TRAC Bursa Subesi - YM3KB) will be active on
all bands using CW, SSB, PSK and ROS. Station's scheduled activity on
bands, frequencies and modes, will be available online at:
http://www.facebook.com/?ref=me#!/profile.php?id=100001715248764
QSL via the address on QRZ.com or by the Bureau.

V2, ANTIGUA. Operators Dave/W9DR, Dave/K9UK and Tom/W9AEB will operate
holiday style from Antigua (NA-100, Grid Square FK97BD) between June
14-28th. Look for W9DR to be active as V25DR and concentrate on 6 meters
SSB/CW on 50.115 MHz. Look for K9UK to be active as V25DD and W9AEB as
V25TP and operate on 80-10 meters using CW, SSB and PSK31. Additional
information will be available on the TBA Web site. QSL via their home
callsigns.

VISALIA DX CONVENTION (IOTA Dinner Banquet). The 16th annual "Islands
On The Air" (IOTA) Dinner will be held in conjunction with the 62th
annual Visalia International DX Convention on Friday, April 15th, in
the Plaza Room of the Holiday Inn Hotel, 9000 W. Airport Drive, Visalia,
CA. Program will be presented by Martin/G3ZAY, Dominic/M0BLP and Mike/K9AJ.
For further information contact N6VR at: rayn6vr@cableone.net

VP5, TURKS AND CAICOS. Karol, G0UNU (ex-ZD8KR), will be active as VP5/G0UNU
from Grand Turk (NA-003) between January 31st and February 6th. Activity
will be holiday style (because he is on a tour group). Operations will
be on 40-10 meters between 1200-1400z, and possibly other times. He will
use a TS-480 and a vertical antenna near the edge of the ocean. QSL via
his home callsign, direct or by the Bureau. No eQSL.

VP8O, SOUTH ORKNEY ISLANDS. Members of the Microlight Penguins departed
Ushuaia, Argentina, on board the "RV Braveheart" on Friday, January 21st,
to head to South Orkney Islands (AN-008). If all goes well, VP8ORK should
be active between January 27th and February 8th. They expect to be on the
air with 7 stations on all HF bands 160-10 meters using SSB, CW and RTTY.
Suggested frequencies are:
CW - 1826.5, 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024 kHz
SSB - 3799, 7078, 14200, 18145, 21295, 24945 and 28475 kHz
RTTY - 7040, 10140, 14080, 18100, 21080 and 28080 kHz
If you want a QSL card, there are three ways available to receive one:
OQRS direct (on the VP8O Web page), OQRS Bureau (on the VP8O Web page)
and direct by mail via VE3XN [w/SASE/Green Stamps/IRC(s)]. For more
details and updates, visit the VP8O Web page at: http://www.vp8o.com
By the way, real-time news is now available at:
http://www.vp8o.com/realtimenews.htm

XT, BURKINA FASO. Jon, K3QF, is now active as XT2RJA from Ouagadougou
for the next few weeks. QSNs show that he has been on 40/30/20/17/15
meters using CW, RTTY and PSK. There is a report that he will also try
to be on other bands too, including 160m. QSL via K3QF.

YE1, INDONESIA. Operators Yon/YB1CCF, Gus/YB1ALL, Nyoman/YB1NWP, Terry/
YC1KAF, Jo/YC0LOW, Danu/YD1GCL and Joz/YD1JZ will be active as YE1C
during the CQ 160-Meter CW Contest (January 28-30th) as a Multi-Single
entry. QSL YE1C to: West Java DX Association, PO. Box 1042, Bandung,
40010 Indonesia. Visit their Web page at: http://ye1c.wordpress.com

DXNL 1712 - Jan 26, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Mike, DJ5AV
(direct: dj5av@darc.de)

EA8 - Canary Islands: Andrea, EA8/IK1PMR, and Claudia, EA8/PA3LEO, will spend their vacations January 20th through March 8th operating on 160 through 6 m. QSLs for both calls via PA3LEO, and by LoTW also.

FH - Mayotte: Bruno, DH1BL, will be living on Mayotte (AF-027) for the next three years. Currently he is active as FH/DH1BL. He will have cards printed when he is sure about his call. QSL via DL7BC, direct or via bureau.

FJ - St. Barthelemy: Daryl, FJ/W7TAE, will be active January 23rd through 28th mainly SSB on 40, 20 and 17 m on Saint Barthelemy (NA-146). QSL via home call, direct or via bureau.

FM - Martinique: Rene, FM/F5LGE, will stay in Martinique until January 30th. He is active on 80 and 160 m, mainly using CW. QSL, direct or via bureau to his home call.

Also Bernard, FM/F5LBG, currently is active from Martinique and will stay until February 3rd. Find him daily using 5 Watts QRP at 10:00 and 18:00 UTC using CW on preferred frequencies 10.106, 14.060, and 18.096 MHz. QSL direct or via REF bureau to his home call.

J7 - Dominica: "Buddies in the Caribbean" DXpedition Team #1, especialy using 100 Watts or less power to "Buddipole portable" antenna systems from different DXCC entities is on route again: Eight operators Budd/J79FF (W3FF), Chris/J79HFP (W6HFP), Dan/J79ZP (WZ1P), Paul/J79AVO (KB9AVO), Mike/J79VG (KC4VG), Steve/J79AT (W/G0AT), Wey/J79EA (K8EAB), and Guy/J79UN (N7UN) intend to activate Dominica February 1st through 9th from the "Calibashie Cove Hotel" (www.calibishiecove.com/) situated at the north coast of Dominica. They will be on the air on 160 through 10 m using CW, SSB, and RTTY with three tansceivers simultaniously, additionally using field stations on battery power from summits, national parks or the beach. QSLs to appropiate home

calls, also by LoTW, or eQSL. A webside is in preparation.

JT - Mongolia: Ken, K4ZW, will continue to be active as JT1ZW and JT5DX through February 2nd mainly on the lowbands, including participation with CQWW 160 m CW contest.

PJ2 - Curacao: Karl, PJ2/OE3JAG, intends an operation in Curacao holiday style January 30th through February 11th using 40/30/20/17/12 m, mostly CW. QSL via LoTW, direct or via bureau. Request of bureau cards also by e-mail to karl@oe3jag.com .

Peter, PJ2/DF7DQ, currently is active on Curacao (SA-099, WLOTA LH-0942) for a two months' job. Find him mainly on 40 or 30 m with PSK. QSL via bureau to EA5GVH or direct to: P.O. Box 651, Willemstad, Curacao, Netherlands Antilles. Also find him at: www.df7dq.de .

PJ6 - Saba: Mike, PJ6/G4IUF, will be active holiday style from Saba (NA-145) January 27th through March 3rd. He will operate CW and SSB on 80/40/20/15/10 m. Preferred frequencies:
CW: 7 kHz from band's edge;
SSB: 3.797, 7.147, 14.157/14.247, 21.277, and 28.477 MHz.
Equipment is IC-7000 and W3DZZ antenna. QSL via home call, direct or via bureau.

VP8/O - South-Orkney-Islands: Members of "Microlite Penguins DXpedition Team"
will be on the air as VP8ORK from AN-008 January 27th through February 8th on their fifth trip. Members of the team are Ralph, K9ZO, Tom, ND2T,
James, 9V1YC, Ralph, K0IR, Don, N1DG, Wes, W3WL, Mike, N6MZ, Nodir, EY8MM, Steve, K6AW, George, N4GRN, Jerry, WB9Z, Lew, W7EW, and John, VE3EJ. They will go there with "RV Braveheart", a ship well known for transporting DXpedition teams. Activity will include all bands 160 through 10 m with SSB, CW, and RTTY. Mainly they intend to give a chance to DXers all over the world for a new entity and band points. They intend to be on the air with seven stations simultaniously with Elecraft K3 transceivers, Acom 1010 PAs, verticals for 40 through 10 m, BigIR verticals, and "Battle Creek Special" for 80/160 m. At sunrise/sunset time they will be on 80 m (CW and SSB) and 160 m simultaniously. The effort will cost about 300.000 US $, so they are looking for donations. QSL via Garry, VE3XN, by OQRS direct, or OQRS buro, both possible on DXpedition's homepage (www.vp8o.com), or direct to VE3XN. Last minute news also at www.vp8o.com/realtimenews.htm .
These are the announced frequencies (MHz) von VP8ORK:
BAND SSB CW RTTY
---
10 m 28.470 28.024 28.089
12 m 24.987 24.892 24.917
15 m 21.295 21.024 21.089
17 m 18.145 18.070 18.103

20 m 14.190 14.024 14.089
30 m --- 10.104 10.149
40 m 7.055 7.024 7.040
80 m 3.781 3.524 3.590
160 m 1.843 1.827 ---

VP9 - Bermuda: Look for Seppo, VP9/OH1VR, January 27th through February 1st on Bermuda (NA-005), also in the CQWW 160 m CW contest as Single-OP/ Low-Power. QSL via home call, find him also at: http://www.oh1vr.net .

XT - Burkina Faso: Jon, K3QF, will be in Burkina Faso for the next few week s.
He is QRV as XT2RJA usually during his evening hours. He hopes to be active in the CQWW 160 m DX Contest. QSL via K3QF.

6W - Senegal / J5 - Guinea-Bissau: Peter, HA3AUI, is going back to Africa. He will be active in his spare time as either 6W2SC from Cabrousse, Senegal, or J5UAP from Varela, Guinea-Bissau between February 1st and March 31st. Peter plans to operate mainly CW and digital modes on 160 through 10 m. His equipment includes an Elecraft K3-Transceiver, 500 Watts linear and 5 bands-Spiderbeam, as well as verticals. QSL via HA3AUI - direct only. His webside is at http://cqafrica.net .

8P - Barbados: Look for Tony/N3ME and his son Bernie/W3UR to be on the air January 26th through February 14th as 8P9ME and 8P9UR in Cave Bay, St. Philip Parish, Barbados (NA-021). They intend activity on all bands 80 through 10 m using CW, SSB, PSK, and RTTY. QSLs to home calls, direct, via bureau, or by LoTW.

Dominican Republic, special call: Members of "Radio Club Dominicano Inc." will use special call HI0RCD January 26th through February 27th comemmorating liberator Juan Pablo Duarte (http://de.wikipedia.org/wiki/Pablo_Duarte) and 167 years of independance on 160/80/40/20/17/15/10 m CW, SSB, digital modes, and on AO-51 Satellite. QSL via bureau. Find this event also at: www.hi8lam.blogspot.com .

Kazakstan, special call: "7. Asian Winter Games" will be held January 30th through February 6th in Kasachstan. Listen to several special calls like UN2011G good for special diplomes.

Kuwait, special call: For the event of 50 years of independence of Kuwait "Kuwait Amateur Radio Society" (KARS) got the specia L call 9K50NLD for February 24th through 28th time frame. January 26th through late February ham radio stations of Kuwait are also allowed to use the prefix 9K50.

Pirates:

The call of John, ZD9GI (Gough Island, AF-030), was pirated on 17 and 20 m on CW. John is only using SSB and PSK, never CW.
Also ZL9BI and ZL9BS on 40 m CW were pirate actions according to Phillip, ZL2TZE.

Silent Keys:

December 24th, 2010 Sigrid Handke, DL7CN, died after a short illnes at
72 years of age. Together with her partner, DL7FT (OM Frank, who died
in 2004), she was active in several DXpeditons.
Additionally Alain Martinet (C31LN), Livio Marocco (IK1RLI), and Drago
Grabensek (S59AR) were reported Silent Key last week.

UPCOMING CONTESTS

28.-30. January: CQ WW 160 m DX Contest;
29./30. January: UBA DX Contest;
29./30. January: REF Contest;
1. February-30. April: Holyland Contest, find more information at:
www.iarc.org/~4z4tl/4X20HC_fil.htm .

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:

AF-049, 3B8, Mauritius Island: Find Josep/EA3BT and Nuria/EA3WL
from Mauritius January 23rd through 29th as 3B8/EA3BT and 3B8/EA3WL.
QSL via EA3BT (d/B).

AF-057, 5R, Madagascar's Coastal Island West: Andy/SM1IRS, Al/SM4HAK, and
Eric/SM1ALH will be 5R8HL/p on Nosy Be Island January 22nd through
February 1st. QSL via SM1ALH (d/B).

AF-068, SO (CN), Western Sahara South Group: 5C2L (I8LWL), 5C2P (IK2PZC),
5C2J (IK7JWX), and CN8QY intend an activation of Herne Island February
1st through 5th as CN2LWL. QSL via I8LWL (d/B). Also: www.i8lwl.it .

AS-003,4S, Sri Lanka Is. (Mayn): 4S7LRG is Mats, SM6LRR, January 22nd
through February 4th in Sri Lanka. QSL via home call (d/B).

NA-003, VP5, Turks Islands: Karol/G0UNU is planning an activation of
Grand Turk Island January 31st through February 6th as VP5/G0UNU.
QSL via home call (d/B).

NA-008, VY0, Nunavut (Ellesmere Isl.) Group: Jay/VY1JA will be active as
VY0JA on Ellesmere Island for five weeks starting January 26th.
QSL via N3SL (d/B).

NA-091, VE7, BC Province South Group: Christian/F5IDM intends to be on
the air January 29th through 31st as VE7/F5IDM on Quadra Island.
QSL direct (QRZ.com).

NA-105, FS, St. Martin: K4UP, W4LW, and K4FMD will use FS/home call on
St. Martin on 20/15/12 and 10 m SSB January 28th through February 5th.
All QSLs via K4UP (d).

NA-122, HI, Dominican Rep., Coastal Islands: Starting January 27th
Adriano/IK2GNW will be active on Levantado Island for two months.
QSL via I2YSB (direct only).

OC-035, YJ, New Hebrides: Find Hermann/DL2NUD and Stefan/DL9GRE January
27th through February 2nd as YJ8GR and YJ8HP on Vanuatu. QSL via
home calls (d/B).

SA-024, PY2, Sao Paulo State West Group: A group of Brasilian operators
will present an activity from Comprida Island (DIIB SP-03) January
28th through 30th with PR2R callsign. QSL via PY2OP (d/B).

```
Further Information about Kazakhstan special calls mentioned in DXNL 1712:
==========================================================================

In the period from January 30th to February 6th, 2011 two key cities of
Kazakhstan - Astana and Almaty will conduct the 7th Asian Winter Games.
About 30 Asian countries are expected to send their sportsmen for the
Games. The Games will include competitions on 11 sports and the
sportsmen will contend for the 65 sets of medals.

Almaty
- International Ski Jump Complex - Ski Jumping
- Biathlon Complex - Biathlon
- A Cross-Country Ski Complex - Cross-country skiing, Ski orienteering
- Baluan Sholak Sport Palace - Short track speed skating, Closing Ceremony
- Shymbulak Alpine Sport Resort - Alpine skiing, Freestyle skiing
- Medeo Alpine Ice Arena - Bandy

Astana
- Indoor Speed Skating Stadium - Speed skating
- Ice Sport Palace - Ice Hockey
- Alatau Sports Palace - Figure Skating

Besides, during the Winter Asian Games the sports leaders of 45 Asian
countries will take part in the Asian General Olympic Council Assembly.

Almaty Amateur Radio League (ARL) is organizing activation of special
amateur radio stations including UN2011G and 8 stations with UP2011
prefix. The suffix of UP2011-stations will imply the abbreviation of
the 8 winter types of sports to be featured during the Games in Almaty
and Astana.

- UN2011G (Game) - ARL club station (regular callsign UN0GL)
- UP2011AS (alpine skiing) - regular callsign UN8GU, op. Andy
- UP2011BN (biathlon) - regular callsign UN7QCC, op. Victor
- UP2011CS (cross-country skiing) - regular callsign UN6GAE, op. Alexander
- UP2011FG (freestyle skiing) - regular callsign UN8GZ, op. Vitaliy
- UP2011HB (Russian hockey, bandy) - regular callsign UN6GT, op. Valeriy
- UP2011IH (ice hockey) - regular callsign UN2G, op. Evgeniy
- UP2011SJ (ski jumping) - regular callsign UN6QC, op. Arthur
- UP2011SO (ski orienteering) - regular callsign UN8GC, op. Michael
Special stations will be active during the period from January 30th,
(starting at 18:00 UTC) until February 6th (ending 18:00 UTC) of 2011
on all the HF bands including WARC. Modes of operation: CW, SSB & DIGI.
QSL via regular callsigns (direct & bureau).
Those who will manage to make QSOs with special stations can apply for a
```

special award "Almaty - 2011" established specifically for the occasion.
More information is available at: www.un-dx.ucoz.com (ENG) and
www.qrz.kz (RUS)
Program manager: Arthur UN6QC un6qc (at) yandex.ru

"ALMATY 2011" AWARD

"ALMATY 2011" award is established by Almaty Amateur Radio League. It is issued to all the licensed radio amateurs as well as to SWL for QSOs/SWL with special stations (UP2011 and UN2011 suffix) active during the 7th Asian Winter Games in Almaty and Almaty radio amateurs (callsign suffix starting with letters "G" or "Q"). The award has 3 classes of diploma and a Trophy (plaque).

To meet the award conditions one must make the following number of QSOs in the period from January 30th to February 6th, 2011:
For 3rd Class Award - 5 points (QSOs with 2 special call stations are compulsory),
For 2nd Class Award - 7 points (QSOs with 3 special call stations are compulsory),
For 1st Class Award - 11 points (QSOs with 5 special call stations are compulsory),
Trophy (plaque) - 20 points and more (is compulsory QSO with all 9 special call).

Almaty stations provide the following scores:
UN2011G - 3 points
UP2011. - 2 points each
UN#G. and UN#Q. - 1 point each

Contacts made on any radio amateur band in any mode are acceptable.

1st, 2nd, 3rd class diplomas are issued in electronic format free of charge. Those who request to receive the printed copy of diploma will need to pay the actual cost of printing and postage (in total 6 USD).
Cost of plaque - 30 USD + actual postage depending on destination.

Hard printed QSL cards are not required. Applicant's log is required showing basic information about the contacts actually made including:
Your call name and family (for award). Date, timing, band, callsign, RS/RST exchanged (in Exell or Word fail).
Please, applications for awards send to Artur UN6QC by email:
un6qc@yandex.ru .

Program manager: Arthur UN6QC

==> BOARD OF DIRECTORS: ARRL BOARD HOLDS 2011 ANNUAL MEETING

The ARRL Board of Directors held its 2011 Annual Meeting January
21-22 in Windsor, Connecticut. At the meeting, the Board set its new
legislative objectives for the 112th Congress, re-elected the ARRL
Executive Committee, bestowed various technical and service awards,
approved the organization's financial plan for 2011, set timelines for
the ongoing consideration of digital periodicals and more. A detailed
look at all the Board's actions, including the official minutes from
the meeting, will be forthcoming.

==> BOARD OF DIRECTORS: ARRL HUDSON DIVISION DIRECTOR FRANK FALLON,
N2FF, RETIRES FROM ARRL BOARD OF DIRECTORS
```

After more than 14 years as the ARRL Hudson Division Director, Frank Fallon, N2FF, announced his retirement from the Board at the conclusion of the 2011 Annual Meeting of the ARRL Board of Directors. Per the ARRL's Articles of Association, Hudson Division Vice Director Joyce Birmingham, KA2ANF, immediately moved up to the Director position to fill the remainder of Fallon's unexpired three year term, which runs through December 2012. In the coming days, ARRL President Kay Craigie, N3KN, will appoint a new Vice Director to fill Birmingham's unexpired three year term, also running through December 2012. Read more here <http://www.arrl.org/news/arrl-hudson-division-director-frank-fallon-n2ff-retires-from-arrl-board-of-directors>.

==> ARRL RECOGNIZES: ARRL BOARD BESTOWS AWARDS AT 2011 ANNUAL MEETING

The ARRL Board of Directors had the pleasure and distinction of bestowing three annual awards at its 2011 Annual Meeting -- the ARRL International Humanitarian Award, the George Hart Distinguished Service Award and the Bill Leonard, W2SKE, Professional Media Award. Read more here <http://www.arrl.org/news/arrl-board-bestows-awards-at-2011-annual-meeting>.

==> AMATEUR RADIO IN SPACE: NASA'S NANOSATELLITE HEARD BY HAMS

When a NASA nanosatellite -- NanoSail-D <http://www.nasa.gov/mission_pages/smallsats/nanosaild.html> -- ejected unexpectedly on January 17 from the Fast Affordable Scientific and Technology Satellite (FASTSAT <http://www.nasa.gov/mission_pages/smallsats/fastsat/10-156.html>), the agency called upon Amateur Radio operators to help track it. NASA asked radio amateurs to listen <http://www.arrl.org/news/nasa-seeks-amateur-radio-operators-aid-to-listen-for-nanosatellite-s-beacon-signal> on 437.270 MHz for the signal and verify that NanoSail-D was operating. NASA received almost 470 telemetry packets from 11 countries.

The NanoSail-D beacon sent an AX.25 packet every 10 seconds; the packet contained data about the spacecraft's systems operation. Listen here <http://nanosaild.engr.scu.edu/nanosaild2_pa3guo_20jan2011.mp3> for a recording of the nanosatellite's beacon, made by Hank Hamoen, PA3GUO, on January 21.

Once the NanoSail-D team received confirmation that the nanosatellite did indeed ejcect, NanoSail-D principal investigator Dean Alhorn quickly enlisted Alan Sieg, WB5RMG, and Stan Sims, N4PMF, to try to pick up NanoSail-D's radio beacon. Both hams work at the Marshall Space Flight Center in Huntsville, Alabama.

"The timing could not have been better," Sieg said. "NanoSail-D was going to track right over Huntsville, and the chance to be the first ones to hear and decode the signal was irresistible." Right before 2300 UTC on January 17, they heard a faint signal. As the spacecraft soared overhead, the signal grew stronger and the operators were able to decode the first packet: NanoSail-D was alive and well. "You could have

scraped Dean off the ceiling. He was bouncing around like a new father," Sieg recalled.

<http://www.youtube.com/watch?v=s1vZfm500hE> According to NASA, the nanosatellite was last heard at 1354 UTC on January 21. Telemetry indicates that the sail deployed on schedule and the satellite is now believed to be out of power, which NASA said was to be expected. NASA is now asking for visual tracking and sighting reports of NanoSail-D, which is about 650 km above the Earth. According to the agency, when the nanosatellite's sail reflects off the Sun, it could be up to 10 times as bright as the planet Venus -- especially later in the mission when the sail descends to lower orbits. You can track NanoSail-D on the web <http://spaceweather.com/flybys/> or on your smart phone <http://simpleflybys.com/>. NASA estimates that NanoSail-D will remain in low Earth orbit (LEO) between 70 and 120 days, depending on atmospheric conditions.

==> AMATEUR RADIO IN THE CLASSROOM: ARRL TEACHERS INSTITUTE NOW ACCEPTING APPLICATIONS FOR 2011 SESSIONS

The ARRL Education Services Department has announced the 2011 schedule for the Teachers Institute on Wireless Technology (TI) workshop. Offered through the ARRL's Education & Technology Program, the Teachers Institute is a four-day, expenses paid, in-residence learning opportunity designed for motivated teachers and other school staff who want to learn more about wireless technology and bring that knowledge to their students. A variety of topics are covered during the TI, including basic wireless technology literacy, electronics, the science of radio, radio astronomy, how to bring space into the classroom, ham radio operation, introduction to microcontrollers and basic robotics. While participants do not need to have an Amateur Radio license to attend the basic TI sessions, one is required for the advanced (TI-2) session. Read more here <http://www.arrl.org/news/arrl-teachers-institute-now-accepting-applications-for-2011-sessions>.

==> LEGISLATIVE MATTERS: ARRL LEGISLATIVE NEWSLETTER TO BE LAUNCHED

The inaugural issue of the ARRL Legislative Update -- an HTML newsletter focusing on the ARRL's legislative and advocacy efforts at the national level -- will launch the week of January 31. According to ARRL Regulatory Information Manager Dan Henderson, N1ND, this is not a monthly newsletter, but rather a timely newsletter with the goal to convey important information to the ARRL family. "The legislative process is a fickle thing, Henderson said. "Sometimes it moves as slow as molasses in a New England winter, while at other points, time is of the essence. Developing a newsletter designed to be e-mailed to interested ARRL members is a good way to provide important news and calls for action expediently." The ARRL Legislative Update is an "opt-in" newsletter available to ARRL members. To receive it, go to your Member Profile on the ARRL website <http://www.arrl.org/Users/edit> and select the tab for "Edit Email

Subscriptions." To receive the ARRL Legislative Update, simply check the appropriate box on that page then click "Save" at the bottom. To unsubscribe, follow the same process, but uncheck the box for this newsletter.

==> FOCUS ON YOUTH: ARRL SEEKS NEW YOUTH EDITOR

The ARRL has a proud tradition of promoting youth involvement in Amateur Radio. One of the ways we involve young people in our hobby is through our Youth Editor. This person is responsible for writing a monthly column for the ARRL website about youth and youth activities within the Amateur Radio Service. We are looking for a new Youth Editor. Do you know of someone who would be a good fit for this position? Maybe they hold leadership positions either in their Section or in their local club. The candidate must be an ARRL member and must keep their membership current throughout their tenure in the position. He or she will be required to write a monthly column of at least 1000 words and provide a minimum of three pictures (with captions) for each. For this, they will receive a small stipend for each column. Read more here <http://www.arrl.org/news/arrl-seeks-new-youth-editor>.

==> ARRL FOUNDATION SCHOLARSHIP APPLICATIONS AND TRANSCRIPTS DUE FEBRUARY 1

Students planning to apply for the more than 60 scholarships administered by the ARRL Foundation should be aware that the deadline is fast approaching. All materials -- including transcripts -- are due February 1. Beginning this year, applicants must submit all material electronically. No paper forms will be accepted. Read more here <http://www.arrl.org/news/arrl-foundation-scholarship-applications-and-transcripts-due-february-1>.

==> SOLAR UPDATE

Tad "Like a comet pulled from orbit as it passes a Sun <http://www.youtube.com/watch?v=H5WNeBZ4rBU>" Cook, K7RA, reports: The average daily sunspot numbers were up for the past week (ending January 26) by more than 11 points to 32.6, compared to the previous week. The average daily solar flux rose more than 3 points to 83.5. The planetary A index average was down 2 points to 2.9, and mid-latitude A index was down 1.5 points to 2.4. The latest prediction from NOAA/USAF shows lower solar activity with solar flux for January 27-28 at 79 and 78, then 76 for January 29 through February 2, 78 on February 3-4 and 80 on February 5-6. They show planetary A index at 5 on January 27-February 2, then 10 on February 3-4 and 7 on February 5. Geophysical Institute Prague sees quiet conditions January 28 through February 1, quiet to unsettled February 2 and unsettled February 3. Look for more information on the ARRL website on Friday, January 28. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Stephen Schwartz's For Good

<http://www.youtube.com/watch?v=H5WNeBZ4rBU> from the musical Wicked
<http://en.wikipedia.org/wiki/Wicked_%28musical%29>.

==> THIS WEEK ON THE RADIO

This week:

- January 28-30 -- CQ 160 Meter Contest (CW)
- January 29-30 -- REF Contest (CW); BA DX Contest (SSB); SPAR Winter
Field Day
- January 30-31 -- Classic Exchange (CW)

Next week:

- February 4 -- NCCC Sprint Ladder
- February 5 -- Minnesota QSO Party; FYBO Winter QRP Sprint; AGCW
Straight Key Party
- February 5-6 -- Delaware QSO Party; 10-10 International Winter
Contest (SSB); British Columbia QSO Party; Mexico RTTY International
Contest; YL-ISSB QSO Party (CW); EPC WW DX Contest
- February 5-7 -- Vermont QSO Party
- February 6 -- North American Sprint (CW)
- February 8 -- ARS Spartan Sprint
- February 9 -- NAQCC Straight Key/Bug Sprint
- February 9-10 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 28-29 -- ARRL Mississippi State Convention
<http://www.msham.org/hamfest.php>, Jackson, Mississippi
- February 5 -- ARRL South Carolina Section Convention
<http://www.arrl.org/hamfests/south-carolina-section-convention-1>,
North Charleston, South Carolina; ARRL Virginia State Convention
<http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2011>,
Richmond, Virginia
- February 11-13 -- ARRL Southeastern Division Convention
<http://www.arrl.org/hamfests/southeastern-division-convention-orlando-hamcat
ion>,
Orlando, Florida
- February 18-19 -- ARRL Arizona State Convention
<http://www.arrl.org/hamfests/arizona-state-convention-yuma-hamfest-emergency
-preparedness-show>,
Yuma, Arizona
- February 26 -- ARRL Vermont State Convention
<http://www.arrl.org/hamfests/vermont-state-convention-ham-con-1>,

Colchester, Vermont

To find a convention or hamfest near you, click here

Amateur Radio Newsline(tm) Report 1746 - January 28 2011

Amateur Radio Newsline report number 1746 with a release date of
Friday, January 28, 2011 to follow in 5-4-3-2-1.

The following is a QST. A Georgia ham radio group receives praise for
its rescue radio work during a snowstorm, an amateur radio emergency
response unit in Alaska looses its communications trailer to Mother
Nature, Brazil's military praises ham radio for its response to a flood
and mudslide disaster, a new bill is introduce in the Senate to create
an inter-operable firstr response broadband network and is the future
of ham radio in brainwave station control. Find out the details on
Amateur Radio Newsline(tm) report number 1746 coming your way right
now.

RESCUE RADIO: GEORGIA ARES GROUP PRAISED FOR STORM RESPONSE

A quick response by hams in Georgia during a recent snowstorm has
brought words of praise from civic leaders. Amateur Radio Newsline's
Norm Seeley, KI7UP, is here with the details:

--

Local emergency workers in Cherockee County Georgia who received a
major assist from a group of volunteer ham radio operators during the
snowstorm that covered the region are singing their praises of the
radio amateurs in the area. The group receiving the accolades is the
Cherokee Amateur Radio Emergency Service. This is a 40 member SKYWARN
organization made up of volunteers who share severe weather and
emergency information with the Cherokee County Emergency Operations
Center when called upon to do so.

According to Robby Westbrook, director of the Cherokee Sheriff's Office
Division of Emergency Management, the ham radio group is an invaluable
resource during the severe weather. Westbrook said that the hams began
radioing in reports when the storm first started. That helped us to
know where to deploy our resources.

County Commissioner Jim Hubbard works closely with the amateur radio
group. He said its members were a big help in the storm's first 30
hours. Hubbard noted that the group provided the Emergency Operations
Center with a good overview of how hard the region was getting hit.

Jim Millsap, WB4NWS, of Woodstock, Georgia is the Emergency Coordinator for Cherokee County ARES. He told a local newspaper the group's mission is to support Westbrook and the Emergency Operations Center staff any time a disaster happens. He added that when the ice storm suddenly hit Cherokee last month at rush hour, the group was able to provide information about dangerous areas on the roads. It also served the same role during the floods of 2009.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, watching this one from Scottsdale, Arizona

--

More about the Amateur Radio Emergency Service club is on line at www.Cherokee-ares.org

(Cherokee Tribune)

**

RESCUE RADIO: ALASKA CLUB LOOSES EMCOMM TRAILER TO MOTHER NATURE

A windstorm has destroyed a mobile ham radio emergency communications trailer in Alaska. According to a posting on Q-R-Zed dot com by District Emergency Coordinator Don Bush, KL7JFT, the Matanuska Amateur Radio Association lost its vehicle in the wind storm on January 12th.

Bush says that the trailer was originally purchased with a grant from the Anchorage Amateur Radio Club along with donations received from various members and organizations in Alaska. Not having any insurance on it, Bush says that the club does not know it can replace it. He adds that this is a big loss for a small club that is very active in the community in helping with all kinds of events. He also says that the trailer was the only backup communications for the Borough Emergency Services if conventional communications is lost.

A fund has been set up to try to raise funds to replace the destroyed vehicle. Itds on-line ay www dot kl7jfu dot com. (KL7JFT, QRZ.com)

**

RESCUE RADIO: COMMERCIAL RADIO AUSTRALIA NOW OFFICIAL INFO PROVIDER

A broadcast service down-under has become the latest provider of emergency alert information. Graham Kemp, VK4BB, of the WIA News has more:

--

Chief executive officer of Commercial Radio Australia, Joan Warner has welcomed the signing of a memorandum of understanding with the New South Wales Government, making commercial radio stations official providers of emergency services information.

Ms. Warner said the NSW memorandum of understanding follows a similar arrangement with the Victorian, South Australian and Queensland

Governments. The industry has argued for some time for commercial radio to be included and promoted as an official provider of information in emergencies, along with the ABC.

For the Amateur Radio Newsline I'm Grahm Kemp, VK4BB, of the WIA News in Australia.

--

This new agreement makes it easier to alert the public in times of emergencies. (WIA News)

**

RESCUE RADIO: BRAZILIAN MILITARY PRAISES HAMS IN WAKE OF MASSIVE FLOODS

Civil Defense forces in Brazil have praised the efforts of a local group of amateur radio enthusiasts. This after the hams helped them co-ordinate the rescue efforts in the first hours after the landslides brought on by flooding.

According to a report on the BBC News website, Lt Col Roberto Robadey said that without the help from the Brazilian ham community that his command couldn't have done anything in those first two days.

Robadey said that the ham radio operators took their gear to key points to provide a communication link between rescue groups. Since them, the Brazilian Air Force said it was installing a communication centre in Itaipava, so people could make phone calls and access data in their attempts to track down missing relatives.

About 100 soldiers have also been deployed to the Cuiaba valley, which has been cut off since the heaviest downpours in 44 years tore through the mountainous area near Rio de Janeiro. Officials say at least 600 people are known to have died in the floods.

The full BBC story on this ham radio first responder effort in Brazil is on-line at Read the full BBC News story at tinyurl.com/BrazilRescue

**

HAM RADIO IN SPACE: NANOSAIL-D HEARD BY HAMS IN HUNTSVILLE

Some good news on the health of the NanoSail-D spacecraft. The Marshall Amateur Radio Club WA4NZD in Huntsville, Alabama, has confiirmed ejection and activation of the NanoSail-D sub-satellite.

The WA4NZD team of Stanley Simms, N4PMF, and Alan Sieg, WB5RMG, along with NanoSail-D Principal Investigator Dean Alhorn were listening on 437.275 MHz FM at the club station on Wednesday, January 19th. That's when the NanoSail-D beacon was heard and subsequently decoded.

The only communication from the NanoSail-D vehicle is via ham radio with 1200 baud FM AX.25 beacon packets. Controllers are asking for

telemetry reception reports from all over the world to help track the bird. They say that the solar sail was to deploy after three days, but the battery may last longer than that.

This loaf-of-bread sized spacecraft was carried to orbit late last year on an Air Force rocket as part of NASA's FastSat project. It has now become the first successful deployment of a satellite, launched from a satellite already in orbit.

NanoSail-D is expected stay in low-Earth orbit between 70 and 120 days, depending on atmospheric conditions. The satellite is expected to eventually de-orbit itself and re-enter the earth's atmosphere. More information on this project is on-line at wa4nzd.wordpress.com.

(WA4ZND Release)

**

HAM RADIO IN SPACE: ARISSAT 1 SET FOR TRIP TO THE ISS

The ARISSat-1 space craft is mounted in the Progress vehicle at Baikonur and the hatch sealed.

Progress flight 41P is scheduled to lift off on Friday, January 28th. Due to the newly announced launch date of shuttle flight STS-133, the space walk to deploy ARISSat-1 has been moved up to February 16th.

A NASA press release describes the plans for ARISSat-1 in an article about planned Russian EVAs from the ISS is available at tinyurl.com/6kceotn.

NASA TV has already run a program featuring ARISSat-1. Watch for repeat playback in coming days. And we will have more ham radio space related news later on in this weeks Amateur Radio Newsline report.

RADIO POLITICS: ARRL HOLDS ANNUAL BOD MEETING

The ARRL Board of Directors held its 2011 Annual Meeting January on 21st and 22nd in Windsor, Connecticut. At the meeting, the Board set its new legislative objectives for the 112th Congress, re-elected the ARRL Executive Committee, bestowed various technical and service awards and approved the organization's financial plan for 2011. It also set

timelines for the ongoing consideration of digital periodicals and more.

A detailed look at all the Board's actions, including the official minutes from the meeting, will be available in the near future. Keep an eye on the front news page at www dot arrl dot org for the latest updates.

(ARRL)

**

RADIO LAW: ROCKEFELLER REINTRODUCES INTEROPERABLE RADIO BILL TO SENATE

Senate Commerce Chairman Jay Rockefeller, of West Virginia has reintroduced legislation that would re-allocate a chunk of spectrum to public safety officials. This, for the creation of a national broadband interoperable network.

Rockefeller said the bill mirrors the measure he offered last Congress. One that would re-allocate the so-called D-block of spectrum to public safety officials instead of auctioning it off to commercial bidders as the Federal Communications Commission has proposed.

Rockefeller noted that with the upcoming 10th anniversary of the September 11, 2001, al-Quida terrorist attacks on the Uniuted States, Congress needs to takes the steps necessary to implement a recommendation by the commission that investigated those attacks. That being to create a national broadband interoperable public safety network. He said that such a network is needed to assist first responders to better communicate during emergencies.

As you are likely aware, the 2001 terrorist attacks on the World Trade Center in New York City and on the Pentgon highlighted the problems first responders had in trying to communicate with each other during emergencies. With each responding service using a different radio system, communications between them was almost impossible. At the World Trade Center it fell to ham radio to provide the only inter operable communications for the first several days.

**

RADIO LAW: VERIZON SUES THE FCC OVER NET NEUTRALITY DECISION

Ham radio could have a vested interest in the outcome of Verizon Communications challenge to the Federal Communications Commission's controversial net neutrality order. This as the telecommunications giant becomes what likely will be the first of company's to try to stop the agency from requiring Internet companies to treat all Web traffic equally. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

A legal challenge from one or more of the nations telecommunications and broadband providers to the recent FCC order mandating Net Neutrality was widely expected. This after the FCC has said it thinks Congress enabled it to pursue its Net Neutrality rules under several interpretations of telecommunications laws.

In simple terms, Net Neutrality means that service providers must treat all traffic on their networks equally and cannot speed up or slow down consumer access to any web destination based on network usage of that customer. It also effectively bans tiered service where heavy Internet users could be charged more than those who only use the net occasionally. The FCC's Net Neutrality rules are supported by consumer groups and Web giants such as Google and Facebook.

The Verizon appeal is the first step that will begin a chain of legal maneuvering that will initiate a lawsuit that will be heard in the same court that last year struck down the FCC's earlier attempt at enforcing Net Neutrality rules. Verizon and other providers claim that it is they and they alone who have the right to determine the business model that they operate under.

Another challenge to the FCC's Net Neutrality decision is likely to come from the Republican lead House Energy and Commerce Committee. It has already announced that undoing Net Neutrality through a resolution of disapproval under the Congressional Review Act is a top priority. However, that effort is likely to stall in the Democraratic controlled Senate.

What this might eventually mean to ham radio is simple. More and more communications technologies are being developed where interlinking of signals and control of remote stations forces the need for more and more bandwidth. Some on a full time basis. If Net Neutrality is overturned and if service providers decide to place some of these high bandwidth ham radio operations in the category of heavy use it could slow down these applications to a crawl or make them financially impossible for the average ham to continue.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF in the Newsroom in Los Angeles.

--

In its filing Verizon argues that the FCC does not have the legal authority to mandate how Internet service providers treat content on their networks. For its part, the FCC says that its mandate is to oversee all aspects of telecommunications in the United States. (Published News Reports)

HAM HAPPENINGS: COMMEMORATING THE 20TH ANNIVERSARY OF THE HOLYLAND CONTEST

The Israel Amateur Radio Club has announced that it will be sponsoring a special 3 month on the air activity. This, to commemorate the Holyland Contest's 20th anniversary.

Operation begins on February 1st and runs through April 30th. Two stations will be on CW, SSB and the Digital modes using the special callsigns 4X20HC and 4Z20HC. All QSL's go via 4Z4TL. For more details about the Holyland Contest take your web browser to tinyurl.com/holylandoperation and holylandoperation is spelled as one word.

**

HAM HAPPENINGS: 2011 SARL NATIONAL CONVENTION APRIL 15 - 16

The South African Radio League's 2011 National Convention will have two clubs as its host. The show which is slated for April 15th and 16th in the city of Vaal will be jointly sponsored by the Sasolburg and Vaal Triangle Amateur Radio Clubs.

The two organizations say that they are aiming to make the convention the biggest get-together of South African radio amateurs in years. Among the attractions is a Saturday afternoon visit to the Bloemendal medium wave radio broadcast station near the city of Meyerton. That's where attendees can experience first hand what a 500 kilowatt transmitter is capable of doing. More on all aspects of this event is on line at www dot qsl dot net slash zs4srk. (South African Radio League)

**

HAM HAPPENINGS: BLACKROCK CASTLE OBSERVATORY IRELAND FEB 19 - 20

And Ireland's North Cork Radio Group will be active the call EI1NC/P on February 19th and 20th. This from the Blackrock Castle Observatory which is a 16th century Castle located 4km from the heart of Cork city on the banks of the river Lee. The Castle has seen many uses in its long history and now houses a cutting edge of space and observation post. More informatyion on the Castle is available at www dot bco dot ie. The North Cork Radio Groups website is at www dot eilnc dot com. And less we forget, the operation from Blackrock Castle will run from and 10:00 to 17:00 hours UTC on both days. (Press Release)

**

HAM HAPPENINGS: ANNUAL GATHERING AT M2 ANTENNA SYSTEMS

Closer to home, the 13th annual ham radio gathering at M2 Antenna Systems is now set for Saturday, March 19th at the M2 factory in Fresno, California. Exact plans for this year's event will be revealed shortly. Keep an eye on www dot m2inc dot com for the latest details. (W6OMF)

**

NAMES IN THE NEWS: FRANK FALLON, N2FF RETIRES AS ARRL HUDSON DIRECTOR

Some names in the news. First up is Frank Fallon, N2FF, who announced his decision to retire from the position of ARRL Hudson Division Director at the conclusion of the League's first Board of Directors meeting of 2011. In announcing his decision to step aside after more than 14 years on the job, Fallon said that at age 72 he thinks it's time to cut down on night driving and to turn things over to his Division's Vice Director Joyce Birmingham, KA2ANF and let her have her turn in the front seat at Board meetings.

Under the ARRL's rules of succession, when a Director retires or can no longer serve for other reasons, the Division's Vice Director fills that position. In this case its' Joyce Birminham, who has been an active radio amateur for more than 30 years.

Birmingham began her ARRL career in 2000, when Fallon asked her to be an Assistant Director in the Hudson Division. This, after her husband Andy, WB2RQX, became a Silent Key. In 2003, she was elected ARRL Hudson Division Vice Director; she was re-elected for two more terms, in 2006 and 2009. Birmingham also serves as the District 2 Chairperson of the Young Ladies' Radio League and as the President of the East Coast DX Association. (ARRL)

**

HAM RADIO ON THE WEB: NEW 60 METER BLOG

And the Southgate news reports that Peter Ourednik, OK1RP, in the Czech Republic, now runs a blog covering the 60 meter or 5 MHz band. It features information on DX operation and related news for the band. You can read it on-line at 60mband.blogspot.com. (Southgate)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM RADIO TECHNOLOGY: A BIG LEAP FOR CODEC 2

Codec 2 may not be ready for prime time, but its getting close. Take a listen.

--

Codec 2 audio: Hear it by downloading the MP3 version of this weeks newscast at www.arnewsline.org.

--

That was just a snippet of a long conversation between Bruce Robertson, VE9QRP, in Sackville, New Brunswick, Canada holding forth with Paul Saville, ZL3IN, in Christchurch, New Zealand using Codec2.

For those unaware, Codec 2 is an open source alternative to both D-Star and P25 that's being developed by a group of volunteers all around the world. The idea behind Codec 2 is to provide a single, free, software-based digital voice encode and decode system that would not require any proprietary firmware as is found in most other current digital voice systems. And as you can hear, even in this Internet-only QSO being held by two hams half a world apart, the quality is quite extraordinary. Likely on a par with all the systems available to hams today. Listen as ZL3IN describes his current career to VE9QRP:

--

Codec 2 audio: Hear it by downloading the MP3 version of this weeks newscast at www.arnewsline.org.

--

More about Codec 2 is on-line at Codec2 dot org. The complete QSO between VE9QRP and ZL3IN is at tinyurl.com/codec2video. (Southgate)

**

HAM RADIO IN SPACE: NASA ADDS ONE MORE SHUTTLE MISSION

NASA has officially added another space shuttle launch to its schedule and the final one for the fleet.

The space agency has set a target launch date of June 28th for shuttle Atlantis and started preparations for the 135th and last shuttle flight. The four-member crew will take up supplies to the International Space Station and return a faulty pump that has stumped engineers.

With the addition of STS-135 there are now three missions left before NASA retires its shuttle fleet this year. Shuttle Discovery's last mission is slated for February 24th nand the final flight of the Endeavour will take place in April.

The final flight of Atlantis will be commanded by Christopher Ferguson, KG4JCQ. The rest of the crew is composed of astronaut researchers and includes Douglas Hurley, Rex Walheim, and Sandra Magnus, KE5FYE. (NASA)

**

RADIO IN SPACE: SMARTPHONE BASED SATELLITE BEING DEVELOPED IN THE UK

Researchers at England's University of Surrey and Surrey Satellite Technology Limited are building a satellite containing a smartphone payload that will be launched into orbit around the Earth later this year.

Called STRaND-1, the name is an acronym for the Surrey Training, Research and Nanosatellite Demonstrator. The tiny bird is being developed by the Surrey team to demonstrate the advanced capabilities of a satellite built quickly using advanced commercial off-the-shelf components.

STRaND-1's lead researcher is Dr. Chris Bridges. He explained that a smartphone made an ideal satellite payload because these devices pack lots of components such as sensors, video cameras, GPS systems and Wi-Fi radios that are technologically advanced but a fraction of the size, weight and cost of components used in existing satellite systems. Also, because many smartphones run on free operating systems that this could lead online software developers to create applications that could feasibly be utilized on later satellites.

A smartphone avionics suite is one of many technological advances packed into this 4 kg nanosatellite. To precisely point and maneuver, the satellite also incorporates advanced guidance, navigation and control systems including miniature reaction wheels. It also contains a GPS receiver, as well as innovative pulse plasma thrusters to propel it through space.

If this experiment is successful, it could give new meaning to the line from the science fiction film for E-T to phone home. (Southgate)

**

DX

In DX, the Microlite Penguins DXpedition Team will be active as VP8ORK from the South Orkney Islands Antarctica, from January 27th to February 8th. The South Orkney Islands one of the world's most wanted DXCC entities. Operation will be CW, SSB and RTTY on 160 through 10 meters. QSL direct only to Garry Hammond, VE3XN, 5 McLaren Avenue, Listowel, Ontario, Canada, postal code N4W 3K1. For more information please visit the teams website at www dot vp8o dot com.

IK1PMR and PA3LEO are now operational portable EA8 from the CXanary Islands. They will be there until March 8th but their activity on the air will be holiday style on 160 through 6 meters. QSL via PA3LEO or Logbook of the World.

Lastly, F5LBG is now active portable FM from Martinique running only 5 watts QRP on 10 point 106, 14 point 060 and 18 dot 096 MHz. He will be thre until February 3rd operating holiday style. Listen out for him daily around 1000 UTC and 1800 UTC. QSL via F5LBG, direct or by the Bureau.

(Above from various DX News souraces.)

**

THAT FINAL ITEM: BRAINWAVE CONTROL IS COMING

And finally this week, get ready to control your, TV set, your stereo and maybe even your ham radio station with only your mind. That's what you may be able to do with brain waves if the technology developed by a company called PLX Devices proves out. No its' not science fiction as we hear in this report:

--

According to its website, the XWave from PXL Devices is the first consumer product priced under $100 which can sense and detect human brainwaves, interpret them and connect it to everyday technology.

PLX Devices founder and CEO is Paul Lowchareonkul. He recently told the U.K. Daily Mail that it was only a matter of time before products like the XWave entered the mainstream. Lowchareonkul says that the human brain is the most powerful, complex thing in the universe, and for the first time, we're able to harness its amazing power and connect it to everyday technology.

Lowchareonkul says that with the development of 3rd party applications or apps, the potential for innovation is limitless. At the moment, PLX is only offering apps that interact with the XWave for Apple mobile devices like the iPhone, iPad and iPod touch. There are four apps currently available that interact with the XWave. These include a basic set-up app; an app that allows you to upload your song list and sync your brainwaves with any song in your library; a "Tug of Mind" app and a meditation app. In the future, PLX says on its website that you will be able to control and float objects in video games by simply thinking about it, or train your mind to focus and relax on command.

And if you do get one and are able to develop an app to control your ham station with your brain, please be sure to let us know so that we can pass it along to what will then become a truly mew world of amateur radio.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW. In Los Angeles.

--

>From pictures on-line, the XWave device itself looks almost like an ordinary headset for telephone operator. The PLX website claims that XWave is perfectly safe because it only listens to brainwaves and does not transmit or send out any signals. That's a good thing for many reasons including there being no need to add more QRM to our already overcrowd bands.

More on this rather interesting device is on-line at www.plxwave.com/info.html. (Daily Mail, Mobilehack.com, others)

** first TEP openings on 50 MHz in VK... **

The first reports of US signals into Eastern Australia occured on
the January 11th at the turn of the UT Day. For several weeks
amateurs in ZL1 and ZL3 had made infrequent contacts with Bob
K6QXY who runs a 44 element array and an EME capable station,
K6MYC and N5JEH at least but nothing extended to Australia.
But on the morning of the 11th Norm VK3DUT logged the K6FV beacon

in Woodside California on 50.068 MHZ in Grid CM87. This beacon runs 100 watts and a yagi antenna which at the time was directed towards the South Pacific. Steve VK3OT noticed the report posted on the DX Summit and VK Logger websites and on tuning the 6M band at 0035 UTC heard the CW signals from N5JEH in New Mexico USA on 50.105 running at around 579 ... and more ...

MOONBOUNCE from THE GAMBIA (C56 / IK13QL) - LATEST NEWS from the C56-Team, dated 2011-01-23: Well, less than three weeks to go before C56EME will come on air from IK13ql in The Gambia! The tickets did arrive and the special callsign C56EME is OK. Our swedish hosts in the Gambia did phone etc. for more than in a week and all these efforts resulted in our license. We are very pleased with them. They did a nice job! Today Rene PE1L, Elthe PA3CEE and Johan PE9DX tested the aerials 2x8 Xpol at the QTH of Fred PE1DAB: www.emelogger.com/gambia/default.asp?page=Multimedia It was a big success. Fred cooked a delicious peasoup for the hungry C56EME team. We tested indoor, in order to see if everything fits and if a good equilibration can be obtained. The aereals will be pointed to the moon manually with help of ropes and stones, so it is important to have everyrhing stable. We succeeded! SOURCE: The C56EME Team direct to MMMonVHF

Hi, guys, I am glad to announce that there is going to be an expedition to BY8 area and this time it will be loud! In an co-operation with Yunnan Astronomical Observatory, we are given the opportunity to activate an 11m diameter dish for 432MHz EME. This operation is going to take place in mid-March from Chengjiang (OL14kq). I am currently working closely with the observatory to make this a success. The expedition team consists of several amateur radio operators including BA1DU, BA4TA, BA4RN, BH4REQ, BH4RLO and me. We will also try to be active for 144MHz from this location. After the big dish operation. The team is going to activate Shangri-la (NL97ut) on 144MHz/432MHz EME with a portable set of equipment (TBD). AFAIK, this is going to be the first activation of EME from NL97. More detailed schedule will be posted in the near future. I will be travelling in the US until the end of Feb. Let me know if you have any suggestion. I also have to remind you that such an operation could be canceled or postponed at any moment,as it did for XX9. Anyway, we are doing our best... RIG on 144 MHz might be 2x 10el and 1KW

Announcement New DXCC 144MHz moonbounce: PJ4(FK52ud)
Bonaire is a new DXCC since 10-10-2010 see
www.arrl.org/news/dissolution-of-netherlands-antilles-creates-four-new-dxcc-entities
Before this date Bonaire was part of the Netherlands Antilles and
counted for DXCC Netherlands Antilles. Since 10-10-2010 the
Netherlands Antilles are deleted as DXCC but a qso with PJ4/PA3CNX
PJ4/PE1L, PJ4EME or PJ4NX still counts (for the DXCC award) for
this deleted entity (compare with East Germany or Czechoslovakia
see http://www.arrl.org/deleted-entities) You will get a chance to
add a new entity to your DXCC-list while the 'old one' still
counts for the DXCC award. We are happy to announce that from
April 7 th until April 11 th 2011 PJ4X will be active from Bonaire
on 144 MHz moonbounce. The locator will be FK52ud. We want to be
active from moonrise till moonset. We try to send at least once a
day a update via MoonNet, MMMonVHF and our mailinglist. READ ALL,

** PJ2T (FK52ME) on 6 Meters **

Geoff W0CG/PJ2DX and I will be arriving at the PJ2T station on
Curacao Friday afternoon, and although neither of us are VHF ops,
we will have radio on 6 meters over this coming weekend. We have
only 100W and a 4.5-element yagi (one element half has dropped
off). In the unlikely event that conditions allow, you will have
a much better chance to work Jean-Claude PJ2BVU, who knows and
loves the band! On the following weekend, please work PJ2T in the
CQWW 160 CW Contest! 73, Jeff Maass K8ND Station Manager, PJ2T
Caribbean Contesting Consortium CCC Web Site: http://www.pj2t.org

SOURCE: ICPO Bulletin - LATEST NEWS from Jim, PJ2/W8WTS, dated 2011-01-27: PJ2/W8WTS (Curacao) will be QRV for skeds FRIDAY January 28 moonset. Hello Everyone, We had a great morning down here in Radio Paradise. We completed the first EME QSO from the new DXCC entity Curacao with Lance, W7GJ. This was actually the second EME QSO that I have completed in 36 years on the air. The EME setup here at the PJ2T station is ad hoc and will need to come down soon. If anyone would like a sked on Friday morning, that will be the last opportunity for this trip. Please contact me via email at jim@w8wts.com if you would like a sked on Friday morning. Best operating times will be 1445Z to 1800Z, January 28 If I don't hear from anyone, I probably will not set up again to-morrow morning. Many thanks to Lance for his hard work in making our little EME experiment from Curacao possible.

** KH8, Tutuila Island (AH45), qrv on HF and 6m **

Ron, WA8LOW, plus others will be active as homecall/KH8 from Tutuila Island (IOTA OC-045, USi AS007S, WLOTA 4385, WFF KFF-053 Eastern county, Grid Loc. AH45), American Samoa, between 30th July and 14th August 2011. Plans are to be QRV with high power stations on 160-6 metre CW, SSB, RTTY and PSK. The will have beam antennas for 40-6 and vertical on 160 and 80. QSL direct to home calls.
SOURCE: [NG3K] via ICPO Bulletin (21-28 January 2011)

** DX Operation: ea8 **

160m-6m holiday style - QSL to pa3leo or LoTW - Begin date: 20110120
End date: 20110308 Callsign(s): ea8/ik1pmr, ea8/pa3leo
SOURCE: tnx to Bill, ng3k direct to MMMonVHF

** DX Operation: Belize **

Jim (WB2REM), Paul (W4PGM) and Glenn (KD2JA) will be operating
from Placentia, Belize from March 23 until March 30, 2011. Qsl
direct only to each operator's call. QSL to V31MM via Jim WB2REM,
V31GB via Glenn KD2JA and V31PM via W4PGM. We will be on both SSB
and CW, 160-6 meters with a concentration on WARC bands and 6 m.
When QSLing please supply a SASE (from stateside) or (Overseas)
Self Addressed Envelope with either a green stamp depending on the
US Air Mail Rate at the time or an IRC. This will ensure you will
receive a response to your QSL request...

** 2011 Six Meter Expedition to Saba Island ï¿½ PJ6 **

LATEST NEWS from Andy, N8OFS, dated 2011-01-26::
Antenna will be 7 ele OWA on 30 boom. Power is limited to 150 w.
on Saba and St. Eustacia as well as Bonaire. All this will be
posted on website in next few weeks.
Six Meter Expedition to Saba Island (PJ6) is taking shape.
The team will be K5AND ï¿½ Dick, W5OZI ï¿½ Pat and K5TR ï¿½ George.
We have alocation picked out reserved on the island. It is
located on thenortheast part of the island at about 150 meters
above sea leavel (490ft) with perfect take off to the US, EU, AF
and most of SA. The planis to operate CW on 50.106 Mhz and SSB on
50.118 Mhz. We will also beon JT65 during moonsets and moonrises
on 50.210 Mhz. We should have aweb site in the coming month to
post updates to the trip. We do not know what callsign(s) we
will use. (from their Webpage: http://dkhanson.com/pj6/)

** Herne Island (IOTA AF-068, WW Loc. IL23AP) qrv HF and 6m **

Operators Leopoldo, I8LWL (5C2L), Alfredo, IK7JWX (5C2J), Ruggero,
IK2PZC (5C2P) and Mounaim, CN8QY plan to activate the rare Herne
Island (IOTA AF-068, WW Loc. IL23AP) on 1-5th of February 2011.
QRV on all HF bands, including WARC, and also 6 metres. Modes will
be mainly SSB, with Digital modes and some CW. QSL information:
for Italians op. via home calls, for CN8QY via I8LWL. Log online
will be available after the DXpedition. For updates check their
website at: www.i8lwl.it/ NOTE: no credit will be given for
operations after 31 January 2001 from the following islands unless
evidence is produced that removes the doubt over IOTA qualification
mentioned below. In the case of sovereignty dispute, copies of the

licence and permission to operate from the island are required.
Credit will continue to be allowed for operations that took place
before 1 February 2001. AF-068 S0 (CN) Herne and Virginia Islands
- sovereignty disputed between Western Sahara and Morocco.

** SPECIAL EVENT GB5LLB **

Southport and District Amateur Radio Club will be running GB5LLB
from Lytham Lifeboat Station on 29 January 2011. The station is
being run as part of SOS Radio Week and is being sponsored, with
all monies received going to the RNLI. Contact can be made on 2m
and whichever HF bands are open on the day. QSL via G0JCQ (QTHR).
The club would like to express their thanks to Snowdonia Radio
Company for supporting the station by supplying the vertical HF
antennas that will be used. Further details can be
found on the club's website at: www.sadarc.org.uk/.

WIANEWS FOR WEEK COMMENCING JAN 30 2011.

VK6LA BECOMES OA

Antique Wireless Radio Transmitter found in flood debris.

AUSTRALIA'S MOST WANTED

Riverina Field Day

US 6 meter signals into Eastern Australia

Black Ops, The Aspidistra transmitter

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING JANUARY 30 2011.

Lionel ALLEN - VK6LA / VK9CB has been awarded the Medal of the Order of
Australia, the citation reads "For service to the community of Cocos (Keeling)
Islands through the preservation and promotion of local history and heritage"

Lionel had worked on Cocos during the 1960's and after retiring made several
visits to Cocos to activate that rare VK9 location for fellow amateurs.

It was during one of these visits he looked for recorded history of the
Islands and finding only minimal information set about researching the
Cocos Keeling group of islands

Years of painstaking research and many visits later a more comprehensive picture of Cocos history had evolved and for this, plus his ongoing involvement with the promotion of Cocos history and heritage, Lionel has been awarded the Medal of the Order of Australia.

Antique Wireless Radio Transmitter found in flood debris.

Radio 4BC in Brisbane along with The Toowoomba Chronicle say that among the tonnes of flood debris, Lockyer Valley resident Howard Reck thinks he has stumbled across a family heirloom.

Three days after the region was hit by floodwater, Mr Reck found what he believed to be a World War II or Korean War antique radio, 30 kilometres downstream from Grantham.

Speaking on 4BC he explained how it looked like one of those big units seen in the Mash TV show, but has a Polish name engraved at same stage on the rear of the metal cabinet.

If you are the item's rightful owner, and can provide information about its special markings, contact Chronicle reporter Anthea Gleeson, email anthea.gleeson@thechronicle.com.au

Libraries adopt RFID system

Melbourne Library Service has celebrated a historic milestone, after implementing technology to enhance the efficiency of user transactions.

Said to be the world's first RFID self-service solution with EFTPOS, it was implemented in the Melbourne City and East Melbourne Libraries.

While many libraries have installed the RFID technology, this is claimed to be the first solution that allows users to pay outstanding fines.

The RFID system's use in the Melbourne City Library, which averages 3000 visitors and 3500 loans each weekday, has produced the strongest response, given the bulk of these transactions were previously conducted by library staff.

Field Day Logs Due

Last week VK7 News ran in item attributed to John Martin VK3KM reminding listeners that the logs for the Summer VHF-UHF Field Day are due by Monday 31 January. So here is VERY late reminder to the rest of Australia!

For those who wish to enter the optional Microwave Challenge, the scoring sheet has an extra page for you to record the greatest distances worked on 1296 MHz and higher bands. Alternatively, you can include details of distances worked in the body of your email.

Take a look at the website on the email and internet editions of the broadcast for more details.

http://www.wia.org.au/members/contests/vhfuhf/

Speaking of logs that need be in or resubmitted, same same goes for the 2010 CQ DX Marathon.

John, K9EL, CQ DX Marathon Administrator, reports log submissions for the Marathon must be in by 2359Z, tomorrow 31 January 2011.

Please visit http://www.dxmarathon.com for details on submitting your log.

Please note that the DX Marathon E-mail server crashed and was down from 0500Z to 2200Z on January 19th. Any logs sent during that period are unfortunately lost and will need to be re-submitted. If you are not sure, a complete list of all logs received is posted on the website.

If you do not see your call, please re-submit.

AUSTRALIA'S MOST WANTED

Low Power Radio Solutions (LPRS), a European supplier of short-range radio devices, has provided a high-sensitivity, Omni directional Yagi antenna to four amateur space enthusiasts who have now managed five successful high-altitude balloon flights into near space.

The balloon is fitted with a computer probe and digital cameras to send information back to Earth as live internet events.

Spacebits is the brainchild of four technology enthusiasts from Portugal who have been inspired by recent amateur ballooning projects posted to the internet.

http://www.radiocomms.com.au/news/44733

Now the web story, and with all items read on this national news web details are available when you log onto wia.org.au and read the text editions, is probably of immense interest to one VK4 ham in particular!

Steve VK4KHQ wants to hear from amateurs who have experience or dabbled with UAV's (Unmanned Aerial Systems, particularly streaming real-time data for video & telemetry etc.

Please contact Steve VK4KHQ on 07 3409 1135 or vk4khq2@ozemail.com.au

HAMS ACROSS AUSTRALIA.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Have we all marked our calendars and started planning for the National Field Day on 17th April, next? This is for amateurs to set up and work the bands in prominent locations so that the public can meet us as ambassadors of our club and our hobby. To move the process along, get out the media kit from last year's Field Day and start bringing the details up to date. The pre-publicity will pay dividends with people travelling hearing of the event on broadcast radio, or reading a par in the local newspaper that will improve the public attendance. If your area has an internet events calendar, ensure that your event is listed there.

Back in the heyday of CB, there was a popular bumper sticker which stated "CBers do it on the air." The amateurs popularised a sticker of their own, "Amateurs talk to the World."

Times have moved on but the basic idea of people communicating still rings out around the world. The International Amateur Radio Union (IARU) and our own WIA have adopted a slogan to be used here in VK-land for the National Field Day.

A cute combination of words recognising the history and linking with current technology trends.

"Amateur Radio: The first technology-based social network."

What a way to theme the day.

I'm Geoff Emery and that's what I think....how about you?

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe Amateur Radio club.

There were about 40 members at the club last Monday night with about half the members there to participate in the regular monthly fox hunt. Shaun, VK4FY and his daughter, took the role of planting the fox as the usual fox planter, Ken, VK4FKEN and his wife Wendy, VK4FWEN were enjoying the delights of the Great Barrier Reef. Shaun found some new locations to place the fox which drove both, Charlie, VK4YZ and Peter, VK4TAA, to distraction before finally finding the elusive quarry.

Ken has been able to maintain contact with the club via echo link and has been working as a maritime mobile station and completely enjoying himself.

Meanwhile back at the club house, Kev, VK4UH, was sharing the success of his latest DXpedition to Norfolk Island and told club members that there were many contacts to both Australia and New Zealand with some 12 yet to be confirmed records in the 2 metre, UHF and higher bands.

Kev told the group of a possible new record for Australia with a successful moon bounce contact on 2 metres from Norfolk to Spain. Kev has promised that he will provide more details of the whole expedition in the form of a technical talk in a few months time. That is something not to be missed.

Club President, David, VK4DC, showed off his, what he called his United Nations 2 metre linear amplifier. He calls the linear that name as he had to source parts from some 15 different suppliers in 12 countries around the world. The quality of the homebrew construction was excellent and it has been tested with excellent results. This project took over 4 months to build due the slow delivery of parts but it is now ready to hit the airwaves very soon.

Many club members were involved with either flood work in the Moreton Bay District and assisting with the clean-up in the Brisbane area. Well Done Guys, you should be very proud of your fine work.

It was also pleasing to catch up with Mal, VK4UMS, after his extended holiday in the US and looking at the photos of the cruise ship and his adventure in the lap of luxury he spent on his 4 week cruise from LA to the Caribbean and back. Mal is back off the US again soon to the Dayton Hamfest and we all hope that the Aussie dollar remains high so he will be able to bring back some real goodies.

Next Monday night is a general chit chat night and all amateurs are welcome to visit the club house. It is usually open about 6.30 pm local time and there is some interesting banter on the Redcliffe Repeater as members make their way to the clubhouse.

So now it's 73 from Ray, VK4CF and you are listening to QNEWS.

theTARCinc Management Meeting this Tuesday

The Management Meeting of the Townsville Amateur Radio Club happens this Tuesday 1st of February from 7-30pm at the Club Rooms perched atop the SES HQ Green Street West End. Make sure you bring along something for the Show and Tell session, all welcome !

VK7
local area news :- http://reast.asn.au/news.php
vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com

The next meetings of the NWT-ATV Group are scheduled for Saturday February 5 at the QTH of Ursula VK7FROO, 24 Malonga Drive, Burnie.

Please note this will be the Club's AGM with a General Meeting following the AGM.

IF any member would like to try his/her hand at being involved at managing the Club, here is your chance, Nomination forms are available from the Club.

Amateur Television Activity is percolating along quite well and in recent times, Ulverstone has been fortunate in having two Coastal Amateurs relocate to its town.

We are talking about Steve VK7ZSJ and Ross VK7WP, and because they are in relatively close proximity to Tony VK7AX, a renewed interest in ATV activity is taking place. Regular ATV transmissions on 70CM. are taking place with all the daily Amateur Radio Broadcasts from VK7AX being transmitted on 70CM ATV.

(Tony VK7AX, News Officer - North West Tas. ATV Group)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

D-STAR ACTIVE IN JOHANNESBURG

The first digital repeater in Johannesburg is active on the air. The repeater is on loan for demonstration purposes and is offering amateurs an opportunity to experiment with D-Star.

While there are other digital on-air technologies being used by amateurs, D-Star is one of the first on-air and packet-based standards.

D-STAR offer clearer signals and uses less bandwidth than its non-digital counterparts. As long as the signal strength is above a minimum threshold and no multi-path is occurring, the quality of the data received is better than an analogue signal at the same strength.

GB1OOD is issued for the year 2011 by Ofcom as a Special event callsign.

It will be used through out the year to celebrate the 100 years of the Derby Wireless Club.

They lay claim to being the oldest continually active local wireless club in the WORLD!

Until 25th of march GB1OOD is operating from the "Silk Mill Museum" in the City Centre of Derby.

OVER THE HORIZON RADAR ON 7 AND 10 MHZ

The latest issue of the free IARU Monitoring System newsletter reports on Russian radar in 7 MHz.

The newsletter says that the Over the Horizon Radar from Russia was active between 7000 and 7200 kHz with burst transmissions on 5 different frequencies on December 30th of 2010.

The pulse rate was, as always 66.66 pulses per second.

Meantime another Over the Horizon Radar that is based in Cyprus has been destroying communications on the 10 MHz band every afternoon.

==========

NEWS FROM ARNEWSLINE USA

QSLING: ARRL LoTW NOW AVAILABLE TO VHF AND UHF OPERATORS

The ARRL has announced that its very popular Logbook of the World has been upgraded to support awards based on Maidenhead grid squares, such as VUCC and the Fred Fish Memorial Award.

Logbook of the World ins an online system for hams to use to confirm two-way contacts. It can also be utilized that can be used for various ARRL awards. Until now it has been limited to confirming contacts on the high frequency bands. Now members of the ham community who enjoy operation on 50 MHz and above can utilize its services as well.

To take advantage of the new features, you need to log in to your Logbook of the World has account or create one if you are not already as user of the service. After that, just follow the outlined procedures found on the Logbook of the World pages. More information on how to do this is at the ARRL website. Use www.tinyurl.com/5vw4nkd to take you directly there.

ICOM ASKS HELP IN STOPPING COUNTERFEIT IC-V8 HT'S

Icom is out to stop whoever is supplying counterfeit copies of its popular IC-V8 2 meter hand-held radio. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

Fake transceivers, battery packs and chargers began being reported in 2010. Icom says that the difference between a real model IC-V8 handheld and the knock-off phoney radios are so small that a blind user might not know they are using a fake radio.

For example, the number 2 key on the real IC-V8 is for the "P Beep" function. On the fake radio number 2 is "VOX". Also, on the back of the real Icom product the serial number tag is black while it is white on the fake radio.

Even accessories are being cloned. The F21 Battery Pack looks like an Icom but there are two differences. The fake does not have the ICOM logo, and carries the Part Number BP-208 instead of BP209N as found on the real Icom battery. Lastly, the optional factory remote microphone is designated by Icom as the HM-133 while the counterfeit is HM-133V. Icom says that a real HM-133V is for

other radios in their product line.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

Icom asks that if you find a product that you may suspect is counterfeit, please report it to the company's support centre. You can contact Icom at 2380 116th Avenue NE, Bellevue, Washington, 98004 in the United States. Or by phone to area code 425-454-8155.

More about the products mentioned in this story is on-line:
IC-V8 Handheld Radio - http://www.icom.co.jp/world/notice/pdf/V8.pdf
F21 Battery Pack - http://www.icom.co.jp/world/notice/pdf/F21.pdf
HM133 Microphone - http://www.icom.co.jp/world/notice/pdf/2720H.pdf

LISTENER DRIVEN RADIO ADDS NEW FEATURES

Listener Driven Radio, an interactive audio software platform for broadcasters is adding several new features. The company's SMS text messaging capabilities now make it possible for listeners to sign up for a text message to their mobile device when their favourite songs play. Listeners can also receive alerts via e-mail, AOL Instant Messenger, Yahoo Messenger, MSN Messenger, Jabber and Google Talk.

For those not aware, Listener Driven Radio is a new model for radio, shifting stations from broadcasts to what it calls crowdcasts. That's where listeners vote, and a stations programming is affected in real-time. More is on-line at www.ldrradio.com

GLOBAL TUNES REACHES 55 RECEIVERS WORLD WIDE

You can now access 55 receivers world wide on the Global Tuners dot com website. Receivers on-line operate a variety of modes including the AM and FM broadcast bands, the shortwave spectrum, HF and UHF bands in various modes.

Countries currently on-line include the USA, Australia , Finland, France, Germany , Greece , Italy , Hong Kong , the Netherlands, the Slovak Republic, Sweden and the United Kingdom to mention only a few. So far there are 33,777 registered members and you will have to sign up for an account if you wish to control a receiver.

For more information take your web browser to www.globaltuners.com and global tuners is spelled as one word.

RUSSIA TO RESUME SPACE TOURIST FLIGHTS IN 2013

Listen out for space tourists to once again operating on-orbit from the International Space Station sometime in or after 2013. This after Russia announces that it will start selling multimillion-dollar tourist tickets to the International Space Station after a four-year hiatus.

Virginia-based Space Adventures has had no seats to sell for the zero-gravity voyage since billionaire Cirque du Soleil founder Guy Laliberte flew to the orbiting outpost back in October 2009. But according to recent news reports,

beginning in 2013 it will again offer three 10 day trips per year to the space station aboard Russian Soyuz spacecraft. This, thanks to a deal between itself, the Russian space agency Roskosmos and Soyuz manufacturer R-S-C Energia.

Russia has again found room for paying private customers aboard the cramped three-seat Soyuz due to plans to increase annual production of the single-use craft from four to five in 2013. The Soyuz is carried to orbit by Russian rockets that are launched from the Bikenour Cosmodrome in Kazikstan.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Jan 1-31 WIA ROSS HULL MEMORIAL VHF/UHF

Feb 26-27 ZL Jock White Field Day

Mar 19-20 WIA John Moyle Field Day weekend

Apr 30 WW Marconi Day 2011 www.gb4imd.org.uk in due

Jock White Field Day 26th and 27th February, stations in ZL it's time to get your team together for Field Day. Get those antennas sorted and give the generator set a test run.

The single station 80/40 section will be continued on for 2011 after being a success last year.

Rule changes are available from Stuart ZL2TW but included in the changes is the number of CW contacts per band have been reduced from 25 to 20.

(Stuart Watchman)

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE
hf nets ON the net, www.timroberts-vk4yeh.id.au/
logging programs try:-

The first reports of US 6 meter signals into Eastern Australia occurred on January 11th at the turn of the UT Day.

Steve VK3ZAZ says that for several weeks amateurs in ZL1 and ZL3 had made infrequent contacts with K6MYC, N5JEH and Bob K6QXY who runs a 44 element array but nothing had extended to Australia.

But on the morning of the 11th Norm VK3DUT logged the K6FV beacon in California on 50.068 MHZ Grid CM87. This beacon runs 100 watts and a yagi antenna which at the time was directed towards the South Pacific.

Then Steve VK3OT on tuning the 6M band at 0035 UTC heard CW signals from N5JEH in New Mexico USA on 50.105 running at around 579. He then tuned up to the US call channel on 50.125 and encountered W0OGH in DM 43 ii calling CQ on CW and a two way occurred, the first into USA from VK3 since Cycle 23 in the year 2000/01!

Other stations active on 6M this month included VK5CP/9L Lord Howe island, H44DA Solomon's, H40FN Temotu heard by many VK3s who could not break his keyer, the DU1EV/beacon on 50.006 the AH2G/Beacon on 50.004, KG6DX Joe in Guam, several VK8s from Darwin, FK8CP and FK8IA and VK0KEV Macquarie Island.

(73 from Steve VK3ZAZ Wannon Victoria).

Blackrock Castle Observatory Cork

North Cork Radio Group will be active EI1NC/P on February 19 and 20 from Blackrock Castle Observatory a 16th century Castle located 4km from the heart of Cork city on the banks of the river Lee.

The Castle has seen many uses in its vast history and now houses the cutting edge of space and observation technology.

(www.bco.ie and www.ei1nc.com)

Mats SM6LRR is QRV from Sri Lanka as 4S7LRG mainly on 160, 80 and 40m till 4th February. He hopes to take part in the CQ WW 160m CW Contest at the end of the month so anyone needing 4S7 on Top Band should keep a look out for him. QSL's go via SM6LRR.

Three Swedish amateurs are active from Madagascar until early February. They are signing 5R8HL and are located on the mainland IOTA AF-013 and on Nosy Be Island IOTA AF-057.

(*)

For the Island chasers quite a rare one is due February with CN2LWL being operated by a group of Italian amateurs from Herne Island IOTA AF-068. Dates are 1 - 5 February and QSL info is via I8LWL.

(*)

Gerd DJ4KW and Gisela DK9GG will operate from V31YN and V31GW respectively in Belize until the end of February. During the period 2 - 8 February they hope to go to Southwater Caye (IOTA NA-180) using the call V31YN/P.

(*)

To celebrate the 50th anniversary of independence, stations in Kuwait will be using the 9K50 prefix from now until the end of February.

(*)

For those of you who enjoy collecting new prefixes look for TC 2011 EWU from now until 6 February. This station is active during the World University Games in Erzurum in Turkey.

(*)

The Microlight Penguins Group are off on another trip down south where they will activate VP8ORK from the South Orkney Islands.
This is a rare one for DXCC purposes and should be on the air till February 8.

(* thanks to irts news)

The Porthmadog and District Amateur Radio Society are supporting SOS Radio week operating today, 30th January from the Porthmadog Yacht club.
The society will be using the callsign GB0PLB.
(rsgb)

Crewe Heritage Centre Amateur Radio Club will also be taking part in SOS Radio week using GB4CHC today, Sunday 30th January. The Club will have two stations on HF, one on SSB and one on Digimodes. They are being sponsored at 10p per country contacted and money raised will go to the RNLI.
(rsgb)

IT'S A PUZZLEMENT!

With a callsign that LOOKS like "Siam" the original country name for Thailand comes word of a Thai operation from Sweden with Belgium Operators !

Special event station SI9AM from the King Chulalongkorn Memorial in Sweden, the largest Thai Pavilion in the world outside Thailand, will be active until January 31st.

Operators will be Raf/ON5RZ, Dirk/ON7DS and Fons/ON4AWT.

Activity will be on 160-10 meters using CW, SSB and FM.

But to QSL, use SM 3 CVM direct or by the Bureau.

For more information, visit the SI9AM Web page:

www.si9am.se

INTRUDER WATCH - ENFORCEMENT ZONE

We mentioned this last week, that "that" pirate is active again in the CW section of 40 Meters

A station has been heard over the last 2 or 3 weeks, 7008 to 7010 last worked 14th Jan @ 1442z 7010.

Please report any unusual activity or better capture a 20 second MP3 audio file and post it to IntruderWatch@googlegroups.com

We need to catch this person so please help us out

Phillip ZL2TZE (ZLDXC List Owner)

DJ9KR PUBLISHES 40 METER BROADCAST INTRUDER LIST

Ulrich Bihlmayer, DJ9KR, of Tuebingen, Germany, has published a list of broadcast stations still operating in the 7.0 to 7.2MHz amateur service radio band. The list can be downloaded from in Adobe PDF format at tinyurl.com/4c8ootr.

The latest version was published on January 11th. Using it as a handy reference you should be able to determine what station might be interfering with a QSO and where that station is located.

Excellent graphics concerning the intruder situation in Region 1 / Europe
during 2010, see http://www.iarums-r1.org/iarums/int2010

Visit also the powerpoint presentation on the IARU Region 1 Monitoring System
homepage, see http://www.iarums-r1.org/iarums/bw-2010.pps

November through March 0900 UTC 7.068 MHz

Researchers at the University of Surrey and Surrey Satellite Technology
Limited (SSTL) have developed 'STRaND-1', a satellite containing a smartphone
payload that will be launched into orbit around the Earth later this year.

STRaND-1 (Surrey Training, Research and Nanosatellite Demonstrator) is being developed by the Surrey team to demonstrate the advanced capabilities of a satellite built quickly using advanced commercial off-the-shelf components.

Smartphones pack lots of components - such as sensors, video cameras, GPS systems and WiFi radios that are technologically advanced but a fraction of the size, weight and cost of components used in existing satellite systems and because many smartphones also run on free operating systems that lend themselves to online software developers, creators of applications ('apps') for smartphones could feasibly develop apps for sats.

If a smartphone can be proved to work in space, it opens up lots of new technologies to a multitude of people and companies for space who usually can't afford it.

Aspidistra transmitter site on BBC TV

On Monday last BBC South East broadcast an item about the Aspidistra transmitter site near Crowborough and Radio Amateur Les Rawlings G3FET was interviewed.

In the "Inside Out" show Kaddy Lee-Preston explores a secret weapon hidden deep beneath the Ashdown Forest - Aspidistra - a 500 MW medium wave transmitter used for black propaganda against Nazi occupied Europe during World War II.

The item included an interview with Radio Amateur Les Rawlings, G3FET, who was an engineer at the station.

Series 19. Episode 3/9 of "Inside Out" was broadcast at 7:30pm on Monday January 24 and was available nationwide on SKY channel 983.
It can be watched again on the web at
www.bbc.co.uk/iplayer/episode/b00xztmk/Inside_Out_South_East_24_01_2011/

Pictures of Aspidistra including one of G3FET:-

Amateur Radio overseas helps rescue co-ordination

Radio Amateurs in Brazilian have received high praise from Brazilian civil defence authorities during their recent flooding. Lt Col Roberto Robadey said, "without their help, we couldn't have done anything in those first two days,"

Radio amateurs took their radio equipment to key points across the town to provide a communication link between rescue groups.

(irts)

REWIND

The Australian Newspaper site (theaustralian.com.au) have an interesting article on a plan to dig for the remains of a world war 2 tunnel at Stalag Luft III called 'George'

The movie "The Great Escape", with Steve McQueen, made Stalag Luft III and its tunnels Tom and Harry infamous. Now it's George's turn.

George, which was built after the breakout of 76 British and Commonwealth airmen in March 1944, will soon be celebrated when a team of British engineers travel to the remains of the camp to excavate it.

The team, who have already identified the entrance to George, hope to find evidence of the preparations that imprisoned airmen made in anticipation of their German captors turning on them when Soviet forces pushed back the German lines.

The tunnel entrance was in the theatre.

Now - five rows back from where the stage was and three seats across. was found what you might call a hollow, a depression in the ground.
George is obviously still there.

Some former PoWs believe that there will be escape equipment and items including radio receivers that were stashed there before the march.

Air Commodore Charles Clarke, who went into George while he was held in Stalag Luft III and is now president of the Ex-Prisoner of War Association, said that some prisoners left more personal items in the tunnels including art work.

FINAL FINAL

Last week we made mention of the eBay auction of the AMSAT-UK SDR Dongle serial
number 200.

A great success - it sold for £430.

The FUNcube SDR dongle usually sells for £125 and the price fetched exceeded
all expectations. The purchaser of the dongle will also have their name or
callsign sent into space on FUNcube.

Speaking of "da dongle' our WIA website last week called for hams to help
NASA try and track NanoSail-D.

Well, operating from batteries, the Amateur Radio satellite NanoSail-D had a
short but successful mission life and Henk PA3GUO has produced a HD video
of reception using his AMSAT-UK FUNcube SDR Dongle to receive NanoSail-D.

Dean Alhorn, NanoSail-D principal investigator said "To get to this point is
an incredible accomplishment for our small team and I can't thank the amateur
ham operator community enough for their help in tracking NanoSail-D,"

"Their assistance was invaluable. In particular, the Marshall Amateur Radio
Club was the very first to hear the radio beacon. It was exciting!"

GB2RS NEWS

Sunday 30th January 2011

The news headlines:

Advance notice of RSGB AGM

UK Space Agency looking for radio amateur

QSL Manager updates

The 2011 RSGB AGM will be held on 16 April at the Menzies Mickleover Court, Etwall Road, Mickleover, Derby DE3 0XX. Registration will take place at 11am and the official proceedings commence at 12 noon. The Open Forum runs from 2 to 4pm. During the official proceedings, the National Club of the Year trophy, sponsored by Waters and Stanton, will be presented.

The UK Space Agency is soliciting expressions of interest to operate the Ground Segment of the first UK national CubeSat mission. The UK Universal Bus Experiment, or UKube, is a collaborative effort between the UK Space Agency, industry and academic participants. Interestingly, the requirements documents specify that the Ground Station manager must hold a UK Full amateur radio licence. The RSGB understands that the Ground Segment responsibilities will include providing satellite up- and downlinks on amateur bands, plus disseminating data that is received from space. Full details of the requirement, including information on how to apply, is online at www.ukspaceagency.bis.gov.uk/20701.aspx.

92. Like a roach infestation, Nimbusters expands to five boards + change

Newsgroup: rec.radio.amateur.misc
Date: 2011-01-29 19:54:28 UTC
From: UberJacker <nohijack@houston-hunks.com>
Message-ID: <83a60c23-81cc-46ce-a806-aaac02c5cf52@a3g2000yqf.googlegroups.com>
Source record: 4932
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

After Sored Mamzer, the Sword Brethren of Eastern Ohio filed a
fraudulent DMCA complaint against Nimbusters, he only caused it to
multiply into many boards and become even more annoying. Right now, I
count five separate boards, plus a place where you can look at a group
photo. They are as follows:

(nimbusters photo) http://www.nimbusters.org
(everyone) http://subgurls.com/busters/forum/index.php?mode=index
(nimbusters) http://subgurls.com/forumGOOD/forum.php?board=8
(hams) http://subgurls.com/forumGOOD/forum.php?board=1
(nimbusters) http://nimbusters.org/forum/forum.php?board=8
(hams) http://nimbusters.org/hams/forum.php?board=1

This is getting out of control and is downright scary. Please don't
ToS Nimbusters again. It has already multiplied enough!

(Obviously, Mark can never win.)

SARL NEWS - SUNDAY 30 JANUARY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

SA AMSAT ANNOUNCE DETAILS OF TWO SATELLITE PROJECTS

NASA's NANOSATELLITE HEARD BY RADIO AMATEURS

ARRL AWARDS TO SA AMATEURS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SA AMSAT ANNOUNCE DETAILS OF TWO SATELLITE PROJECTS

SA AMSAT has announced details of two satellite building projects SAiSAT and Kletskous.

SAiSAT is a longer term project managed by John Willescroft, ZS6EF, looking at overcoming the power limitations of a small satellite by introducing fold out solar panels that besides generating power from sunlight will also host payloads and be used for orbit stabilisation. The objective of SAiSAT is to involve students at Masters and PhD level at both academic universities and universities of technology. Universities and other interested institutions and individuals are invited to join the project. A detailed document is available on the SA AMSAT website at www.amsatsa.org.za.

A SAiSAT briefing session will be held at the National Amateur Radio Centre on 25 March, the day before the SA AMSAT Space Symposium is to be held at Vodaworld.

The second project is called Kletskous, a hands-on CubeSat aimed at promoting greater involvement in satellite activity by South African Radio Amateurs. A preliminary teleconference was held during this past

week reviewing the various options and payload. The first draft of a project plan will be available on www.amsatsa.org.za later this week. Regular updates will be posted as the project develops.

The project is managed by Hannes Coetzee, ZS6BZP. Hannes is inviting interested persons to join the team. "We are particularly looking for radio amateurs with RF design experience, antenna design experience and software writing experience. Send your contact details and a short description of you technical background to saamsat@intekom.co.za.

SAAMSAT is launching a fundraising campaign and is seeking contributions to its satellite building fund. Donations can be paid into ABSA bank. The account details are SA AMSAT, ABSA account number 560 153 171 Branch code 632 005. All donations will be acknowledges on www.amsatsa.org.za. To ensure acknowledgement please send details of your contribution to saamsat@intekom.co.za with Satellite Fund in the subject line.

Invest in the future of amateur satellite communication, support these projects.

NASA's NANOSATELLITE HEARD BY RADIO AMATEURS

When a NASA nanosatellite -- NanoSail-D -- ejected unexpectedly on January 17 from the Fast Affordable Scientific and Technology Satellite (FASTSAT), the agency called upon Radio Amateurs to help track it. NASA asked radio amateurs to listen on 437,270 MHz for the signal and verify that NanoSail-D was operating. NASA received almost 470 telemetry packets from 11 countries.

The NanoSail-D beacon sent an AX.25 packet every 10 seconds; the packet contained data about the spacecraft's systems operation. Once the NanoSail-D team received confirmation that the nanosatellite did indeed eject, NanoSail-D principal investigator Dean Alhorn quickly enlisted Alan Sieg, WB5RMG, and Stan Sims, N4PMF, to try to pick up NanoSail-D's radio beacon. Both hams work at the Marshall Space Flight Center in Huntsville, Alabama.

"The timing could not have been better," Sieg said. "NanoSail-D was going to track right over Huntsville, and the chance to be the first ones to hear and decode the signal was irresistible." Right before 23:00 UTC on January 17, they heard a faint signal. As the spacecraft soared overhead, the signal grew stronger and the operators were able to decode the first packet: NanoSail-D was alive and well. "You could have scraped Dean off the ceiling. He was bouncing around like a new father," Sieg recalled.

According to NASA, the nanosatellite was last heard at 13:54 UTC on January 21. Telemetry indicates that the sail deployed on schedule and the satellite is now believed to be out of power, which NASA said was to be expected.

NASA is now asking for visual tracking and sighting reports of NanoSail-D, which is about 650 km above the Earth. According to the agency, when the nanosatellite's sail reflects off the Sun, it could be up to 10 times as bright as the planet Venus -- especially later in the mission when the sail descends to lower orbits. You can track NanoSail-D on the web or on your smart phone. NASA estimates that NanoSail-D will remain in low Earth orbit (LEO) between 70 and 120 days, depending on atmospheric conditions.

ARRL AWARDS TO SA AMATEURS

Dennis Wells, ZS1AU, today joins the ranks of SA's top DXCC members.

Tjerk Lammers, ZS6P, the SARL Awards Manager, reported that after 60 years of amateur radio Dennis, ZS1AU, finally submitted his first time ever DXCC application to the ARRL (American Radio Relay League) last year in December.

Dennis was credited with 337 entities which places him in the number three spot on the South African DXCC members phone list.

Congratulations Dennis, you deserve it.

FIRST ZS WORKED ALL STATES TRIPLE PLAY AWARD

The ARRL has awarded the first Worked All States Triple Play award to a South African Radio Amateur. Barry Murrell, ZS2EZ, is the recipient of Award number 492 issued on 7 January 2011.

The Triple Play Award requires working all 50 US States on SSB, CW and RTTY (150 contacts) with all confirmations via LoTW. Only contacts from 1 January 2009 count.

Donovan van Loggerenberg, ZS2DL, has also made all the contacts and received the confirmations, he has submitted his application to the ARRL.

Well done Barry.

CONTEST NEWS

The Antique Wireless Association CW Activity Day will run from 10:00 UTC (12:00 CAT) on Saturday 5 February to 10:00 UTC (12:00 CAT) on Sunday 6 February with CW activity on 20, 40 and 80 metres. This contest is open to radio amateurs interested in CW.

The exchange is a RST report, the operators name and Grid Square locator. Logs to be sent to Andy, ZSADY, either by e-mail to andy.cairns@xsinet.co.za or standard mail to A Cairns, P O Box 12320, Benryn, 1504. Logs must be submitted by Monday 21 February 2001. Find the rules on page 23 of the 2011 SARL Contest Manual.

The first leg of the 2011 SARL National Field Day will start at 10:00 UTC (12:00 CAT) on Saturday 12 February and it will end at 10:00 UTC (12:00 CAT) on Sunday 13 February. Participants may use phone, CW and digital modes on 160 to 10 metres, excluding 30, 17 and 12 metres.

There are five classes of participation catering for multi-operator (club), single operator and general stations. The exchange is made up of the number of transceivers, the class of participation and your provincial abbreviation. Logs must be submitted by Monday 21 February to the Bloemfontein RAC by e-mail or standard mail.

It is very important that participants will read the rules for this contest before the start of the Field Day, find the rules on page 25 to 29 of the 2011 SARL Contest Manual.

LAST CHANCE TO MAKE CONTACT WITH ZS85SARL

For the SARL Field Day on 12 to 13 February, members of the Boland Amateur Radio Club will have the SARL's birthday call sign, ZS85SARL, on the air and will it offer the last opportunity to radio amateurs, who have not yet made contact with ZS85SARL, to do so.

An effort will be made to achieve a WAZS 200 via the SA QSL system under this call sign. Radio amateurs, who have not yet made contact with ZS85SARL, are thus specially invited to contact ZS85SARL during the Field Day event and to confirm the contact via the SA QSL system.

M�re detail about the station will be published on the SARL Website closer to the event.

EAST RAND RADIO CLUB FLEA MARKET

This popular flea market will be held on the 5th February from 12:00 to 15:00 on the sports grounds of the Sel Park Primary school in Pridgeon Str., Selection Park, Springs.

The coordinates for getting there are: S 26° 17 247 & E 28° 27 129
Please come and support us and or bring all your old and new stuff to sell. There will be something cold and hot to drink and also "lekke" pancakes and wors rolls, so bring lots of money please.

Contact Francois, ZR6COI, at 079 932 7131 or email to zr6coi@vodamail.co.za or Judy, ZR6POP, at 074 177 0395 zr6pop@vodamail.co.za for bookings of tables or get them on the 145,675 Springs ERB Repeater.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspots 1 147 and 1 149 are about to disappear out of direct Earth view. Fortunately a new and as yet unnumbered sunspot is forming on the eastern limb. The effective sunspot number is expected to be less than 15 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be fair towards Europa on 15 m, later to be followed by fair 20 m openings. Early evening 15 m contacts with the USA are possible. Contacts with Australia are possible on 20 m at sunrise. 15 and especially 20 m openings to Brazil and South America

are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 20 and 30-m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 31 January - Closing date for phase 1 of the construction competition. 5-6 February CW Activity day of the Antique Wireless Society. 12-13 February - SARL National Field Day and ZS85SARL on the air for the last time from Saturday 12:00 CAT to Sunday 12:00 CAT. 21 February - Logs for the SARL field day to be in to the Bloemfontein ARC.S 25 February - Logs for AWA CW Activity day to be in to Andy, ZSADY. 28 February - Offers to host a station at Sun City during IARU Region 1 conference to be in to iaru2011@sarl.org.za. 25 March - SAiSAT briefing session at the NARC.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 30th January 2011

IRTS Web Site Changes

The layout of the IRTS web site www.irts.ie was updated during the week. While the structure of the site remains broadly the same as before, following feedback from users we have revised the menus as well as some of the content.

A new page on "Getting an Amateur Station Licence" outlines the skills requirements for a licence, while the "Amateur Station Licence Examination" page explains the examination process.

There is no shortage of data and information about Amateur Radio on the 'Net. With this in mind, the IRTS site focuses on material of particular interest to its members, potential members and other local radio amateurs. Other key sections of the site cater for those studying for a licence and for visitors to Ireland.

Amateur Station Licence Examination

Those studying for the licence examination and their tutors will be interested in the document "Studying for the Harmonised Amateur Radio Examination Certificate" which includes the revised examination syllabus, along with a sample paper based on the new syllabus. This document can be obtained at www.irts.ie/downloads or from the "Amateur Station Licence Examination" page of the IRTS web site.

Your Club Listing on IRTS Website

Club Secretaries, S&#65533;amus EI8BP as Web Editor is preparing to update the Clubs page on the Website. Some of this information is somewhat outdated. Please have a look at your club's entry on the IRTS Website and contact S&#65533;amus by Email at ei8bp / at / eircom / dot / net with any changes. The Website information is an important point of contact for prospective club members and an opportunity to promote your club.

IRTS NEWS on Community Radio

The IRTS weekly news will now be read on 'Dundalkfm' local community radio station on Tuesdays. This provides open access to amateur radio news for the general public, locally and interested people alike. Dundalkfm broadcast on 100 mhz and stream live on the internet on www.dundalkfm.com

---

IRTS Weekly News Podcast

Advanced plans are now in place to provide a podcast version of the IRTS weekly news. The MP3 podcast will be available for download from the IRTS website. This development will benefit all service users of the IRTS website. More news on this item to follow next week.

Springtime Amateur Radio Courses

Enrolment for amateur radio theory classes will take place in Dundalk Amateur Radio Society on Thursday February 3rd at 8.30pm sharp. Further information can be obtained from Tony EI4DIB / at / ei7dar/ dot /com or text only to 086 4066660. Everyone welcome. www.ei7dar.com

For radio theory classes in Limerick, information can be obtained from Ger McNamara EI4GXB on 087 2532512 or ei4gxb / at /gmail / dot /com.

For radio theory classes in South Dublin, Classes are starting again at 8:00 pm in Terenure College on Tuesday evenings. Telephone Michael EI2GKB on 087 248 1970 or Email him at miklef / at / oceanfree / dot / net for further information.

The West Tyrone Amateur Radio Club GN4OMA, will take registrations for the radio foundation course taking place on Tuesday February 1st at 8pm sharp. The Venue is Technology Education Centre, 2 Spillers Place, Omagh, County Tyrone. www.wtarc.co.uk.

The Lough Erne Amateur Radio Club will run an Intermediate course and examination in SHARE over three weekends, 12th and 13th, 19th and 20th, and 26th and 27th February. This resumes the course begun in November but abandoned in December's severe weather.

The Club usually meets on Tuesday evenings in SHARE. The thirtieth Lough Erne Rally will be in SHARE's big Arena on Sunday 17th April.

For more information please email Michael Clarke, Chairman, mi5mtc / at/ learc / dot/ eu.

International Marconi Day

International Marconi Day takes place this year on Saturday 30th April. The Howth Martello Radio Group will be participating once again as an award station using the call-sign EI0MAR.

This is not a contest but there are several nice awards available for working the officially listed stations, each of which has an historic

connection with Marconi. The event is organised by the Cornish Amateur Radio Club. For more information please visit the club's website http://crac.g4usb.net/cracblog/.

EI0MAR operates from the Martello Tower overlooking the East Pier in Howth. The tower now houses a vintage radio museum. In 1905 the British Post Office carried out wireless telegraphy experiments at the tower in Howth using Marconi equipment.

Visitors are always welcome at the museum and the group hopes to see many visitors during the IMG event in April. The HMRG's website is www.ei0mar.org where a free information booklet in PDF format can be downloaded.

The North Cork Radio Group are pleased to announce that they will be active from the Marconi Signal Station at Mizen head where Marconi sent many of his first test transmissions to America. Further details will be posted nearer the event, however, please pencil the day free if you'd like to attend or work the station.

Cork Social Evening

Listeners are reminded that Tuesday February 1st is the closing date for tickets for the social evening at the Vienna Woods Hotel in Cork taking place next Saturday February 5th 2011. The event is open to all and newer licensees are particularly encouraged to attend and get to know their fellow amateurs.

Tickets are available from Dave Moore EI4BZ priced at 30.00 and you can contact him on 087-6290574 or by email on ei4bz / at / eircom / dot/ net.

South Eastern Amateur Radio Group

The Annual General Meeting of South Eastern Amateur Radio Group will take place on Monday 28th February in the Roanmore Social and Sports Centre, Cleaboy Road, Waterford. All are welcome.

For up to date information about the club, visit www.searg.com

---

DX News

Look for 3B8/SP2JMB and 3B8/SP2FUD from the Island of Mauritius from 4 -24 February. They will be operational using CW, SSB and RTTY. From 18 - 22 February they plan to do a side trip to Rodrigues Island (IOTA AF-017) where the prefix in their calls will change to 3B9.

To celebrate the 50th anniversary of independence, stations in Kuwait will be using the 9K50 prefix from now until the end of February.

During a holiday in the Dominican Republic Claudio HB9OAU plans to operate as HI7/ HB9OAU from 6 - 18 February. If he can manage one day trips to some of the off-shore islands he will put on HI2/HB9OAU from IOTA NA-122.

A group of three Spanish amateurs EA1PP, EB1HF and EC1DPM are spending some time in the Caribbean area next month. They will operate from two of the 'new' DXCC entities Bonaire PJ4 and Curacao PJ2. Modes in use will be SSB and RTTY.

For those of you who enjoy collecting new prefixes look for TC2011EWU from now until 6 February. This station is active during the World University Games in Erzurum in Turkey.

PHOENIX A.R.C. Annual Rally

Phoenix Amateur Radio Club annual rally will be held on Sunday 20th February 2011 in the usual venue, Coolmine Community School, Blanchardstown.

Doors open for Traders at 9.00 am Doors open to public 11.00am Admission 5 Euros. To book tables contact Tony at 0872439997 or Tom at 01-8211043.

Plenty of Parking, Refreshments and Bring and Buy Sale. All usual traders will attend.

This is the First Rally of 2011.

For further details on Rallies please see www.irts.ie/rallies

---

Lagan Valley ARS Annual Rally

The Lagan Valley rally will be held on Saturday March 19th 2011. The venue is the village centre 7 Ballynahinch Road Hillsborough, Co. Down. Doors open at 11.30am.

For further information please contact Jim Henry, GI0DVU Telephone 048 9266 2270, you can also visit gi0dvu.co.uk/lisburnrally.aspx

A Bring and Buy, Car Parking and Refreshments will also be available.

Did you know?

In February 2004, a unique Morse code for '@' (at) symbol as used in an email, was introduced: --- (Dit-Dah-Dah-Dit-Dah-Dit).

Items for inclusion in next weeks Radio News should be forwarded to Aidan EI7JC, preferably via e-mail to "news / dot /ei7jc / at / gmail / dot / com". Or by phone to 085 7100511 News can also be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to

both the radio and printed news services.

Please note that items for the radio news should reach the editor not later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 23rd-January, through Sunday, 30th-January there were 226 countries active. Countries available: 1A, 3A, 3B8, 3B9, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J5, J6, J7, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VP2V, VP5, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, YV0, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1A0, S.M.O.M. Another rare appearance/activity of 1A0KM from the Sovereign Military Order of Malta happened this past weekend, and operations were expected to end on January 30th. Operators mentioned were IK0FVC, G4IRN, I0JBL, I0ZY, I8NHJ, IK0DWN, IK0FTA, IK0PRG, IW0BYL, IZ0NRG and possibly

some guest operators. QSL via IK0FTA direct. All QSOs will be uploaded to LoTW.

4W, TIMOR-LESTE. David, VK2CZ, will be active as 4W3A from Dili during the CQ WPX SSB Contest (March 26-27th) as a Single-Op/Low-Power entry. David informs OPDX that this is just a long weekend trip (fly in on the Friday and then out on Monday.... The airfares are dirt cheap right now). He doubts very much if he will be on the air outside the WPX SSB contest. QSL Manager is direct via M0OXO (see <http://www.m0oxo.com> for details).

5Z, KENYA (Update). Sig, NV7E/ZS6SIG, who has now relocated from Pretoria, South Africa, to Nairobi, Kenya, is now signing 5Z4EE for the next four years. Sig announced this past week that he will also be in the CQWW WPX SSB Contest (March 26-27th) as well as the ARRL DX CW Contest (February 19-20th) and ARRL DX SSB Contest (March 5-6th) as a Single-Op/All-Band/ High-Power entry. Activity outside of the contests will be on all bands 160-10 meters. QSL via NV7E or at the address shown for 5Z4EE on QRZ.com.

6W, SENEGAL. Fernando, EA1BT, will be active as 6W/EA1BT between May 3-12th. More details are forthcoming.

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the ARRL DX SSB Contest (March 5-6th) as Single-Op/All-Band/High-Power entry. QSL via LoTW or direct to NN1N.

9N, NEPAL. Operators Dov/4Z4DX/9N7DX and XYL Anat/9N7YL will be active between April 13-30th. Activity will be mainly 20/15/10/6 meters using mostly CW, RTTY and PSK31. Dov is going to organize the big DXpedition in November 2011, to celebrate his 60 years birthday and 45th anniversary of being on the air. QSL via 4Z4DX. For more details and updates, see:
http://www.mdxc.org/9n7dx/
http://www.qrz.co.il/home.php?page=7DX

BLACK SEA CUP INTERNATIONAL 2011. The Black Sea Contest Club (BSCC) will sponsor the "Black Sea Cup International Contest 2011" which will be held between 1200z, February 5th and 1159z, February 6th. For more information on the contest, please visit the BSCC Web page at: http://bscc.in

C6, BAHAMAS. Operators Bill/NE1B (C6AWB) and Tom/N1GN will once again be active as C6ANM from Nassau (NA-001, FL15) during the CQ 160-Meter SSB Contest (February 25-27th) and ARRL DX SSB Contest (March 5-6th) as a Multi-Single entry. QSL via LoTW.

CE, CHILE (LH Op). Hector, CE3FZL, and possibly others will be active as CE2C from the Faro, Cofradia Nautica del Pacifico (ARLHS CHI-079, WW Loc. FF46DP), Algarrobo, during the South American Lighthouse Weekend (SALW 2011), February 25-27th. Activity will be on 40/20/15/10 meters using 100 watts and a Mosley TA33M directional beam antenna. QSL direct (QRZ.com address) with 2 IRCs, or by the Bureau. No eQSL!

CE, CHILE (LH Op). Members of the Team DX Scorpions will be active as CE1Z from Punta Tetas Lighthouse (ARLHS CHI-075) during the South American Lighthouse Weekend (SALW 2011), February 25-27th. Activity will be on

160/80/40/20/15/10 meters using 7 stations, 9 operators and 3 guests. Operators mentioned are Claudio/CA1KHF, Jose/CE1UOR, Melo/CE1TUW, Patricio/ CE1WNR, Antonio/CE1RSQ, Victor/CE1TKL, Ricardo/CE1GBE and Pedro/CE1WML. QSL via CE1WNR. For more details, see: http://www.qrz.com/db/ce1z http://ce1z.blogspot.com

CY0, SABLE ISLAND (Update). Randy, N0TG, reports, "Although the two previous attempts to access the island were unsuccessful, the team is eagerly looking forward to March anticipating improved weather, propagation and a successful landing. We are pleased to note that routine supply flights to Sable for the small staff on the island have been successful and on schedule during January. Hopefully, this will be a continuing trend of improved flight conditions as we count down to an early March operation. Most of the Dxpedition equipment and supplies are stored in the aircraft hanger in Halifax, Canada---ready to be loaded onto the aircraft." The CY0 Web site will be updated as new information develops at: http://www.CY0dxpedition.com

D2, ANGOLA. QSL Manager Mike, CT1IUA, informs OPDX that Paulo, D2CQ (aka CT1ITZ), will be back on the air very soon from Porto Amboim. He was off the air for almost 1 year after some equipment was stolen from his QTH (power supply, coax, PL's, windom...). Paulo will be on the air with a G3TXQ Hexbeam and for now he will only be active on 20-6 meters SSB. He plans to put a dipole up for 40m and 80m soon. Mike mentions that sometimes the electricity goes down for 2 or 3 hours, so it is normal that Paulo suddenly disappears once in a while!

D4, CAPE VERDE. A group of operators (not named) will once again be active as D4C from Sao Vicente Island (AF-086) for the ARRL DX CW Contest (February 19-20th) as a Multi-2 entry. Before and after contest, operators will be active as D44AC. QSL D4C via LoTW or CT1ESV by the Bureau or IZ4DPV for direct. QSL D44AC direct to Carlos Pulu, P.O. Box 398, Mindelo, Cape Verde For the latest information, check the D4C Web page at: http://www.d4c.cc

FH, MAYOTTE (Update to OPDX.995). Bruno, DH1BL, who is currently active as FH/DH1BL from Mayotte (AF-027) for the next 3 years, has now received a "FH" callsign - FH4VOS. He was heard this past week on 20 meters SSB. QSL via his QSL Manager DL7BC, by the Bureau or direct.

HH, HAITI. Operators Jan/K4QD and Don/AF4Z will once again be active as HH4/K4QD and HH4/AF4Z between February 18th and March 5th. Activity will be on 80-10 meters CW, SSB, RTTY and possibly PSK, as time permits. As in the past, Jan and Don will be working at the NW Haiti Christian Mission <http://www.nwhcm.org> in Saint-Louis-Du-Nord for two weeks. Jan prefers QSLs for K4QD are direct or LoTW, but the Bureau is OK. QSLs for AF4Z are direct.

HI, DOMINICAN REPUBLIC (Update). Operators Yukon John/KL7JR and XYL Claire/WL7MY will be active as HI3/KL7JR and HI3/WL7MY from Hispaniola Island (NA-096) between March 1st and June. Activity will be on 80-10 meters SSB using several different wire antennas from their beach location.

Main antenna will be a 40-10m vertical loop. QSL via KL7JR (QRZ.com, CBA).
E-mail for skeds at: kl7jr@yahoo.com
Antenna farm links: http://www.hamuniverse.com/kl7jrhorizminibeams.html
http://www.hamuniverse.com/kl7jrslopingdelta806.html

IOTA NEWS.....
AF-018. Operator Raffaele, IH9YMC, will be active from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc. JM56XT), African Italy, in the CQ 160-Meter SSB Contest (February 25-27th) as a Single-Op/low-Power entry. QSL via eQSL.

AF-068. (Op Postponed!). Italian operators Leopoldo/I8LWL (5C2L), Alfredo/IK7JWX (5C2J), Ruggero/IK2PZC (5C2P), Simon/IZ7ATN (5C2SG) and Mounaim/CN8QY have postponed their operation to Herne Island, located in the large bay of Dakhla, until September. Orginally it was scheduled for between February 1-5th. Alfredo, IK7JWX, informs that the 5C2 was traveling in Morocco to reach Dakhla and Herne Island, when on the way a wheel broke on of their jeep, and it turned upside down. The impact only hurt Leo/I8LWL (5C2L), but the rest of the team is in good shape. Leo suffered a fractured shoulder and a slight head injury and is now recovering in a Marrakech hospital. For updates, please visit the following Web page at: http://www.i8lwl.it

EU-054. Operators Raffaello/IT9ATF, Renato/IT9NPR, Pippo/IT9PPG, and Pino/IT9WDC will be active as IF9A from Favignana Island (IIA TP-011, MIA MI-025, WLOTA LH-1545) for the CQWW WPX SSB Contest as (March 26-27th) as a Multi-Single entry. Activity will be on all bands and modes outside of the contest. QSL via IT9ATF, direct or by the Bureau.

EU-146. Gerard/PD2GCM and guest operator Bertus/PD2GJS will activate the special callsign PD04ISLE starting May 1st, to commemorate the 4th anniversary of the Isle of Tiengemeten, a nature island. It is the last surviving island in the southwest part of the Netherlands as a unique nature reserve. The activation will be continued throughout 2011 until December 31st. For more details, see: http://pd04isle.webklik.nl
http://www.qrz.com/db/PD04ISLE

NA-067. (Update/Correction) Operators Eric/W4OTN, Amanda/KI4IWS and Bill/KG4CXY will be active as W4OTN from Core Banks Barrier Island (USI NC033S, WLOTA 0596, Carteret County, North Carolina) between July 29th and August 1st. Activity will include an entry in the RSGB IOTA Contest (July 30-31st). Outside of the contest they will be active on 80-10 meters using CW and SSB. QSL W4OTN, by the Bureau or direct (QRZ.com

J8, ST. VINCENT. Dave, G3TBK, will once again be active as J88DR between February 16th and March 14th. Activity will include the ARRL DX CW Contest (February 19-20th) and the ARRL DX SSB Contest (March 5-6th) as a Single-

Op/All-Band/Low-Power entry. He will also be in the RSGB's 74rd Commonwealth Contest (March 12-13th). Activity outside of the contest will be on all HF bands, especially 30/17/12 meters, using CW, SSB and RTTY. QSL via G3TBK, direct or by the RSGB Bureau.

KH6BZF PROPAGATION FORECAST/REPORT (For January 31st-February 6th)....
Jan 31 HN-AN SOLAR REFERENCE KEYS
Feb 1 AN --------------------
Feb 2 AN BN - Below Normal
Feb 3 AN AN - Above Normal/Geomagnetic Level is QUIET
Feb 4 AN LN - Low Normal
Feb 5 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Feb 6 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

NP4, PUERTO RICO (NA-099). Alfredo, WP3C, will be active as NP4DX in the RSGB IOTA Contest (July 30-31st) as a Single-Op/Mixed-Mode/24-Hrs entry. His activity will also count for the WLOTA as LH-2802. QSL via W3HNK, direct preferred, but Bureau is OK. Visit his web page at: http://www.wp3c.qth.com/np4dx.htm

OA, PERU. Fred, DL1NL, will be active as OA4/DL1NL sporadically from the Radio Club Peruano (OA4O) in Lima until February 20th. Activity will be on 160-10 meters CW only. QSL via his home callsign.

P4, ARUBA. Tim, WD9DZV, will be active as P40A from Aruba between March 8-13th. Activity will be holiday style on most bands and modes. QSL via WD9DZV.

PJ2, CURACAO. Members of the Caribbean Contesting Consortium (CCC) will once again activate Signal Point Station on Curacao (SA-099, WLOTA LH-0942) during the ARRL DX CW Contest (February 19-20th) as a Multi-Multi entry. Operators mentioned are: Geoff/W0CG (PJ2DX), Bill/W9VA, Mal/NP2L, Wayne/K8LEE, Jim/W0NB, Kelly/N0VD, Dan/N1ZZ, Charles/WA9S and John/N4QQ. Outside the contest operators will use PJ2/homecall or their personal PJ2 callsigns. QSL via their home callsigns. QSL PJ2T via N9AG or LoTW.

PJ6, SABA ISLAND (Update to OPDX.985). The six meter expedition to Saba Island (NA-145) by team Dick/K5AND, Pat/W5OZI and George/K5TR now has a Web page available at: http://dkhanson.com/pj6
In the coming months, watch for updates and news during their operation. Callsigns are still not known.

YE2H QSL STATUS. Dani, YB2TJV, QSL Manager of YE2H (Indonesian Light-
house Station) informs OPDX that the YE2H QSL cards are still in
printing, and will be ready at the end of January 2011. He states,
"Thanks for all stations who have made QSOs with us."

ZL8X QSL STATUS. Mario, DJ2MX, states that the ZL8X QSL cards will be
printed sometime in February. They hope that the distribution of QSL
cards will start at the end of February or beginning of March. In a
press release by Mario, some questions came up last weeks about their
LoTW policy. It is recommend to read the complete press release for
more details on how they will process the QSOs for LoTW at:
http://www.kermadec.de/news/news_archives/index.php?task&#65533;ownews&id&#65533;7

QSLS VIA LoTW: 9N38 (1982)

QSLS RECEIVED VIA MAIL: 4L5O, 5R8IC, 7Z1CQ, 7Z1TT, 8R1AK/p, A45XR,
C56E, EK3SA, EM75LWY, FP/AC8W, HG0GU/1, IR0LI, J48CM, KC4USV, LU/JH4RHF,
MU/F4EGD, NP4A, OX/DL2SWW, PJ2/K2TQC, PJ2/W1NG, PJ2MI, PJ2T, PJ4W,
PJ6A, RK2FWA, S79LR, T6MB, VK0KEV, VK4LDX/p, VK9XO, VP2E/W1UE, ZD9AH,
ZF2AH, ZL7V and ZL7VR

QSLS RECEIVED VIA THE BUREAU: 6W/IZ2DPX, 9A3XV, 9A4A, 9A7B, 9H1RZ,
DM2DX, IQ6FU/P, IY4FGM, OH2HQ, OH8X, OL4A and US2IW

S2, BANGLADESH. Tom, KC0W (ex-ZD7X, XU7XXX, TO0O), is expected to be active
from Bangladesh for 9 months beginning in November 2011. Activity will have
a special emphasis placed on 80 and 160 meters. More details will be forth-
coming.

T30, WESTERN KIRIBATI. Udo, DL9HCU, is once again active as T30HC from
Tarawa Island (OC-017). Length of stay is not known. Activity this past
week was on 20 meters CW (14002 kHz around 0600z). QSL via his home
callsign.

TF, ICELAND. Siggi, TF3CW, has announced that he will be active in the
ARRL DX CW Contest (February 19-20th) as Single-Op/Single-Band (20m)
entry. QSL via LX1NO.

TI8, COSTA RICA. Operators Keith/W4KTR, Eddie/K4UN, Bob/W4BW, Lex/W4XO, Carlos/TI2KAC, Juan Carlos/TI2JCY and TI2ZM will be active as TI8M from Costa de Pajaros, during the ARRL DX SSB Contest (March 5-6th) as a Multi-2 entry. QSL via TI2KAC, direct preferred but bureau "OK". Look for activity before the contest on 160-10 meters.

TJ, CAMEROON (Update). An international team composed of members of the Provins ARC (F6KOP) will be active as TJ9PF (instead of TJ3C as first reported) from Kribi between February 10-20th (See OPDX.992). Also, Gerard, F2VX, unfortunately had to cancel his trip with the team, and a substitute was very quickly found. Norbert, DJ7JC, has joined the TJ9PF crew, and he is a specialist in the Digital and CW modes. For more details and updates, visit the TJ9PF Web page at: http://www.tj9pf.fr

V5, NAMIBIA. Seven members of the Lufthansa Amateur Radio Club (LARC) of Frankfurt will operate as V55DLH from Omaruru between February 5-12th. Operators mentioned are: Georg/DD8ZX, Bernd/DF1FF, Juergen/DH0RAK, Juergen/DH6ICE, Frank/DJ3FK, Rudi/DK7PE and Bernhard/DK7TF. Activity will be on all bands and modes, including PSK and SSTV. QSL via Zik, DK8ZZ.

VK9C, COCOS-KEELING ISLANDS. Tim, NL8F, will once again return to Cocos Keeling (OC-003) and be active as VK9CF between March 19-29th. Activity will be on 80-10 meters SSB and possibly 160m. Tim hopes that this year's conditions are better than last year's conditions in March for the lower bands. He is also expected to be in the CQ WPX SSB Contest (March 26-27th). QSL via K8NA.

VP8O, SOUTH ORKNEY ISLANDS. Members of the Microlight Penguins hit the airwaves as planned on January 27th, from Signy Island (AN-008) around 1730z on 20 meters SSB. Activity by VP8ORK should last until February 8th. They expect to be on the air with 7 stations on all HF bands 160-10 meters using SSB, CW and RTTY (Suggested frequencies were listed in OPDX.995). As this was being written, the VP8ORK log shows (at 1456z, Janaury 30th) that they have made 21198 QSOs with 7863 unique callsigns (13321/CW, 7364/SSB and 513/RTTY). The online log can now be found at:
http://www.clublog.org/charts/?c&#65533;8ork
If you want a QSL card there are three ways available to receive one: OQRS direct (on the VP8O Web page), OQRS Bureau (on the VP8O Web page) and direct by mail via VE3XN [w/SASE/Green Stamps/IRC(s)]. For more details and updates, visit the VP8O Web page at: http://www.vp8o.com
By the way, real-time news is now available at:
http://www.vp8o.com/realtimenews.htm

ZA, ALBANIA. Franck, F4DTO, will once again be active as ZA/homecall from Elbasan between April 2-16th. Activity will be on 40&#65533;10m, mainly SSB, using 100 watts and monobander antennas. QSL via his home callsign, direct or by the French Bureau. For updates, watch QRZ.com (F4DTO) or Franck's Web page at: http://monsite.orange.fr/f4dto

ZF, CAYMAN ISLANDS (NA-016). John, K6AM, will be active as ZF2AM during the CQ 160 Meter SSB Contest (February 25-27th) as a Single-Op/High-Power entry. QSL via K6AM, direct or by the Bureau or LoTW.

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

104. BEST HOT MASALA VIDEOS SITES AND LIP KISS PHOTOS

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

February 2, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Go Digital! CQ WPX RTTY
- Calling All Students - School Club Roundup
- Field Day Update from ARRL HQ
- Jargon Joggin'
- Solar One-Two Punch
- ARRL CW SS and Sep VHF QSO Party Results
- Coverage Maps and VOACAP
- Tasty Tin Tips
- When All Else Is Made to Fail

NEW HF OPERATORS - THINGS TO DO

You may not realize that the Northern California Contest Club weekly NS
CW sprint <http://www.ncccsprint.com/rules.html> on Thursday evenings
is preceded by a slow-speed version called the SNS. This is a good way
to try the sprint format without the blazing speeds of the full-speed
version. February is the busiest contest month next to October - you'll
find plenty to do!

BULLETINS

There are no bulletins items for this issue.

BUSTED QSOS

Watson - a name! Peter N5UWY reports that the correct call sign for the
author of DXLab Suite is AA6YQ and Jim WI9WI observes that the great
Antarctic explorer was Shackleton, not Shackleford (whose name is
burned into my synapses as a junior-high Vice Principal).

==> CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Feb 5-6

- Maine FM Simplex Challenge--Phone

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

ARRL Contest Branch Manager, Sean KX9X has just released some important information for this year's ARRL Field Day <http://www.arrl.org/field-day>. The "free" VHF station that was previously restricted to Class A participants with two or more transmitters is now available to all Class A operations! This should promote additional VHF+ weak-signal operation and know-how. In order to promote better VHF+ operating practices, Sean and Steve WB8IMY have collaborated on a VHF Operator FAQ document that presents information on how to operate on 6 and 2 meter SSB and CW, using FM phone, and working the satellites. Field Day offers VHF+ operating opportunities to hams that may not have tried it before - this document will help them get better results and follow regular operating practices. Now it's up to the VHF+ operators out there to help their teams get that VHF station on the air and making QSOs! Read more about this year's rules on the ARRL Field Day web site.

CQ WPX Contest Director, Randy K5ZD reports on the CQ WPX blog <http://www.cqwpx.com/blog/?p=77>, "Everyone who submitted a log for the 2010 CQ WPX SSB Contest should have received an email with a link to their log checking report. The log check report is a text file that contains all the information about how your log was scored and any errors that were found." Not only is the information you miscopied available, but the report also includes information about how your information was copied by other stations. This is solid gold information you can use to improve your operating! Randy is not entirely without sympathy for a first-time report reader, "It can be shocking to see a log check report for the first time. Everyone makes errors. The best ops have spent years improving their skills and learning a vocabulary of call signs. Study your errors and work to improve them in the next contest." Several log checking reports from winning stations (and Randy's as well) have been made public for comparison.

Array Solutions has announced a new wide-band vector impedance antenna analyzer, the AIM UHF <http://arraysolutions.com/Products/AIMUHF.htm>. Its operating range is 5 kHz to 1 GHz and it operates just like the popular AIM4170C. The companion PC software displays the data graphically and stores the digitized information in files, as well. Another instrument in the increasingly sophisticated tool set available to amateurs!

Ham radio has been in the news more and more recently. One could say things are looking up, especially when the subject is finding an errant satellite! NASA's NanoSail-D <http://www.nasa.gov/centers/marshall/news/news/releases/2011/11-009.html> got stuck in its canister and failed to deploy as expected. (I have whole weeks like that.) To the rescue came hams with UHF weak-signal capability! Asked by NASA to listen for the satellite, the beacon was almost immediately detected <http://tinyurl.com/4s7nj4r>. The satellite turns out to be in orbit and the experiment is running - way to go!

Now that NanoSail-D <http://www.nanosail.org/> is, in fact, sailing, Spaceweather.com <http://spaceweather.com/> and NASA have announced a contest to photograph the orbiting solar sail. It should be bright enough to see and web sites like Heavens-Above <http://heavens-above.com/> can help you locate it. The contest will end along with NanoSail-D when it re-enters the atmosphere in April or May of this year. (from AMSAT <http://www.amsat.org/> bulletin 030.05)

Rick NQ4I announces the second annual Contest Ham Radio cruise from September 16-19th on the Monarch of the Seas. The ship will sail from Port Canaveral, Florida with a destination of Coco Cay in the Bahamas. Contact Rick's spouse, Georganne N4ZUF <%20Georganne@nq4i.com> for information about the cruise.

The MARAC US Counties QSO Party <http://marac.org/cwrules.htm> has undergone a major overhaul of rules, dates, and scoring, moving to the last full weekend of July. Mobile contesting is a lot of fun and this is one of the bigger contests of its type. (Thanks, Scott KA3QLF)

If you've ever encountered gear you once owned and sold, you may agree that hamfests may have an analog in kula rings <http://www.umanitoba.ca/faculties/arts/anthropology/courses/122/module5/kula_ring.html> - a formal network of trinket exchange in the islands near Papua New Guinea. (Thanks, Mike AA1TJ)

Web Site of the Week - If you've ever Elmered a new ham, you know they ask a lot of questions, some of which aren't that easy to answer, like "Why do hams abbreviate everything?" Sometimes, even the old-timers can't answer! Luckily, there is a one-stop-shop resource on the AC6V "Jargon" web page <http://www.ac6v.com/73.htm>. I was surprised to learn the origin of the Philco company name!

WORD TO THE WISE

Mega-irks - From "The First 50 Years of University of Wisconsin Broadcasting", a listener wrote in 1969 inquiring, "...(the announcer) tells us that WHKW operates on a frequency of 89.3 mega-irks. What, if you please, is a mega-irk?" Obviously, a mega-irk is what happens when someone tries to steal your frequency above 1 MHz.

==> SIGHTS AND SOUNDS

A few days ago, a spectacular double eruption on the Sun resulted in an M1-class flare, the strongest of the year so far. Luckily for HF'ers the flare's ejected material missed Earth, so no geomagnetic storms resulted. (VHF+ ops could use the aurora!) You can watch the explosions on the Spaceweather.com <http://spaceweather.com/> highlight movie captured by SOHO and the Solar Dynamics Observatory.

Quite a jump from the A-frame lumber masts in the old Antenna Books, the tallest wooden tower <http://www.modestoradiomuseum.org/wooden%20tower.html> in the world is nearly 400 feet high! The story and a whole lot more Is available at the online site for the Modesto Radio Museum <http://www.modestoradiomuseum.org/>. (Thanks, Tim K3LR)

IBM equipment (and employment) has been a part of many hams' lives. Mike K7NT found this enjoyable video about the last 100 years at IBM <http://www.youtube.com/watch?v=39jtNUGgmd4&feature=youtu.be>, one of the world's oldest technology companies still doing business.

Lots of old-radio pictures are available around the web - take a look at the Shorpy <http://www.shorpy.com/> site and search for "wireless" or "radio". (Thanks, Brad AA1IP)

==> RESULTS AND RECORDS

Two sets of ARRL contest results <http://www.arrl.org/contest-results-articles> hit the web this week; the excellent 2010 September VHF QSO Party writeup by Jeff K1TEO and the preliminary version of the 2010 CW Sweepstakes results. (The full package, including the writeup by VE4XT will be out later around late April.) There is something very rare in the CW SS results - a TIE

between the top two Single-Op, High Power stations, N9RV and N0NI (operated by AG9A)! It looks like the coasts were not the places to win this year. The SSB SS preliminary results should be out in a couple of weeks. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

Don't forget to add your photos and stories about the Jan VHF Sweepstakes to the ARRL Soapbox page at http://www.arrl.org/contests/soapbox - some good ones are up there already! Dink N7WA also maintains a comprehensive text Soapbox page <http://www.eskimo.com/%7Emwdink/3830/> for major and minor contests, too.

The results of the 2010 CQ WPX SSB Contest <http://www.cqwpx.com/results.htm> are now available on the CQ WPX Web site. Visitors can read the results article from CQ Magazine, search through the online score database <http://www.cqwpx.com/score_db.htm> and review the public logs <http://www.cqwpx.com/publiclogs/2010ph/>. The score records have also been updated. It was another record year for WPX SSB <http://www.cqwpx.com/stats.htm> with almost 700 more logs than 2009. (Thanks, CQ WPX Director, Randy K5ZD)

With the CW weekend in the history books, the CQ WW 160 Contest <http://cq160.com/> is looking forward to the SSB weekend at the end of February. Contest Director, Andy N2NT reports that there are four new trophies this year:

SSB/CW Combined - Multioperator - World
CW Single Operator -- Russia
SSB Single Operator -- Russia
Single-Op, Assisted -- Zone 3 USA (CW)

OPERATING TIP

Good troubleshooting tips sound like good operating training tips, too!
1. Always check the simple, fragile stuff first
2. Use solid and consistent trouble-shooting techniques
3. Use the experience and knowledge of others
4. Never give up
(Thanks, Mark WD4ELG)

==> TECHNICAL TOPICS AND INFORMATION

NW7US has published a web page on "De-mystifying HF Radio Propagation and Modeling <http://hfradio.org/ace-hf/ace-hf-demystified.html>". It includes some coverage maps which may be generated using VOACAP <http://www.voacap.com/coverage.html> as explained in ARRL Propagation Forecast Bulletin ARLP003 <http://www.arrl.org/w1aw-bulletins-archive-propagation>.

Clamp-style connectors in the N and BNC families have been popular for years. Now a clamp-style UHF connector is available from RF Industries <http://tinyurl.com/4zn9ayf>. An advantage of clamp-style connectors is the ability to inspect the work before and after the

cable is fitted into the body until the center pin is crimped. Full assembly instructions <http://tinyurl.com/45gryqy> are also on-line. While more expensive than the solder-style connector, the extra waterproofing of the jacket and inspection feature might be worth it for specific projects. (Thanks, Paul W9AC)

Pete N4ZR reports finding a useful coax stripping tool for many different types of cable. "I discovered the DataShark 70029 cutter and stripper - for $9.95 it strips phone cable, Cat5-5e-6, RG6Quad, RG6, RG59, RG7 and RG11 (if the latter, then I suspect RG-213 as well). It is the perfect complement to [type-F] compression connectors because it automatically and precisely trims RG-6 family cables to fit perfectly."

Why use a butterfly variable capacitor? Originally created for push-pull amplifiers with the rotor grounded, they can be useful as a "regular" variable capacitor, too. If you do not ground the rotor and use the two stators as the two ends of the cap, the result is half the minimum capacitance (important at VHF), twice the breakdown voltage, and no poor rotor contact issues. The trade-off is that the frame can't be grounded and an insulated shaft coupling is required. (Thanks, Mike WV2ZOW)

Magnetic declination - the difference between True and Magnetic North - varies quite a bit across the US and especially Canada. This NOAA web page <http://www.ngdc.noaa.gov/geomagmodels/Declination.jsp> will figure your magnetic declination based on ZIP code or lat/long, plus the date. (Thanks, Kevin AC0H)

"Practical Sailor" is a product evaulation magazine for sailors. In 2007 they tested a comprehensive list of corrosion inhibitors and the results <http://www.tc-11.com/Marine%20Electronics%20Test.pdf> may be of interest to maritime and land-based hams. (Thanks, Jim KS4O)

Roger K8RI describes a simple way to make a template for rotator mounting bolts without using a measuring instrument. "Using thin cardboard (such as from a pad of paper) or even a plastic sheet protector, turn the rotator upside down and lay the plastic or cardboard over the base. With a ball-peen hammer, using the ball end lightly tap on the sheet over the areas where the bolt holes are located. Make sure all holes remain aligned with the sheet. Done properly this can actually develop cutouts for each bolt hole. Place the template on the work-piece, mark the bolt holes and drill. This procedure also works well for making gaskets using gasket material of the proper thickness."

Technical Web Site of the Week - Reuse is a favorite past-time (if not a full-time) activity of hams and no re-use is more fun than that staple of the workbench - a candy tin. The web site "Art of Manliness <http://artofmanliness.com/2011/01/30/22-manly-ways-to-reuse-an-altoids-tin/>" shows 22 ways to reuse the popular Altoids tin. I'm sure there must be an equivalent "Art of Womanliness" site, but maybe the female re-users just don't feel the need to show off as much! (Thanks, John AE5X)

==> CONVERSATION

When All Else Is Made to Fail

Ham radio has been making surprise media appearances here and there over the past couple of years and not just as a novelty story, either. In just the past couple of weeks, NASA asked hams to listen for the NanoSail-D solar sail (see the News section for more) and a variety of "media hits" find hams providing emergency communications and other useful services. Now there are rumors coming out of the Egyptian turmoil about using ham radio to communicate when a government decides to close off the usual information channels. (Information about use of ham radio in Egypt is unsubstantiated <http://www.pcworld.com/businesscenter/article/218338/ham_radio_not_a_viable_option_for_egypt.html>.)

I have often characterized ham radio as "the world's most powerful form of communications available to the private citizen" when asked why it is still relevant. It may not be the fastest or the most ubiquitous or have the ultimate convenience, but that is the source of its power - it must meet none of those requirements in order to survive. Let's face it - ham radio does not compete with broadband data links carrying commerce and entertainment traffic! If that was its mission, we would long ago been off the air.

We've all heard the slogan "When All Else Fails" and it has a certain truth but consider what happens when the communications outages to which we respond are intentional - when all else is made to fail. Back in the Soviet Union's fading days of glasnost, a coup attempted to restore the old government structure. While not well-known, some Russian hams passed information around the country, playing a game of electromagnetic cat-and-mouse with the would-be authorities trying to follow and jam them across the bands and modes. Months later, when the Lithuanian parliament in Vilnius was surrounded by Russian military forces, authority of the government was transferred to a minister outside the country via the ham radio club station inside the parliament building. Finally, there was the tale of the "Last Voice from Kuwait <http://9k2ra.net/?page_id=130>" as one ham kept transmitting even under occupation.

Regardless of how Amateur Radio is used in response to extraordinary circumstances, the keys to the utility of Amateur Radio are two-fold; our flexibility and our independence. Amateur Radio is the only licensed service that assigns no channels and encourages operators to use any frequency available to them. Amateur Radio also offers the ability to communicate completely independently of any other communications service or infrastructure. Amateurs may choose to channelize operations and combine their operation with other communications services if that is what most suits the need or preference, but it is critically important that we maintain our flexibility and independence for when direct point-to-point communication is the only answer.

Amateur radio is a broad hobby or service - and getting broader all the time. Yet along with all the many novel constructs that make up ham radio today, that we can make contacts unassisted and independently remains a core element of who we are and what we do. Contesting and radiosport exercise the skills that support those abilities. In our zeal to explore the game we should always remember and make room for the elemental aspects of Amateur Radio "know-how" unique to our service, fulfilling our Basis and Purpose in the most fundamental, necessary, and yes, enjoyable ways. Let us not ever take the essential "amateur" out of Amateur Radio.

73, Ward N0AX

==> CONTESTS

2 February through 15 February

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

North American Sprint--CW, from Feb 6, 0000Z to Feb 6, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name, and S/P/C. Logs due: 7 days. Rules <http://www.ncjweb.com/>

North American Sprint--Phone, from Feb 13, 0000Z to Feb 13, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name, and S/P/C. Logs due: 7 days. Rules <http://www.ncjweb.com/>

School Club Roundup--Phone,CW,Digital, from Feb 14, 1300Z to Feb 18, 2400Z. Bands (MHz): 1.8-28, 50+. Exchange: RS(T), Class, S/P/C. Logs due: 30 days. Rules <http://www.arrl.org/school-club-roundup>

NS Weekly Sprint--CW, from Feb 4, 0230Z to Feb 4, 0300Z. Bands (MHz): 1.8-14. Frequencies: Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

YLISSB QSO Party--CW, from Feb 5, 0000Z to Feb 6, 0000Z. Bands (MHz): 1.8-28. Exchange: Call sign, RS(T), ISSB number. Logs due: Mar 19. Rules <http://www.ylsystem.org/>

Ten-Ten Winter Phone QSO Party--Phone, from Feb 5, 0001Z to Feb 6, 2359Z. Bands (MHz): 28. Exchange: Call sign, name, QTH, 10-10 number. Logs due: Feb 21. Rules <http://www.ten-ten.org/>

Black Sea Cup International--Phone,CW, from Feb 5, 1200Z to Feb 6, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and org'n ID, member nr or ITU zone. Logs due: 30 days. Rules <http://www.bscc.ucoz.ru/>

EPC WW PSK Contest--Digital, from Feb 5, 1200Z to Feb 6, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: 30 days. Rules

<http://www.epcwwdx.srars.org/index.php/contest-rules.html>

Vermont QSO Party--Phone,CW,Digital, from Feb 5, 1300Z to Feb 6, 0300Z and Feb 6, 1300Z to Feb 7, 0300Z. Bands (MHz): 1.8-28. Frequencies: Multiple operating periods; CW band edge + 60 kHz; SSB 1.89, 3.89, 7.29, 14.29, 21.39, 28.39. Exchange: RS(T) and VT county or S/P/C. Logs due: 30 days. Rules <http://vtqsoparty.westriverradio.org/>

Minnesota QSO Party--Phone,CW,Digital, from Feb 5, 1400Z to Feb 5, 2400Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW 1.850,3.550,7.050,14.050,21.050,28.050; SSB 1.870,3.850,7.250,14.270,21.350,28.450. Exchange: Name and MN county or S/P/C. Logs due: Mar 15. Rules <http://www.w0aa.org/>

FYBO Winter QRP Field Day--Phone,CW, from Feb 5, 1400Z to Feb 5, 2400Z. Bands (MHz): 1.8-28. Exchange: RS(T), S/P/C, name, power, temp in deg F. Logs due: 30 days. Rules <http://www.azscqrpions.com/>

Straight Key Party--CW, from Feb 5, 1600Z to Feb 5, 1900Z. Bands (MHz): 3.5. Exchange: RST, serial, category, name, age. Logs due: Feb 28. Rules <http://www.agcw.org/en/?Contests:Happy_New_Year_Contest>

British Columbia QSO Party--Phone,CW,Digital, from Feb 5, 1600Z to Feb 6, 0800Z. Bands (MHz): 1.8-28. Frequencies: CW 1.815,3.535,7.035,14.035,21.035,28.305; SSB 1.845,3.85,7.23,14.25,21.3,28.4; Dig per band plan. Exchange: RST and BC district or S/P/Territory or DX. Logs due: Mar 31. Rules <http://www.deltaamateurradio.com/>

Delaware QSO Party--Phone,CW,Digital, from Feb 5, 1700Z to Feb 6, 2359Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW 1.825,3.55,7.05,14.05,21.05,28.05,50.95; SSB 1.86,3.96,7.26,14.26,21.36,28.36,50.135; Digital per band plan. Exchange: RS(T) and DE county or S/P/C. Logs due: 30 days. Rules <http://www.fsarc.org/>

XE Int'l RTTY Contest--Digital, from Feb 5, 1800Z to Feb 6, 1759Z. Bands (MHz): 3.5-28. Exchange: RST and XE state/district or serial. Logs due: 30 days. Rules <http://www.fmre.org.mx/>

QRP Winter Fireside SSB Sprint--Phone, from Feb 6, 2000Z to Feb 6, 2359Z. Bands (MHz): 3.5-28. Frequencies: 3.865, 7.285, 14.285, 21.385, 28.385. Exchange: RS, S/P/C, QRP ARCI number or power. Logs due: Mar 7. Rules <http://www.qrparci.org/content/view/8344/118/>

ARS Spartan Sprint--CW, from Feb 8, 0200Z to Feb 8, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

NAQCC Monthly QRP Sprint--CW, from Feb 9, 0130Z to Feb 9, 0330Z. Bands (MHz): 3.5-14. Frequencies: Monthly on 2nd Tuesday or 3rd Wednesday (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs

due: 4 days. Rules <http://naqcc.info/>

CWops Monthly Mini-CWT Test--CW, from Feb 9, 1100Z to Feb 10, 0400Z and See Web site. Bands (MHz): 3.5-14. Frequencies: Multiple operating periods, monthly on the second Wednesday, 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

PODXS Valentine Sprint--Digital, from Feb 11, 8 PM to Feb 12, 2 AM. Bands (MHz): 1.8-7. Frequencies: 1.807,3.580,7.070/7.035 EU/7.028 JA. Exchange: Name, OM or YL, S/P/C. Logs due: Mar 4. Rules <http://www.podxs070.com/pskfest>

YL-OM Contest--Phone,CW,Digital, from Feb 11, 1400Z to Feb 13, 0200Z. Bands (MHz): 1.8-28. Exchange: Call sign, RST, serial and S/P/C. Logs due: 30 days. Rules <http://www.ylrl.org/>

CQ WW RTTY WPX--Digital, from Feb 12, 0000Z to Feb 13, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Mar 1. Rules <http://www.cqwpxrtty.com/>

Asia-Pacific Sprint--CW, from Feb 12, 1100Z to Feb 12, 1300Z. Bands (MHz): 7,14. Exchange: RST, serial. Logs due: 7 days. Rules <http://jsfc.org/apsprint/aprule.txt>

Dutch PACC Contest--Phone,CW, from Feb 12, 1200Z to Feb 13, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and Dutch province or serial. Logs due: Mar 14. Rules <http://www.dutchpacc.com/>

Louisiana QSO Party--Phone,CW,Digital, from Feb 12, 1500Z to Feb 13, 0300Z. Bands (MHz): 3.5-28. DXNL 1713 - Feb 2, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

A3 - TONGA, OC-049
Akira,JA1NLX, will be active as A35AY from Fafa Island (OC-049) working
in CW and RTTY on 80m-10m (incl. WARC bands) from Feb 4-9. His QRGs are
CW: 3505, 7015, 10115, 14035, 18075, 21035, 24895, 28035 kHz
RTTY: 10140, 14085, 18110, 21085, 24920, 28085 kHz.
His equipment includes a FT-857 with 100 watts and a vertical.
QSL via JA1NLX, direct, via bureau or LoTW. For more information click:
http://www.ne.jp/asahi/ja1nlx/ham/A35_2011.html

C6 - BAHAMAS, NA-001
Randy,W6SJ, is going to hit the airwaves in "holiday style" signing
C6AWS from Grand Bahama Island (NA-001) from Feb 3-9. Randy prefers to
work in CW on the WARC bands. QSLs via bureau, direct or LoTW via W6SJ.

Drew,N2RFA, wants to show up as C6ABB from Nassau (NA-001) from
Feb 7-17. He works in the digital modes PSK31, RTTY and maybe SSTV
on 80m/40m/20m/17m. QSLs via his homecall.

D4 - CAPE VERDE, AF-086
John,IK5CRH, John,IK5BCM, Beppe,IK5CBE, and YL Andrea will be QRV as
D44TBE from Sal Island (AF-086) from Feb 2-9. They will work in CW, SSB
and digital modes on 80m-10m and if there is enough space also on 160m.
QSL direct or via bureau to IK5CRH.

FK - FRENCH NEW CALEDONIA, OC-032
After returning from Vanuatu Hermann,DL2NUD, and Stefan,DL9GRE, will
activate New Caledonia Island (OC-032) as FK/DL2NUD (2m/70cm/23cm EME)
and FK/DL9GRE (HF) from Feb 3-15. QSLs via homecalls, bureau ok.

HI - DOMINICAN REPUBLIC
Claudio,HI7/HB9OAU, will stay on Bayahibe (NA-096) from Feb 6-18.
He hopes to make a side trip also to the Catalina Islands (NA-122) and/
or to Saona. His call would be HI2/HB9OAU there. Claudio works in SSB

on 10m/15m/17m/20m/40m/80m. QSLs via bureau or direct to his homecall.

J6 - ST LUCIA, NA-108
J6/DF2SS and J6/DL1VKE will be active with two stations in CW, SSB and RTTY on 160m-10m from Feb 5-17. Their planned QTH is on a hill in the north of the island with a free skip to Europe and North America.

JW - SVALBARD, EU-026
Jon,LA8HGA, and Andreas,LA8AJA, will be QRV mostly in CW but also in RTTY and some SSB on 160m-10m signing JW8HGA (QSL via LA8HGA) and JW8AJA (QSL via LA9VDA) from the club JW5E in Longyearbyen (EU-026) from Feb 4-18. A logsearch and more information can be found at: http://la8aja.com/expeditions/jw2011

OA - PERU
Fred,OA4/DL1NL, is staying in Peru until Feb 20 and works from the clubstation OA4O in Lima sporadically. He works only in CW on 10m-160m. QSL cards should be sent via bureau to his homecall.

P29 - PAPUA NEW GUINEA, OC-034
Allan,VK2GR, and Josette,VK2FXGR, are working for the organization "Australian Doctors International" (http://www.adi.org.au) and plan to show up as P29CW from Kiunga in the Western Province (OC-034) between February and early September. Operation is planned with only little power in CW/SSB/RTTY on 80m-10m. QSL via VK2IR (also eQSL). Logs and pictures are available online at http://www.p29cw.blogspot.com

S9 - SAO TOME AND PRINCIPE, AF-023
A team of seven HAMs from Germany (DL2JRM, DM2AYO, DD2ML, DK1AX, DF1AL, DL7VEE and DM5TI) will activate Sao Tome Island (AF-023) as S9DX from Feb 4-17. They will work with at least two stations and activities are planned in CW, SSB and RTTY on 160m-10m with emphasis on the lowbands in CW and RTTY. They also plan to take part in the CQ WPX RTTY Contest. QSLs via bureau or direct via DL1RTL.
Bureau QSLs may be requested online at: http://s9dx.hkmann.de

T30 - WESTERN KIRIBATI, OC-017
Bill,N7OU, and Bob,W7YAQ, are travelling to the Pacific once more. They will visit Tarawa (OC-017) from Feb 8-22. They will work mainly in CW but also in RTTY and SSB on 160m-10m with 100 watts and verticals and plan to take part in the ARRL DX CW Contest as well. Their calls are not known yet. QSLs via bureau or direct to their homecalls.

T30HC is the call of Udo,DL9HCU, on Tarawa (OC-017) now. The length of his stay is not known. QSLs direct or via bureau to his homecall.

V5 - NAMIBIA
Several members of the "Lufthansa Amateur Radio Club" (LARC) will be active in CW, SSB, RTTY, PSK and SSTV on 160m-10m signing V55DLH from Omaruru from Feb 5-12. The team members are Georg,DD8ZX, Bernd,DF1FF, Juergen,DH0RAK, Juergen,DH6ICE, Frank,DJ3FK, Rudi,DK7PE, and Bernhard,DK7TF. QSLs direct or via bureau to Zik,DK8ZZ.

Please visit the homepage of the LARC at: http://wp.larc.ws/?page_idy

3B8 - MAURITIUS, AF-049 / 3B9 - RODRIGUES ISLAND, AF-017
Bogdan,SP2FUD, and Slavo,SP2JMB, are going to visit these islands.
They will sign 3B8/homecall on Mauritius (AF-049) from Feb 4-24 and
also as 3B9/homecall on Rodrigues Island (AF-017) from Feb 18-22. They
also plan to join the CQ WPX RTTY Contest (Feb 12/13). The activities
will take place in CW, SSB and RTTY on 80m-10m.
QSL via their homecalls, also via bureau.

5H - TANZANIA
Maurizio,IK2GZU, is working in Ilembula/Tanzania from Feb 2 until Mar 8
and radio operation can be expected in CW, SSB and RTTY on HF (most
likely not on 80m/160m). He is using a 3 ele tribander pointing towards
Europe, verticals and dipoles. QSL via IK2GZU (bureau preferred) or via
LoTW. You may request bureau QSLs via his website where you can find
also a logsearch: http://www.buffoli-pm.it
His call will be issued upon arrival.

8Q - MALEDIVES, AS-013
Andrew,G7COD, announced to show up again as 8Q7AK from Embudu Island in
the South Male atoll (AS-013) from Feb 5-18. Andrew plans to work in CW
and SSB on 80-10m during following times: 0730-0830 UTC, 0900-1030 UTC,
1300-1500 UTC and 1730-1800 UTC. His preferred frequencies are:
CW: 3503, 7003, 10103, 14003, 18073, 21003, 24893 kHz
SSB: 3795, 7063, 14190, 18133, 21253, 24953 kHz.
QSL cards should be sent via bureau or direct to his homecall.
Please visit also his homepage at: http://8q7ak.freewebspace.com

AFRICA TRIP
Laci,HA0NAR, will be QRV again from Western Africa from Feb 5-26.
During this time he will sign 6W/HA0NAR from Senegal and J5NAR from
Guinea-Bissau. Furthermore Laci intends to activate following IOTAs:
AF-078 (Senegal South Group) from Feb 5-7 and
AF-093 (Guinea-Bissau Coastal Region Group) from Feb 8-11.
While on the mainland he will focus on the lowbands (160/80/40/30m).

SOUTH PACIFIC TRIP
Bob,5B4AGN, is travelling through the South Pacific during the first
half of February and will be QRV only in CW on all bands from:
Feb 2-8: Palau (OC-009) as T88ZM
Feb 9-16: Saipan (OC-086, USI NI002S, WLOTA 1333) as KH0/G3ZEM
His operations take place from these rental shacks:
http://palau.rental-shack.com/english and
http://saipan.rental-shack.com/english
QSLs via M0URX, also via bureau.

CANADA, SPECIAL EVENT STATIONS
All HAMs in in Nova Scotia may use the prefixes CJ1 (instead of VA1)
and CK1 (instead of VE1) during February to celebrate the Canada Games
which are held in Halifax during this time.
More information about the games: http://www.canadagames2011.ca/en/home

HUNGARY, SPECIAL EVENT STATIONS
Hungary took over the EU Presidency in 2011. The special event stations
HG2011A, HG2011E, HG2011EU, HG2011I, HG2011N, HG2011O, HG2011P, HG2011R
and HG2011U are actice until Jun 30 to mark this event. All QSOs will
be confirmed via bureau automatically. They have also a special award
for free and further information can be found at: http://www.mrasz.hu

NORWAY, SPECIAL EVENT STATIONS
LA200D stands for 200 years of the city of Drammen. This station is
active in all modes and on all bands throughout the year.
QSLs via bureau or direct to LA2D.

The special event station LM11SKI is working in all modes on all bands
from the Nordic World Ski Championships in Holmenkollen/Oslo between
Feb 1 and Mar 31. For more information see: http://www.oslo2011.no/en
QSL via LA4O, bureau ok.

SILENT KEYS: Following DXers passed away during the past weeks:
W.P. "Paddy" Gunasekera, 4S7PB, ex-president of the "Radio Society of
Sri Lanka", Willy Fiallo, HI8MWF, Alberto Di Pietra, IW9FC,
Drago Grabner, E73F, (YU4VGD, T94GB), and William "Bill" Wilson, WA8YTM

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Feb 6: North American Sprint
Feb 6: February QSO Party 2011
Feb 5/6: Black Sea Cup International Contest, see: http://bscc.in

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

RAC Bulletin 2011-002E New National Affiliated Club Coordinator
Appointed; Robert Critch VE3QTH joins RAC Team.
2011-002-01

Geoff Bawden Announces The appointment of Robert Critch, VE3QTH as
National Affiliated Club Coordinator.

Robert Theo Critch VE3QTH

BIO:

Born in Montreal Quebec 1961 and lived there as a young boy. Then
moved to St. Jean, Que. Years later moved to Nova Scotia for awhile
before trekking to the Island of Newfoundland. As many young
Newfoundlanders do, he moved and settled in Toronto. But the
attraction of Barrie Ontario soon called out to him. So he packed up
the family and radio gear to land in the beautiful south-end of Lake
Simcoe in Barrie Ontario Canada that he now calls home.

Robert has had a long and outstanding carrier in Voice and Data
Communications Technology. He has worked for both large and small
organizations over the years and has run several business. His current
accomplishments include being the current President of Barrie
Amateur Radio Club Inc.(BARC), and being owner & President of a small
Telecommunications company. He is active on VHF, UHF, and HF on
several Phone and Digital modes. He is also very active in CANWARN,
ARES, and BARC activities & Club events. He holds a Basic +
license.

Robert will be joining the RAC team, taking over as RAC's National
Affiliated Club Coordinator.

" We live in a time of huge accomplishments in Science and
Technology and Radio Amateurs have been at the forefront of so many of
the advances. Amateur Radio is at it's best, when we work together. It
is my personal goal to help bring local clubs together under RAC on a
national scale, to share in their knowledge, ability and passion for
Amateur Radio."

SCOUTING: BOY SCOUTS OF AMERICA AND ARRL TEAM UP TO HELP SCOUTS LEARN
COMMUNICATIONS SKILLS

After working together for nearly a century to provide Scouts with the
ability to learn radio communication skills, Boy Scouts of America and
the ARRL have officially teamed up by signing a memorandum of
understanding. This MOU designates the ARRL as a key resource for K2BSA
and Radio Merit Badge training at the BSA National Scout Jamboree and
establishes the ARRL as the go-to source for Scouts interested in
learning about and becoming involved in radio communication.

BSA Chief Scout Executive Bob Mazzuca and ARRL President Kay
Craigie, N3KN, launched the partnership January 31 by holding a unique
communications meeting. Mazzuca joined Craigie virtually during an
Internet video conference and document-signing ceremony. From separate
locations, the pair took the opportunity to talk about the importance
of each organization to the ongoing development of the other.

"Throughout the years, going all the way back to the Wireless Merit
Badge in 1918, the ARRL has worked hand-in-hand with Boy Scouts of
America to help teach Scouts the skills and joys of radio
```

communication," said Chief Scout Executive Bob Mazzuca. "Today, we are making official a relationship that has been beneficial for both of our organizations for nearly a century." [Read more here <http://www.arrl.org/news/boy-scouts-of-america-and-arrl-team-up-to-help-scouts-learn-communications-skills>]

==> BOARD OF DIRECTORS: PRESIDENT CRAIGIE APPOINTS FORMER SM WILLIAM HUDZIK AS HUDSON DIVISION VICE DIRECTOR

After review of eligibility by the ARRL Ethics and Elections Committee, President Kay Craigie, N3KN, has appointed William W. Hudzik, W2UDT, of Gillette, New Jersey, to serve as Vice Director of the ARRL's Hudson Division for the remainder of the current term that expires January 1, 2013. Hudzik fills the vacancy created when Frank Fallon, N2FF, retired from the ARRL Board of Directors after more than 14 years of service and his Vice Director, Joyce Birmingham, KA2ANF, assumed the Director position. Read more here <http://www.arrl.org/news/former-northern-new-jersey-section-manager-appointed-hudson-division-vice-director>.

==> LEGISLATIVE MATTERS: AMATEUR RADIO BILL INTRODUCED IN THE US SENATE

On January 26, Senator Joe Lieberman (ID-CT), along with Senator Susan Collins (R-ME), introduced Senate Bill 191, The Amateur Radio Emergency

Communications Enhancement Act of 2011. Similar to HR 81 <http://www.gpo.gov/fdsys/pkg/BILLS-112hr81ih/pdf/BILLS-112hr81ih.pdf>, introduced in the US House by Representative Sheila Jackson Lee (D-TX-18) <http://www.arrl.org/news/new-amateur-radio-bill-introduced-in-congress> on January 5, the bill, if passed, would direct the Department of Homeland Security (DHS <http://www.dhs.gov/index.shtm>) to undertake a study on emergency communications. S 191 has been referred to the Committee on Homeland Security and Governmental Affairs <http://hsgac.senate.gov/public/>. Lieberman is the Chairman of the committee, while Collins is the Ranking Member. Read more here <http://www.arrl.org/news/senate-version-of-amateur-radio-legislation-introduced>.

==> ARRL FIELD DAY: 2011 FIELD DAY PACKET AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 25-26, 2011! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun.

Field Day packets are now available for download <http://www.arrl.org/files/file/Field-Day/2011/2011_FD_Packet.pdf>and include the complete rules (including a change for 2011), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press.

There is one rule change for 2011. Starting this year, all stations operating in Class A may use a free VHF station without increasing their operating category. This is designed to encourage more activity on the VHF bands, especially 6 and 2 meters, during the best sporadic-E season of the year.

We have also included in the FD packet a brief one-page flier with basic "What is Field Day" information that may be reproduced as a handout for your information table.

==> ARRL AUDIO NEWS TO RESUME FEBRUARY 10

There will be no Audio News this week. It will resume next Thursday, February 10.

==> TAKE A (VIDEO) TOUR OF W1AW

Click here <http://www.arrl.org/multimedia> to watch a video tour of W1AW, conducted by Station Manager Joe Carcia, NJ1Q. Scroll down the page until you come to VIDEO: W1AW.

==> VOTE FOR YOUR FAVORITE ARTICLE IN THE FEBRUARY ISSUE OF QST

Now's the time to cast your vote for your favorite article in the February 2011 issue of QST <http://www.arrl.org/qst/>. Just head to the Cover Plaque Award page <http://www.arrl.org/cover-plaque-poll> and click on the article of your choice. The winner of the QST Cover Plaque Award for January is Jim Koehler, VE5FP, for his article "Reflow Soldering for the Radio Amateur." Congratulations Jim!

==>
SOLAR UPDATE

Tad Cook, K7RA, reports: The past week had a single zero sunspot day, on Thursday, January 27. Activity came right back, but the average daily sunspot number for the week fell over 12 points to 20.1, and average daily solar flux declined 2.7 points to 80.8.

Predicted solar flux values for the next week are below the average for the previous seven days. Values forecast by NOAA/USAF for solar flux are 78 on February 3-8, 76 on February 9-10, then 80, 80 and 82 on February 11-13.

Predicted A index on February 3-5 is 15, 8 and 8, followed by 5 for February 6-28.

Look for more information on the ARRL website on Friday, February 4. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> THIS WEEK ON THE RADIO

This week:

- February 4 -- NCCC Sprint Ladder
- February 5 -- Minnesota QSO Party; FYBO Winter QRP Sprint; AGCW Straight Key Party

- February 5-7 -- Vermont QSO Party
- February 6 -- North American Sprint (CW)
- February 8 -- ARS Spartan Sprint
- February 9 -- NAQCC Straight Key/Bug Sprint
- February 9-10 -- CWops Mini-CWT Test

Next week:

- February 12 -- Asia-Pacific Spring Sprint
- February 12 -- FISTS Winter Sprint
- February 12-13 -- Dutch PACC Contest
- February 12-13 -- New Hampshire QSO Party
- February 12-13 -- CQ WW RTTY WPX Contest
- February 12-13 -- SARL Field Day Contest
- February 13 -- North American Sprint, SSB
- February 14-18 -- School Club Roundup

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. WIANEWS FOR WEEK COMMENCING FEB 06 2011.

Hams listening in while Yasi attacks

Uniden announces Australia's first 77 channel UHF-CB radio

CSIRO, NASA use Parkes telescope to take the pulse of the universe

BRAINWAVE CONTROL IS COMING

Twitter for ham radio

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING FEBRUARY 6 2011.

Hams listening in while Yasi attacks

Hams have been keeping in touch via HF radio and keeping a vital link alive
during the passage of one of the more fierce and expansive severe tropical
cyclones to hit the North East coast of Australia in recent times.

Severe Tropical Cyclone Yasi, named by the Regional Specialist Meteorological
Centre at Nadi, Fiji, tracked from its breeding ground east of Vanuatu to make
landfall on the Far North Queensland Coast, during late Wednesday 2nd February.

The system was so vast that it affected communities along a 900km stretch of coast from Cooktown to Mackay and 500km inland to Croydon, Richmond, Charters Towers and Clermont.

A storm surge forecast of between 3 and 5 metres along with high seas forced the evacuation of many coastal facilities such as nursing homes, caravan parks and low lying residential areas.

A massive effort during Tuesday 1st was undertaken at construction sites, business areas, government centres, tourist facilities and farms to secure everything to prevent the incidence of flying debris during the onset of hurricane force winds.

Schools in most areas affected were closed on Wednesday and Thursday, with only those not damaged by the passage of Yasi opening on Friday.

Whilst making sure that their families and houses were safe, radio amateurs within the warning area and across the country kept in touch via HF Radio with a listening watch on Queensland WICEN frequency 7075kHz and regular contact via the morning Gnarly Net on 3600kHz and the afternoon Friendly Net on 7115kHz.

This regular contact has kept the communication lines open just in case the well engineered cyclone rated commercial telecommunication networks failed. Operators also maintained operations on VHF and UHF during the phenomenal weather conditions.

A number of Radio Amateurs who are members of the Australian Defence Force have been involved with flood relief operations during the previous weeks and are now assisting with the relief effort following the passage of Severe Tropical Cyclone Yasi.

Also assisting, some 120 Queensland, Tasmanian and Victorian State Emergency Service (SES), personel have headed north to cairns to assist with Yasi recovery effort.

Radio Amateurs living in the disaster area are now picking up the pieces, getting their stations back up and running as the Cyclone Season in Northern Australia is not over until the end of April and there might be another call to action during the next few months ahead.

Townsville hams are monitoring the local repeaters 146.7MHz and 438.225MHz and will be reverting to 146.5MHz and 439MHz should those repeaters fail.

Atherton Tablelands hams are monitoring the local repeaters
146.075MHz and 439.9MHz
along with 146.5MHz and 7075kHz.

Rockhampton hams are monitoring the local repeaters 146.7MHz and 438.225MHz along with 7075kHz and 3600kHz.

Cairns hams are monitoring the local VHF repeater 146.950MHz along with the Atherton Tableland repeaters, 146.5MHz and 7075kHz

Later in this bulletin you will hear from Felix, a long time contrbiutor to both Amateur Radio Magazine and this WIA National News Broadcast, Felix, or VK4FUQ, is based in Ingham, one of the areas hit hard by "yaesu" whoops yasi.

Currently Felix is A-OK but VKR THe police in Queensland have advised of road closures in Ingham and isolation for Cardwell

Yes police wish to advise all motorists that Cardwell can not be access via road due to flooding and extensive damage caused to the roadways.

Motorists are asked to avoid this area until further notice.

All vehicles heading to Ingham are urged to delay travel or head back to areas that can facilitate their stay as there is currently no power or water in the town.

Vehicular access is restricted to local residents or those officially assisting with recovery due to flooding.

(Police Media / Commercial Radio / Gavin VK4ZZ - Townsville, North Queensland)

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Hi everyone,

Just a reminder to get yourselves registered real soon for the fabulous Annual conference up here in Darwin at the end of May.

Plan and book your travel early so you can get a good priced seat on the plane.

Mirrambeena resort is the conference venue and we have secured a great accommodation deal there specially for conference participants so don't forget to make your bookings direct with them as well, as per the information on the WIA website.

The idea is to plan and book in advance don't leave it till the last minute you could be very disappointed.

We have lots of good things planned and we would love you to come and enjoy the top end in the dry. Find out why we love this place.

The theme this year "technology for the bush" and you could probably add "the joys of living in the top end". So come on up for the weekend and stay and have a bit more of a look around at this part of Australia.

www.wia.org.au is the place to do it just follow the prompts and take a look at the program as well. Its pretty well all there.

That's it for me for now i'm spud vk8zwm

Emergency Communications Training.

Eric VK2VE says that " It appears publicity for the first NSW course have not filtered through from the WIA so for NSW participants the first course will take place over two weekends, being February 19 20 then April 9 and 10.

Please note that 100% attendance at the two weekends is a requirement for successful course completion. If you have previously expressed an interest in doing the course, you STILL need to fill in the application form on wia.org.au

Many people have not realised that the expressions of interest previously submitted were only to gauge interest and will not result in automatic inclusion or the WIA contacting them to see if they still want to participate.

You can also contact the course convenors,
Eric van de Weyer VK2VE on 0414 528 629 or
Greg James, VK2GRJ on 0418 614 813.

"Although as shown in the great Queensland floods of January 2011 little if any use is made of Ham Radio operators, our time may very well come so to quote BP.. "Be Prepared".!" (ed)

Uniden announces Australia's first 77 channel UHF-CB radio

>From waterlogged antiques to modern narrowband communicators.

Unidens Mini Compact Mobile UHF-CB series accommodates all 77 channels to be open for business in May. The band restructuring aims to reduce congestion.

Uniden's Brad Hales, said it is an exciting development for CB radio users.

The Mini Compact series features a seven colour backlit LCD and keypad to match a vehicle's dashboard light colour, as well as a flip LCD feature for optional reverse mounting. The radios can be mounted in a variety of places including the console, dashboard, cabin roof and under the seat.

(press release plus current.com.au)

IT'S A GAS

Queensland Gas Corporation (QGC) has signed a $14 million contract with Motorola Solutions to provide project infrastructure communications for the Australian gas giant.

The deal will result in QGC being provided with a microwave radio system that will link its central processing plant to its head office in Chinchilla and provide project infrastructure communications.

The contract will include the integration of a Terrestrial Trunked Radio (TETRA) radio system for its offices.

Work on the site will commence this year, with the 28-site radio network set to be comprised of more than 3000 Motorola radios operating in the 450 to 470 MHz bands during both the construction and operation phases of the project.

comuterworld.com.au

CSIRO, NASA use Parkes telescope to take the pulse of the universe

CSIRO astronomers using Parkes radio telescope are working closely with NASA to unlock one of astronomy's great enigmas - the science behind pulsars.

The project has tracked down 25 ultra fast "millisecond" pulsars in just two years, the same number discovered in the previous 20 years.

"This has been a hugely productive collaboration, and it is generating unprecedented returns for physics and astronomy," says the leader of the Parkes observations, the CSIRO's Dr Simon Johnston.

Innovation Minister, Senator Kim Carr, says the research exemplifies the sorts of international collaboration that the Australian Government is fostering across the board.

"We have a proud history of co-operation and involvement with NASA on a number of fronts, from assisting with communicating with the Apollo missions to the moon, to deep space exploration, and understanding how our universe works," says Senator Carr.

"It's all about exploring new frontiers and building Australian capacity as a research intensive and innovative nation.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to Qnews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Over the past few years the internet has become the ubiquitous contact point for the majority of people. We lost the telegram and the price of postage has just risen even although delivery times are slower in areas such as where I live. I suppose that I can't complain because I have been able to use the internet to deliver messages, DX when the bands have been dead and obtain equipment for my station as well as research many things without going to a library.

Those businesses serving the amateur radio market are very savvy to the power and speed of the internet and questions are usually very promptly answered. The down side is that the hamfest gatherings are finding it harder to attract commercial displays as the competition has sliced profit margins very low.

I have recently been gathering information on a particular item that I need to buy - but not AR related. This is a major sector of the Australian retail economy whose figures feed into the Consumer Price Index. A search of the range brings pages of results all with "contact the dealer" tags. Unlike our niche AR traders, these players ignore contact via email and telephone and they are ignoring customers.

I suppose the moral is to support your local amateur radio supplier as he is giving good service in the e-commerce world.

I'm Geoff Emery and that's what I think, how about you?

CLUBBING

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day again, this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

As you are no doubt aware a severe Category 5 Cyclone called Yasi crossed over the coast here in Far North Queensland.

As I write this item it is Wednesday the 2nd of February and we are still in the process of battening down for Yasi which is due to visit us here on the Atherton Tablelands in around 12 hours time.

Local amateurs have been preparing for this cyclone now for a few days now by dismantling antenna systems, ensuring that their emergency power and transceivers are working and of course also looking after the family home.

Some local amateurs have evacuated to safe centres. John VK4JKL, Gary VK4FD, Jeff VK4BOF, Paul VK4ZJD to name just a few.

A listening watch has been established on 7.075MHz and 3.600MHz as well as Ch.50 on 2 metres and various local repeaters.

This is a huge system with great potential to cause massive damage and by the time you hear or read this the outcomes will have been well published by the media.

I will endeavour to give a more comprehensive report next week, providing I still have a shack.

Visit the TREC website at www.treclub.org.au for further information and you can also download the latest monthly news in TREC-NEWS.

February 19 a Saturday will see the Tablelands Radio and Electronics Club's Social get-together at 1000hrs, a Show and Tell at the clubrooms, followed by a management committee meeting. Guest speaker is Howard VK4BS President of the Cairns Amateur Radio Club.

Training and Education

Congratulations to Pat Price, Angela Devine and Nicole Sweeney who all passed their Foundation Licence assessments last Saturday week the foundation training day put on by REAST in Southern Tasmania..

We look forward to hearing you all on air.

(vk7news)

VK8

News from the Darwin amateur radio club.

G'day, this is spud vk8zwm president of the Darwin Amateur Radio club with the latest club news.

The annual general meeting was held early in December.
The new committee members are
Spud vk8zwm president
Geoff vk8gp vice president
Peter vk8hpb secretary
Mike vk8xz treasurer
Station manager Richie vk8rr
Committee vk8hf John, Patrick vk8zmx and Alan vk8ab
A new public officer Ian vk8ip was also elected.

Membership remains at $25.00 and is now due. See spud or Mike to pay your dues soon.

A special general meeting will be held soon to pass necessary paperwork, so keep an eye on your e-mails and on air please.

The annual fee (Fridge emptying exercise) was held on the first meeting night of the year the 5th of January after we all had a chance to do a little recovery from the Christmas break. A good attack on the fridge and a chinwag was held.

Catch ya later

This is spud vk8zwm in Darwin hooroo.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Ham Radio used to by-pass Egypt net block

The BBC reports that fax machines, ham radio and dial-up modems are helping to avoid the net block imposed on Egypt.

Balloon flight pictures in the press

Alex Baker and Chris Rose, mechanical engineering students at the University of Sheffield, UK, attracted widespread media publicity after releasing pictures taken from their High Altitude Balloon. It reached a reported height of 37km where it took some stunning pictures of the stratosphere before landing in Cambridgeshire.

The equipment to take the pictures cost them just £350.

To track it they used a cell-phone attached to the balloon that sent back the GPS co-ordinates by text.

At the present time Amateur Radio payloads are not permitted on balloons in the UK, hence the innovative use of mobile phones.

Army CubeSat SMDC-ONE

Radio Amateurs pioneered the development of CubeSat technology and demonstrated the communication capabilities of these small satellites.

Now young US Army engineers are developing their own CubeSats at the Redstone Arsenal in Alabama.

Their first 3U CubeSat called Space and Missile Defence Command-Operational Nanosatellite Effect or SMDC-ONE for short was launched on a SpaceX Falcon 9 rocket.

This initial demonstrator mission went into a very low orbit, about 300km above the earth. During its short lifetime it proved the ability to receive text and images from a ground sensor and then to relay that data to a ground station.

An article on SMDC-ONE by Kari Hawkins is now available on the web.

Read The Redstone Rocket article Flying into orbit in small package www.theredstonerocket.com/node/216

==========

NEWS FROM ARNEWSLINE USA

ALASKA CLUB LOOSES EMCOMM TRAILER TO MOTHER NATURE

A windstorm has destroyed a mobile ham radio emergency communications trailer in Alaska. According to a posting on Q-R-Zed dot com by District Emergency Coordinator Don Bush, KL7JFT, the Matanuska Amateur Radio Association lost its vehicle in the wind storm on January 12th.

Bush says that the trailer was originally purchased with a grant from the Anchorage Amateur Radio Club along with donations received from various members and organizations in Alaska. Not having any insurance on it, Bush says that the club does not know it can replace it. He adds that this is a big "blow" for a small club that is very active in the community in helping with all kinds of events. He also says that the trailer was the only backup communications for the Borough Emergency Services if conventional communications is lost.

A fund has been set up to try to raise funds to replace the destroyed vehicle.

NEW 60 METER BLOG

Peter Ourednik, OK1RP, in the Czech Republic, now runs a blog covering the 60 meter or 5 MHz band. It features information on DX operation and related news for the band. You can read it on-line at 60mband.blogspot.com

BRAINWAVE CONTROL IS COMING

Get ready to control your, TV set, your stereo and maybe even your ham radio station with only your mind. That's what you may be able to do with brain waves if the technology developed by a company called PLX Devices proves out. No its' not science fiction as we hear in this report:

According to its website, the XWave from PXL Devices is the first consumer product priced under $100 which can sense and detect human brainwaves, interpret them and connect it to everyday technology.

PLX Devices founder and CEO is Paul Lowchareonkul. He recently told the U.K. Daily Mail that it was only a matter of time before products like the XWave entered the mainstream. Lowchareonkul says that the human brain is the most powerful, complex thing in the universe, and for the first time, we're able to harness its amazing power and connect it to everyday technology.

Lowchareonkul says that with the development of 3rd party applications or apps, the potential for innovation is limitless. At the moment, PLX is only offering apps that interact with the XWave for Apple mobile devices like the iPhone, iPad and iPod touch. There are four apps currently available that interact with the XWave. These include a basic set-up app; an app that allows you to upload your song list and sync your brainwaves with any song in your library; a "Tug of Mind" app and a meditation app. In the future, PLX says on its website that you will be able to control and float objects in video games by simply thinking about it, or train your mind to focus and relax on command.

And if you do get one and are able to develop an app to control your ham station with your brain, please be sure to let us know so that we can pass it along to what will then become a truly mew world of amateur radio.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW. In Los Angeles.

>From pictures on-line, the XWave device itself looks almost like an ordinary headset for telephone operator. The PLX website claims that XWave is perfectly safe because it only listens to brainwaves and does not transmit or send out any signals. That's a good thing for many reasons including there being no need to add more QRM to our already overcrowd bands.

More on this rather interesting device is on-line at
www.plxwave.com/info.html

REWIND - WITH COL VK4CC

Historic callsign heard again in Australia.

The callsign G2YT, Peter in the UK is quite well known on the 20m amateur bands each summer but possibly less well known is the fact that this call has a fascinating history.

In the early 1920's, the UK call 2YT was issued to the Marconi Wireless Telegraph Company for use by the Poldhu radio station in SW England. It is likely that the call was also used by Marconi whilst aboard his yacht "Electra". In 1924 2YT at Poldhu took part in test transmissions to receivers built by AWA and installed at 2FC in Willoughby, NSW.

One of the engineers working with Marconi was radio pioneer Mr Crispin (Cris) Redshaw. When Cris became silent key in 1974, one of Cris' relatives asked Peter if he would like to resurrect the old call, by this time, G2YT. It was only after having done this Peter discovered its fascinating history.

Peter is the fourth custodian of G2YT, it having been reissued twice previously.

For further information please see www.qsl.net/vk2dym/radio/Marconi.htm

New 1296 MHz mobile record

John VK3KM WIA Contest Manager let the vk7 news team know last week that there is a new 1296 MHz mobile record in VK, just under 1000 kms, in fact 933.7 km!

He has also added to the official history 2 retrospective 6 metre records

VK4DV to PA0HIP - 15,742.4 km, 15 Feb 1991

VK4DV to GJ4ICD - 16,278.0 km, 12 Oct 1989

Details of all current VHF-UHF records, and a list of all Australian records since 1947, are on the WIA web site at the web address that can be found on the email and internet editions of this broadcast.

http://www.wia.org.au/members/records/data/index.php

(vk7news)

2.4GHz VK-ZL Record

A record 2.4GHz VK ZL record was set between VK4OX and ZL1TPH 2317.1km.

Adrian made an mp3 recording - it runs for 34 minutes and can be found at the link on the email and internet editions of this broadcasts.

www.vklogger.com/docs/zl1tph_vk4ox_13cm.mp3

As Jim VK3OX told Graham " If you listen to the mp3 recording Adrian made the sigs on 2403.2MHz were peaking 5-8 and quite amazing! Later that day Adrian pushed the record out a few km more when he worked Brian, ZL1AVZ".

The highlights are at 02 mins and 40 secs into the recording where they are on 2 metres arranging to QSY to 2.403GHz when ZL1TPH/P says he has never heard a VK so strong.

At 24.43 Adrian starts TXing his callsign on CW on 2.4GHz followed by a series of dits. This ends at 26.31.

26.32 ZL1TPH/P replies on SSB on 2.403GHz.

Two way sig reports are exchanged by 27.00.

27.40, ZL1TPH comments "first crossing (from ZL) towards Australia on 2.4GHz.

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE

"BARRY"" FIRST ZS WORKED ALL STATES TRIPLE PLAY AWARD

The ARRL has awarded the first Worked All States Triple Play award to a South African Radio Amateur. Barry Murrell, ZS2EZ, is the recipient of Award number 492 issued on 7 January 2011.

The Triple Play Award requires working all 50 US States on SSB, CW and RTTY (150 contacts) with all confirmations via LoTW. Only contacts from 1 January 2009 count.

LAST CHANCE TO MAKE CONTACT WITH ZS85SARL

For the SARL Field Day on 12 to 13 February, members of the Boland Amateur Radio Club will have the SARL's birthday call sign, ZS85SARL, on the air and will offer the last opportunity to radio amateurs, who have not yet made contact with ZS85SARL, to do so.

An effort will be made to achieve a WAZS 200 via the SA QSL system under this call sign. Radio amateurs, who have not yet made contact with ZS85SARL, are thus specially invited to contact ZS85SARL during the Field Day event and to confirm the contact via the SA QSL system.

Kuwait is using the special prefix 9K50 until 28th February.

Province of Nova Scotia will use special prefixes CJ1 and CK1 all February.

St Vincent J88DR February 16 to March 14, this by Dave G3TBK.

Mauritius listen for 3B8/SP2JMB and 3B8/SP2FUD until 24th February

Until February 6th (1800hrs utc) two major cities of Kazakhstan - Astana and Almaty are hosting the 7th Asian Winter Games.

Almaty Amateur Radio League (ARL) is pioneering the initiative to celebrate the games by activation of special central stations:

* UN2011G (Game) - ARL club station in Almaty - regular callsign UN0GL
* UP2011AWG (Asian Winter Games) - club station in Astana - regular callsign UP7Z

And 8 special stations from Almaty featuring special prefix UP2011.

* UP2011AS (alpine skiing) - UN8GU, op. Andy
* UP2011BN (biathlon) - UN7QCC, op. Victor
* UP2011CS (cross-country skiing) - UN6GAE, op. Alexander
* UP2011FG (freestyle skiing) - UN8GZ, op. Vitaliy
* UP2011HB (Russian hockey, bandy)- UN6GT, op. Valeriy
* UP2011IH (ice hockey) - UN2G, op. Evgeniy
* UP2011SJ (ski jumping) - UN6QC, op. Artur
* UP2011SO (ski orienteering) - UN8GC, op. Michael

CYCLONE SEASON

Radio amateurs across the country keep in touch via HF Radio:-

This with a listening watch on Queensland WICEN frequency 7075kHz and regular contact via the morning Gnarly Net on 3600kHz, the afternoon Friendly Net on 7115kHz and the Afternoon net on 7098kHz.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

Nanotape may oust solder pads

Solder pads in IC packages could soon be made obsolete by a new nanotape material developed by the Semiconductor Research Corporation (SRC) and Stanford University.

Using a sandwich of thermally conductive carbon nanotubes between thin metal foils, the nanotape transfers heat away from chips better than solder, and it is a lightweight, flexible material that is cheaper and more compliant.

Externally, a nanotape pad looks like a conventional solder pad because both the top and bottom are metallic, but internally it harbours the superior thermal conductivity of carbon nanotubes, with heat transfer characteristics similar to those of copper.

The researchers predict that early adopters will begin using the nanotape by the end of next year, with mainstream benefits to end users starting around 2014.

IRTS Changes

The layout of the IRTS web site www.irts.ie has been updated. While the structure of the site remains broadly the same as before, we have revised some of the content.

There is no shortage of data and information about Amateur Radio on the 'Net. With this in mind, the IRTS site focuses on material of particular interest to its members and for visitors to Ireland.

The IRTS weekly news is now read on 'Dundalkfm' local community radio station on Tuesdays. This provides open access to amateur radio news for the general public. Dundalkfm broadcast on 100 MHz and stream live on the internet on www.dundalkfm.com

Also advanced plans are in place to provide a Podcast version of the IRTS weekly news. The MP3 Podcast will be available for download from the IRTS website.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

AMSAT-VK UNOFFICIAL HF Net.
2nd Sunday each month.
April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

Over the past weeks we have made reference to NanoSail-D, well according to NASA, the nanosatellite was last heard at 1354 UTC on January 21.

Telemetry indicates that the sail deployed on schedule and the satellite is now believed to be out of power, which NASA said was to be expected. NASA is now asking for visual tracking and sighting reports of NanoSail-D which is about 650 km above the Earth. According to the agency, when the nanosatellite's sail reflects off the Sun, it could be up to 10 times as bright as the planet Venus, especially when the sail descends to lower orbits.

You can track NanoSail-D on the web
http://spaceweather.com/flybys/

or on your smart phone
http://simpleflybys.com/

NASA estimates that NanoSail-D will remain in low Earth orbit (LEO) between 70 and 120 days, depending on atmospheric conditions.

(arrl)

Kletskous, is a hands-on CubeSat aimed at promoting greater involvement in satellite activity by South African Radio Amateurs.

A preliminary teleconference has been held reviewing the various options and payload. The first draft of a project plan is available on amsatsa.org.za

Project manager is Hannes Coetzee, ZS6BZP. Hannes is inviting interested ZS persons to join the team. "We are particularly looking for radio amateurs with RF design experience, antenna design experience and software writing experience.

** MMMonVHF Trophy: "Best VHF DX Expedition" of the Year 2010 **

Dear VHF-Fans and participants of the 2010ï¿½s MMMonVHF Voting,
First of all we would like to thank you very much for all of your
votes for our MMMonVHF Voting ï¿½BEST VHF Expedition of 2010ï¿½

We are very proud to count a total of 105 voters - which will be
the best result since our start 2007. During the voting period from
1st to 20th of January 2011 we counted more than 100 voters from
32 different countries which clicked more than 300 times for 52
different Expeditions, which were published on the Review Page of
www.mmmonvhf.de during past year (2010). In the EME section you was
able to vote from 18 Expedition and that got 220 votes and in the
MS section we did count 34 Expedition with 92 votes this year.

As the result of the Voting 2010 the Team of MMMonVHF
is happy to announce the following person / Teamï¿½s as winner:

Category EME:
1st Place and so ï¿½BEST VHF - EME Expedition of 2010ï¿½:
Rene, PE1L and Eltje, PA3CEE and Johan, PE9DX (as 3B8EME & PI4KST)
2nd place: Lance, W7GJ & Bob, ZL1RS (as 3D2LR & 3D2RS)
3rd place: DK2ZF (as CE0Y, CE2/DK2ZF & OH0/DK2ZF)

Category Meteorscatter:
2 times the 1st Place and so ï¿½BEST VHF MS Expeditionï¿½s of 2010ï¿½:
Teams of US8ZAL/p & EM5U - UX5UL/p - UT6UG/p - UY5UG/p
3rd place Hermann, DL2NUD (as FY/DL2NUD & SM/OH/DL2NUD...)

The complete 2010 result and lot of comments and details at:
http://www.mmmonvhf.de/trophy2010.php

*** MMMonVHF Preview: Meteor Scatter in February & March 2011 **

In February and March, Sporadic Meteors reach their annual minimum
of activity; anyway, MS-DXing is still possible in 144 MHz,
especially in the morning and over distances close to optimal.
Only minor showers hit the Earthï¿½s atmosphere in February and
March. The most significant is Capricornids-Sagittariids, a daytime
shower, capable of providing fairly good meteor rates sometimes at
the end of January ï¿½ early February. Have a look to shower
predictions for February - March 2011 at www.mmmonvhf.de/ms.php

Amateur Radio Newsline(tm) Report 1747 - February 4 2011

Amateur Radio Newsline report number 1747 with a release date of
Friday, February 4, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The mass media claims ham radio is part of
the uprising in Egypt but is it? Also ARISSAT-1 is now safely on the
International Space Station, Australian hams keep emergency channels
open for Cyclone Yasi and lots of action from the FCC. Find out the
details on Amateur Radio Newsline(tm)report number 1747 coming your way
right now. (Billboard Cart Here)

**

RADIO AND POLITICS: HAM RADIO AND THE EGYPT UPRISING

The mass media claims that ham radio has been an information channel
out of Egypt during the uprising against President Hosni Mubarak, while
others are not so sure. But the media still seems to be jumping in
without any way to confirm its stories on ham radios involvement.
Amateur Radio Newsline's Norm Seeley, KI7UP, is here with what we know
and what we can only surmise:

--

Once you spend the time to vette all these stories of ham radio
involvement in Egypt you realize not a one of them can be true.

First off, most reports are credited to unspecified hams or websites
around the world. Not one callsign or name has been attached to any
report so that it can be verified.

Second, if there were Egyptian hams on the air, it would be their
neighbor hams in Israel and the world's "Big Gun DX Super-Stations,"
rather than Joe Ham with his dipole and 100 watt transceiver hearing
them. But to date nobody has heard one word from any of the worlds
well known DX'ers or the Israeli amateur radio community. That in
itself is more than enough to make a reporter suspicious.

As we said, all reports so far have been rumors, most coming from
websites sympathetic to the Egyptian people who are demonstrating. And
some do claim that unnamed hams in their group have heard reports
transmitted in Morse code of conditions in Cairo and elsewhere. Reports
that at the time were impossible to confirm since Egyptian President
Hosni Mubarak had banned all news reporting out of that nation
including the pro-Arab Al Jazerra News Network. News reporting that

has since been partially restored.

But lets take this a step further. If you bother to look up a listing of hams licensed by the Egyptian government, the total is only about two dozen. Someone may claim a Morse message posted on a website sympathetic to the plight of the Egyptian people was delivered by ham radio, but if here are people transmitting from Egypt it's more likely to be that nations equivalent of unlicensed Freebanders than a person holding a valid SU prefix callsign. If there are stations sending reports in Morse, there is a far better chance that it's some fool in New York City, London or Paris taking advantage of the situation than a station in Cairo, Alexandria or Giza risking his or her life.

Of coarse for the moment we freely admit that this is all conjecture, but ask yourself this. If there were valid ham radio stations on the air from Cairo or anywhere in Egypt, who would be the ones hearing them? The answer as we said is the hams next door in Israel who have to be listening in because they can hear just about any signal coming out of Egypt. Also, the multi-million dollar DX and contest stations world wide can usually hear a pin drop on the other side of the world when band conditions are good. But with High Frequency band conditions in the doldrums, even for the very best of competition grade DX station installations would have little chance that any of the reported transmissions come from Egypt, if they exist at all.

For the Amateur Radio Newsline, I'm Norm Seeley, reporting what little is known from Scottsdale, Arizona.

--

One problem with ham radio is that most people who know how to use it in Egypt were probably trained by the military and may be opposed to the protests. Others may be wary of transmitting because they are worried about who might be listening.

The bottom line: It won't be until this uprising is over

that we might find out if ham radio really played any part

in the information flow out of Egypt. That is, if we ever

really do, find out.

(Various sources)

**

HAM RADIO IN SPACE: ARISSAT-1 NOW ON THE ISS

ARISSAT-1 is now safely on board the International Space Station and is being made ready for deployment.

The new ham radio bird made its trip to the I-S-S on-board a Russian Soyuz-U rocket carrying a Progress cargo vehicle that was launched from the Baikonur Cosmodrome in Kazakhstan. The Progress main cargo was

fuel, oxygen, food and other supplies for the space station. It docked with the space station at 8:39 Central Standard Time on Saturday, January 29th.

ARISSAT-1 is scheduled to be hand-launched during a spacewalk on February 16th. It features a new software defined transponder that will allow simultaneous FM, CW and BPSK transmissions on 2 meters. It also carries a traditional Mode U/V transponder that uses 70 centimeters as an uplink and 2 meters down to hams on the ground.

More information on ARISSAT-1 is available at the AMSAT North America website. It's in cyberspace at tinyurl.com/78nmh. (ANS, ARISSAT)

**

RESCUE RADIO: AUSTRALIAN HAMS READY FOR CYCLONE YASI

Australian hams have been keeping in touch via High Frequency radio and keeping a vital link alive during the passage of one of the more fierce and expansive tropical cyclones to hit the North East coast of Australia in recent times. Amateur Radio Newsline's Bruce Tennent, K6PZW, has the details:

--

Severe tropical cyclone Yasi, named by the Regional Specialist Meteorological Center at Nadi, Fiji, tracked from its breeding ground east of Vanuatu to make landfall on Australias far North Queensland Coast, during late Wednesday, February 2nd.

According to a report from Gavin Reibelt, VK4ZZ, in Townsville, North Queensland, the storm system was so vast that it affected communities along a 900 kilometer stretch of coast from Cooktown to Mackay and 500 kilometers inland to the cities of Croydon, Richmond, Charters Towers and Clermont.

A storm surge forecast of between 3 and 5 meters along with high seas forced the evacuation of many coastal facilities such as nursing homes, caravan parks and low lying residential areas.

VK4ZZ says that a massive effort on Tuesday February 1st was undertaken at construction sites, business areas, government centres, tourist facilities and farms to secure everything to prevent the incidence of flying debris during the onset of hurricane force winds.

Schools in most areas affected were closed on Wednesday and Thursday, with only those not damaged by the passage of Yasi scheduled to reopen on Friday.

VK4ZZ says that while making sure that their families and houses were safe, radio amateurs within the warning area and across the country kept in touch via HF Radio. They kept a listening watch on Queensland WICEN frequency of 7.075 MHz and regular contact via the morning Gnarly Net on 3.600 MHz and the afternoon Friendly Net on 7.115 MHz. These

regular contacts kept the communication lines open just in case the well engineered cyclone rated commercial telecommunication networks failed. Operators also maintained operations on VHF and UHF during the phenomenal weather conditions.

A number of Radio Amateurs who are members of the Australian Defense Force have been involved with flood relief operations during the previous weeks. VK4ZZ says that they are now assisting with the relief effort following the passage of tropical cyclone Yasi.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, in Los Angeles.

--

Radio Amateurs living in the disaster area are now picking up the pieces, getting their stations back up and running as the cyclone season in Northern Australia is not over until the end of April and there might be another call to action during the months ahead. (VK4ZZ)

**

RESCUED RADIO RELIC: ANTIQUE RADIO FOUND IN VK FLOOD DEBRIS

Still from down-under, Radio 4BC in Brisbane along with The Toowoomba Chronicle say that among the tones of flood debris, Lockyer Valley resident Howard Reck thinks he has stumbled across someone's family heirloom. Three days after the region was hit by floodwater, Reck found what he believed to be a World War II or Korean War antique radio, 30 kilometres downstream from Grantham.

peaking on 4BC he explained how it looked like one of those big units seen in the Mash TV show, but has a Polish name engraved at same stage on the rear of the metal cabinet. If you are the item's rightful owner, and can provide information about its special markings, contact Chronicle reporter Anthea Gleeson by e-mail to anthea (dot) Gleeson (at) thechronicle (dot) com (dot) au.

**

RESCUE RADIO: HAM RADIO VS. THE SHOWS OF 2011

--
AUDIO: CHIPPING ICE
--

That's the sound of one Amateur Radio Operator trying to clear a path on his driveway so he can head down to the local Emergency Operations Center. Hams from Texas to New England were put on alert this week as a massive winter storm swept across the country covering everything with 2 inches of ice and nearly two feet of snow. Chicago, Michigan and Northern Indiana got over 20 inches of snow in 24 hours as blizzard conditions made travel difficult. Thousands were left without power for several days as crews repaired power lines pulled down by the weight of

ice and strong winter winds.

Amateur radio operators reported bent antenna elements and high S-W-R from the thick ice coating as they began to report local storm damage to various Emergency Operations Centers.

In Chicago, hours after the snow stopped falling traffic ground to a halt. The iconic Lake Shore drive had over 200 cars, trucks and buses stuck and abandoned.

Across central Indiana and western Ohio a think layer of ice covered roads and sidewalks making travel almost impossible. Most schools and business were closed as State Emergency Management Officials asked residents to "just stay home".

By the weekend, temperatures continued to drop and most people found it impossible to chip or scrape they way clear of the think icy build up.

RESCUE RADIO: FCC TAKES ANOTHER STEP TOWARD NATIONWIDE INTEROPERABLE RADIO SYSTEM

The Federal Communications Commission has adopted a Third Report and Order and Fourth Further Notice of Proposed Rulemaking that it says will significantly advance communications interoperability for our Nation's first responders. Amateur Radio Newsline's Mark Abramovich, NT3V, is here with the details:

--

The rules adopted and those proposed in the January 25th Order and Fourth Further Notice of Proposed Rulemaking support the build out of robust, dedicated and secure mobile broadband networks specifically for rescue radio service. The FCC says that these will enable public safety

broadband users to share information, videos, photos and emails across departments and jurisdictions nationwide for day-to-day operations and during large-scale emergencies.

The Order and Fourth Further Notice of Proposed Rulemaking requires all 700 MHz public safety mobile broadband networks to use a common air interface called Long Term Evolution or LTE. This to support roaming and interoperable communications, The NPRM seeks comment on additional rules to enable nationwide interoperability.

The FCC says that its action builds on the technical requirements that state and local 700 MHz broadband waiver recipients are already subject to in the early buildout of their regional public safety broadband networks.

The Fourth Further Notice of Proposed Rulemaking seeks public comment on, among other things the architectural vision of the network; the effectiveness of open standards; interconnectivity between networks; network robustness and resiliency along with several other key points. The deadlines for public comments and reply comments on the Fourth Further Notice of Proposed Rulemaking are 45 days and 75 days, respectively, after publication in the Federal Registry.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

RESCUE RADIO: FCC SEEKS COMMENTS ON ARIEL COMMUNICATIONS ARCHITECTURES

The FCC's Public Safety and Homeland Security Bureau is seeking comment regarding the creation of low-altitude aerial telecommunications architectures. Ones that are accessible, reliable, resilient, cost-effective and secure. They also have to be systems which are capable of providing public safety and emergency response personnel the capability to communicate during the critical restoration period after a major disaster over a multitude of communications platforms. These might include High Frequency, UHF and VHF two-way radio, cellular telephones, the Internet, and satellite circuits.

Specifically being looked at are such aerial telecommunications architectures such as unmanned aerial vehicles or balloon mounted or unmounted systems. These are believed to be communications platforms that can be rapidly deployed to an area within the first few hours after major natural disasters or terrorist attacks. As such, the Public Safety and Homeland Security Bureau is seeking comment on the means of coordinating and managing such solutions before and during deployment, what public safety agencies may be involved in the

operations of such systems or those who own communications operations that may be adversely impacted by such systems.

This inquiry has been designated as PS Docket No. 11-15. Interested parties may file comments to it on or before February 28th. More details on PS Docket No. 11-15 is on line also as a downloadable Word file at tinyurl.com/4agoxg2

(FCC, CGC)

ENFORCEMENT: UNLICENSED CALIFORNIA BROADCASTER WARNED OFF THE AIR BY FCC

The Los Angeles Office of the Federal Communications Commission has issued a Notice of Unlicensed Operation to Robert Gwynne of Covina, California. This, after confirming that an unlicensed broadcast radio station on 107.9 MHz was allegedly operating from his residence.

According to the FCC, its records show that no license was issued for operation of a broadcast station at this location on 107.9 MHz in Covina, California. Based on this the regulatory agency told Gwynne in its January 12th notification that this unlicensed operation must be discontinued immediately.

The FCC also warned Gwynne that the operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal law. As such it could subject the operator of an illegal station to severe penalties, including fines, seizure of transmitting equipment and criminal sanctions including imprisonment. (FCC)

**

ENFORCEMENT: FCC CITES COMPANY OVER SALE OF CELLPHONE JAMMERS

The FCC has issued an Official Citation to DeadlyDeal.com. This based on allegations that between August 25, 2008 and January 16, 2010 the company offered for sale a cellular telephone jamming device called the Blocker.

While DeadlyDeal.com says that it no longer offers these devices to its clientel, the FCC states that even the manufacturing or importation of such units to United States shores is a direct violation of its rules. This is because jamming devices cannot be certified or authorized because the main purpose of a jamming device is to block or interfere with radio communications.

In its communication the FCC warns DeadlyDeal.com that if after receipt of the Citation that should the company violate the Communications Act or the FCC's Rules that the regulatory agency can impose monetary forfeitures of up to $16,000 for each such violation or each day of a continuing violation and up to $112,500 for any single act or failure

to act. In addition, violations of the Communications Act or the Rules can result in seizure of equipment as well as criminal sanctions, including time behind prison bars.

Deadly Deal was given 30 days following the Janyary 26th date of the Citations release to respond either through a personal interview at the closest FCC office, or by filing a written statement with the agency.

RADIO ON THE WEB: WWW.RADIOSHACKCATALOGS.COM

Want to spend some time strolling vicariously through the history of the electronics retailing? Now you can thanks to a website called RadioShackCatalogs.com.

The site contains catalogs for the company that date all the way back to 1939. Each one is animated in a way that a click of your mouse lets you turn the pages or zoom in to see that special part ofd item that evokes a memory of days gone by. The site also has the complete history of the company along with the story of how in 1963, Charles Tandy purchased Radio Shack Corporation when it was on the verge of bankruptcy for only $300,000 and built it into the mega corporation it is today.

Whether or not you are a fan of Radio Shack you will likely get a thrill of this trip back in time. You will find it at www.RadioShackCatalogs.com on the World Wide Web. (K3MSB)

NAMES IN THE NEWS: RADIO RECORD OF 2317 KM ON 2.4 GHZ ACROSS THE TASMAN SEA

A new distance record has been set between Steve Hayman, ZL1TPH, and Adrian Pollock, VK4OX. This for the first trans-Tasman Sea contact on 13 Centimeters over a path of 2317 Kilometers. That's 1439 miles on a band considered totally line of sight.

ZL1TPH lives in Orewa, New Zealand. He was running 80 to 100 watts at the feed of a 1 meter dish. VK4OX was in Bald Knob, Queensland, Australia pushing only about 20 watts to the feed of a 24 dBi Gridpack antenna about 9 meters off the ground.

Only a few years ago a contact such as this would likely not have been possible. Today's technology has made it so. (ZL4PLM via ZL2BHF)

**

NAMES IN THE NEWS: W2UDT NAMED ARRL HUDSON DIV VICE DIRECTOR

ARRL President Kay Craigie, N3KN, has appointed William Hudzik, W2UDT, of Gillette, New Jersey, to serve as Vice Director of the League's Hudson Division for the remainder of the current term that expires January 1, 2013.

Hudzik is a Senior Engineering Aide and Project Manager for Morris County, New Jersey. His wife Maryann is Morris County Superior Court judge.

Hudzik fills the vacancy created when Frank Fallon, N2FF, retired from the ARRL Board of Directors after more than 14 years of service. As reported last week, ARRL Hudson Division Vice Director, Joyce Birmingham, KA2ANF, assumed the Director position when Fallon tendered his resignation from the post. (ARRL)

NAMES IN THE NEWS: 741 QSL CARDS SO FAR TO CELEBRATE W0GFQ 100TH BIRTHDAY - MORE WANTED

And Quarter Century Wireless Association President Bob Roske, N0UF, reports that as of February 2nd, the request to have hams worldwide send 100th birthday greeting QSL cards to World Radio Labs founder Leo Meyerson, W0GFQ, has so far brought 741 responses from the amateur radio community. Meyerson who celebrates his personal centenary later this month will have this event celebrated on February 24th by QCWA Chapter 154 in West Palm Springs, California. If you have not done so already, please take a moment, write the words Happy Birthday Leo, and mail it to Leo Meyerson, W0GFQ, 19 Park Lane, Rancho Mirage, California, 92270. We are 100 percent certain that Leo will enjoy hearing from you. (N0UF)

EMERGING TECHNOLOGY: VIDEO DNA MAY PUT AN END TO MOVIE PIRACY

Video pirates beware. A new system called Video DNA may land you behind prison bars. Amateur Radio Newsline's Frank Haas, KB4T, has more:

--

Three Israeli researchers have come up with what they believe to be a sure fire way to end video piracy. Dr. Alex Bronstein working with his twin brother Michael and Israeli researcher Proffessor Ron Kimmel, has developed a way of treating video footage like DNA.

Dr. Bronstein who is with of Tel Aviv University's Department of Electrical Engineering says that it is not only members of the animal and plant kingdom that can have DNA. He says if a DNA test can identify

and catch criminals, his group believes that a similar code might be applicable to video. Then if the code were copied and changed, it would be obvious to law enforcement.

As video does not have a real genetic code like members of the animal kingdom, Dr. Bronstein and his team created a DNA equivalent that can be applied to video files. The result is a unique DNA fingerprint for each individual movie anywhere on the planet. When scenes are altered, colors changed, or film is bootlegged on a camera at the movie theatre, the film can be tracked and traced on the Internet. And says Dr. Bronstein, like the films, the video thieves themselves can be tracked and caught.

I'm Frank Haas, KB4T.

--

If the entertainment industry adopts this new video DNA codeing, it could mean that a lot of video pirate could eventually be looking at the world from the other side of prison bars. (adapted from Science Daily)

**

EMERGING TECHNOLOGY: SMARTER ID TAGS THAT USE LESS ENERGY

Researcher Bjorn Nilsson's research has developed a system that makes RFID tagging technology even more effective and more energy efficient. Nillson has come up with a new protocol or rules for communication between readers and tags that use less energy and permit reader unit batteries last longer. This means that it is now possible to produce simpler and cheaper tags.

Today's active tags have been relatively limited since they have been energy-consuming and expensive to produce. There has long been a demand for more energy efficient tags with a longer lifespan. There's also the quirk that if multiple tags pass a reader at the same time, it might be that all tags are not read. But with Nilsson's protocol tags cannot interrupt one another leading to greater accuracy.

The next step is to develop an active tag with a single circuit and Nilsson is already working on this. Together with his colleague Emil Nilsson at Halmstad University, he is running a project where Bj"rn's job is to see to it that readers and tags communicate with each other, while Emil is developing the electronics to make it all more efficient.

RFID tags are found on numerous items in a great number of different areas where someone wants to trace, identify, and store information. Its believed that industries such as logistics, transportation, and animal husbandry can be made considerably more efficient with the aid of Nillsson's more modern tags. (VHF Reflector, KB9TVD)

**

EMERGING TECHNOLOGY: THE VALUE OF SCIENCE IN THE PUBLIC RYE

Still with emerging technology, most US citizens value the nation's scientific achievements, but unlike most scientists, they often pick and choose which scientific findings they agree with. This, according to a recent survey conducted by the famed Pew Research Center.

The center conducted the wide-ranging telephone survey in collaboration with the American Association for the Advancement of Science. The research included responses from 2,533 scientists in the American Association for the Advancement of Science, and 2,001 public respondents.

Among the findings it was noted that while nearly 9 out of 10 scientists accept the idea of evolution by natural selection, only a third of the public does. And while 84 percent of scientists say the Earth is getting warmer because of human activity, less than half of the public agrees with that. Also, although 27 percent of Americans said scientific advances are the nation's greatest achievement, that was down from 47 percent in the group's May 1999 survey.

According to the survey, most scientists and the public agree it is appropriate for scientists to take part in political debate over issues such as stem cell research. And even Americans who disagree with scientific conclusions think highly of scientists. (Adapted from Science OnLine)

RADIO IN SPACE: THE NEW LONG WAVELEGNTH ARRAY

Whats being termed as an innovative new radio telescope array is now under construction in central New Mexico. One that will eventually harness the power of more than 13,000 antennas and provide a fresh eye to the sky.

This antenna farm will form what is being called the Long Wavelength Array. This is a radio telescope designed to survey the sky from horizon to horizon over a wide range of frequencies in the High Frequency spectrum from 20 to 80 MHz.

The first station in the Long Wavelength Array, with 256 antennas, is scheduled to start surveying the sky by this summer. When complete, the entire system will consist of 53 station locations, with a total of 13,000 antennas strategically placed in an area nearly 248 miles in diameter.

The overall receiving system is expected to provide sensitive, high-resolution images of a region of the sky hundreds of times larger than that of a full moon. Investigators believe that these images could reveal radio signals coming from planets outside our solar system, and thus would turn out to be a new way to detect these worlds. In addition to planets, the telescope will hopefully reveal a host of other cosmic phenomena.

The University of New Mexico is the lead researcher in this project,. NASA's Jet Propulsion Laboratory in Pasadena, California is providing the advanced digital electronic systems, which represent a major component of the observatory. (Adapted from Space Daily)

**

ON THE AIR: W4H CELEBRATES THE 6th ANNUAL GREAT HAMFEST OF THE NORTH

On the air, members of the Caribbean Amateur Radio Group have activated the special event call W4H and will be on the air with it through February 11th. This, as part of the 6th Great Hamfest of the North, which was to be held on Sunday, February 6th at the Coliseum of the city of Hatillo, Puerto Rico. Modes being used are RTTY, PSK31 and SSTV. QSL information is on line at QRZ.com (WP3GW}

**

DX

In DX, KA1YMX stroke 8 P will be active from Barbados while on vacation between February 26th and March 5th. His operation will be on CW and SSB using an Elecraft K 2. No other details are available. QSL via his home callsign.

G3RWF will be active as 5X1NH from Fort Portal in western Uganda between February 20th and April 14th. He prefers to operate CW but plans to also be on the Digital modes with some SSB on all bands except 160 meters QSL via his home callsign or electronically using Logbook of the World.

Finally, PE1KL and PA2LS will be operational as 9G5LK near the village of Ampenyi, Ghana between April 28th and May 6th. Their activity will be on 80 through 10 meters using SSB, PSK31 and RTTY. QSL via PA2LS.

(Above from various DX news sources)

THAT FINAL ITEM: SPAM BROADBAND MESSAGE BLOWS UP SUICIDE TERRORIST

And finally this week, proof positive that spam e-mail to a cellular telephone can be deadly. This is especially true if you happen to be a negligent terrorist with little knowledge of radio. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in our Newsroom with the rather bizarre details:

--

What Russia's security calls a "Black Widow" suicide bomber who was apparently planning a terrorist attack in central Moscow on New Year's Eve was killed before she could blow herself up. This after an unexpected text message set off her bomb too early. The unnamed woman is thought to have been part of the same group that recently struck Moscow's Domodedovo airport. She apparently intended to detonate a suicide belt in a busy area near Red Square on New Year's Eve in an

attack that could have killed hundreds. But security sources believe a spam message from her mobile phone operator wishing her a happy new year received just hours before the planned attack triggered her suicide belt, killing her but nobody else. According to the UK newspaper the Telegraph, the woman was at her Moscow safe house at the time getting ready with two accomplices. Both of them survived and were seen fleeing the scene. The newspaper says that Islamist terrorists in Russia often use cheap unused wireless mobile phones as detonators. The phones are usually kept switched off until the very last minute. But in this case, Russian security sources believe the terrorists were negligent and left this one turned on. That carelessness on the terror group's part likely saved many, many innocent lives.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.
--
According to the newspaper, Russian security sources believe the new year's eve bomber and the airport bombers may have been members of a suicide squad trained in al-Qaeda strongholds in Pakistan and sent to the Russian capital last December to target the city's transportation system. (UK Telegraph)

GB2RS NEWS

Sunday 6th February 2011

The news headlines:

Kuwaiti amateurs to use special prefix

Medium wave tests from the US

Canada Games special prefix

Look for amateur radio operators in Kuwait using the special prefix 9K50 until 28 February. Activity is to celebrate the 50th anniversary of Kuwait's independence. Also, 9K50NLD will be on the air between 24 and 28 February. Activity will be from the members of the Kuwait Amateur Radio Society.

If you are an SWL or an amateur with a good medium wave receiver, on Saturday 12 February at 0700 and 0800UTC, radio station KHMO on 1070kHz in Missouri will conduct a DX test for SWLs worldwide. The test will be with Morse code, sweep tones and voice announcements. Transmissions will be made for five minutes at 0700 at 5kW into the station's three-tower, day antenna pattern. At 0800 they will transit the same material at 1kW using the six-tower, night time pattern. Then from 0900 to 1000UTC, WLIQ on 1530kHz in Illinois will conduct a DX test of its own. WLIQ will test for twenty minutes using Morse code, sweep tones, voice announcement, special music, sound bites and the like at its 1.4kW, non-directional, day power. Then WLIQ will test for twenty minutes at 290W non-directional, critical hours power. Finally, for the last twenty minutes of the hour, they will test at 3W, non-directional, night power. If you would like to receive a QSL you can send a written report, or a cassette or CD to the Chief Engineer of these stations by following the rules and sending reports to Gary Glaenzer, c/o the name of the station whose DX test your are reporting, 325 East Douglas Avenue, Jacksonville, Illinois 62650. For more information, type KHMO February DX tests into your favourite search engine.

Amateur radio operators in the Province of Nova Scotia will be permitted to use special prefixes CJ1 and CK1 throughout the month of February to celebrate the 2011 Canada Games to be held in Halifax. VA1 stations will be allowed to use the special prefix CJ1, while VE1 stations will use the special prefix CK1.

The BBC has confirmed plans to close five of its 32 World Service language services. The Macedonian, Albanian and Serbian services will be

axed, as will English for the Caribbean and Portuguese for Africa. The World Service will also cease short wave transmission of six more services in March 2011, these will be Hindi, Indonesian, Kyrgyz, Nepali, Swahili and the Great Lakes service for Rwanda and Burundi.

The T32C Five Star DXers Association DXpedition to Kiritimati in the Northern Line Islands between 28 September and 26 October has announced the winner of the sponsored young operator position with the team. Michael Zurch, DG1CMZ is an experienced contest and DXpedition operator and is currently working towards a PhD at the University of Jena.

Amateur radio repeaters GB3NL and GB3LV, both located in north London, have been returned to service after a brief outage. The two repeaters, which are co-sited at Enfield Civic Centre, had been off air following a power outage in Enfield. IRLP node 5600 and Echolink node 155403, which both operate via GB3LV on 70cm, are also working again.

Following a successful launch on 28 January, the ARISSat-1 satellite has arrived at the International Space Station. Due to the newly announced launch date of shuttle flight STS-133, the space walk to deploy ARISSat-1 has been moved up to 16 February. The satellite contains a software defined transponder that will provide a 70cm up, 2m down service plus a range of telemetry, FM, CW and BPSK transmissions. Details of the mission are at www.arissat1.org.

As part of the Midland Amateur Radio Society's 80th anniversary celebration, an award is being issued to amateurs who work/hear a certain number of MARS members during 2011. Full details on QRZ.COM under GX3MAR.

And now for the details of rallies and events for the coming week

The 26th Canvey Radio & Electronics Rally will take place today, 6 February, at The Paddocks, Long Road, Canvey Island, Essex SS8 0JA. This is at the southern end of the A130. There is free car parking and the doors open at 10.30. Admission to the rally is ?2 and refreshments will be available. More details from Dave, G4UVJ, on 01268 697 978 in the evenings.

Also today, 6 February, the Radio-Active Rally will be held in the Civic Hall, Nantwich, Cheshire CW5 5DG. Doors open at 10.30am and there will be a Bring & Buy. More details from Simon Chettle G8ATB, on 01270 841506.

or for any other information contact Hugh Kernohan, GI0JEV, on 0282 587 1481.

The Harwell Radio and Electronics Rally will take place on 13 February at Didcot Leisure Centre, Mereland Road, Didcot OX11 8AY. Talk in will be on S22 and car parking is free. Entrance is ?2.50 and accompanied under 12s are free. Doors open at 10.30am and there will be trade stands, special interest groups and refreshments available. Details from Ann, G8NVI on 01235 816379.

The Northern Cross Rally returns to its former home at Thornes Park Sports Centre, Horbury Road, Wakefield, WF2 8TY on Sunday 13 February. There is plenty of parking, an RSGB Bookstall and all the usual traders. There will also be several club and group stands. Refreshments are available on site at reasonable prices and admission is ?3. Doors open at 10.30am with disabled access from 10.15. Bring & Buy Booking In is also from 1015. More information from www.northerncrossrally.org or contact Ken Quinn, 2E0SSQ on 07 900 563 117.

Now for the news of special events

GB1OOD, Golf Bravo 1 Oscar Oscar Delta, has been issued as a special event callsign by Ofcom for all of 2011. It will be used throughout the year to celebrate the 100 years of the Derby Wireless Club, the oldest continually active local wireless club, now incorporated within Derby and District Amateur Radio Society. Until 25 March the station will be operating from the Silk Mill Museum located in the City Centre of Derby alongside the River Derwent. The station will have restricted operation due to the museums opening hours and so will be on the air mostly at weekends. QSL information as on QRZ.Com.

North Cork Radio Group will be active using the call EI1NC/P on 19 and 20 February from the Blackrock Castle Observatory. Operations will be from 1000 to 1700UTC both days. The venue is a 16th century castle, located 4km from the heart of Cork city on the banks of the river Lee. The Castle has seen many uses in its long history and now houses an observatory.

And now the HF DX news compiled from 425 DX News and other sources

IK1PMR and PA3LEO are now operational portable EA8 from the Canary Islands. They will be there until 8 March but their activity on the air will be holiday style on 160 through 6 meters. QSL via PA3LEO or Logbook of the World.

Andrew, G7COD, a member of the Yorkshire Dales Contest Group will be operational every day from Embudu Island in Kaafu Atoll the Maldives, which is IOTA AS-013, using the call 8Q7AK until 18 February. He will be using SSB and CW on the 80 to 10 metre bands including WARC frequencies. For comprehensive details of operating times, suggested frequencies and QSL information etc, please check 8Q7AK on QRZ.COM and www.8q7ak.freewebspace.com.

Look for 3B8/SP2JMB and 3B8/SP2FUD from the Island of Mauritius until 24 February. They will be operational using CW, SSB and RTTY. From 18 to 22 February they plan to do a side trip to Rodrigues Island, which is IOTA AF-017, where the prefix in their calls will change to 3B9.

During a holiday in the Dominican Republic, Claudio, HB9OAU plans to operate as HI7/ HB9OAU until 18 February. If he can manage one-day trips to some of the offshore islands he will put on HI2/HB9OAU from IOTA NA-122.

Now the contest news

The 70cm AFS contest takes place today, Sunday 6 February, between 0900 and 1300UTC. During the first decade of the 2000s this contest generally attracted about 30 entries per year, but in 2010 participation surged to 63. Now that it is the final match in the new Super League series, it will be interesting to discover what effect that has on participation. Using all modes, the exchange is signal report, serial number and locator.

February is the second month of the 2011 80m Club Championship series. As is traditional, the mode sequence is rotated each month, so this month we have SSB on the 7th between 2000 and 2130UTC. The exchange is signal report and serial number.

The 432MHz UK Activity Contest takes place on 8 February from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

The First 1.8MHz Contest takes place for four hours on the evening of the 12th between 2100 and 0100UTC on the 13th. This used to be a CW-only event, but it now contains CW, SSB and mixed mode sections. Exchange a signal report, serial number and District code, which are the first two letters of your postcode. Postcodes that begin with a single letter, for example S for Sheffield are padded out to two letters. A full list of District codes can be found in the RSGB Yearbook or on the Contest Committee website.

Over the full 48 hours of the weekend of 12-13th the CQWW WPX RTTY contest will keep the data portions of the bands busy. Exchange a signal report and serial number. Multi-two and multi-multi entrants use separate serial number sequences per band, while all others use just the one. In parallel with it the CW and SSB portions of the bands will also be busy, because the PACC (VERON) contest takes place for 24 hours. Send a signal report and serial number, but expect to receive a report and a 2-letter Province code from Dutch stations.

And now the solar factual data for the period from the 24th to the 30th of January, compiled by Neil Clarke, G0CAS on the 31st of January.

The latest smoothed monthly sunspot numbers are available and for April, May and June 2010 are 14, 15.5 and 16.4 respectively.

This week, solar activity increased to moderate levels when a rather unexpected M1 solar flare took place on the 28th. A sunspot group that produced a C1 solar flare on the 24th rotated out of view on the 28th, in the process it produced the first M class solar flare since the 6th of November last year. In total, five C class solar flares took place during the period. Solar flux levels remained almost stationary at 81 units every day except for the 26th, which only declined one unit, and the 30th when it increased to 83. The 90 day solar flux average on the 30th was yet again at 84 units. X-ray flux levels showed little variation day to day and averaged A6.6 units. Geomagnetic activity was very quiet every day, the highest daily figure was only Ap 4 units. The average was Ap 3 units. So far in January, up to the 30th, there was

only one day when the Ap index was in double figures, that was the 7th with an Ap index of 11 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 410 kilometres per second on the 24th to a very slow 270 kilometres per second by the 30th. Particle densities were low except for a brief increase to 17 particles per cubic centimetre on the 25th and another brief increase to 15 particles per cubic centimetre on the 28th. As a result of a quiet magnetic field Bz showed only modest variations of no more than minus and plus 6 nanoTeslas throughout the period.

And now the solar forecast. This week solar activity is expected to be at very low levels. There is a chance however that activity could increase to low on the odd day. Solar flux levels should be around the 80 mark or slightly above for most of the week. Geomagnetic activity is expected to be quiet every day. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to the west coast of North America and California should have a maximum usable frequency with a 50 per cent success rate of around 17MHz. The optimum working frequency with a 90 per cent success rate will be about 13MHz. The best time to try this path will be between 1600 and 1800 hours. This is a difficult path to work with the path getting close to the polar region and subject to attenuation. You may find that the path does not open at all on some days.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

123. SARL NEWS - SUNDAY 6 FEBRUARY 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-02-05 20:00:16 UTC
From: website@sarl.org.za
Message-ID: <20110205200007.0FCE833C4E@panix2.panix.com>
Source record: 4813
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 6 FEBRUARY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

SARL MEMBERSHIP REACHED 1 500

WHY SHOULD YOU JOIN THE SARL?

LEARNING TO PROGRAM IN WINDOWS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SARL MEMBERSHIP REACHED 1 500

The SARL membership reached 1 500 during the past week, the highest number it has been for many years. Welcome to all the new and rejoining members.

The lucky winners of the joining competition which ran over the Christmas period and ended on 15 January 2011 are Lucas Holtzhausen ,ZR6LH, and Stephen Waries, ZS1BSW. Congratulations. Both are the lucky winners of a 2011/2012 SARL Membership.

WHY SHOULD YOU JOIN THE SARL?

There are still many radio amateurs in South Africa who are outsiders looking in, expecting the same access to services and information as members. As one person wrote on the SARL forum this week and we quote a shortened version of what he wrote "Some of info costs money, rands and cents, mostly rands. Some non-members prefer to be non SARL members. It is their own free choice. But some of these non-members demand certain services from SARL without contributing towards the cost of these services. They demand it for free."

And that is the point of joining the SARL. For example, from membership dues the SARL pays affiliation fees to the International Radio Union supporting the efforts the IARU makes at the ITU level. It is through the collaborative efforts that we today have the 10, 18 and 24 MHz allocations and more recently the expansion of 40 metres. These efforts cost money, people have to travel to attend ITU meetings, lobby regional telecommunication organisations and attend ITU world radio conferences. It does not come for nothing.

The WRC-12 Conference Preparatory Meeting (PM) will open in Geneva in slightly more than a week. Duration will be 2 weeks. Amateur radio will be represented. The IARU will be following not only Agenda Item 1.23 (500 kHz) but also several others, which might pose a threat to our bands. The IARU delegation will also be watching the development of the draft agenda for the next WRC in 2015 or 2016.

Joining the SARL is little to pay for what is done locally and internationally to make amateur radio prosper.

This year the SARL, for the first time since the formation of the IARU in 1925, will be hosting the Region 1 triennial conference in August. Delegates representing more than 90 national societies will be in South Africa to discuss strategies to keep Amateur Radio the most exciting of all scientific hobbies. In addition the IARU Administrative Council will also meet in South Africa immediately after the Regional conference.

So if you are serious about amateur radio, join the SARL. It is now the time. Visit www.sarl.org.za to get application forms and information or call Mariska at 011 675-2393 on Monday,

LEARNING TO PROGRAM IN WINDOWS

The next course the SARL is presenting is "Learning to program in Windows. Produce your own applications in Windows to run peripherals from a USB port. The course includes a USB interface that will switch relays and read push buttons and voltages. The course will be presented by John Willescroft, ZS6EF. The first course will in Cape Town on Saturday 19 March 2011. John will teach you how to design your own shack control program with stand-alone applications. Your very own EXE files.

Registration is R350 for members and R500 for non-SARL members. Bookings are now open, so visit www.sarl.org.za , select RTA and follow the links.

GAUTENG PIC COURSE A GREAT SUCCESS

The course on learning to programme micro controllers, held at the NARC last Saturday, was a great success with very positive comments received from participants both from radio amateurs and delegates from industry.

The next PIC course will be held in Cape Town on 16 July. Unfortunately there are no further PIC courses on the schedule for 2011.

The SA Amateur Radio Development Trust has the ARRL book "PIC programming for beginners in stock. It comes with a CD containing MPLab IDE software, device documentation, video files and exercise program files. It is available by mail order at www.amateurradio.org.za, select books and follow the links.

TECHNOBYTE TODAY IS ON SELECTING THE RIGHT HEAT SINK

In Amateur Radio Today, John Willescroft, ZS6EF, will discuss how to decide on what heat sink is required for your project. Also in the programme is an interview about the SKA with Dr Bernie Fanaroff.

ANOTHER CHANCE TO ENTER THE SPACE WEEK ESSAY COMPETITION

On request from the Gauteng Department of Education the entry date for the Space Week essay competition has been extended to 31 March. The main reason is that because of the disruption in education during the second half of last year, learners had to focus on catching up on their studies, which left them very little opportunity to devote time to researching the subject and write an essay. The subject for the Essay is "If you were an astronaut on the international space station, what experiment would you like to carry out and why?" Full details on www.amsatsa.org.za.

CONTEST NEWS

The committee received 12 logs from four radio clubs for the first SARL 80 metre Club contest. The results are:

1st West Rand ARC, 152 points from 9 logs 2nd Antique Wireless Association, 46 points from 4 logs 3rd Port Elizabeth ARS, 17 points from 1 log 4th Sandton ARC, 9 points from 1 log

The SARL National Field Day will be run next weekend, 12 and 13 February with phone, CW and digital activity on 160 to 10 metres. The complete rules can be found in the 2011 SARL Contest Manual. The rules have changed, thus it is important the rules are read before the contest starts.

CLUB NEWS

The Overberg Amateur Radio Club will be operating a field station on 12 February on the farm Lochinvar just outside of Stanford. They will also be holding their AGM at the same QTH at 10:00. That evening the Loch Rock party will also take place, so it seems it is going to be a fun week end. Visitors are welcome. Contact ZS1AZ by email to andre@zs1az.co.za for more details.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1 150 is decaying with no substitute at the moment visible. The effective sunspot number is expected to be less than 15 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be fair towards Europe on 15 m, later to be followed by fair 20 m openings. 15 m contacts with the USA are possible during the evenings. Contacts with Australia are possible on 20 m at sunrise. 15 and especially 20 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the workhorse for contacts around the country with 20 and 30-m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

5-6 February - CW Activity day of the Antique Wireless Society. 12-13 February - SARL National Field Day and ZS85SARL on the air for the last time from Saturday 12:00 CAT to Sunday 12:00 CAT. 12 February - Overberg Amateur Radio Club field station and AGM on Lochinvar near Stanford. 21 February - Logs for the SARL field day to be in to the Bloemfontein ARC 25 February - Logs for AWA CW Activity day to be in to Andy, ZSADY. 28 February - Offers to host a station at Sun City during IARU Region 1 conference to be in to iaru2011@sarl.org.za. 25 March - SAiSAT briefing session at the NARC. 31 March - Entries for the Space Week Essay Competition to be in.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

Please think of the environment before printing this e-mail
****

>From The Business Manager ZL2DL
Debby says...
Happy new year everyone. Sorry I missed the first issue of the year, but I was away on holiday in the deep South!

Break In will be in your letterboxes within the next few days. In this issue are your voting papers for President, and those in the Northern region will receive an additional vote for their Council delegation. Anyone who has moved to this area, but has chosen to keep their branch affiliation elsewhere will not receive a voting form for Council, only a Presidential one.

Under no circumstances can the prepaid envelope be used to forward subscription payments, either for this year or in the future. Once the elections have closed, any envelopes addressed to the 'Returning Officer'

will be disposed of unopened.

I would also ask that you do not contact me to find out my views on who to vote for. I feel that you as members know what you want/need for your Association, therefore my opinions are purely that and should not be considered important in this election process.

Council is holding a face to face one day meeting on the 19th February at Wellington airport. The last date for any papers to be included in their discussions is the 8th February. This gives me time to prepare the agenda and post to all Councilors.

Below in this issue of HQ Info-line, is a special message from the newly appointed Marketing Officer, David Searle ZL3DWS. (see I Need Your Help. NZART Needs Your Help. Now!) From time to time, I receive requests from branches asking for any promotional material NZART may hold in regard to promoting amateur radio. Sadly there has been a big lack of anything really usable over the past 10 years. We do have the special brochure, which was updated in November last year, however there is absolutely nothing else. I would suggest everyone get behind David and see what ideas can be thought up...no idea is stupid.

Lastly if you do not receive your Break In, within the next two weeks, before contacting me, please make sure if you think you have sent payment, that his has been presented at your bank. If you do need to notify me of a payment, please advise the date and method of payment to help me reduce time in searching through bank statements.

Talk soon...Debby ZL2DL

NZART Publicity & Marketing Officer Appointed - David ZL3DWS
FROM: President Roy ZL2KH
Re your appointment as Marketing and Publicity Officer for NZART:
Council was so pleased with your application that they decided to appoint you at once - rather than wait for a council meeting.
You are therefore apponted effective immediately. Thanks very much for your most generous offer.

REPLY: From David ZL3DWS

Dear Roy and Councillors,

Iï¿½m indeed thankful to be here and to have some skills and resources to promote and celebrate the great hobby that has served us all so well over the years.

The task of encouraging everyone to become a ham is a big one. However as a team, together, we should be able to start making a difference.

One step at a time.

I look forward to reading NZARTï¿½s Marketing Plan and building on it, with lots of Council input, shortly.

In the meantime, I would welcome informal suggestions or ideas now via email or phone. This is so the best can be researched, given thought and included in a plan that WILL work.

As we visit branches, read the amateur/electronics press and talk to colleagues, weï¿½ll all see/hear ideas that should WORK for us.

Then, please tell me. Together, weï¿½ll build something good that lasts.

Thanks and all the best for 2011,

73ï¿½s,
David ZL3DWS

****

FMTAG Notes For February 2011
At its February 2011 meeting, NZART Council approved the following FMTAG Notes.

TOPO50 Map Series - Useful URLs
The MED has been using the TOPO50 map series, to define station locations for radio licensing purposes, for more than six months. Several members have asked for more information on this map series. The most informative websites, which include additional links, are:
http://www.linz.govt.nz/topography/topo-maps/topo50/index.aspx
http://www.linz.govt.nz/topography/topo-maps/topo50/sheets/index.aspx

Proposals
None this month.

Final Recommendations to NZART Council
Published in HQ Infoline and on the NZART website, inviting comments from members. No comments have been received.

1.. Branch 39 Tauranga has applied to link to Shaw Road 7175 and 855, from Minden 680, located at Topo50 map reference BD36 691.76 217.82. The link transmit frequency will be 433.550 MHz and the link receive frequency will be 438.550 MHz. An Engineering Evaluation shows that there will be no interference to other stations.

2.. Branch 46 Wairarapa has applied to change the frequency of its National System UHF Link Station at Pariwhariki Trig, Topo50 map reference BP35 288.84 459.75. The new transmit frequency will be 434.975 MHz and the receive frequency will be 439.975 MHz. An Engineering Evaluation shows that there will be no interference to other stations.

3.. Branch 53 Te Puke has applied to increase the power of its 7175 repeater located at Shaw Road, Topo50 map reference BE37 870.20 014.96. An Engineering Evaluation shows that the repeater transmit frequency can remain on 147.175 MHz and the repeater receive frequency on 147.775 MHz, and that there will be no interference to other stations.

4.. Branch 53 Te Puke has applied to increase the power of its 855 repeater located at Shaw Road, Topo50 map reference BE37 870.20 014.96. An Engineering Evaluation shows that the repeater transmit frequency can remain on 438.550 MHz and the repeater receive frequency on 433.550 MHz, and that there will be no interference to other stations.

5.. Branch 53 Te Puke has applied to up-link to Takaurunga 540 from its BBS at Totara Street, Topo50 map reference BD37 809.83 218.01. The link transmit frequency will be 144.800 MHz and the link receive frequency will be 145.400 MHz. An Engineering Evaluation shows that there will be no interference to other stations.

6.. Branch 66 Auckland VHF Group has applied for a Spectrum Licence on TV Channel 39 for its Nihotupu ATV repeater, to replace its previous Radio Licence, cancelled by the MED as part of the Digital Switch-Over process. The location is Nihotupu, Topo50 map reference BA31 401.84 114.69. All of the engineering parameters are unchanged from those of the cancelled licence.

7.. Branch 74 Wellington VHF Group has applied for a Spectrum Licence on TV Channel 39 for its Belmont ATV repeater, to replace its previous Radio Licence, cancelled by the MED as part of the Digital Switch-Over process. The location is Belmont, Topo50 map reference BQ32 568.79 398.86. All of the engineering parameters are unchanged from those of the cancelled licence.

8.. The Radio Electronics Group has applied to move its 2-metre repeater to Peacockes Road, Topo50 map reference BD33 030.88 129.32. We have selected a repeater transmit frequency of 147.125 MHz and a repeater receive frequency of 147.725 MHz. An Engineering Evaluation shows that there will be no interference to other stations.

9.. The Radio Electronics Group has applied to move its 70-centimetre repeater to Peacockes Road, Topo50 map reference BD33 030.88 129.32. We have selected a repeater transmit frequency of 438.875 MHz and a repeater receive frequency of 433.875 MHz. An Engineering Evaluation shows that there will be no interference to other stations.

Comments and Applications
Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to:
fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:
http://www.nzart.org.nz/nzart/fmtag/

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

END

****

I Need Your Help.
NZART Needs Your Help.
Now!
Last month I was appointed Marketing and Public Relations Officer for NZART.
The early priorities include doing everything we can to:
1. Create more licensed radio amateurs
2. Encourage more people to join NZART
3. Tell the story of amateur radio to as many New Zealanders as possible.

We have a lot to be proud of, so let's share it.

One person can't do it. For one thing, there are only 24 hours in the day and secondly budget. However there are 5,000 licensed radio amateurs in NZ and others, who together, could achieve much.

Everyone of us can contribute to the above three goals. Progress will not be steady, and we won't always get it right. Over the years you and I have received much from this great hobby of ours. It is only right we tell the world about it, and help the next generation join in the fun.

Here is how you can help build something that is good and lasting.

Simply tell me:
1. how should we promote NZART?
2. who should we be talking to?
3. what should we be telling them?

Call me on 03 358 2424 or email ZL3DWS@nzart.org.nz or write PO Box 20-256, Christchurch, 8543.

Then, in the coming months I will create tools and provide resources that will help everyone work towards the three goals above. That's my promise to you. But I will need your help. Let's get started.

Responses may also be made via the internet here:

IARU E-Letter - IARU Electronic Newsletter
January, 2011

In this Issue:

The ITU -the International Telecommunication Union

If you were to ask most amateur radio operators what entity is responsible for granting privileges to use portions of the radio spectrum for amateur radio purposes the answer would likely be their own national telecommunication authority. However, that's only partially true.

The ultimate authority for the use of the radio spectrum is the International Telecommunication Union (ITU). It is desirable that each amateur radio operator understand what the ITU is and why its work and

decisions are important.

Most countries are Member States of the ITU and by way of treaty generally agree to be bound by the decisions of the ITU when it comes to the usage of the radio spectrum. Each country can decide that a certain use determined by the ITU may not apply in their own jurisdiction. It is not common for countries to do that but it is within their sovereign authority to do so.

The International Telecommunication Union is a United Nations agency that deals with information and communications technology issues. They have an extensive web site at www.itu.int that details much of their work. The ITU is based in Geneva, Switzerland and includes in its membership 192 Member States and more than 700 Sector Members and Associates.

ITU has coordinated the shared global use of the radio spectrum, promoted international cooperation in assigning satellite orbits, worked to improve telecommunication infrastructure in the developing world, established the worldwide standards that foster seamless interconnection of a vast range of communications systems and addressed other global concerns, such as mitigating climate change and strengthening cybersecurity.

The top staff official of the ITU is its Secretary-General, Dr. Hamadoun Toure who is also a licensed radio amateur with the call sign HB9EHT. There are three sectors in the ITU: Radio-communication (ITU-R), Development (ITU-D) and Standardization (ITU-T). The IARU is a Sector Member in both the ITU-R Sector and the ITU-D Sector. The IARU fully participates in both of those sectors by attending any and all meetings that involve issues that may impact the amateur or the amateur-satellite services.

The Secretary-General, the Deputy Secretary-General and the Directors of the three ITU Sectors are elected to four-year terms by the Member States at Plenipotentiary Conferences held every four years. The IARU is a recognized international telecommunication organization and is invited to participate as an observer at the Plenipotentiary Conferences. The most recent "Plenipot" was held in October, 2010 in Guadalajara, Mexico.

The ITU Council was established in 1947 under the name Administrative Council, following a decision taken by the 1947 Plenipotentiary Conference in Atlantic City, New Jersey, United States. The Council comprises a maximum of 25% of the total number of Member States, which are elected by the Conference with due regard to the need for equitable distribution of Council seats among the five world regions (Americas, Western Europe, Eastern Europe, Africa, Asia, and Australasia). The current Council is comprised of 48 members.

The role of Council is to consider, in the interval between Plenipotentiary Conferences, broad telecommunication policy issues to ensure that the Union's activities, policies and strategies fully respond to today's dynamic, rapidly changing telecommunications environment. It also prepares a report on the policy and strategic planning of the ITU. In addition, Council is responsible for ensuring the smooth day-to-day running of the Union, coordinating work programs, approving budgets and controlling finances and

expenditures.

Finally, Council also takes all steps to facilitate the implementation of the provisions of the ITU Constitution, the ITU Convention, the Administrative Regulations (International Telecommunications Regulations and Radio Regulations), the decisions of Plenipotentiary Conferences and, where appropriate, the decisions of other conferences and meetings of the Union. The IARU has attended several ITU Council meetings in the recent past.

The ITU-R Sector is very important for radiocommunication services, including the amateur and amateur-satellite services. Every 4 or 5 years the ITU holds a World Radiocommunication Conference (WRC) to revise the international Radio Regulations. It is the job of WRC to review, and, if necessary, revise the Radio Regulations, the international treaty governing the use of the radio-frequency spectrum and the geostationary satellite and non-geostationary-satellite orbits. Revisions are made on the basis of an agenda determined by the ITU Council, which takes into account recommendations made by previous world radiocommunication conferences.

The general scope of the agenda of world radiocommunication conferences is established four to six years in advance, with the final agenda set by the ITU Council two years before the conference, with the concurrence of a majority of Member States. The next WRC is scheduled for 23 January to 17 February 2012, just one year away.

Under the terms of the ITU Constitution, a WRC can:

1.. revise the Radio Regulations and any associated Frequency assignment and allotment Plans;

2.. address any radiocommunication matter of worldwide character;

3.. instruct the Radio Regulations Board and the Radiocommunication Bureau, and review their activities;

4.. determine Questions for study by the Radiocommunication Assembly and its Study Groups in preparation for future Radiocommunication Conferences.

There is a lengthy preparatory process for every WRC in which the IARU participates as a Sector Member. There are usually countless meetings dealing with each agenda item that has been determined to be on the agenda for a WRC. Many of those agenda items can, and do, have a substantial impact on the amateur radio usage of portions of the radio spectrum. It is important for the IARU to participate to "protect our frequencies" and when the opportunity presents itself, to expand our spectrum.

ITU-R Study Groups and Working Parties address each agenda item on the WRC agenda and try to arrive at a consensus and recommendation(s) how the agenda item may be addressed or dealt with at the WRC. Studies are conducted many times to determine how a proposed new usage may impact the other services, or not. Each of these agenda items are thoroughly discussed for at least a couple of years leading up to the WRC. You can imagine how important it is for the worldwide amateur community that IARU participate in the entire

study group/working party process.

ITU-D is where much of the ITU's work on disaster response takes place. The development arm of the ITU considers emergency telecommunications an integral part of its projects integrating telecommunications/information and communication technology in disaster predication, detection, and alerting. Emergency Telecommunications play a critical role in the immediate aftermath of disasters by ensuring timely flow of vital information which is much needed by government agencies, and other humanitarian actors that are involved in rescue operations and providing medical assistance to the injured.

IARU's task in the ITU-D Sector is to ensure that amateur radio's role in disaster communications is understood and appreciated by the ITU members. The ITU-D Sector also conducts a worldwide conference. The current schedule calls for a World Telecommunication Development Conference every 4 years. In 2010, the WTDC was held in Hyderabad, India in late May and early June. IARU participated in the conference.

The ITU also sponsors regional and global exhibitions called TELECOMS. An ITU Telecom offers a global ICT community platform that gathers stakeholders from across the telecommunications/ICT sector to connect, collaborate and create the future ICT landscape.

Forums or seminars related to ICT are conducted at the Telecoms and IARU has participated in such forums, usually on topics related to emergency communications. In one of the ITU buildings, there is a permanent amateur radio station, 4U1ITU. 4U1ITU is the club station of the International Amateur Radio Club.

In an upcoming IARU E-Letter, I will describe the organization of IARU and how it works within the ITU and the regional telecommunication organizations like CEPT, CITEL and APT to ensure amateur radio's continued place in the radio spectrum landscape.

73, Rod W6ROD

How to Subscribe to This E-Letter
You can send an email to secretary@iaru.org requesting that you be added to the distribution list. Or, you may be able to receive it via your own IARU member-society, either in English or translated into your own language.

An archive of earlier issues is available at http://www.iaru.org/e-letter/.

The IARU E-Letter is published on behalf of the Administrative Council of the International Amateur Radio Union by the IARU International Secretariat. Editor: Rod Stafford, W6ROD, IARU Secretary.

I received the following very interesting email from Dave Theophilus, WØNRW. Thanks, Dave, for putting this together. 73, Art KØAIZ

Having worked for the National Weather Service (NWS) for 35 years, I am occasionally asked which weather sites I prefer on the Internet. Partly because of my work experience, but also because of the quality and quantity, I generally prefer NWS sites to others that are available.

Living in the area served by NWS Omaha/Valley (http://www.crh.noaa.gov/oax/) I can find most anything I want in the way of weather on their site. For other areas, click on Organization just below the heading, which will take you to a master list of NWS sites.

However, during the monster storm that struck large parts of the county around the beginning of February, a combination of extremely high loads (20 million hits per hour) and equipment problems, caused the NWS websites to become very slow and even shut down completely at times.

So, backup sites are a necessity. I rely mostly on the College of DuPage in Illinois. Their radar page is at: (http://weather.cod.edu/analysis/analysis.radar.html). Pick your radar site from the map. They have recently added a looping capability to the 0.5 deg Base Reflectivity. During the thunderstorm season, the Storm Relative Mean Velocity is useful when looking for circulations. The VIL is a useful product when looking for areas likely to be receiving hail.

I also rely very heavily on the College of DuPage NWS Text Page at: (http://weather.cod.edu/danatext.html). I have found that warnings issued by the NWS will show up on this page within a few seconds of issuance.

Another site that is good for primary, as well as back-up use, is the National Center for Atmospheric Research (NCAR) at: (http://www.rap.ucar.edu/weather/).

On all these sites always pay close attention to the time stamps to make sure you are looking at current data.

For Numerical Weather Prediction or model data, I like the page from Golden Gate Weather Services at: (http://ggweather.com/loops/ncep_loops.htm). I usually look at the Global Forecast System (GFS) output for North America. I normally look at the SLP/Thickness/Pcpn display by selecting a loop for the proper

hour and stepping through each time interval display (12 hours) manually. This will run out to 384 hours or about 15 days. The two main model runs are the 00Z and 12Z runs. For instance, model data based on the 12Z (6 AM CST) data collection is usually all available between 16Z and 17Z (10 and 11 AM CST).

The solid lines are sea level pressure lines, the dashed lines are thickness lines (think temperature), and the shaded areas are 12-hour precipitation (see scale on the left). The 540-thickness line is a good first guess as the dividing line between rain and snow.

As you watch this model you will notice, especially in the far out periods, that storms will come and go between successive model runs. We need to become concerned when successive runs are similar on surface features. At the closer in times, model variability usually lessens.

Also, note that if you click on the Model Name, you will jump to the NWS Model page.

That is as far as I am going to go today. An explanation of everything you will see on these pages would be a project of its own. If you have questions, I would be glad to try to answer them.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, WB2KSK, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, WB6RSE, N7OU, K8YSE, KG8P, W8GEX (60m News), AT International, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DX-World.Net, EA4AK, EB7DX, F5NQL, F5PFP, F6AJA & Les Nouvelles DX, G3XTT, I1JQJ/IK1ADH & 425 DX News, IK5HHA, JA1TRC/KH2J, JA1XGI, LA4LN, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PA7TWO, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK2HV and ZS1HF/ZS8M for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30th-January, through Sunday, 6th-February there were 235 countries active. Countries available: 1A, 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FT5X, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2M, VP2V, VP5, VP8, VP8/h, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK2, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1A0KM WRAP-UP. Luca, IK5HHA, one of the 1A0KM guest operators, informs OPDX that they made 11995 QSOs during their Sovereign Military Order of Malta operation. The breakdown is 5381/CW, 6184/SSB and 430/RTTY QSOs.

By the time you read this, logs should be uploaded to LoTW.

4A, REVILLAGIGEDO. Santos, EA4AK, sent out a press release announcing a DXpedition to Revillagigedo (XF4) during March. The assigned callsign will be 4A4A. The DXpedition's Web site is: http://www.revillagigedo2011.com The team leader and DXpedition organizer is Marcos, XE1B, and the QSL Manager is David, EB7DX <see: http://www.eb7dx.com>. Confirmation will only be DIRECT and LoTW. A team of 9 operators will operate from "Isla Socorro" (officially "Benito Juarez" Island) between March 3-20th. The island's reference numbers are: IOTA NA-030, WAZ Zone 6, ITU Zone 10, Grid Locator DK48MS and located -approx- at Longitude 111° West and Latitude 18° 46° North. Sunrise will be around 1320z and Sunset around 0100z. Currently the team consists of Marcos/XE1B (Team Leader/SSB), Santos/EA4AK (Logistic/SSB), Vicente/EA5AFP (CW), Fernando/EA5FX (CW), Francisco/EA5KM (CW), Javier/EC4DX (SSB), Edu/EA8AUW (SSB/Digi) and Alejandra Ortiz (Geology - Photography). Activity will be on 160-10 meters, possibly 6 meters, using CW, SSB and the Digital modes. They plan to have a CW team and a SSB team operating simultaneously on the air at all times. Yagis will be used for the higher bands and verticals for the lower bands. Efforts are being made to bring some linear amplifiers to the island. Santos, EA4AK, states, "Because propagation conditions are still low or average we must make a special effort to optimize the DX windows. I have prepared some 'propagation movies' (one for each band) for Revillagigedo to help those with less experience estimating the best times/bands to work 4A4A. You can see the movies on my YouTube 'channel' at: http://www.youtube.com/user/EA4AK "
The press release also mentions: "The licenses and permits for the 4A4A DXpedition have taken long time to obtain due to the complexity of this archipelago. Revillagigedo is a natural reserve, a protected reserve of the biosphere. Only visits or expeditions of scientific nature are permitted by the relevant Mexican authorities (a prestigious Mexican geologist will travel with the team to perform studies of natural life interest while 4A4A is running). Also, it is an emplacement of military interest, and tightly under the control and supervision of military authorities. These two permits from those two mentioned authorities are absolutely necessary before proceeding to request an amateur radio operating license to the telecommunications authorities." This 4A4A DXpedition is exclusively financed by the personal financial effort of the team of operators. The team is looking for some support from sponsors, clubs or other organizations. See the official Web site (provided above) for details on how to help them. Santos, EA4AK, has also provided a few links for interest:
* A Twitter Page for updates: https://twitter.com/EA4AK
* Various maps and images of Isla Socorro, and Revillagigedo, on EA4AK's Picassa album: https://picasaweb.google.com/EA4AK.Santos/4A4AVARIOS#
* All the JPG images of those propagation movies can be more carefully scrutinized at the Picassa album on: https://picasaweb.google.com/EA4AK.Santos/4A4APROPAGATIONIMAGES#

9G, GHANA. Operators Rob/PA3DEW and Vincent/PA3FQX will once again be active as 9G1AA from Dorma Ahenkro Hospital in Ghana between March 1-20th. Activity will be mainly on 20 and 15 meters SSB. QSL via PA3ERA.

CR3/CT9, MADEIRA ISLANDS. Operators Ulf/DL5AXX, Tom/DL5LYM, Jan/DL7JV, Frank/DL8WAA and Falk/DK7YY will be active as CR3L from Santana, Madeira Island (AF-014) during the ARRL DX CW Contest (February 19-20th) as a Multi-2 entry. QSL via DJ6QT. Operators will probably be active as CT9/homecall before and after the contest. Checkout the CR3L station's Web page at: http://www.cr3l.de

DX0, SPRATLY ISLANDS. Chris, VK3FY, is reporting on DX-World.Net (edited): "We are hoping that the weather improves in the South China Seas so that we can board the ship which will take four operators to Pag-Asa. As this is a scouting trip, operating time on the island will be limited to a few hours to 3 days. The time on the island will be utilized in taking pictures of prospective sites and time permitting getting DX0DX on the air. This is a prelude to the April operation. QSL will be as per DX0DX via Bob N2OO. As we are guests on this vessel, we have no control over its departure, schedule or time it is allotted at Spratly."

E3, ERITREA. It looks like a E30 DXpedition is planned for 2012. The last operation, E30GA, took place from Asmara in November 1998. Currently the information is limited -- no operators and specific dates were provided. The only thing available via the below Web page is activity will be on 160-6 meters, including 30/17/12 meter bands, with operations on CW, SSB and RTTY. The unknown team will have at least 4 stations on the air at the same time on different bands and modes. The callsign is also not clear on the Web page (is it E30A or E30AA). However, the below Web page states, that the QSL Manager for E30A is S52RU. The Web for the 2012 DXpedition (still under construction) is:
http://www.seecc.net/Eritrea2012/index.html
There is a survey for "bands needs" available on the Web page. Hopefully, more info will be forthcoming. Stay tuned!

EA8, CANARY ISLANDS. Per, LA5EAA, will be active as EA8/LA5EAA between February 13-26th. Activity during the first week will be from the Island La Gomera (DIE S-014, WLOTA 1526), and the second week from the Island of Tenerife (DIE S-012, WLOTA 1276). Both islands are IOTA AF-004). He plans to operate holiday style using an Yaesu FT-817 transceiver (5w QRP) and wire antennas on the HF bands, mainly CW. QSL via his home callsign.

FRENCH EXPEDITION TO ANTARCTICA. Mehdi, F5PFP, will once again head south to the Antarctic waters sailing on a yacht on a 6 week voyage. He departs from Ushuaia on February 14th. His itinerary (as he puts it) is as follows: "Beagle channel islands> the Drake, then it will depend of the sailing conditions, impossible to give you an order.
>South Shetland Islands > West Graham land > Palmer Islands >Biscoe Islands >Adelaide Island> Marguerite Bay >back via the Melchior islands.
Callsigns mentioned are FT5YK/p, VP8DLM and CE9XX (he is waiting for an Argentine callsign also. Radio operations will be mostly between 2200-0200z on 40 meters SSB and possibly earlier sometime on 20 meters.

Equipment is an IC-706, FT-897 and an IC 2KL amp. Antennas are a 1/4 wave vertical for 40m and a 1/4 wave vertical for 20m.

HE3, SWITZERLAND (Special Event). Members of the Rav Radio Amateurs of Vaudios (HB9MM) will activate the special callsign HE3OM from Sottens during the month of February. Sottens is a small village where the last medium waves transmitter active in Switzerland was located. It stopped its emissions on December 31st, 2010, at 2359 local time. Permission has been granted to the "Radioamateurs Vaudois" club to use the 2 giant antennas for amateur purposes. The callsign HE3OM was chosen for the following reasons:
* The prefix HE3 has already been used in 2004, when the shortwave transmitter in Sottens went off the air. At that time the special callsign was HE3RSI.
* The suffix OM in French means Ondes Moyennes, mediumwaves.
* Also, OM are the initials of Option Musique, the last program that was transmitted over these big antennas.
The tallest antenna, 188 meters high, is used on the HF bands, especially the lower bands like 160m and 80m. The "small" mast, 125 meters high is connected to the VLF station transmitting on the 137 kHz amateur band.
QSL HE3OM via HB9TOB. For more details, see: http://www.hb9mm.com/sottens

IOTA NEWS.....
NA-193. Operators John/VE8EV and Gerry/VE8GER are currently planning a 5-7 day operation to Tent Island in the Yukon Territory Group during late April (over the Easter holiday - dates to be finalized at the end of March). Tentative callsign will be XK1T. Activity will be a high-power/yagi operation, mostly 20 meters, mostly SSB (but likely more CW than previous trips) with the goal of putting NA-193 into as many logs as possible in NA, Europe, and Asia. They are looking for donations/funds to help pay for the cost of this expensive operation. Donations can be made through John's OQRS page at: http://ve8ev.blogspot.com

J6, ST. LUCIA. Operators Volkmar/DF2SS and Marc/DL1VKE are now active as J6/DF2SS and J6/DL1VKE from St. Lucia (NA-108) until February 17th. Activity will be on all HF bands using CW, SSB and RTTY. QSL via their home callsign, direct or by the Bureau.

KH0, MARIANA ISLANDS. Members of the Mariana Friendship Club (WH0SS) will be activatings W0S from Saipan (OC-086, USI NI002S, WLOTA 1333) between February 15-22nd, to celebrate the Silver Jubilee of the international exchange program between Seisa Group (Japan) and Marianas High School (Saipan CNMI). Since 1986, more than 7000 students from Japan to Saipan and more than 1000 students from Saipan to Japan crossed the ocean to participate in this incomparable and fruitful program. This operation is also one of the activities of "Foundation with Global Children" and "International NGO Seisa-Lotus (provisional name)" aiming for the advancement of education and medical care to children worldwide. The operating site will be the Saipan World Resort, Saipan, Commonwealth of Northern Mariana Islands (CNMI). Operators mentioned are Yasuo/KH0WF, Akihiko/

JK1OPL, Jay/KH2J, Tadao/AE6UR, Naohiko/W6HGY and Mamoru/W6KNH. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL via JA1HGY. Log Search will be available at: http://www.clublog.org/logsearch.php?log=S Please note that the team will not be in the ARRL-DX CW Contest, however they will operate SSB/RTTY and the WARC bands, to avoid the confusion during the contest period.

KH0, MARIANA ISLANDS. Yuichiro, JM2RUV, will be active as KH0/JM2RUV between February 18-21st. Activity will be on the HF bands using CW and SSB. He also plans to be on during the ARRL DX CW Contest (February 19-20th). QSL via JM2RUV, direct or by the Bureau.

KH6, HAWAII. Operators Lloyd/KH6LC, Oliver/W6NV, Don/N6DA, Ken/N6KB, Curt/AH6RE and Jim/W6SC will be active as KH6LC during the ARRL DX CW Contest (February 19-20th) as a Multi-2 entry. QSL via WA6WPG.

KH6BZF PROPAGATION FORECAST/REPORT (For February 7-13th)....
Feb 7 AN SOLAR REFERENCE KEYS
Feb 8 AN --------------------
Feb 9 HN BN - Below Normal
Feb 10 HN AN - Above Normal/Geomagnetic Level is QUIET
Feb 11 HN-AN LN - Low Normal
Feb 12 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Feb 13 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

PA, THE NETHERLANDS. Kees, PA7TWO, informs OPDX that a new Dutch contest group has been born and located in the northwest part of the Noord-Holland Province. The contest team's callsign is PA6NH. The team members are PA2PAC, Paul/PA3FUN, Kees/PA7TWO, Jerry/PH9HB, Jan/PD1AIQ and Bram/PE1OPK. Their station setup consists of surplus equipment, namely Harris 590 receivers and Telefunken S2525 amplifiers, with Yaesu/ACOM equipment as backup. This new contest team plans to participate in all the major contests starting with the upcoming Dutch PACC Contest (February 12-13th). The group has a successful trial run for their new station during last weekend's UBA-SSB Contest (January 29-30th) that looked very promising. ADDED NOTES: QSLs for the upcoming PACC Contest (only) will be sent via the "Global QSL" for all QSOs. For all other contests, send your direct QSL to PA7TWO via the address on QRZ.com. (Please read and comply to the listed QSL rules!). As a general rule, all QSOs will be uploaded to the LoTW! Also, checkout the PA6NH pictures on QRZ.com.

P4, ARUBA (Update). Tim, WD9DZV, will be active as P40D (not P40A as announced last week) from Aruba between March 8-13th. Activity will be holiday style on most bands and modes. QSL via WD9DZV.

PACIFIC TOUR (Update). Bob, 5B4AGN, will finish his Palau (OC-009) T88ZM operation on February 8th, and then head to Saipan (OC-086, USI NI002S, WLOTA 1333). He will be active as KH0/G3ZEM between February 9-16th. Operations will be from the Saipan Rental Shack (See the following Web page at: http://saipan.rental-shack.com/english/index.html)
Activity will be CW only on the HF bands. QSL via M0URX, direct or using his OQRS for Bureau cards at: http://www.m0urx.com/qsl-request-form.html

PJ2, CURACAO. Operators Don/W5FKX, Jim/N5HZ, Dave/W5XU and Mike/W5ZPA will be active as PJ2T from Signal Point Station on Curacao (SA-099, WLOTA LH-0942) between March 10-17th. Activity will be on all bands and modes. QSL PJ2T via N9AG or LoTW.

PJ4, BONAIRE. Roger, N4RR, will once again operate in the CQWW WPX RTTY Contest (February 12-13th) from Bonaire (SA-006, WLOTA L1279) using the callsign PJ4R. He will be signing PJ4/N4RR before the contest starting on February 9th. All activity will be RTTY on 80/40/20/15 meters. QSL via his home callsign.

PZ, SURINAME. Serge, RX3APM, will be active as PZ5P from Paramaribo between February 15-22nd. Activity will be on 160-10 meters using CW and SSB. He will also be in the ARRL DX CW Contest (February 19-20th). QSL via UA4LU or LoTW.

PJ7E QSL STATUS. PJ7E QSL team reports: "We still have about 1000 QSLs to finish up the backlog. Tom, N4XP, has been mailing about 600 per week. Please be patient as it just takes time. The OQSL card requests will be caught up by next week. If you have not received your QSL by March 1st, please inquire at <info@stmaarten2010.com> and do not re-send cards at this time. Thanks for all of the QSOs...."

QSL T88ZM via M0URX, direct or using his OQRS for Bureau cards at:
http://www.m0urx.com/qsl-request-form.html
Bob, 5B4AGN, was the operator from the Palau Rental Shack (OC-009)
<http://palau.rental-shack.com/english/> between February 1<8th.

QSLS VIA LoTW: 1A0KM, 9M6/KM0O, A25DF, A45XR, A65BP, C6AKQ, C6ANM, C91DL, CO7PH, DH3MIT, DJ7XB, E51PEN, GM4WZL, HB10DX, HK3W, J6/KB9AVO, J48S, JT1CO, JY9NX, MU/F5NHJ, OM3LK, R5GA, R7MA, RI1FJ, RK3DXW, SP9BBH, SP9H, SV7LNK, SY75NW, T32OU, TG9AJR, TO5DX, UA0BA, V21ZG, V31RG, WL7E, YO3JF, YS3CW and ZL50VK

QSLS RECEIVED VIA MAIL: 5R8RJ, 6V7Z, 9K2YM, CY0/VE1AWW, D44TBV, DT8A, FG8AR, FR/DJ7RJ, GP0DTH, GW7X, HH2/OH2TA, HI3K, HK0GU, HK0GU/1, HK0GU/3, J5V, J68JA, JA1PBV/6W, KC4AAA, PJ2/K8LEE, PJ6A, PJ7E, PX8J, PX8L, TA7/WK1S, XV4SP, YB0AKM and ZB3B

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED This Week!

S9, SAO TOME & PRINCIPE. Operators Ulli/DD2ML, Jurgen/DF1AL, Klaus-Dieter/DK1AX, Rene/DL2JRM, Rolf/DL7VEE, Sid/DM2AYO and Harry/DM5TI are now active as S9DX until February 17th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via DL1RTL. Bureau QSLs may be requested online. For more details, visit their Web page at: http://s9dx.hkmann.de

T2, TUVALU. Haru, JA1XGI, informs OPDX that he will be active as T2XG between May 17-24th. Activity will be on 40-10 meters using CW, SSB and the Digital modes. QSL via JA1XGI, direct or by the Bureau.

T30, WESTERN KIRIBATI (Update/Reminder). Operators Bill/N7OU and Bob/W7YAQ are expected to once again team up for another operation in the Pacific this week, but this time from Tarawa Island (OC-017) between February 8-22nd. Bill will sign T30OU and Bob will sign T30YA. Activity will be on 160-10 meters using mostly CW with some SSB and RTTY, and using 100 watts and vertical antennas. They will also be in the ARRL DX CW Contest (February 19-20th) as a Multi-Single entry and signing T30YA. QSL via their home callsigns. They will upload their logs to LoTW soon after they get back to the USA.

T32, CHRISTMAS ISLAND (Update). Don Field, G3XTT, FSDXA Publicity Officer, has sent out a press release (Bulletin #2) from the Five Star DXers Association (FSDXA) with updates on their T32C DXpedition to Kiritimati (Christmas Island) that will take place between September 27th and October 25th. The release states that the "T32C" callsign is now confirmed and has been issued. This took a little time to arrange, as single letter suffixes are not normally issued by the Kiribati Government. Secondly, the T32C Web site <http://www.t32c.com> is going strong with all the

latest news. For example, you can look at predicted propagation, make a donation via PayPal and other means, read about the island, and much more. At this time though, they would particularly urge everyone to complete the survey of wanted bands and modes which will help them in planning their operating schedule.
It was also mentioned that their 40 member team is now almost complete, and they are especially delighted to welcome young amateur Michael Z�rch, DG1CMZ, whose participation is possible thanks to an anonymous sponsor. Michael is a 25-year old from Thuringia, Germany. He was first licensed at the age of 14 and is a keen contester and DXer.
The UK-based members of T32C have had several preparatory sessions to clean up and refurbish kit from their previous operations as well as building and testing equipment which they will be using for the first time (for example, new 4-square antennas for both 40 and 30m, and vertical arrays for the high bands, to complement their existing Yagis). Some photos of these activities appear on the Web site. They have also been getting to know the FT-5000 radios of which they will have 16 with them on T32 along with Quadra linear amplifiers. Several pallets of gear are now ready to be transferred to the shipping container which they expect to leave the UK in late February from where it will travel via Singapore to Fiji, arriving in Suva in April or early May for onward shipping to T32. They have also added a GPS tracker in the container so that they can follow the progress of their kit as it makes its way to the island! To read the complete press release and their new brochure, go to the following Web pages at:
http://www.t32c.com/Resources/Documents/Press/Press%20Bulletin%202.pdf
http://www.t32c.com/resources/documents/brochure%20feb.pdf

TO7/FM, MARTINIQUE (NA-107). Dim, UT5UGR, will once again be active as TO7A during the ARRL DX Phone Contest (March 5-6th) as a a Single-Op/ All-Band/High-Power entry. Outside of the contest look for him to sign FM/KL7WA. QSL FM/KL7WA and TO7A via UT5UGR.

VISALIA DX CONVENTION (Top-Band Banquet). Steve, WB6RSE, reports that the 2011 Top-Band Dinner Banquet at the Visalia DX Convention is now open for reservations. It will take place on Friday, April 15th, at 6:30 PM. The location is the Convention Hotel, Holiday Inn, Visalia CA. The program will be: "The Low Bands from VP8ORK South Orkneys". There will be door prizes. The menu will be the "Miner 49er BBQ Buffet Dinner. No host bar." The cost is 37 USDs/person. If you wish to attend, please send an E-mail with the number of reservations you would like along with CALL, FIRST & LAST NAME, and contact E-MAIL address for each person to: wb6rse1@mac.com You will receive a return E-mail confirming availability along with payment information. A SELL OUT IS EXPECTED. FIRST COME, FIRST SERVED!

VK0/H, HEARD ISLAND. Carl, N4AA, editor of QRZ DX, reports that Chris/ VK3FY and Steve/VK6IR are co-leaders in planning for a DXpedition to Heard Island in February of 2013. They are proposing a 13 member team for a two week operation. The estimated cost for this operation is around 500,000 USDs. They are expected to put a Web page online to keep everyone informed. Last operation from Heard Island was back in 1997. The latest

ranking by "DX Magazine's Most Wanted Survey" is #5 world-wide.

VP8O, SOUTH ORKNEY ISLANDS. Members of the Microlight Penguins continue
to be active as VP8ORK from Signy Island (AN-008) until February 8th.
As this was being written, the VP8ORK log shows (at 0658z, February 5th)
that they have made 51979 QSOs with 15122 unique callsigns (34085/CW,
14548/SSB and 3346/RTTY). The online log can now be found at:
http://www.clublog.org/charts/?c&#65533;8ork
If you want a QSL card there are three ways available to receive one:
OQRS direct (on the VP8O Web page), OQRS Bureau (on the VP8O Web page)
and direct by mail via VE3XN [w/SASE/Green Stamps/IRC(s)]. For more
details and updates, visit the VP8O Web page at: http://www.vp8o.com
By the way, real-time news is now available at:
http://www.vp8o.com/realtimenews.htm

ZF2, CAYMAN ISLAND (Satellites, Grids, HF and Contesting). Adrian, AA5UK,
will be operating as ZF2AE from Grand Cayman and ZF2AE/ZF8 from Little
Cayman between March 25th and April 2nd. He plans to operate during the
CQ WPX SSB Contest (March 26-27th) on Little Cayman, on 40-10 meters using
a IC-7000 and vertical antenna. Current plans are to operate holiday style
outside the contest on SSB, RTTY, PSK31 and the satellites (AO-51, SO-50,
VO-52 and FO-29). Most activity will be in the afternoons and evenings.
QSL direct to AA5UK with a SAE/SASE, by the Bureau, LoTW or eQSL.

ZL50, NEW ZEALAND (Special Events). Look for Graeme, ZL1ANH, to be active
as ZL50GH during the year 2011. Activity is to celebrate his 50th anni-
vesary of being a licenced radio amateur. QSL via his home callsign, by
the Bureau or direct. Also, via LoTW.
ADDED REMINDER: Members of the Papakura Radio Club (ZL1VK), NZART
Branch 65 in South Auckland, will activate the special event callsign
ZL50VK between now and March 31st. Activity is to celebrate the 50th
anniversary of the club. Look for logs to be uploaded to LoTW and Club
Log. QSL via ZL1VK. Visit their Web page at: http://www.qsl.net/zl1vk
PLEASE NOTE: These are New Zealand stations and NOT ANTARCTICA (ZL5)
callsigns.

ZS8, MARION ISLAND (Update). Pierre, ZS1HF/ZS8M, continues to be active
most days, mainly 20/17 meters SSB. Pierre has released another newsletter
from Marion Island, where he provides more great pictures, along with
more details about the island happenings and activities on the island.
He also has a section in his newsletter called "Humans and seals do not
mix!!!" If you have a weak stomach, you may not want to see these pictures.
Pierre states that during breeding season the seals become extremely
aggressive. Someone found out and got 25 stitches later! His newsletter
can be found online at: http://www.iz8epy.it/html/zs8m.html
Lastly, Pierre mentions the following four items:
1. Our Polar Supply ship will be arriving on 15 March with a team of
maintenance people. At this stage I assume my operation will be
down scaled, especially the SSB operation.
2. The ship returns to Cape Town on 19 April to collect the new team,
including fuel and food for the next year.

3. The ship departs Cape Town on 5 April for Marion Island and arrives
11 April with the new team.
4. I expect the ZS8M operation will cease officially on 11 April 2011.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 6th February 2011

Request for Return of IRTS Trophies and Cups

It is time once again to recall all trophies presented at the 2010 IRTS, AGM held in Dundalk.

Trophies and Cups can be returned to the IRTS Stand at the Phoenix Radio Club Rally in Coolmine on Sunday February 20th 2011 or to any IRTS Committee Member before end of February 2011.

This will allow for any engraving to be done, or to allow any repairs as needed.

Early return will be appreciated. Peter EI4HX can be contacted on ei4hxperimental / at/eircom / dot/ net.

IRTS Awards Nominations.

The time is here again for nominations for the several awards for IRTS Trophies and cups that are required from within the membership, this includes the awards for,

1. Service to the Society or to Amateur Radio. Awards in this category can be to members or non-members.

2. Awards for other achievements.

Awards in this category [2] include the 4 and 6 Meter Shields, the SWL Award, and the awards for Quality Construction Projects. These are confined to members only.

When considering your nominations, please refer to previous successful winners as included in www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or Individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX and Pat EI9HX, or to Peter Grant EI4HX, Chair of Awards Committee, QTHR, or by e-mail to ei4hxperimental/ at/ eircom/ dot/ net.

Closing date for nominations is February 30th 2011.

IRTS AGM Annual Dinner and Rally 2011

You are reminded of the importance of attending the IRTS AGM weekend, including Annual Dinner and Rally will be held this year on Saturday March 26th and Sunday March 27th. The event will be hosted by the Limerick Radio Club. The venue is the Radisson Blu Hotel, Ennis Road, Limerick. For more information contact, Ger McNamara EI4GXB on 087 2532512 or ei4gxb/ at /gmail/ dot/ com.

Engineers Week

This year Engineers Week, organised by Engineers Ireland, runs from 14 - 20 February. Once again the Society plans to participate in centres through the country. Currently under consideration are Athlone, Cork, Cavan, Dundalk., Mayo and Limerick. If you would like to participate please contact S&#65533;amus ei8bp / at / eircom /dot/net.

Shannon Basin Radio Club

The Shannon Basin Radio Cub held its AGM in Roscommon on the 28th Jan. The following officers were elected.. Chairman: Pat EI9HX, Secretary: Brian EI8IU, Treasurers: Fergus EI6IB and Brian EI8IU, QSL Manager: Richard EI5GGB. The club would like to thank the outgoing officers. Several new members attended and are very welcome to the club. The next meeting will be held in Hannons Hotel Roscommon Town on Wednesday 23rd March at 20:30.

Blackrock Castle Observatory Cork

North Cork Radio Group will be active EI1NC/P on February 19 and 20 from 10am until 5pm at Blackrock Castle Observatory a 16th century Castle located 4km from the heart of Cork city on the banks of the river Lee.

The Castle has seen many uses in its vast history and now houses the cutting edge of space and observation technology, more info on the Castle is available at www.bco.ie information on NCRG is available at www.ei1nc.com

---

Fingal Radio Club

With immediate effect, please note that the Fingal Radio Club EI 2 FRC will no longer be meeting at the Erin's Isle GAA Club, Farnham Drive Finglas Dublin.

Fingal Radio Club have not as yet finalised their new meeting place, so in the meantime, contact and information about the club may be made to Chris Yeates EI 7 AAB at YEATESDSL / at/ eircom / dot/ net for the latest information.

Limerick Radio Club

The AGM of Limerick Radio Club will take place on Thursday 10 February at 7.30pm in the Limerick Institute of Technology. All members are requested to attend. Further details are available from Ger McNamara EI4GXB Hon. Secretary at QTHR.

South Eastern Amateur Radio Group

The Annual General Meeting of South Eastern Amateur Radio Group will take place on Monday 28 February in the Roanmore Social and Sports Centre, Cleaboy Road, Waterford. All are welcome.

For up to date information about the club, visit www.searg.com

The South Eastern Amateur Radio Group and the Lough Erne Amateur Radio Club are planning to get Ireland its say again in the International Geopark Communication event on 28 & 29 May, with stations at the Copper Coast Geopark and the Marble Arch Caves Geopark in Fermanagh. Geoparks are areas recognised by UNESCO to have exceptional geological heritage. There are 42 in 16 European countries, but only these two in Ireland. Amateur radio's culture itself is international educational and scientific, so it is quite right that amateur radio be involved with Geoparks that are designated by UNESCO - the United Nations Educational Scientific and Cultural Organisation.

DX News

Bruno DH1BL who is at present on the Island of Mayotte in the Indian Ocean has been active as FH/DH1BL. He recently received a local call and can now be found using FH4VOS. He expects to be on Mayotte for another three years and his QSL info is via DL7BC.

Two American operators plan to operate on the amateur bands from Haiti between February 18 and March 5. They will be working at a local Christian Mission and during their spare time will be on the air as HH4/K4QD and HH4/AF4Z.

J88DR will be active again from February 16 to March 14. This is the call used by Dave G3TBK while on the Caribbean island of St Vincent. Dave is interested in contesting and will be QRV in the ARRL DX CW Contest as well as the ARRL DX SSB Contest and the Commonwealth Contest during that period.

An international team will operate from Cameroon using the call TJ9PF from February 10-20. QSL manager is F5OGL and full details of the DXpedition can be found on www.tj9pf.fr

Members of the Lufthansa Amateur Radio Club are off on another overseas trip. This time they plan to operate as V55DLH from Namibia. QSL

manager is DK8ZZ.

Gerd DJ4KW and Gisela DK9GG will operate from V31YN and V31GW respectively in Belize until the end of February. During the period 2 - 8 February they hope to go to Southwater Caye (IOTA NA-180) using the call V31YN/P.

To celebrate the 50th anniversary of independence, stations in Kuwait will be using the 9K50 prefix from now until the end of February.

DJ9KR PUBLISHES 40 METER BROADCAST INTRUDER LIST

Ulrich Bihlmayer, DJ9KR, of Tuebingen, Germany, has published a list of broadcast stations still operating in the 7.0 to 7.2MHz amateur service radio band. The list can be downloaded from in Adobe PDF format at tinyurl.com/4c8ootr.

The latest version was published on January 11th. Using it as a handy reference you should be able to determine what station might be interfering with a QSO and where that station is located.

Excellent graphics concerning the intruder situation in Region 1 / Europe during 2010, see http://www.iarums-r1.org/iarums/int2010

Visit also the powerpoint presentation on the IARU Region 1 Monitoring System homepage, see http://www.iarums-r1.org/iarums/bw-2010.pps

---

GLOBAL TUNES REACHES 55 RECEIVERS WORLD WIDE

You can now access 55 receivers world wide on the Global Tuners dot com website. Receivers on-line operate a variety of modes including the AM and FM broadcast bands, the shortwave spectrum, HF and UHF bands in various modes.

Countries currently on-line include the USA, Australia , Finland, France, Germany , Greece , Italy , Hong Kong , the Netherlands, the Slovak Republic, Sweden and the United Kingdom to mention only a few. So far there are 33,777 registered members and you will have to sign up for an account if you wish to control a receiver.

For more information take your web browser to www.globaltuners.com and global tuners is spelled as one word.

Radio Rallies

PHOENIX A.R.C.

Phoenix Amateur Radio Club annual rally will be held on Sunday 20th February 2011 in the usual venue, Coolmine Community School, Blanchardstown.

Doors open for Traders at 9.00 am Doors open to public 3.00am Admission 5 Euros. To book tables contact Tony at 0872439997 or Tom at 01-8211043.

Plenty of Parking, Refreshments and Bring and Buy Sale. All usual traders will attend.

This is the First Rally of 2011.

For further details on Rallies please see www.irts.ie/rallies

---

Items for inclusion in next weeks Radio News should be forwarded to Aidan EI7JC, preferably via e-mail to "news / dot /ei7jc / at / gmail / dot / com". Or by phone to 085 7100511 News can also be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor not later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

130. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.misc
Date: 2011-02-07 07:05:01 UTC

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

DXNL 1714 - Feb 9, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

CN - MOROCCO
Ron,W3PV, is active as CN2PV from Rabat mostly in CW on 40m and will
stay there until May 1. QSLs via bureau or direct to his homecall.

KH2 - GUAM, OC-026
Nobu,JR3STX, and Take,JS6RRR, will sign W3STX/KH2 and KH2/JS6RRR from
Guam (OC-026) working in CW/SSB/FM/RTTY/PSK31 on 160-6m from Feb 10-15.
QSL cards for W3STX/KH2 should be sent via JR3STX (direct/bureau) and
QSLs for KH2/JS6RRR via JS6RRR (direct/bureau).

KH0 - NORTHERN MARIANA ISLANDS, OC-026
Some members of the "Mariana Friendship Club" (WH0SS) will show up as
W0S from Feb 15-22. They are celebrating the silver jubilee of the
co-operation between the Marianas High School in Saipan (CNMI) and the
Seisa Group in Japan. 7000 guest students came from Japan to Saipan and
more than 1000 from Saipan to Japan since 1986. The OPs are: KH0WF,
JK1OPL, KH2J, AE6UR, W6HGY, W6KNH and operation will take place in CW,
SSB and RTTY on all bands from 160m-10m.
The QSL manager is JA1HGY and an online logsearch is available at:
http://www.clublog.org/logsearch.php?log&#65533;S
They will not take part in the upcoming ARRL DX CW Contest instead they
will dodge to SSB, RTTY or the WARC bands.

J3 - GRENADA, NA-024
Bill,K4LTA/J37BO, and his XYL Ruby,K4UPS/J37RO, will activate Grenada
on all bands from Feb 9 until Mar 10. Bill will use the call J38A in
the ARRL DX CW Contest (Feb 19/20).
QSLs for J37BO and J38A via K4LTA and J37RO via K4UPS.

Roy,KE4TG, will show up from Grenada during the same time. He will sign
J38RF primarily in digital modes using a K3 transceiver, a G5RV and
phased verticals. He also plans to work on 60m. QSL via homecall.

PJ4 - BONAIRE, SA-006
Roger,N4RR, plans to join the CQ WPX RTTY Contest from Bonaire (SA-006,
WLOTA L1279) using PJ4R. His activity starts on Feb 9 and will be only
in RTTY on 80m/40m/20m and 15m. Roger will sign PJ4/N4RR before and
after the contest. The QSL cards should be sent via his homecall.

PZ - SURINAME
Serge,RX3APM, will stay in Suriname from Feb 15-22. His plans to work
as PZ5P in CW and SSB on 10m-160m. He also wants to take part in the
ARRL DX CW Contest.
The QSL cards are managed by UA4LU and he also accepts QSLs via LoTW.

T8 - PALAU, OC-009
Mike,JA6EGL/T88SM, and Hiro,JA6KYU/T88HS, will activate Palau (OC-009)
in CW and SSB on 80m-6m from Feb 10-15.
QSLs via homecalls, unfortunately only direct.

TJ - CAMEROON
Several members of the F6KOP Team and the Clipperton DX Club will be
active as TJ9PF from Cameroon from Feb 10-20. Their QTH will be Kribi
directly at the beach. Following team members know each other already
from former DXpeditions: F4AJQ (Frank, DXpedition leader),
F5UFX (Seb, deputy team leader), FM5CD (Michel), N2WB ("Wild Bill"),
K4SV (Dave), I2VGW (Gabriele), ON7RN (Eric), N6OX (Bob), F6ENO (Alain),
F8BJI (Jean-Paul), F6BIV (Jean-Luc), F5EOT (Michel), F5VHQ (John),
F2JD (Gerard), DJ7JC (Norbert), F1NGP (Yan), F5PED (Mathieu), and
F1HRE (Henri). The team will work in SSB, CW, RTTY and PSK on 160m-10m.
They will use six stations: 5x FT-450, 1x K3, 6x Acom 1010. Antennas:
Spiderbeams, 3x 5-band, 1x 3-band, 1x WARC vertical, antennas for 20m/
30m/40m/80m/160m. Lowbands: Depending on the local conditions they will
put up one or two beverages and a K9AY antenna. Their goal for this
DXpedition are 80.000 QSOs with focus on lowbands and digital modes.
Their QSL manager will be Didier,F5OGL, and the pilot station is F6AML.
Further information can be found on their website: http://www.tj9pf.fr
Following preferred frequencies were announced (in kHz):
Band CW SSB RTTY PSK

10m 28024 28480 28082 28122
12m 24892 24960 24918 24920

TT - CHAD
Baldur,DJ6SI, is travelling to Africa again from Feb 14-24. This time
he will show up as TT8DX mostly in CW.
As usual the QSLs should be sent direct or via bureau to his homecall.

V3 - BELIZE
Torsten,DG7RO, plans to become active as V31TF mainly in SSB/RTTY (but
also in CW) on 160m-10m between Feb 9 and Mar 1. Torsten works in
"holiday style" with a FT-857, 100 watts, a dipole and a longwire.
He also plans to join the WPX RTTY Contest, ARRL DX CW Contest and the
CQWW 160m SSB Contest, maybe as V31GW.

V4 - ST CHRISTOPHER AND NEVIS, NA-104
Mike,V4/W1USN, and Bob,V4/AA1M, will be QRV from St. Kitts (NA-104)
in SSB, CW and PSK31 from Feb 12-24. They plan to work also on 60m.
QSLs should be sent via bureau or direct to their homecalls.

5Z - KENYA
Sig,NV7E/ZS6SIG, who was working in Pretoria before will stay in Kenya
for the next four years. Sig has been licensed as 5Z4EE and plans to
be QRV on all bands from 160m-10m including the major contests.
QSL via NV7E, Charles Signer, Unit 8900 Box 226, DPO, AE 09831, USA
or via the W7 QSL bureau.

FRANCE, SPECIAL EVENT STATION
Francois,F8DVD, will be active as TM8AAW during the "8th Antarctic
Activity Week" from Feb 12-28. The callsign has the WAP reference 199.
Activities will take place mainly in SSB on 40m-10m.
QSL via F8DVD, direct or via bureau.
More information is available at: http://tm8aaw.monsite-orange.fr

SWITZERLAND, SPECIAL EVENT STATION
The club "Radio Amateurs Vaudois" (HB9MM) has the permission to use the
antennas of the former broadcasting station in Sottens. HE3OM is active
until the end of February. The bigger mast (188m high) is used on 160m,
80m and 40m while the smaller mast (125m high) is used on 137 kHz.
QSL via HB9TOB, more information at: http://www.hb9mm.com/sottens

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
After the Netherland Antilles have been added to the DXCC entity list
lately this list now includes 340 entries. Useful 10 band checklist
in the Doc, Excel or PDF format can be downloaded from:
http://www.dx-newsdesk.co.uk

The latest information about ZS8M can be found on the website:
http://www.iz8epy.it/html/zs8m.html
This site states that OM Pierre will go QRT on Apr 11, which is the
scheduled arriving date of the new team on Marion Island.

UPCOMING CONTESTS

Feb 11-13: YLRL YL-OM Contest
Feb 12/13: CQ WPX RTTY Contest
Feb 12/13: PACC Contest
Feb 12/13: KCJ Topband Contest
Feb 12/13: RSGB 1.8 MHz CW Contest
Feb 12: FISTS Spring Contest
Feb 13: North American Sprint Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AF-004, EA8, Canary Islands: Per,EA8/LA5EAA, will be QRV from the Canary
Islands from Feb 13-26. He will activate Gomera Island (DIE S-014)
during the first week and Tenerife (DIE S-014) during the second week.
QSL via homecall (bureau/direct).

AF-017, 3B9, Rodrigues Island: Slavo,3B9/SP2JMB, and Bogdan,3B9/SP2FUD, will
activate Rodrigues during the WPX RTTY Contest from Feb 12-13.
QSLs via homecalls (bureau/direct).

NA-001, C6, Great Bahama Bank Group: Drew,N2RFA, is signing C6ABB from
Nassau on New Providence Island from Feb 7-17. QSL via homecall (d).

NA-072, HP, Panama/Darien Province Group: Kai,HP1/DL2BP, and Sven,HP1/DJ2ST,
are working from Contadora Island from Feb 6-17.
QSLs for both calls should be sent via DL2BP (bureau/direct).

NA-085, W4, FL State North Group: Dennis,WA2USA/4, is working from
St. George Island (USI FL0075) between Feb 3 and Mar 3.
QSL via homecall (bureau/direct).

NA-108, J6, St. Lucia: Volkmar,J6/DF2SS, and Marc,J6/DL1VKE, are QRV from
St. Lucia from Feb 5-17. QSLs via homecalls (bureau/direct).

OC-049, A3, Tongatapu Group: Akira,JA1NLX, announced to be active as A35A
from Fafa Island from Feb 4-9. QSL via homecall (d/B/LoTW/online log).

OC-086, KH0, Northern Mariana Islands: Bob,5B4AGN, will sign KH0/G3ZEM from
Saipan (USI NI002S) from Feb 9-16. QSL via M0URX (bureau/direct).

OC-139, VK5, SA State East Centre Group: Andrey,VK5MAV/6, plans to show up
from Kangaroo Island from Feb 15-21. QSL via homecall (bureau/direct).

SA-046, PY7, Pernambuco State Group: Members of the "Casa do Radioamador de
Pernambuco" (CRAPE) will sign PY7CRA from Itamaraca from Feb 11-13.
QSL via PY7CRA (bureau/direct).

SA-099, PJ2, Curacao Islands: EA1PP, EB1HF and EC1DPM want to be QRV as
PJ2/EA1PP from Curacao Island from Feb 11-16. QSL via EA1PP.

SOUTH SUDAN TO BECOME A NEW DXCC ENTITY?

As stated earlier there was a referendum held in Sudan to find out whether
the south of the country should become an own country. With an overwhelming
majority of more than 99 % the population voted for the separation of the
south. South Sudan was an own DXCC counter before and may find its way onto
the DXCC Entity List again soon.
More information about the referendum can be found online at:
http://www.bbc.co.uk/news/world-africa-12201063

MORE THAN 30 MILLION QSOs IN THE DARC CONTEST LOGBOOK (DCL)

The number of QSOs which can be confirmed in the German DARC Contest Logbook
increased to more than 30 million QSOs in January. This makes the German
DARC Contest Logbook nearly as big as the American Logbook of the World
which has 36 million QSOs in it. A big part of the increase comes from the
CQ WPX Contests with the logs made available by the contest manager K5ZD.

The WAE Contest logs of the past year extend the database as well and makes the application of awards as easy as some clicks. Until now there have been 1.422 awards issued including the Worked All Continents (WAC) with 308 awwards. All in all this is a positive result after one year operation of the German DARC Contest Logbook (DCL).
More information can be found on the website: http://www.dxhf.darc.de/~dcl

ARISSat-1 ARRIVES AT THE INTERNATIONAL SPACE STATION (ISS)

A Russian Progress transporter of the type Typ M-09M docked to the ISS on Jan 30 with the new amateur radio satellite ARISSat-1 onboard. If all plans go well the satellite will be put to space on Feb 16.

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WINQSL), DJ5AV, DK1MAX, DK8JB, DL1MDV, DL1SBF, DL7VOA, F4AJQ, F6AJA & Les Nouvelles DX, F5NQL, JA1TRC, NG3K and others.

The German PDF version can be found on the DARC homepage at:

RAC Bulletin 2011-003RAC Field Organization Review - VPFS Council announces appointments.
2011-02-08

As you may be aware, in November 2010 a review of the RAC Field Organization was begun to research and reform many aspects of the ARES in Canada. We have been meeting regularly by teleconference, and I would like to thank the many volunteers who have come forward. I am especially pleased to announce the following appointments:

Chairman of the "Mission" working group (WG) - Garry Jacobs VE6CIA - Section Manager Manitoba (Advisor - Doug Mein VA3DM)

Chairman of the "Training Specification" working group (WG) - Allan Boyd VE3AJB - Section Manager Ontario (Advisor - Ian Snow VA3QT)

Chairman of the "Census" working group (WG) - James King VE3ETZ
Secretary - Peter Wetton VA3PRW

Many thanks to all of you for agreeing to assist with this important project. Please watch the RAC website, bulletins and the RAC Blog for +updates as this project moves forward.

Special Event Staion VY1T - Teslin Historical and Museum
Society . Grand Opening of Aeradio Exhibit.
2011-02-08

The VY1T Special Event Station will be on the air from June 29,
2011 to July 1, 2011 for the Grand Opening of Aeradio Exhibit at the
Teslin Historical and Museum Society in Teslin, YT.

VY1EI Eric our resident contester, will use VY1T on June 29th from
Whitehorse. Club Station VY1T will be on the air from Teslin
Yukon, at the George Johnson Museum June 30th from early morning
to late afternoon. VY1T will be on the air from Whitehorse on Canada
Day as a club station. QSL will be available

On June 30th please find us on 20 meters around 14.180 or so, also may
try 14.140

QSL via Hugh Henderson, VY1EEN at P.O. Box 33062, Whitehorse,
YT Y1A 5Y5

More information to be found on the Yukon Amateur Radio Association
website at <http://www.yara.ca/> or contact Ron McFadyen at
<mcfadyen@northwestel.net>

* * * * * *

On June 30th 2011, The Teslin Historical and Museum Society, owner and
operator of the George Johnston Museum, Mile 804 Alaska Highway,
Teslin, will host a large gathering to celebrate the Grand Opening of
its historical and (now) unique Aeradio Navigation Range Building
(1941), with its interior exhibits.

The exhibits tell the story of Teslin from 1940-55 when its quiet and
simple northern village life was overturned with the coming of RCAF
Teslin base, the Aeradio Navigation Range, and the Alcan Highway.
The story is told with transmitters, other artefacts, text and
photographs inside a rare 1941 radio range air navigation building.

We would be delighted if Yukon ham operators, former DOT telegraphers,
amateur radio and radio telecommunication enthusiasts would attend the
Opening. We feel that this is appropriate because DOT staff of RCAF
Teslin not only handled hundreds of thousands, perhaps millions, of
radio messages from 1940-55 but because they were avid amateur radio
hams on their off duty hours. They controlled this aeradio building
and were central to Teslin's wartime role.

The Society will welcome dignitaries and guests, such as yourselves, to Teslin for a formal ribbon-cutting, a sit-down traditional Dominion Day Silver Tea, to view other new exhibits inside the Museum, a display of ham radio (so popular in the 1940s) and other events recalling that era in Teslin. Guests will be invited to "make a day of it" and visit the local high-quality Yukon Wildlife Gallery and Teslin Tlingit Council's elegant Heritage Centre exhibits. This invitation is a preview to the formal invitation to be sent in Spring of 2011.

Should you wish to arrange overnight accommodation, please contact Yukon Motel (1 867- 390 2443), Teslin Lake Motel (-390 2521) or Dawson Peaks (-390-2244) for a selection of rooms, cabins and meals. Teslin Lake offers superb trout, grayling, burbot and pike fishing. Charters and leisure boat rides are available. Excursions for small groups can be arranged by the Museum.

LATEST Update from the C56-Team, dated 2011-02-06: C56EME will be
QRV soon from The Gambia (Locator: IK13ql) Rig is 2 x 8 Xpol yagi,
TS-2000, WA2ODO preamp and enough EME power. Frequency: TX/RX
144.124 MHz. C56EME always first. We'll also take a small 70cm
setup (23 elem. yagi) with us hoping to get some big guns in our
log. We leave February 9th and build up the station before the
weekend. We try to put our first signals Friday February 11th to
the moon. KYFC. We want to be active at least during two whole
weekends. The first weekend the conditions will be poor to
moderate, so all big guns can be worked easily, starting Febr. 15th
the condx will become excellent! and at that time we have plenty of
time to concentrate us on the weaker ones. And you know: we'll never
give up untill a QSO has been made! Last operation presumably
February 21st There's a good possibility for internet/loggers...
If so, we will connect to Nï¿½UK so now and than. We also want to
make small impressions on YouTube on a regular basis if possible.
See our website http://www.emelogger.com/gambia with the latest
updates/log/news and further info about the team members.

Frank DH7FB & Bernd DF2ZC qrv from GD in april 2011
Hello All, as announced already in 2010 Frank DH7FB and Bernd
DF2ZC are activating the Isle of Man (DXCC GD) this year.
We will be QRV from IO74RH, the Close Taggart cottages
http://www.closetaggart.co.uk/ The schedule is: 8/9 April
transfer from Berlin respectively JO30RN via Dunkerque " Dover "
Oxford (where we ll stay the night) " Heysham " Douglas/Isle of

Man to the DXpedition location where we should arrive around 1800Z
on the 9th. The following morning we ll set up the equipment and
should be ready by moonrise on the 10th which is at 0930Z. Our
final activity will be moonset on the 13th (0300Z) unless we deem
it necessary to be QRV also from moonrise on the 13th (1330Z) for
another two hours or so before we break down the station.

** E3, ERITREA Expedition in 2012 **

It looks like a E30 DXpedition is planned for 2012. The last
operation, E30GA, took place from Asmara in November 1998.
Currently the information is limited -- no operators and specific
dates were provided. The only thing available via the below Web
page is activity will be on 160-6 meters, including 30/17/12 meter
bands, with operations on CW, SSB and RTTY. The unknown team will
have at least 4 stations on the air at the same time on different
bands and modes. The callsign is also not clear on the Web page (is
it E30A or E30AA). However, the below Web page states, that the
QSL Manager for E30A is S52RU. The Web for the 2012 DXpedition
(still under construction) is: www.seecc.net/Eritrea2012/index.html
There is a survey for "bands needs" available on the Web page.
Hopefully, more info will be forthcoming. Stay tuned!
SOURCE: Ohio/Penn DX Bulletin #997

** 4A4A DXpedition - Revillagigedo (XF4) **

Dear friends: The Revillagigedo (XF4) March 2011 DXpediton has been
finally officially announced. The assigned callsign is "4A4A". See
the web site: http://www.revillagigedo2011.com/ The team leader,
and expedition organizer, is Marcos, XE1B and the QSL manager is
David: EB7DX (see: http://www.eb7dx.com). Confirmation will only be
DIRECT and LOTW. A team of 9 operators (see the official web site
for operators details) will operate from "Isla Socorro" from the
4th to the 19th of March 2011. Isla Socorro, iota NA-030, (off.
"Benito Juarez" island) is located -aprox- at longitude 111ï¿½ West
and latitude 18ï¿½ 46ï¿½ North. WAZ zone 6. ITU zone 10. Loc is DK48MS
Because propagation conditions are still low or average we must
make an special effort to optimize the DX windows. I have prepared
some "propagation movies" (one per band) for Revillagigedo to help
those with less experience estimate the best times/bands to work
4A4A. You can see the movies in my YouTube "channel":
http://www.youtube.com/user/EA4AK - Read all in details at:

141. LB573 - Rotating Amber Light Bill Hearing (was Re: Legislative Update (was Re: LB719 Hearing (was Re: Flashing Light Bill Amendment Introduced (Nebraska))))

Newsgroup: rec.radio.amateur.misc
Date: 2011-02-10 14:47:25 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20110210133811.06AC420A49@bmail.arrl.org>
Source record: 4831
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,oma.general,nebr.misc,rec.radio.info

This is a "heads-up" that the bill to allow Nebraska Storm Spotters to use flashing amber lights will be reviewed at a hearing by the Transportation and Telecommunications Committee on February 15, 2011.

The hearing is scheduled for 1:30pm at the Capitol in Room 1113.

You can get a pdf copy of the bill at the following URLs:

The Nebraska State Legislature website:

http://nebraskalegislature.gov/bills/view_bill.php?DocumentID=12373

or from my website:

http://www.ctwsoft.com/arrlne/LB573.pdf

This bill follows up on an attempt made last session to modify a new law to allow Storm Spotters to use flashing amber lights. It has been reviewed by ARRL's legislative affairs office. I've received both positive and negative comments from hams in Nebraska. These were all thoughtful and had merit. Whether for or against the bill, you can make suggestions to modify the bill and improve any resulting law.

If you would like to testify in person about LB573, your contributions would be appreciated. If you would like to submit comments in writing (via email), please follow the advice of Jim Harper, KCØSHZ, that I emailed earlier. Jim suggested:

1. Send your comments to the Chair of the Transportation and Telecommunications Committee, Sen. Fischer. Her email address is: dfischer@leg.ne.gov

2. Include the bill number (LB573) and the phrase "Testimony for the Record" in the subject line. Also indicate whether the testimony is in favor or opposed to the bill. For example, you can write

"LB573 - Testimony for the Record (in favor)" or "LB573 - Testimony for the Record (opposed)"

WIANEWS FOR WEEK COMMENCING FEB 13 2011.

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING FEBRUARY 13 2011.

PERTH IS BURNING

Our 160 meter rebroadcaster in Perth has told us how fires were burning in the
hills North and South of Perth, Rolystone repeater was still working for the
news relay, a fire fighter was injured when hit by a truck near Rolystone and
Tic Hill repeater was still working at this point in time.

CB UHF was change to CH 8 instead of CH 4 that stopped working last Sunday
evening, reports say fires were close to that repeater.

More than 60 homes have been destroyed and a fire-fighter injured in bushfires
burning out of control around Perth.

The bushfires are in the Perth hills to the east of the city, and at the edge
of the Swan Valley to the north

Your WIA news has not to date received any official WICEN news reports on
the recent floods cyclone nor fires but this report from the South African
equivalent of WICEN, HAMNET shows how the catastrophes' in VK is
world wide news.

HAMNET is a voluntary group of South African amateur radio operators who make their unique communication skills available to assist and help others in distress during and after disasters.

HAMNET is represented on the sub-committee of the South African Search & Rescue Organisation so as you see is a MOST respected organisation.

Listen now to this report from Hamnet's National Director, Francois Botha, ZS6BUU.

"Cyclone 'Yasi' was the reason why many towns on the Australian East Coast had to be evacuated with Townsville being hard hit.

It was calculated that as many as 30,000 houses could be flooded by the cyclone and damage could run into billions. Queensland as been the focus of attention for long time and amateur radio emergency operators were active in the 40M band monitoring the situation and prepared to pass traffic.

The cyclone has now changed into a 'tropical low' and headed west across Australia with warnings of flash floods in places like Alice Springs and Barkly who are normally very dry areas. People have been warned to be on the alert for at least the next 24 to 48 hours as the storm peters out over the mainland.

Reporting for Hamnet this is Francois Botha - ZS6BUU.

This written report in from VK4ZZ in Townville helps bring us up to date.

"Yasi spares Green Street club rooms but clobbers Mount Stuart.

Severe Tropical Yasi crossed the Queensland Cassowary Coast and tried its best to blow away the communities directly in line with its path on the coast and a fair way inland.

It decimated whole areas of electricity supply grids knocking out household and commercial mains supplies for an extended period.

At the TARC Club Rooms mains supply was cut however the club station was powered off the Townsville State Emergency Service HQ Emergency Power Supply for the duration of the outage. Only equipment casualties were the unfastening of one end of the long wire receiving antenna and the slight skewing of the VHF Co-Linear.

A different story unfolds however for the TARC Amateur Radio Repeater Site at Mount Stuart which also houses a commercial co-sitee and the SES CH1 Repeater.

Severe wind gusts took out the high tension mains supply cables for Mount Stuart in five places, with a forecast that repairs could take months. Those severe wind gusts also took out the VK4RAT 2metre Repeater Co-Linear antenna, breaking the antenna at the base and shredding the radome. Despite the damage the antenna was still serviceable right up until the repeater system reserve batteries going flat sometime on Monday afternoon February 7th.

With the regional repeater system silenced by lack of electrons, alternative arrangements have been put into place for local hams in the Townsville area to maintain contact on 146.5MHz and 439MHz simplex FM and there is also an active VHF USB net on 144.150MHz from 2130UTC daily.

The TARC WICEN VHF repeater has been brought online, located at the VK4ZZ Borg Cube with a no break power supply and connection to an antenna well above the suburban tree line.

The repeater frequency is 147.150MHz with positive 600kHz shift.

The Sunday Night NQ Net Retransmission will utilise this repeater until further notice".

Now up the road apiece to Dale VK4DMC.

"G'day again, this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

Yes we're still here - YASI did her best to blow us away but Far North Queensland hams are a resilient lot. We survived, albeit some of us suffering various degrees of damage.

Category 5 Tropical Cyclone Yasi crossed the coast near Mission Beach south of Cairns in the early hours of Wednesday morning packing wind speeds of around 295 kph. The cyclone then travelled inland passing over the Atherton Tablelands and areas to the south including Ingham and Townsville before heading west.

Local amateurs were well prepared for this event, antennas were lowered, emergency power and transceivers setup and tested as well as ensuring that their homes were secure, memories of cyclone Larry in 2006 are still fresh in our minds.

Some local amateurs evacuated to safe centres. JohnVK4JKL, Gary VK4FD, Jeff VK4BOF, Paul VK4ZJD to name just a few. They were stranded then due to flooded rivers and blocked roads.

Fortunately reports from FNQ hams have been positive with little or minor damage being wrought by Yasi. Trees down, gardens wrecked and in a couple of cases towers and antennas smashed. Wind speeds of 200kph were reported in Atherton.

Paul VK4ZJD who lives at Tully Heads was extremely fortunate with his house being only one of a few in the area that survived and with relatively minor damage. A shed was wrecked as well as the garden being totally redesigned into a twisted mess with mud and sand everywhere. Paul was back on air the next day.

Amateurs living on the coast received the brunt of the cyclone. Areas mainly to the south of Innisfail including the Tully region, Cardwell and Ingham were seriously affected. Townsville also experienced cyclonic conditions but with lesser wind speeds and fortunately with no major damage being reported. Many areas suffered and are still suffering significant power interruptions and also loss of other essential services such as water and phone etc.

It was fantastic to see the response from fellow amateurs who set up listening watches mainly on 40 and 80 metres in particular the guys from Rockhampton who set up a station at the top of the Mt. Morgan range and were there all night. Also stations in Atherton, Townsville, Mackay, Toowoomba and Brisbane were there throughout to lend a hand with emergency traffic if needed. Well done to all and it was comforting for those of us in the path of Yasi to know that you were there and chat with you from time to time. Thanks Guys for the sterling effort.

Visit the TREC website at www.treclub.org.au for club information and you can also download the latest monthly news in TREC-NEWS.

This has been Dale VK4DMC and you are listening to the WIA news.

Central Coast Amateur Radio Club Field day at Wyong

Hello everyone, and welcome from the members of the Central Coast Amateur Radio Club, my name is Rod - VK2FVRJ

There only 2 weeks to go until Amateur Radio's Big Day out

The CCARC Field day will be held at Wyong Race course on Sunday 27th February

Admission is Adults $12 with free admission for those under 17.

Special Note To ease your entry to the Race Course could you please have the correct entry fee ready for the gate keepers.

Gates will open at 6.30 am to allow entry and setup for Traders / Exhibitors and Flea Marketeers

The Trader / Exhibitor areas will open to the public at 9am.

The Bistro will open at 8am for the early arrivals.

Most major suppliers of amateur radio and electronic equipment will be there as will representatives of various amateur radio groups, clubs and emergency organisations.

There will also be displays from WIRES and the Central Coast Pottery Society.

Amateur radio examinations will be conducted on the day by Brian Kelly who can be contacted on 04 1865 9043 for further information.

All this, plus raffles, seminars, free tea and coffee.

For help on the day, there will directions and information on the local VHF repeater, 146.725MHz, with a 91.5 sub tone.

For further information and regular updates, please go to the Field Day website, www.fieldday.org.au or email Central Coast Amateur Radio Club ccarc@ccarc.org.au

So don't miss out! Come along and grab a bargain!

CCARC Field Day Dinner

To be held at Club Riverside - Wyong Bowling Club in Panonia Rd Wyong, on Saturday 26th February commencing at 6pm.

Dinner will be a 2 course buffet with drinks at bar prices.

Dinner bookings are essential, please contact the Central Coast Amateur Radio Club on 02 4340 2500 by Thursday the 17 February at the absolute latest

In the case of insufficient numbers for the buffet dinner we may have to revert to ordering your own meal from the bistro.

JUST TO REPEAT

Sydney based 2 metre beacon VK2RSY was off line earlier this month following a failure in the PA stage. It was restored last Monday.

It operates on 144.420 MHz in the CW mode.

Reports on this beacon or any other of the VK2RSY systems from 10 metres through to 23 centimetres are always welcome and can be sent by email to callbacks@arnsw.org.au

or by mail to P. O. Box 6044
Dural Delivery Centre
NSW 2158

LOKI - great mischief-maker from Norse mythology.

Loki is the name of the edge of space balloon experiment that Tamworth Radio Club members & Tamworth Oxley Scout members will be launching in the coming weeks.

Loki-1 is to be a balloon filled with hydrogen that will carry a 1 kilogram payload of:
• APRS equipment for tracking & flight data,
• A camera set to take photo's at 1 minute intervals,
• Sensors to record temp & radiation
• Paper aircraft that will be dropped from a height of approx. 30 kilometres with information on them from the members of the Tamworth Oxley Scout Group.

• OH AND THE PASSENGER.. 1 cockroach has been suggested.

This is the first time the Tamworth Radio Club has taken on a project like this. The local scout group when asked if they wished to be involved responded with so much enthusiasm it was hard to keep everyone calm. (the larger adult type kids seemed to be the most excited). The comment of "can we really do this!!" was heard more than once.

The Tamworth radio club has installed 7 ground stations around the North West and New England regions of NSW that will be used to receive APRS data from LOKI-1 then transferring this to the internet for live tracking via the APRS network. It is expected that LOKI-1 will reach an altitude of 30 kilometres or 100,000 feet in the old scale giving the craft a radio horizon of 700 kilometres

As airspace is heavily regulated regarding its use negotiations are well in hand with Australia's airspace regulator the Civil Aviation Safety Authority, or CASA and air traffic controllers regarding a host of regulations that need to be complied with regarding the flight of the balloon through controlled airspace.

Non compliance with all the necessary regulations have large and hefty fines along with a optional holiday in gaol. Controlled airspace starts at various altitudes above ground depending on where you are, up to 60,000 feet. Most jet passenger aircraft cruise at an altitude between 25,000 and 40,000 feet. How would anyone get to see the photos if the little baby craft gets swallowed and shredded by a big nasty jet engine.

Up to date information can be found on Tamworth Radio Club's web site www.trci.org.au, then follow the links to projects.

VK2BOZ is publicity officer and VK2YGV project director.

VK4 SILENT KEYS @ 2010 - 2011 QAC YEAR

VK4MWT Tom Bowden November 14 2010 Advised by Gavin VK4ZZ
VK4SS Alan Shawsmith November 23 2010 Advised by Stephen VK4JSS
VK4CK Colin King December 30 2010 Advised by Gary VK4AR
VK4AMO Mike O'Callaghan January 02 2011 advised by Dale VK4DMC
VK4HER Dawn Sebbens January 09 2011 advised by Margaret VK4AOE
VK4DI Len Effeney February 01 2011 advised by Clive VK4ACC

Tuesday 1st February 2011 Len Effeney VK4DI of Rockhampton became Silent Key.

At the age of 83, Len was one of the "old guard", being licensed for approximately 65 years, throughout which time he continued his membership of the Wireless Institute of Australia.

CW on the HF bands remained his passion and forte and a fellow club member described his transmissions as "music".

He was a family man, married with six sons and one daughter, with at least three sons obtaining amateur licences.

Len worked in the railway for a number of years with several children completing university qualifications, quite unusual in those days and an indication of Len and his wife Pauline's vision.

Although Len's health had failed markedly, he still attended the Queensland President's Luncheon last November where he was presented with a WIA long service medal by WIA President Michael Owen VK3KI.

Len's Funeral Service was held on 7th February at St. Peters Catholic Church, Rockhampton, prior to a private family committal.

Vale Leonard William (Len) Effeney VK4DI, Silent Key.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Just after the turn of the century, the insurance industry released the findings of a study it had commissioned. This told of the expected increase in severe weather conditions, in the coming years. Almost a decade on we are grappling with summer fires and the weeping of La Nina. This is all too in the face.

Until now, it seems this report has gathered dust under the vollies of climate change debates. Even the position of the amateur radio community in the civil defence structure seems to have waned and government agencies have been equipped with their own communications infrastructure.

One thing that remains true of the amateur fraternity is that the hobby provides a skill base of knowledge on procedures and technology. The new WIA emcom certificate course is designed to build on that base and allow first responders to be relieved and deployed outside of the comms centre.

Some of the students in this course have told me of the enthusiasm they are finding for a new way of aiding their community. If you're old enough, remember the refrain "times they are changing".

I'm Geoff Emery and that's what I think....how about you?

CLUBBING - TO SUPPLY NEWS ITEMS:-
email qnews@wia.org.au

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

I'm Trevor Taege, VK4BAT with news from the Gympie Communications & Electronics Group:

Weather permitting, the Gympie Group will again be at Mt. Wolvi for this year's John Moyle Memorial Field Day Contest. If the forecast is reasonable, the Club will go for a 24 hour stint on the Mountain. If the weather is marginal, a

6 hour contest entry will be submitted as was the case last year.

The Gympie 2 metre repeater continues to operate well on Mt. Boulder but with still just an occasional burst of commercial interference.
The members continue to work to improve the situation whilst trying to avoid going to CTCSS tone access.
It's been difficult because of two commercial frequencies having a 600 KHz channel spacing. It's been proven that when the right combination of transmitters are on, the mixing is most likely occurring in the adjacent commercial site only a few metres away. Work progresses as time and weather allows but each change needs a few weeks of test running because the problem is now rarely heard. Thanks goes to the Gladstone Group who have tuned and sent down a dual port ferrite isolator to help identify and eliminate the problem.
The solar powered repeater was fitted with brand new batteries in December and they're holding up very well especially during the extremely wet and overcast weather of late.

Welcome to Isaac, the Club's newest member and congratulations on that brand new F call - VK4FIBN.

The next meeting of the Gympie Communications and Electronics Group will be on Thursday 3rd of March but please check our website or with a member as by then there may be a new location for meetings.

For Gympie Area News, I'm Trevor Taege, VK4BAT.

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

Greetings from the Rockhampton and District Amateur Radio Club, The RADAR Club. I'm Les VK4VIL.

While Cyclone Yasi ravaged North Queensland recently, RADAR Club members staged a combined effort to provide radio support if needed.

As the cyclone approached the coast, an HF Listening Post, suitable for receiving QRP signals was set up on the Mt Morgan Range, west of Rockhampton. Dave, VK4DJC who regularly frequents the site, coordinated operations and was assisted by Jason VK4FJGS and Jack VK4JRC in setting up the camp and portable equipment and ensuing non-stop surveillance overnight and well into the next morning.

Ray VK4HOT completed a lone overnight vigil at the Club's Heritage Village station VK4CHV while Mike VK4LMB, Frank VK4FLR, Jeff VK4NJB monitored from their home QTHs.

The RADAR club effort was co-ordinated with VK4BS Howard at Kuranda and Gavin VK4ZZ in Townsville. Contacts were made with Dale VK4DMC of Atherton via their club station site during the cyclone and liaison via Malcolm VK4ZMM in Brisbane was also carried out.

Sausage Sizzle.

Yesterday, RADAR club members conducted a sausage sizzle at Rockhampton Office Works.

Adam VK4MTJ and Andrea VK4FROG co-ordinated this event as the clubs initial fundraiser for 2011. A good number of members attended to assist and no doubt extend the profits.

On a sad note, the club extends deep sympathy to the family of radio stalwart Len Effeney, VK4DI who went silent key on 1st February. Len would have no doubt held an amateur licence for longer than any other operator in the area.

Until next time, this has been Les VK4VIL on behalf of the Rockhampton and District Amateur Radio Club.

VK8

News from the Darwin amateur radio club.

G'day, this is spud vk8zwm president of the Darwin Amateur Radio club with the latest club news.

The weekly gatherings for a bickie, piece of granny cake and a cuppa continue on Thursday mornings around 10 am with good numbers. The club net is on Sunday evenings on 80 meters 3.555 starting around 5pm.

We have done a lot of work with the scouting movement in recent times resulting in 19 new licensees. We are working now to encourage them to get active with an activity evening on the 24th for starters for the Darwin venturers and rovers. The Humpty Doo venturers and guides will be having an antenna building and operating weekend not too far away and as well both groups will be operating stations in the John Moyle Memorial field day with club support.

Gary vk8bn has started an upgrade course at the clubrooms on Tuesday nights at 7pm with a good-sized eager class.

Expect to hear us pop up as vk8da during the national field day in April from the rapid creek shopping centre.

Stir of the week.

This comes from the massive variations in signal strength we get here from those south of the border during contests and contacts. There are often more than 10 s points variation in signals from stations no more than a few kilometres apart.

Spud says to those south of the border, put a pinch or two of salt in the water in the paint pot at the top of your piece of wet string you use as an antenna so we can hear you up here. It would be a great help.

Err after that, all I can say is catch ya later
This is spud vk8zwm in Darwin hooroo.

HOME OF THE GOOD GUYS

Last Sunday, Feb 6 a special VK4 flood relief delivery was taking place.

A group of people including members of the Illawarra Amateur Radio Society, were heading towards Grantham in Queensland. Grantham is the area known as ground zero for the devastating floods that recently occurred in SE VK4.

Many of the people in this area lost everything during the disaster.

Sarah Hart a local vk2 mum from the Ingleburn area decided to do something to help the children of the devastated region. Sarah started an appeal for donations of kids school back packs to give to the families of Grantham.

The appeal raised several hundred back packs chock-a-block full of rulers, exercise books, pens, pencils, erasers, calculators, drink bottle, lunch boxes and all sorts of other school requirements.

Sarah lobbied local business houses to provided printed flyers for the appeal, set up a web and facebook page to raise awareness of the appeal. Sarah contacted the Illawarra Amateur Radio Society for assistance to deliver the goods and track the where-a-bouts of the delivery so people that have donated to the cause, would know their contribution has arrived at the disaster region. The trek north to Queensland started early Feb 6, tracked by VK2VVV using APRS.

http://aprs.fi/vk2vvv-15

If any amateurs would like to contribute to the appeal they can call Ross, who is monitoring 145.375Mhz simplex as well as 7.070Mhz

Advised by Ross Vk2VVV via vk2news feb 6

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Exams available at Wyong HamFest Sunday February 27.

Amateur Radio New South Wales in conjunction with the Central Coast Amateur Radio Club will hold assessments with the first session at 7am, second session 10.30 am.

This is the fourth year that ARNSW has conducted exams at the Field Day.

A prior booking is desirable but not essential but you should make contact with the co-ordinator Brian Kelly to find out how the find the rooms, the costs and what is needed with the paperwork.

Brian's contact details are by mobile 0418 659 043 or
email to 3323wbk@tpg.com.au

There are currently about 20 people that have registered interest in upgrading to the standard or advanced class of licence and the NERG has decided to conduct a training course aimed to get everyone to the advanced level. We recommend this path as going the standard track adds an extra $70 for the exam and $42 for change of licence.

Looking at the syllabus for the two grades, you can see that there are only a few extra topics for the advanced. Of course, you can attend the classes and choose to do the standard exam, if you wish.

The classes will be held on the first, third, fourth and fifth (if one occurs) Thursday evenings of each month, commencing at 7:30 pm 17 Feb, and they will run for about 14 weeks. Classes will not be run on the normal NERG meeting nights.

Cost of the course will be $100, for club members. The cost of the exams from the WIA will be $70 each, one theory and one regulations. If you do not have a foundation licence then you will need to pass the practical assessment as well, another $65 to the WIA. Once you have passed these, there will be the licence fee of $65 or change of licence fee of $42.

Melbourne Upgrade Course

Arks Academy will run a combined Standard / Advanced upgrade course commencing Sunday 24th April. The course will be held in easy to reach Nunawading and will run for five Sundays with exams on Sunday 22nd May.

Places are limited and this will be the only course Arks will run this year so please book early to reserve your place.

As Always the course is free of charge

E-mail VK3DQ@wia.org.au

(John Fisher VK3DQ / VK3ARK)

MARYBOROUGH QUEENSLAND

Among the call-ins last week to Ray VK4TPT were two new Foundation licensees, VK4FKAS, Kim and VK4FODM, Owen.

Together with Isaac, VK4FIBN, they had passed the exam and assessment back on 30th December but had to wait until their licences came through due to the Christmas break.

We welcome them all to the airwaves.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

EMC Society withdraws as co-sponsor of IEEE BPL standard

Concerns over technical standards has forced a respected EMC Society to withdraw from co-sponsorship of an IEEE BPL standard.

BPL provides Internet access using mains electrical wiring and generates considerable Radio Pollution. This Pollution can not only ruin peoples' enjoyment of their favourite radio show but also potentially threaten emergency communications.

An ARRL news report says

Citing concerns about parts of its technical content, the IEEE EMC Society Standards Development Committee (SDCom) has voted to withdraw as the cosponsor of IEEE Standard for Power Line Communication Equipment -- Electromagnetic Compatibility (EMC) Requirements -- Testing and Measurement Methods (IEEE Standard 1775-2010).

According to ARRL Laboratory Manager and BPL guru Ed Hare, W1RFI, this decision came about soon after the IEEE Standards Board approved publication of the standard over the technical concerns of the SDCom. Hare is an SDCom member and is a member of the IEEE Working Group that developed the standard.

Read the full ARRL story

Voice of Russia on 7200 kHz

On the IARU Region 1 website, DJ9KR reports that the Voice of Russia is transmitting on the exclusive Amateur Radio frequency 7200 kHz.

The report says:

Since February 1st, 2011 the Russian BC Radio Station "Golos Rossiye" (Voice of Russia) is transmitting programs in Russian language on the exclusive Amateur Radio frequency 7200 kHz with quite high power.

This is causing very harmful interference to the Amateur Radio Service world wide, which has an exclusive allocation for the range 7000 - 7200 kHz.

The location of the transmitter is St. Petersburg, RUS.

Please inform your National Intruder watch man, intruders@wia.org.au

Sound file "Voice of Russia" (Golos Rossiye) on 7200 kHz:
www.iarums-r1.org/iarums/sound/vor1.wav

==========

NEWS FROM ARNEWSLINE USA

VIDEO DNA MAY PUT AN END TO MOVIE PIRACY

Video pirates beware. A new system called Video DNA may land you behind prison bars. Amateur Radio Newsline's Frank Haas, KB4T, has more:

Three Israeli researchers have come up with what they believe to be a sure fire way to end video piracy. Dr. Alex Bronstein working with his twin brother Michael and Israeli researcher Professor Ron Kimmel, has developed a way of treating video footage like DNA.

Dr. Bronstein who is with of Tel Aviv University's Department of Electrical Engineering says that it is not only members of the animal and plant kingdom that can have DNA. He says if a DNA test can identify and catch criminals, his group believes that a similar code might be applicable to video. Then if the code were copied and changed, it would be obvious to law enforcement.

As video does not have a real genetic code like members of the animal kingdom, Dr. Bronstein and his team created a DNA equivalent that can be applied to video files. The result is a unique DNA fingerprint for each individual movie anywhere on the planet. When scenes are altered, colours changed, or film is bootlegged on a camera at the movie theatre, the film can be tracked and traced on the Internet. And says Dr. Bronstein, like the films, the video thieves themselves

can be tracked and caught.

I'm Frank Haas, KB4T.

If the entertainment industry adopts this new video DNA coding, it could mean that a lot of video pirate could eventually be looking at the world from the other side of prison bars.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO
IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

TWEED residents will soon have local radio broadcasts giving detailed warnings about emergency conditions and road closures during a flood crisis.

Murwillumbah State Emergency Service controller Chris Chrisostomos has revealed local community station Big Country Radio FM 88 had agreed to set up broadcasting equipment in the SES Murwillumbah headquarters to give detailed local information during an emergency.

The "back-to-the-future" move, he said, would mirror a service once provided by a previous local-based radio service and could complement ABC radio information which tended to be more regional.

In particular it would allow the SES to broadcast information about flood heights and the expected impact on various Tweed Valley communities, providing home owners, farms and business people up-to-date advice on precautions to take.

"It gives us an extra ability to distribute information," Mr Chrisostomos said.

SPECIAL INTEREST GROUPS - VHF AND ABOVE

The news is that in South-East Queensland, local interest is growing in having gear available for the microwave amateur radio bands - 1296 MHz and the many bands above. And this is not just for getting the gear made and going, but also for getting out and about to use it on air.

The Brisbane VHF Group recognises this and is organising a time when local microwaving amateurs will be out at public places using their gear, not just for their own fun, but so that anyone else who may be interested can come and see what makes this aspect of amateur radio the great fun that it is!

Weather permitting, this will be on Sunday the 6th of March, just three weeks away. The Brisbane VHF Group is arranging the day to show off the excellent aspects and fun of amateur radio at microwave frequencies. It's not a contest - it's just an opportunity to show off this different and exciting aspect of our great hobby.

To make it possible for as many as possible to participate, different microwaving amateurs will be active from several different locations. >From these sites, contacts will be demonstrated with other portable and/or home stations on 1296 MHz, 2403 MHz, and 10.3 GHz. Other gear will be available for 3.4 GHz, 5.7 GHz, 24 GHz and 47 GHz (but not necessarily at all locations!)

Liaison on the day will be on the Group's Mt Glorious 2 metre repeater 147 MHz.

We've made a date claim of Sunday the 6th of March through a nominal time period of 10:00 a.m. to 2:00 p.m., starting just after the morning QNews broadcast. One central location on the southside is Mount Gravatt. Locations to the North and West of Brisbane will be used but the exact locations will be decided soon and publicised.

Contact club president Doug, VK4OE on 3391 5526 or at uwaves@bigpond.com

All amateurs and other interested folk are invited to come along and see microwave amateur radio in action!

REWIND

Broadcasting on the USA AM Band.

1921 TO 1926 The broadcasting industry in the United States was originally regulated by the Department of Commerce. Initially all stations shared a single "entertainment" wavelength of 360 meters, roughly 833 kilohertz.

>From December, 1921 to May 15, 1923 many stations were also authorized use of 485 meters, 619 kHz for broadcasting Market and Weather reports.

This meant that complicated, and hard fought, timesharing agreements had to be negotiated. In late September of 1922, a second entertainment wavelength of 400 meters (750 kHz) was assigned for better quality, higher powered stations.

Stations on the new wavelength were designated "Class B" outlets, while those on 360 became known as "Class A" stations.

On May 15, 1923 the broadcasting service was greatly expanded, with the designation of a band of frequencies, in 10 kilohertz steps, from 550 to 1350 kilohertz. 550 to 1040 kHz were set aside for Class B stations.

Class A stations were assigned to frequencies from 1050 to 1350 kHz. Existing stations were permitted to stay at 360 meters, as "Class C" stations.

One of the world's BEST web sites for "old radio" is just that, www.oldradio.com

==> + AMATEUR RADIO AND THE LAW : MIXED DECISION FROM THE CALIFORNIA
COURT OF APPEALS IN PALMDALE, CALIFORNIA ANTENNA CASE

On January 27, the California Court of Appeals, Second Appellate
District, issued its Opinion in the antenna case of Alec Zubarau, WB6X.
In several respects, it is a win for Amateur Radio in California;
however, the Court decreed that Zubarau was not entitled to his HF
antenna, and said that his vertical antenna would suffice as a
substitute for it.
```

The Court found that the Palmdale antenna ordinance, as it pertained to the height limit for vertical antennas, was "unenforceable" because it allowed a radio amateur to have a vertical antenna up to 75 feet high when measured from the ground but limited the "active element of the antenna array" to 30 feet. The ordinance did not define "array" or "active element" and did not specify from where the 30 permitted feet for such "array" was to be measured. The Court found that if even one reasonable interpretation of the ordinance could be found, the ordinance could be upheld, but that in this case, no one could understand what the limitations were and how they could be applied. That portion of the City's ordinance was therefore unconstitutional and unenforceable. Read more here <http://www.arrl.org/news/mixed-decision-from-the-california-court-of-appeals-in-palmdale-california-antenna-case>.

==> + BOARD OF DIRECTORS: ARRL BOARD SETS LEGISLATIVE AGENDA AT 2011 ANNUAL MEETING

The ARRL Board of Directors held its 2011 Annual Meeting January 21-22, 2011 in Windsor, Connecticut, under the chairmanship of President Kay Craigie, N3KN. At the meeting, the Board set the legislative agenda for the current Congressional session, approved the 2011 operating plan, looked at the benefits of electronic publishing of ARRL periodicals and more. Read more here <http://www.arrl.org/news/arrl-board-sets-legislative-agenda-at-2011-annual-meeting>.

==> + ON THE AIR: THE ARRL INTERNATIONAL DX CW CONTEST IS JUST ONE WEEK AWAY!

The weekend of February 19-20 is prime time for CW DXing as the 2011 ARRL International DX CW Contest <http://www.arrl.org/arrl-dx> takes to the airwaves. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, stations in the US and Canada work only DX stations -- Alaska and Hawaii are considered DX for this contest -- and DX stations only work the US and Canada. DX stations will be trying to make QSOs with all US states and Canadian provinces. The contest exchange is simple: US and Canadian stations send a signal report and their state or province, while DX stations send a signal report and the amount of power they are transmitting with. Read more here <http://www.arrl.org/news/the-arrl-international-dx-cw-contest-is-just-one-week-away>.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 TO BE DEPLOYED FROM ISS NEXT WEEK; WATCH LIVE ON NASA TV

Expedition 26 Flight Engineers Dmitry Kondratyev and Oleg Skripochka, RN3FU, will step outside the International Space Station (ISS) on Wednesday, February 16. While in space, they will install and retrieve experiments on the Russian segment of the complex and deploy ARISSat-1 <http://www.arrl.org/amateur-radio-on-the-international-space-station>, a small ham radio satellite. NASA TV coverage will begin at 6:45 AM (CST), while the extra-vehicular activity -- commonly called a

spacewalk -- will begin about 30 minutes later. The spacewalk will be the second for Kondratyev, who will wear the spacesuit marked with red stripes, and the third for Skripochka, who will wear the suit with blue stripes.

During the nearly six hour spacewalk, Kondratyev and Skripochka will deploy an experiment called ARISSat-1, a boxy 57-pound nanosatellite that houses congratulatory messages commemorating the 50th anniversary of Yuri Gagarin's launch to become the first human in space. The ham radio transmitter will enable communications with Amateur Radio operators around the world for three to six months. It is the first of a series of educational satellites being developed in a partnership with the Radio Amateur Satellite Corp, the NASA Office of Education International Space Station National Lab Project, the Amateur Radio on the International Space Station (ARISS <http://www.rac.ca/ariss/oindex.htm/>) program and RSC-Energia.

The two cosmonauts will also install two experiments: One will collect information useful in seismic forecasts and earthquake predictions, and the second will look at gamma splashes and optical radiation during terrestrial lightning and thunderstorms. The spacewalkers also will retrieve a pair of panels exposed to space as part of an experiment to identify the best materials for building long-duration spacecraft.

You can watch live online <http://www.nasa.gov/multimedia/nasatv/index.html> on the NASA TV Public and Media channels, or on your television set. Contact your local provider for the NASA TV channel in your area. -- Thanks to NASA for the information

==> FCC: FCC ADDS NEW COUNTRY TO CEPT RECIPROCAL AGREEMENT FOR AMATEURS

On Monday, February 7, the FCC released a Public Notice, adding a new country to the CEPT reciprocal operating arrangements for US citizens who hold an FCC-issued General, Advanced or Amateur Extra class Amateur Radio licenses. US hams may now operate in Montenegro, as well as the other countries covered by the European Conference of Postal and Telecommunications Administrations (CEPT), subject to the regulations in force in the country visited, to operate in those countries. CEPT has also set up Web sites that list all countries covered by reciprocal agreements. Read more here <http://www.arrl.org/news/fcc-adds-new-country-to-cept-reciprocal-agreement-for-amateurs>.

==> + GET READY FOR THE MARCH ISSUE OF QST!

The March issue of QST -- our annual antenna issue! -- is jam-packed with all sorts of things that today's Amateur Radio operator needs. >From product reviews to experiments to contesting -- including antennas you can build yourself as well as a guide to buying your first commercial HF antenna -- this issue of QST has something for just about everyone.

With a multitude of articles on antennas -- ranging from antennas for HF, VHF and even antennas for hams with limited space, you are sure to find something to fit your needs. In his article "A Four Wire Steerable V Beam for 10 through 40 Meters," Sam Moore, NX5Z, shows how you can put a strong signal across the upper HF spectrum just where you want it. And if you're into the low bands? If your property doesn't have space for Beverages, check out "A Roof Mount for a Rotatable 160 Meter Receiving Loop" by Steve Lawrence, WB6RSE. And now that your antennas are up in the air, how do you make sure that they are tuned correctly? Check out "Using a Noise Bridge and Spectrum Scope to Adjust Your Antenna Tuner" by Walter G. Mellish, KC2KZJ, to learn how to measure and adjust your antenna without putting a signal on the air.

Amateur Radio has long been a partner on airplane and hot air balloon flights. But what about hang gliding? Join Bill Schell, W4UHE, and get the hang of operating while gliding in "Hang Gliding with Ham Radio." With all of today's social networking capabilities, conversation is a lost art. QST Editor Steve Ford, WB8IMY, takes a look at this in his article "The Art of Conversation." And speaking of conversation, many hams enjoy chatting on their local repeater system, but getting frequencies, offset and tone into VHF FM transceivers can be a challenge. In his article "Making Memories -- Programming Your Local Repeaters," Sumner Weisman, W1VIV, presents some ways to make this a bit easier.

ARRL Contributing Editor Rick Palm, K1CE, takes a look at the ICOM IC-80 handheld VHF transceiver and the ICOM IC-T70A handheld dual band transceiver in this month's Product Review. He calls the IC-80 a "rugged 2 meter handheld with attractive features for emergency communications, as well as daily use." In looking at the IC-T70A, Palm said this radio "is a solid dual band handheld transceiver that includes a wide range of features, yet is easy to operate." QST Contributing Editor Phil Salas, AD5X, checks out the Array Solutions VNA 2180 vector network analyzer. He says that it "brings powerful vector network analyzer capabilities to the home workshop. It harnesses the power of your computer for control and display functions, bringing the cost to a level comparable to surplus commercial equipment with unknown issues or accuracy."

Of course, there are the usual columns you know and expect in the March QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Technical Correspondence, Vintage Radio and more. Look for your March issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join>.

==> FOCUS ON YOUTH: ARRL SEEKS NEW YOUTH EDITOR

The ARRL has a proud tradition of promoting youth involvement in Amateur Radio. One of the ways we involve young people is through our Youth Editor. This person is responsible for writing a monthly column for the ARRL website about youth and youth activities within the

Amateur Radio Service. We are looking for a new Youth Editor. Do you know of someone who would be a good fit for this position? Maybe they hold leadership positions either in their Section or in their local club. The candidate must be an ARRL member and must keep their membership current throughout their tenure in the position. He or she will be required to write a monthly column of at least 1000 words and provide a minimum of three pictures (with captions) for each. For this, they will receive a small stipend for each column. Read more here <http://www.arrl.org/news/arrl-seeks-new-youth-editor>.

==> HAPPY VALENTINE'S DAY: LOVE IS ON-THE-AIR

Every once in a while, we will feature a story written that has been sent to us by a ham. This is one of those times. We hope you enjoy it.

Life can be funny at times. In high school, I was one of those kids who kept to themselves. I was so into the academic side of things that I only went out with a few girls. But there was one girl in school who every time she walked by, my heart would skip a beat. I never saw her with a boyfriend; she was one of the prettiest girls in school and all the guys were too afraid to ask her out. In our senior year, we had a math and English class together, and when we graduated, I joined the Navy.

I saw the world in the Navy. I spent some time overseas and from time to time, I wondered about that beautiful girl who I never asked out in high school. I was too busy with my naval career to settle down, always on the move with Special Ops. I spent 25 years in the Navy and when I retired, I was ready for my next career. I had some radioman experience in the Navy, so I got my Amateur Radio license and started work at a major communications company.

Years later, I found myself at a hamfest, looking for some new radio gear. I saw this radio I wanted back when I was a kid. I saw a guy pick it up and start to look at it. I ran over to the booth and waited for him to put it back on the table. He finally walked away so I asked how much the radio was and if it worked. The lady behind the table looked at me, told me the price and that the rig worked the last time she used it. Then we locked eyes. It was her! The girl from high school! I would know her face anywhere.

After the shock wore off, I asked her if this was her gear for sale. She told me that it was hers and her late husband's. She got her license back in high school and met him at a local club meeting. She told me that they had been married for 23 wonderful years and had one child who was now in the Navy. We talked for hours. She told me that she had had a crush on me back in high school, but was too afraid to ask me out; I told her I felt the same. After the hamfest, I helped her pack up the table and we went to get a bite to eat.

We talked all night, getting caught up on everyone we went to school with. Then she asked me if I had ever thought of her over the years and

if I still had feelings for her. Of course I said yes! After a few dates, I asked her to marry me and she said yes.

We have now been married 10 years and I can honestly say that I married my high school sweetheart. I looked over my station logs and found that years ago I had worked her in a contest, but I never knew it was her. Oh, about the radio that started the whole thing -- yes, it works! -- Paul Rios, KC6QLS, kc6qls@arrl.net

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of January -- looks at the ARRL Board of Directors 2011 Annual Meeting, legislative actions affecting the Amateur Radio Service, filings with the FCC over vanity and club call signs, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-30>.

==> + RADIO CLUB D'HAITI RECEIVES REPEATER FROM ARRL AND RADIO CLUB DOMINICANO

As part of the relief efforts after the earthquake in Haiti, the ARRL -- through its Ham Aid Program -- with the help of IARU Region 2 and the Radio Club Dominicano (RCD <http://www.radioclubdominicano.com/>), delivered a Vertex VXR-7000 <http://www.vertexstandard.com/ap/vxr-7000.html> repeater to the Radio Club d'Haiti. This repeater, part of the original equipment sent by the ARRL during the devastating Haitian earthquakes in January 2010 <http://www.arrl.org/news/arrl-sends-ham-aid-equipment-to-haiti>, will help with radio communications coverage in that devastated nation. Both the Radio Club Dominicano and the Radio Club d'Haiti are IARU Member-Societies. Read more here <http://www.arrl.org/news/radio-club-d-haiti-receives-repeater-from-arrl-and-radio-club-dominicano>.

==> ARRL ATLANTIC DIVISION TO HOST TWO WEBINARS IN FEBRUARY

Periodically, the ARRL's Atlantic Division hosts a "webinar" -- an interactive web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. During February, Atlantic Division Director Bill Edgar, N3LLR, will host two webinars for ARRL members, one on 503(c)(3) organizations and one on using Narrow Band Emergency Messaging Software (NBEMS) -- a set of programs used to send messages and files via Amateur Radio using an audio interface. Read more here <http://www.arrl.org/news/arrl-atlantic-division-to-host-two-webinars-in-febr uary>.

==> SOLAR UPDATE

Tad "The Sun rose over the shadows <http://www.gardendigest.com/zen/above.htm>" Cook, K7RA, reports: Seven different sunspot groups were visible over the past week; the high sunspot number in the past seven days was 71 on Tuesday. The average daily sunspot number more than doubled, rising over 24 points to 44.3 and the average daily solar flux was up nearly three points to 83.5. 71 is the highest sunspot number since May 5, 2010, when it was 77. Coincidentally, both February 8, 2010 and February 8, 2011 had a sunspot number of 71, and between those dates it was never higher except for 77 on May 5. NOAA/USAF predicts solar flux for February 10-20 at 88, 86, 84, 82, 82, 82, 82, 84, 88, 88 and 88. They predict a constant planetary A index of 5 through the end of the month, then 7, 10, 10 and 7 on March 1-4. Even though NOAA sees a constant and quiet geomagnetic environment through the end of the month, Geophysical Institute Prague sees it a little differently for February 11-17. They predict quiet on February 11-12, quiet to unsettled February 13, unsettled February 14-16 and quiet to unsettled February 17. Look for more information on the ARRL website on Friday, February 11. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Michael P. Garofalo's Master Chang San Feng <http://www.gardendigest.com/zen/above.htm>.

==> AMATEUR RADIO FUN: NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll include:

- Do you own an eBook reader?
- What type of product do you most like to see evaluated in QST Product Reviews and Short Takes?
- Has the severe weather damaged your antennas?
- How often do you attend the meetings of your local Amateur Radio club?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the May 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> DXCC NEWS: DXCC DESK APPROVES 9X0SP RWANDA 2010 DXPEDITION

ARRL DXCC Manager Bill Moore, NC1L, reports that the 9X0SP 2010 DXpedition to Rwanda has been approved for DXCC credit. "If you had cards that were recently rejected for this operation, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk," Moore said. "Please note

that due to extremely heavy e-mail, DXCC staff may not respond to your message. Once your record is updated, results will appear in Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) accounts or in the live, daily DXCC Standings <http://www.arrl.org/dxcc/>."

==> THIS WEEK ON THE RADIO

This week:

- February 12 -- Asia-Pacific Spring Sprint, FISTS Winter Sprint
- February 12-13 -- New Hampshire QSO Party, CQ WW RTTY WPX Contest, Dutch PACC Contest
- February 13 -- North American Sprint (SSB)
- February 14-18 -- School Club Roundup

Next week:

- February 18 -- NCCC Sprint Ladder
- February 18-19 -- Russian PSK WW Contest
- February 19 -- Feld Hell Sprint
- February 19-20 -- ARRL International DX Contest (CW) <http://www.arrl.org/arrl-dx>, AWA Amplitude Modulation QSO Party
- February 21 -- Run for the Bacon QRP Contest
- February 23 -- SKCC Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 11-13 -- ARRL Southeastern Division Convention <http://www.arrl.org/hamfests/southeastern-division-convention-orlando-hamcation>, Orlando, Florida
- February 18-19 -- ARRL Arizona State Convention <http://www.arrl.org/hamfests/arizona-state-convention-yuma-hamfest-emergency-preparedness-show>, Yuma, Arizona

Amateur Radio Newsline(tm) Report 1748 - February 11 2011

Amateur Radio Newsline report number 1748 with a release date of
Friday, February 11, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC clears the way for President Obama
to become the first residential voice of a national test of the
Emergency Alert System, VK hams look back on Typhoon Yasi, a new
broadcast intruder on 40 meters, a mixed decision in a Palmdale
California tower and antenna case and a new method to create terahertz
waves. Find out the details on Amateur Radio Newsline(tm) report
number 1748 coming your way right now.

(Billboard Cart Here)

RESCUE RADIO: PRESIDENT TO TAKE PART IN FCC APPROVED EAS TEST

The President of the United States will soon be taking part in a
national test of the of the Emergency Alert System. We have more in
this report:

--

The Federal Communications Commission has taken the necessary action
help pave the way for the first-ever Presidential alert to be aired
across the United States on the Nation's Emergency Alert System. This
as the regulatory agency voted on February 3rd to adopt a Third Report
and Order that sets forth rules that will facilitate the federal
government's efforts to conduct a national E-A-S test by transmitting a
Presidential Alert from Washington, D.C. to television and radio
broadcasters, cable systems and satellite service providers who will
then deliver the alert to the American public.

The national test will require EAS participants to be part of the
exercise and to receive and transmit a live code that includes a
Presidential alert message to their respective viewers and listeners.
The FCC, FEMA and the Nation Weather Service, in coordination with
E-A-S participants, will work together to launch a nationwide public
education and awareness campaign. This will include press statements,
workshops, regional outreach, and television and radio public service
announcements. All will be targeted to consumers in general, and more
specifically to persons with disabilities and seniors, as well as first
responders and state, local and tribal governments. The outreach will
help ensure that the American public is aware that the national test

will be conducted and the benefits of these kinds of public alerts in a real emergency.

For the Amateur Radio Newsline, I'm Brucew Tennant, K6PZW, in Los Angeles.

--

The FCC adds that the national test will also help determine the reliability of the Emergency Alert System and its effectiveness in notifying the public of emergencies and potential danger, both nationwide and regionally. (FCC)

**

RESCUE RADIO: HAM RADIO AND CYCLONE YASI - A FOLLOW-UP

A follow up to least weeks story about Cyclone Yasi that was ravaging Ausatralia's North-East area just at about the time we went to air. Graham Kemp, VK4BB, of the W-I-A News is in Brisbane with an update on the storm and the part radio amateurs played:

--

Hams have been keeping in touch via HF radio and keeping a vital link alive during the passage of one of the more fierce and expansive severe tropical cyclones to hit the North East coast of Australia in recent times. The system was so vast that it affected communities along a 900km stretch of coast and 500km inland.

Whilst making sure that their families and houses were safe, radio amateurs within the warning area and across the country kept in touch via HF Radio with a listening watch on Queensland WICEN frequency 7075 kHz and regular contact via the morning Gnarly Net on 3600 kHz and the afternoon Friendly Net on 7115 kHz. This regular contact has kept the communication lines open. Some 40 cellphone sites were damaged and some 400 had low fuel reserves.

Townsville hams have been monitoring the local repeaters along with the Atherton Tablelands hams. Rockhampton hams are monitoring the local repeaters along with 7075kHz and 3600kHz and Cairns hams are doing this as well.

Radio Amateurs living in the disaster area are now picking up the pieces, getting their stations back up and running as the Cyclone Season in Northern Australia is not over until the end of April and there might be another call to action during the next few months ahead.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

Also assisting are some 120 Queensland, Tasmanian and Victorian State Emergency Service personnel. They have headed north to assist with the

Cyclone Yasi recovery effort. (WIA News)

INTRUDER WATCH: VOICE OF RUSSIA ON 7.2 MHZ

Another broadcast interloper has shown up 40 meters. DJ9KR reports via the IARU Region 1 website that a station identified as the Voice of Russia has been heard on the exclusive Amateur Radio frequency 7 point 200 MHz. The report says that since February 1st, the Voice of Russia is transmitting programs in Russian language with high power and is causing very harmful interference to the amateur radio service all around the globe.

The location of the transmitter has been pegged at being in or near the Russian city of St. Petersburg. The transmissions are from 0800 to 1500 UTC.

Hams around the world are being asked to write their nations ham radio intruder watch coordinator and to ask that body to file a formal complaint with Russian telecommunications authorities. Ham radio has an exclusive allocation for 7 dot 0 to 7 point 2 MHz and no one other than hams are supposed to be heard in that frequency range. (IARU Region 1)

**

HAM RADIO IN SPACE: ARISSAT-1 READY FOR DEPLOYMENT

Hams world-wide are awaiting the deployment of ARISSat-1 ham radio satellite. This, from the ISS during a space walk slated for February 16th.

NASA will cover the event on NASA Select TV. Unfortunately, there has not been a final time during the launch spacewalk when the deployment of ARISSat-1 will occur.

Mealtime the ARISSat team says that it continuing to work on the arissat1 dot org website and adding information as its available. People can also follow ARISSat on Twitter as @Arissat1. (WA4SXM, ANS)

HAM RADIO AND SCOUTING: ARRL & BSA TIE KNOT IN MOU

The American Radio Relay League and the Boy Scouts of America have officially tied the knot of cooperation between the two groups. Amateur Radio Newsline welcomes Michael Grebert, KJ4ZZV who has the details:

--

After working together for nearly a century to provide Scouts with the ability to learn radio communication skills, Boy Scouts of America and the American Radio Relay League have officially teamed up by signing a memorandum of understanding. This document designates the ARRL as a key resource for K2BSA and Radio Merit Badge training at the BSA National Scout Jamboree and establishes the ARRL as the go-to source for Scouts interested in learning about and becoming involved in radio communication.

In addition to its National Scout Jamboree involvement, ARRL will continue to promote participation in the annual Jamboree on the Air event. ARRL will also serve as contributing editor to the Radio Merit Badge publication, will assist with the review, creation and modification of requirements as necessary, and will assist in developing course material, lesson plans, and other resources for teaching the Radio Merit Badge to Scouts. ARRL also will contribute to the content of the Electricity, Electronics, and Emergency Preparedness and Communications merit badge publications.

As its part of this strategic alliance, the Boy Scouts of America will encourage Scouts and Scouters to become familiar with opportunities for public and community service. It will also foster learning and personal growth through involvement in Amateur Radio.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, reporting from Music City, Nashville, Tennessee.

--

Boy Scouts of America Chief Scout Executive Bob Mazzuca and ARRL President Kay Craigie , N3KN, launched the partnership by holding a truly unique wireless communications meeting. Mazzuca joined Craigie virtually during an Internet video conference and document-signing ceremony. From separate locations, the pair also took the opportunity to talk about the importance of each organization to the ongoing development of the other. (ARRL, BSA)

RADIO LAW: MIXED DECISION IN PALMDALE CA ANTENNA CASE

It's a mixed decision in a Palmdale California Appellate court antenna and tower case ruling. This as the California Court of Appeals hands down its ruling in the matter of Alec Zubarau, WB6X versus the City of Palmdale.

The court made three decisions that affect Amateurs in California. First it found that part of the Palmdale ordinance was unconstitutional because it was vague and could not be understood by a reasonable

person. That part of the ordinance allowed an Amateur to have a vertical antenna up to 75 feet high when measured from the ground but limited the "active element of the antenna array" to 30 feet in height.

The court found that the ordinance did not define "array" or "active element" and did not say where the height of such array was measured from. After a number of questions were submitted regarding this ordinance, the court determined that no one could really understand what it meant and declared it unconstitutional. ARRL Volunteer Counsel Len Shaffer, WA6QHD, says that this part of the decision will affect only hams living in Palmdale.

The next issue decided by the court had to do with radio frequency interference. They said that only the Federal government could regulate RFI and any state or municipal law that tried to address it was preempted. That means it is not enforceable. Shaffer says that part of the decision affects hams throughout the state Shafer asks any California amateur whose municipality or county has an ordinance that limits Amateur Radio antennas or operations based on whether there is interference to consumer or other devices to contact Southwestern Division Vice-Director Marty Woll via e-mail at n6vi@arrl.org.

The final part of the decision had to do with whether Palmdale followed the law when they made Alec Zubarau take down his permitted tower but allowed him to keep a VHF/UHF vertical on his roof. The court said they thought this was a reasonable accommodation because it allowed him to be active in some part of amateur radio.

On this point Shaffer says that the decision is troubling. He says that he and his client are considering what options they may have regarding any further review of the issue. Shaffer adds that he will be conferring with various legal sources before any final determination is made. (N6VI)

**

RADIO OOPS: CELL COMPANY INSTALLS TOWER ON PRIVATE FRONT LAWN IN MOUNT SINAI, NY According to news reports a cellular telephone provider apparently crossed the line when without permission it installed a tower and antenna on the front lawn of a private home in Mount Sinai, New York.

Town resident Lori DiMarco told news reporters that she and her family were horrified when they walked out of their house and found that a cell tower had been constructed under the cover of darkness on their front lawn.

Also appalled was Town Of Brookhaven Highway Superintendent John Rouse. He termed the action by NextG Networks as being the height of corporate arrogance. Rouse said that if he has to get in a truck himself and take it down, it's coming down. And as a show of force, Rouse brought out a town bucket truck and threatened to rip down the mast and antenna if the company that installed it doesn't remove it within the next

several days.

In a statement, NextG admitted they installed the tower without the proper permits. It said that it sincerely apologizes to the DiMarco family and a pledge to do it's best to ensure that this does not happen again. However in the same statement, NextG also complained the town was taking too long to review its cell tower applications.

The company says it will take the tower down. As we go to air its unknown if the DiMarco family or the town are planning any legal action against NextG.

More on this bizarre story is on line at several websites including www.wsbt.com/news/wpix-cell-fight,0,7995185.story (Published news reports)

HAM RADIO ON THE BOOKSHELF: WE BE BIG - A BOOK ABOUT BROADCASTING AND HAM RADIO

A new book from a couple of New York Times bestselling authors who are also nationally-syndicated broadcast personalities will offer readers unprecedented exposure to the hobby of amateur radio.

"We Be Big" from Thomas Nelson Publishers is the autobiography of Rick Burgess and Bill "Bubba" Bussey, whose morning radio show is heard in over fifty cities across America as well as on XM satellite radio. The team has previously published several books that landed near the top on the New York Times bestseller list. Their highly successful Rick and Bubba Show feature their down-home view on life in a spirited and fun presentation.

The amateur radio connection comes from several angles. Fitst, Bill "Bubba" Bussey is a longtime active ham radio operator. He holds an Advanced class license and the call sign KJ4JJ. He cites amateur radio as one influence that led to a career in broadcast engineering, ownership, and on-the-air success. Bussey talks in the book about how he came to the hobby at an early age and has been active ever since. He also often discusses the amateur radio on the show.

Additionally, "We Be Big" was co-written with the help of national-bestselling author Don Keith, who also happens to be an active amateur radio enthusiast. Keith holds an Amateur Extra class license and his call sign is N4KC, and has been licensed for almost fifty years.

Keith has over twenty books in print, both fiction and nonfiction, and writes on subjects such as college athletics, broadcasting, submarines, and World War II history. N4KC was also a long-time broadcaster, twice named Billboard Magazine's "Broadcast Personality of the Year."

Publication date for "We Be Big" is scheduled for March 22nd. Pre-orders are being accepted by many booksellers nationwide. (Press

Release)

NAMES IN THE NEWS: VE3QTH NAMED NEW RAC NATIONAL AFFILIATED CLUB COORDINATOR

Robert Critch, VE3QTH, of Lake Simcoe in Barrie Ontario has been named as Radio Amateurs of Canada's National Affiliated Club Coordinator. Critch comes to the post with a long list of personal and professional qualifications including a long and outstanding carrier in Voice and Data Communications Technology. He has worked for both large and small organizations and over the years has run several business. His is the current President of Barrie Amateur Radio Club and is active on the HF, VHF and UHF bands running both voice and digital modes. (RAC)

**

NAMES IN THE NEWS: DG1CMZ TO JOIN YOUTH POSITION IN KIRITMATI OPERATION

And the T32C Five Star DXers Association DXpedition has announced that Michael Zurch, DG1CMZ, has been selected as the person to fill the sponsored young operator position with the team to Kiritimati operation in the Northern Line Islands. Zurch, who is from Trunzig, Germany, is described as an experienced contest and DXpedition operator who is currently working towards a PhD at the University of Jena. The DXpedition to Kiritimati takes place this coming September 28th to October 26th. (GB2RS)

THE CHANGING OF THE GUARD: NEW MEXICO BROADCASTER GARY DIAMOND, K5FSB - S.K.

The man who at one time was the youngest radio amateur in the state of New Mexico and then went on to an illustrious career in broadcasting has become a silent key. This, with the sad news that Gary Diamond, K5FSB, passed away at an Albuquerque hospice care center at the age of 62.

As those in the broadcast industry are aware, Gary Diamond had a long and distinguished career in Albuquerque radio and television. He graduated from Del Norte High School in 1966 and from the University of

New Mexico in 1971. He began his on-air career as a disk jockey for KARA, KQEO, and other radio stations in the Duke City where among other things he became well known for his lively drive time shows. Gary earned the respect of his colleagues and audiences through his comprehensive technical wisdom as well as his broad knowledge of musical artists in all genres.

But Gary's real love was for the technical side of broadcasting and he ultimately gave up his on the air gigs to become an engineer for KOAT Channel 7 and KRKE Channel 13. He eventually achieved his lifelong dream when he was hired as Chief Engineer for station KOB. Following his retirement he went on to become a respected broadcasting consulting engineer across the great American South-West.

Gary Diamond was a member of the Society of Radio Engineers and the Upper Rio FM Society. The latter is an organization dedicated to promoting amateur radio in New Mexico. In addition to his radio interests, K5FSB was a licensed pilot and a member of Aircraft Owners and Pilots Association.

A memorial for Gary was held at The First Unitarian Church in Albuquerque on February 5th. In lieu of flowers, donations in Gary Diamond's name can be made to National Kidney Foundation or American Diabetes Association. (ARNewsline(tm) with information provided by WA5WHN)

**

RADIO IN EDUCATION: ARRL ANNOUNCES TEACHERS INSTITUTE FOR 2011

The ARRL Education Services Department has announced the 2011 schedule for the Teachers Institute on Wireless Technology workshop. Offered through the ARRL's Education and Technology Program, the Teachers Institute is a four-day, expenses paid, in-residence learning opportunity. One that is designed for motivated teachers and other school staff who want to learn more about wireless technology and bring that knowledge to their students.

A variety of topics are covered during the workshop. These include basic wireless technology literacy, electronics, the science of radio, radio astronomy, how to bring space into the classroom, ham radio operation, introduction to microcontrollers and basic robotics.

While participants do not need to have an Amateur Radio license to attend the basic sessions, one is required for the advanced session called TI-2 Space. This training experience is sponsored by the Dayton Amateur Radio Association with the curriculum focusing on the nuts and bolts of setting up and operating a satellite ground station. This in turn serves as excellent preparatory training ground for a scheduled contact with the ISS through the Amateur Radio on the International Space Station program.

Dates of the Institute are July 11th to the 14th with applications due no later than May 15th. Full information and applications are on-line at the Leagues website Its in cyberspace at www dot arrl dot org. (ARRL, ANS)

**

WORLDBEAT: BBC TO CUT BACK FOREIGN LANGUAGE BROADCASTS

The British Broadcasting Corporation has confirmed plans to cease five of its 32 World Service language transmissions. According to the GB2RS News, the Macedonian, Albanian and Serbian services will be the first axed, as will English for the Caribbean and Portuguese for Africa.

The World Service will also eliminate short wave transmission of six more language services in March. These will be Hindi, Indonesian, Kyrgyz, Nepali, Swahili and the Great Lakes service for Rwanda and Burundi. (GB2RS)

**

ON THE AIR: THE ISLE OF TIENGEMTEN COMMERATIVE

On the air listen out for the special event callsign P-D-Zero-4-I-S-L-E. This station will be active throughout all of 2011 from the nature reserve on the Isle of Tiengemeten. QSL this one as directed by whomever you contract. (OPDX)

**

ON THE AIR: SOUTH AMERIUCAN LIGHTHOUSE WEEKEND

CE3FZL and possibly others will be operational as CE2C from the Faro, Cofradia Nautica del Pacifico, Algarrobo, during the South American Lighthouse Weekend that runs from February 25th to the 27th Activity will be on 40, 20, 15 and 10 meters. QSL direct to his QRZ.com address with 2 IRCs, or via the Bureau. No electronic QSL are being accepted for this one. (Press release)

**

ON THE AIR: CELEBRTING 50 YEARS OF KUWAIT INDEPENDENCE

And keep an ear open for amateur radio operators in Kuwait using the special prefix 9K50 through 28th February. This activity is to celebrate the 50th anniversary of Kuwait's independence. Also, 9K50NLD will be on the air between 24 and 28 February by members of the Kuwait Amateur Radio Society. QSL this one as directed on the air. (OPDX)

**

DX

In DX, a team of seven ham radio operators from Germany are activate Sao Tome Island as S9DX through February 17th. They have at least two stations on the air at all times using such modes as CW, SSB and RTTY

on 160 through 10 meters. A special emphasis is on the lower bands in CW and RTTY. QSLs via bureau or direct via DL1RTL.

DH1BL will be on the air as FH4VOS from Combani, Mayotte for the next three years. Lately he has been active on 20 meters using SSB. QSL his operation via DL7BC.

WD9DZV will be active as P40A from Aruba between March 8th through the 13th. His operations will be holiday style on most bands and modes. QSL via WD9DZV.

ZS6SIG has relocated to Nairobi, Kenya, and will be signing 5Z4EE for the next four years. He has announced that he will be in the CQWW WPX SSB Contest on March 26th and 27th as well as the ARRL DX CW Contest from February 19th to the 20th and ARRL DX SSB Contest on March 5th and 6th. Activity outside of the contests will be on all bands from 160 through 10 meters. QSL via NV7E or at the address shown for 5Z4EE on QRZ.com.

Lastly, KL7JR and WL7MY will both be be active portable HI3 from Hispaniola Island between March 1st and sometime in June. Their operation will be on 80 through 10 meters SSB using several different wire antennas from their beach location. QSL via KL7JR as listed on QRZ.com or in thee Callbook.

(Above from various DX news sources)

**

THAT FINAL ITEM: JILA ANNOUNCES A BEW SOURCE OF TERAHERTZ RADIATION

And finally this week, word that JILA researchers have developed a laser-based source of terahertz radiation that is unusually efficient and less prone to damage than similar systems. The technology might be useful in applications such as detecting trace gases or imaging weapons in security screening.

JILA is a joint institute of the National Institute of Standards and Technology and the University of Colorado at Boulder. Its technology is a new twist on a common terahertz wave source. That being a semiconductor surface patterned with metal electrodes and excited by ultrafast laser pulses.

An electric field is applied across the semiconductor while near-infrared pulses lasting about 70 quadrillionths of a second, produced 89 million times per second, dislodge electrons from the semiconductor. The electrons accelerate in the electric field and emit the terahertz waves.

Terahertz radiation which fall between the radio and optical bands of the electromagnetic spectrum have the ability to penetrate materials such as clothing and plastic but can be used to detect many substances that have unique absorption characteristics at these wavelengths. Terahertz systems are challenging to build because they require a blend

of electronic and optical technologies that are integrated to work together flawlessly. The complete story of this advancement in this technology is on line at tinyurl.com/terahertz. (NIST)

GB2RS NEWS

Sunday 13th February 2011

The news headlines:

RSGB AGM to be held in Derby

RSGB looking for EMC volunteer

Northern Train the Trainers session

Join us in Derby for the RSGB 2011 AGM. It will take place on Saturday 16 April at the Menzies Mickleover Court, Etwall Road, Mickleover Derby DE3 0XX. The whole day is geared to bringing the RSGB to you and is an ideal opportunity for local clubs to socialise and meet with each other and meet with senior RSGB officers. Winners of the 2011 National Club of the Year, sponsored by Waters & Stanton, will be announced.

Do you have legal skills? The Society is in need of some help in the area of legislation concerning EMC and related matters in the UK and European context. This person would be invited to join the EMC Committee, either as a full member, a corresponding member or a consultant. We need to further build our `in-house' strength on European and UK legislation particularly as it applies to the technologies involved in radio communication and EMC matters. If you are a qualified lawyer, current or retired, and feel you can help the team looking at this, or if you know of someone who might be willing to offer some help, please contact the RSGB Director responsible, Don Beattie, G3BJ, by email to g3ozf@btinternet.com or phone 01694 781 666.

or telephone 01563 534383 for further details.

or call him on 01225 464394

ARRL DXCC Manager Bill Moore, NC1L, reports that the 9X0SP 2010 DXpedition to Rwanda has been approved for DXCC credit. If you have cards that were recently rejected for this operation, please send an e-mail to the ARRL DXCC Desk. Once your record is updated, results will appear in Logbook of The World accounts or in the live, daily DXCC Standings.

ARISSat-1 should be deployed from the International Space Station on Wednesday 16 February. Amateurs are being encouraged to listen out for the signals, which should reasonably strong. AMSAT-UK has issued a reception challenge to everyone to receive ARISSat -1 signals, and is promising a "FUN" reward to a number of listeners in various categories.

The downlink signals on 2m are expected to be reasonably strong. More details are at tinyurl.com/gb2rs551 and arissat-1.org.

Advance news now of a DXpedition. VK8NSB, VK8FNCY, 9M6DXX, 9M6XRO and MW0JRX will be operating from Timor-Leste in East Timor between 16 and 26 September. The location will be Atauro Island, OC-232, 30km north of the capital, Dili. The group is working closely with the Timor-Leste licensing authority and the DXpedition callsign will be announced soon. There will be three stations, two using full licensed power linear amplifiers and a third running 100W. Antennas will mainly be quarter-wave verticals and vertical dipoles, all located within a few metres of the ocean. For 160m an inverted-L will be used. Activity will be on all bands 10 - 160m using CW, SSB and RTTY. Atauro Island was chosen in order to provide a quiet location, well away from the electrical noise of down-town Dili. The beach-front site will also allow the group to put up vertical antennas right by the ocean, providing additional low-angle gain. In addition, the island counts as OC-232 and is part of a very rare IOTA group, having being confirmed by only 18% of active IOTA participants.

And now for the details of rallies and events for the coming week

The Harwell Radio and Electronics Rally will take place today, 13 February, at Didcot Leisure Centre, Mereland Road, Didcot OX11 8AY. Talk in will be on S22 and car parking is free. Entrance is ?2.50 and accompanied under 12s are free. Doors open at 10.30am and there will be trade stands, special interest groups and refreshments available. Details from Ann, G8NVI on 01235 816379.

The Northern Cross Rally returns to its former home at Thornes Park Sports Centre, Horbury Road, Wakefield, WF2 8TY today, Sunday 13 February. There is plenty of parking, an RSGB Bookstall and all the usual traders. There will also be several club and group stands. Refreshments are available on site at reasonable prices and admission is ?3. Doors open at 10.30am with disabled access from 10.15. Bring & Buy Booking In is also from 10.15. More information from www.northerncrossrally.org or contact Ken Quinn, 2E0SSQ on 07 900 563 117.

There are no rallies next weekend, the next events are on 27 February. Rainham Radio Rally will take place at Rainham School for Girls, Derwent Way, Rainham, Gillingham, Kent ME8 0BX. Doors open at 10.00am. More details from Trevor, G6YLW, 0771 7678 795.

Also on 27 February, Swansea ARS Rally will be held at Court Herbert Sports Centre, Neath Abbey, Neath SA10 7BE. Doors open at 10.30am and entry is ?2 with free car parking. There will be trade stands and a Bring & Buy along with special interest groups. Details from Roger, GW4HSH, on 01792 404422.

Now for the news of special events

The Cornish Club will be running Thinking Day on the Air at Gweal-an-Top school, Redruth, Cornwall on 19 February using the special event callsign GB1RGG.

North Cork Radio Group will be active the call EI1NC/P on 19 and 20 February from the Blackrock Castle Observatory from 1000 to 1700UTC both days. The venue is a 16th century Castle located 4km from the heart of Cork city on the banks of the river Lee. The Castle has seen many uses in its long history and now houses a cutting edge space observation post.

And now the HF DX news compiled from 425 DX News and other sources

KA1YMX/8P will be active from Barbados while on holiday between 26 February and 5 March. His operation will be on CW and SSB using an Elecraft K2. No other details are available. QSL via his home callsign.

G3RWF will be active as 5X1NH from Fort Portal in western Uganda between 20 February and 14 April. He prefers to operate CW but plans to also be on the digital modes with some SSB on all bands except 160m. QSL via his home callsign or electronically using Logbook of the World.

Two American operators plan to operate on the amateur bands from Haiti between 18 February and 5 March. They will be working at a local Christian Mission and during their spare time will be on the air as HH4/K4QD and HH4/AF4Z.

J88DR will be active again from 16 February to 14 March. This is the call used by Dave, G3TBK while on the Caribbean island of St Vincent. Dave is interested in contesting and will be QRV in the ARRL DX CW Contest as well as the ARRL DX SSB Contest and the Commonwealth Contest during that period.

An international team will operate from Cameroon using the call TJ9PF until 20February. QSL manager is F5OGL and full details of the DXpedition can be found on www.tj9pf.fr.

Now the contest news

Over the full 48 hours of the weekend of 12-13th the CQWW WPX RTTY contest will keep the data portions of the bands busy. Exchange a signal report and serial number. Multi-two and multi-multi entrants use separate serial number sequences per band, while all others use just the one. In parallel with it the CW and SSB portions of the bands will also be busy, because the PACC, VERON contest takes place for 24 hours. Send a signal report and serial number, but expect to receive a report and a 2-letter Province code from Dutch stations.

The 80m Club Championships data leg takes place on 16 February from 2000 to 2130UTC. The exchange is signal report and serial number.

The 1.3GHz UK Activity Contest takes place on 15 February from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

On 22 February the 50MHz UK Activity Contest takes place between 2000 and 2230UTC. Using all modes on the band the exchange is signal report, serial number and locator.

Also on 22 February, the SHF UK Activity Contest takes place at the same time, 2000 to 2230UTC. Using bands between 2.3 and 10GHz and all modes, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 31st of January to the 6th of February, compiled by Neil Clarke, G0CAS on the 7th of February.

Solar activity was at very low levels, only just though, because on the 4th just after midday a B9.5 solar flare occurred just falling short of the C class, which would have increased activity to low. Solar flux levels varied little day to day and averaged 80 units. The 90 day solar flux average on the 6th was 99, that's one unit down on last week. X-ray flux levels averaged A4.6 units and remained steady all week. Geomagnetic activity started at quiet levels but during the second half of the 4th levels increased to storm levels. Studying the solar wind data it would appear that a coronal hole disturbance and a coronal mass ejection that departed the Sun on the 30th of January arrived here at Earth at the same time. This resulted in a short but intense storm with stations in the Midlands capable of auroral contacts on 50 and 144MHz. Stations north of the border had this privilege for much longer. The Ap index on the 4th was 21 units. The average was Ap 9 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 300 kilometres per second to 670 early on the 5th. Particle densities started the period with up to 30 particles per cubic centimetre on the 31st and the 1st but then declined to more normal levels. Bz showed little variation at first but fluctuated to minus 20 and plus 16 nanoTeslas at the height of the storm during the evening of the 4th.

And now the solar forecast. Old region 1149 that produced eight C class solar flares on its last rotation should have rotated back into view. Depending on how active this region is will decide on the level of solar flare activity for the coming week. Solar activity could increase to low levels on some days. Solar flux levels should be around the 90 mark for most of the week. A quiet geomagnetic week is expected with the Ap index in single figures throughout. MUFs during daylight hours at equal latitudes should be about 22MHz for the south and 19MHz for the north. Darkness hour lows should be around 8MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of about 23MHz. The optimum working frequency with a 90 per cent success rate will be around 18MHz. The best time to try this path will be between 10:00 and 13:00 hours.

And that's all for this week from the propagation team.

NEWS FOR THE MIDLANDS

On Monday 14 February Gloucester Amateur Radio & Electronics Society is operating on HF. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 14 February South Birmingham Radio Society is on the air and having a ragchew. Contact Don, on 0121 458 1603.

On Monday 14 February South Normanton Alfreton & District Amateur Radio Club is having a natter night. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Monday 14 February Stratford Upon Avon District Radio Society is having an informal evening. Contact G0CHO, on 01608 664488.

On Tuesday 15 February Derby & District Amateur Radio Society is having a visit by RSGB Region 13 Manager Jim, G0EJQ. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 15 February Loughborough & District Amateur Radio Club is having a review of amateur radio computer programs with Art, G3KWY. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 16 February Hinckley Amateur Radio Society is taking part in the 80m Club Calls Data contest. Details from John, M0JAV, on 07836 731544.

On Wednesday 16 February Lincoln Short-Wave Club is putting G6COL on the air, having a natter night and invites members to learn to play poker with G0PIO. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 16 February Midland Amateur Radio Society is holding training classes and having a rally visit planning meeting. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 16 February Telford & District Amateur Radio Society is having a talk on astronomy by G0CZD. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 17 February Cheltenham Amateur Radio Association has a sale of surplus equipment. Contact Derek Thom, G3NKS, on 01242 241099.

On Thursday 17 February South Birmingham Radio Society is holding training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 18 February Coventry Amateur Radio Society is working on Project 2011. Contact John, G8SEQ, on 07958 777363.

On Friday 18 February Nunsfield House Amateur Radio Group is discussing the Northern Lights. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 18 February South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 19 February Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Sunday 20 February Welland Valley Amateur Radio Society is taking part in Thinking Day On The Air as GB0MHG. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

NEWS FOR THE NORTH OF ENGLAND

On Sunday 13 February Wakefield & District Radio Society is running the Northern Cross Rally at Thornes Park Sports Centre, Wakefield WF2 8TY. Contact Ken, 2E0SSQ, on 07900 563117.

On Monday 14 February Bolton Wireless Club is having a talk on amateur satellite operating by John, G1YYH. For details, send an email to boltonwireless@gmail.com.

On Monday 14 February Sheffield Amateur Radio Club is having a talk on electrical safety by David, G6DCT. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 14 February Thornton Cleveleys Amateur Radio Society is watching a video with Ted, G4WBB. Contact Colin Hirst, G0EPY, by email to colmay@sky.com.

On Tuesday 15 February Chester & District Amateur Radio Society has a surplus sale at Burley Hall. Details from Barbara Green on 07957 870770.

On Tuesday 15 February Halifax and District Amateur Radio Club is having a demonstration of Slow Scan Television by John, M0JPA. Contact Martin, M0GQB on 01422 341317.

On Tuesday 15 February Otley Amateur Radio Society is having an open shack night and tech chat. Contact Paul, 2E0PAK, on 07768 996370.

On Tuesday 15 February Stockport Radio Society has an Introduction to operating the HF digital modes by Evan Duffield, M0TJU. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 16 February Denby Dale Radio Club is having a club night. Details from Richard, M0RBG, on 07976 220126.

On Thursday 17 February Ripon & District Amateur Radio Society is having a talk on the myth or reality of QRP DXing. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 17 February South Manchester Radio and Computer Club is having a talk on an HF upconverter by Bill, G4EDM. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 17 February Wakefield & District Radio Society is on the air, having a rally debrief and committee meeting. Contact Ken, 2E0SSQ,

on 07900 563117.

NEWS FOR NORTHERN IRELAND

On Monday 14 February Glengormley Electronics Amateur Radio Society is having a 2m operational night. . Details from Peter Lowrie, MI5JYK, by email to mi5jyk@rsgb.org.uk.

On Monday 14 February Greenisland Electronics Amateur Radio Society is having its club VHF activity night as MN0PQR. Details from Mi5JYK, by email to mi5jyk@rsgb.org.uk.

NEWS FOR SCOTLAND

On Tuesday 15 February Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 16 February West of Scotland Amateur Radio Society is having a Solder Group homebrew projects and licence training evening. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 17 February Aberdeen Amateur Radio Society is on the air and working on construction. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 18 February Cockenzie & Port Seton Amateur Radio Club is having a radio check night with John, MM0JXI. More information from Bob, GM4UYZ, on 01875 811 723.

On Friday 18 February West of Scotland Amateur Radio Society is having presentations, guest speakers, a quiz and a raffle. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

Whitton Amateur Radio Group in West London is planning to start a new Foundation course. Commencing on Wednesday 2 March at 7.30pm, it will lead to the exam on 25 April. The course tutor will be Colin, M0DMJ. Any one wishing to learn more about the course please contact Ian, G0OFN by email to G0OFN@msn.com. Full details can be found at www.warg.info.

On Monday 14 February Coulsdon Amateur Transmitting Society is having a talk on a motorcycle trip to the Himalayas by M0NAT. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 14 February West Kent Amateur Radio Society is having a talk by Richard, G8CDD, on keeping the big trucks moving. More information from Les, G6UBM, by email to westkentars@googlemail.com.

On Tuesday 15 February Andover Radio Amateurs Club is having a club night and holding a committee meeting. Details from Martin, M0MWS, on 07776 181646.

On Tuesday 15 February Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 15 February Bromley & District Amateur Radio Society is planning its programme. Details from Andy, G4WGZ, on 01689 878089.

On Wednesday 16 February Havering & District Amateur Radio Club is having an informal evening. Contact John, M0UKD, on 07817 365354.

On Wednesday 16 February Norfolk Amateur Radio Club is having an informal, construction, shack, Bright Sparks evening and taking part in the RSGB CC Data contest. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 16 February Worthing & District Amateur Radio Club is having a discussion evening. Contact Phil, G4UDU, on 01903 816684.

On Thursday 17 February Colchester Radio Amateurs has a show and tell night. More information from Kevan, 2E0WMG, on 07766 543784.

On Thursday 17 February Cray Valley Radio Society is having a talk on RAYNET by Phil, G6AQP. Details from Bob, M0MCV, on 020 8265 7735 after 8pm.

On Thursday 17 February Horsham Amateur Radio Club is having a social at The Selsey Arms, Coolham. Details are on the web at www.harc.org.uk.

On Thursday 17 February Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564242.

On Thursday 17 February Shefford & District Amateur Radio Society has a talk on long Yagis by Paul, G1GSN. Details from David, G8UOD, on 01234 742 757.

On Thursday 17 February Sutton & Cheam Radio Society is having a talk on air traffic control by Ross MacDonald from Gatwick Airport NATS Services. More information from John, G0BWV, on 020 8644 9945.

On Friday 18 February Cambridge & District Amateur Radio Club invites members to bring and talk about their communication receivers. Details from Ron Huntsman, on 012233 501712.

On Friday 18 February Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239371.

On Friday 18 February Wey Valley Amateur Radio Group is having a talk by Don Field, G3XTT. Details on the web at www.weyvalleyarg.org.uk.

NEWS FOR THE SOUTH WEST

On Monday 14 February Cornish Radio Amateur Club is having a talk on computer and music by Peter, G3WKP. Details from Steve, G7VOH, on 01209 844939.

On Monday 14 February Exeter Amateur Radio Society is having a club night. More information from Nick, on 01363 775756.

On Tuesday 15 February West Devon Radio Club is having a QRP evening with M1AGY. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 16 February Taunton & District Amateur Radio Club is participating in the RSGB CC Contest, data. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 16 February Thornbury & South Gloucestershire Amateur Radio Club has a video night. Contact Tony, G0WMB, on 01454 417048.

On Wednesday 16 February Trowbridge & District Amateur Radio Club is having a natter night.. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 17 February South Bristol Amateur Radio Club watching the South Atlantic DXpedition video with Adrian, 2E0JUW. Details from Andrew Jenner, G7KNA, on 07838 695471.

On Thursday 17 February Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750.

On Friday 18 February Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Tuesday 15 February Marches Amateur Radio Society visiting the BT Network Centre at Whittington House for a members-only conducted tour of the facility. For more information contact Dave, MW0AYM, on 01691 777242.

On Tuesday 15 February Wrexham Amateur Radio Society is having an HF operating night. More information from Patrick, 2W0HUU, on 07947 701 927.

147. NZART Misses the boat again.

Newsgroup: rec.radio.amateur.misc
Date: 2011-02-11 21:47:41 UTC
From: Peter Bennett ZL1UPB <news-nospam@zlham.geek.nz>
Message-ID: <ij4apvamf1@posting.glorb.com>
Source record: 4837

Greetings All

This is one of the reasons I am not a member of NZART any longer.
They are dumb arses. I informed ZL Ham members about the need to put in
a submission in December 2010 and subsequently made a submission on the
due date despite very few showing an interest.

http://www.zlham.geek.nz/modules.php?name=News&file=article&sid=109

&

http://www.zlham.geek.nz/modules.php?name=News&file=article&sid=130&mode=&order=0&thold=0

NZART finally got around to notifying members on close off day and have
had to ask MED RSM for an extension of time to allow NZART to get with
the play.

****

From NZART Headquarters SPECIAL Infoline Issue 24S

Proposed Changes to 27 MHz Amateur Band
It has just come to our notice that changes being proposed by the Radio
Spectrum Policy and Planning group to the CB licence (see
http://www.rsm.govt.nz/cms/pdf-library/policy-and-planning/current-projects/
cb-discussion-paper-gul-2010.pdf)
will, if approved, give CB radio users access to our 26.95 to 27.3 MHz
Amateur Band. (There are also changes planned at UHF but these do not
appear to affect Amateurs.)

Submissions on the proposals are due to close tomorrow -11-FEB-2011- but
we have agreement from the Ministry that we may put in a late submission.

If you have an interest in this area and feel that you could contribute
to an NZART submission, please email the ALO, Don Wallace, ZL2TLL

****

Are the dumb arses at NZART really looking after the best interests of
New Zealand radio hams?

I note the wording above. NZART seem to think the small segment of the
11 meter band is an Amateur allocation. This small segment is of little
use to NZ Amateurs as it is limited to very low power and there is
nobody to talk to.

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 13 FEBRUARY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today

NEW REGULATIONS

ALLOCATION OF ZS9 CALL SIGNS

TONY REUMERMAN BURSARY AWARDED

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

NEW REGULATIONS

The ICASA board reviewed the revised draft regulations. This followed after a public hearing held in early December where the SARL made a lengthy and detailed presentation about the concerns of the Amateur Radio Community. The SARL understands that a further draft for comment will be published in the Government Gazette in the next two weeks. This time ICASA will not hold public hearings but only invite written comment. The SARL will keep a watching brief and make the second draft available as soon as it has been published in the Government Gazette.

ALLOCATION OF ZS9 CALL SIGNS

When the original request was made to ICASA to issue ZS9 calls, the proposal by a group of radio amateurs who had formed a contest group, was based there-on that ZS9 call signs would only be allocated to a club for contesting purposes. Of late individual radio amateurs are now applying for ZS9 call signs for their own general use. ICASA is now looking at setting guidelines that will determine the conditions under which ZS9 call signs will be issued. The item is on the Agenda of the ICASA/SARL liaison meeting to be held on 25 February 2011.

One option would be to reserve ZS9 call signs for special event contest stations allocated on an event by event basis. If the ZS9 prefix is allocated to individual amateurs it will lose its special significance. Your comments are invited. Send it to armi@sarl.org.za before 18 February 2011 to afford the Council of the SARL to take your views into consideration before tabling the SARL views to ICASA at the liaison meeting. Please keep your comments concise and to the point.

TONY REUMERMAN BURSARY AWARDED

The South African Amateur Radio Development Trust has awarded the Tony Reumerman Bursary for young people to study for the class A Radio Amateur Examination to Dirk Johan van Vuuren of Krugersdorp.

The bursary of R1 000 is intended to pay for the examination fees, one year membership of the SARL as a student member, course fees and other study material.

The Tony Reumerman bursary was recently established in recognition of the contribution Tony made to technology development in Amateur Radio. He and his family have donated R20 000, which is being invested, and the interest will be used to finance the bursary.

The Trust has made two more bursaries available. It is however ironic that at club level it is so often said that young people cannot afford the examination and course fees, yet when the Trust announced that bursaries for the May examination were available for young people under 25, only one application was received. For more details about class A RAE bursaries visit www.amateurradio.org.za.

KLETSkous - more details released

SA AMSAT has released a further document setting out details of the proposed KLETSkous CubeSat project. Visit www.amsatsa.org.za for details.

ARISAT-1 TO BE LAUNCHED FROM THE ISS NEXT WEEK

Expedition 26 Flight Engineers Dmitry Kondratyev and Oleg Skripochka, RN3FU, will step outside the International Space Station (ISS) on Wednesday, February 16. While in space, they will install and retrieve experiments on the Russian segment of the complex and deploy ARISSat-1, a small amateur satellite. NASA TV coverage will begin at 6:45 (CST), while the spacewalk will begin about 30 minutes later.

During the nearly six hour spacewalk, Kondratyev and Skripochka will deploy an experiment called ARISSat-1, a boxy 57-pound nano satellite that houses congratulatory messages commemorating the 50th anniversary of Yuri Gagarin's launch to become the first human in space. ARISSAT will enable communications with Radio amateurs around the world for three to six months. It is the first of a series of educational satellites being developed in a partnership with the Radio Amateur Satellite Corp, the NASA Office of Education International Space Station National Lab Project, and the Amateur Radio on the

International Space Station (ARISS) program and RSC-Energia.

You can watch it live at http://www.nasa.gov/ntv.

Current ARISSAT is being tested on board the ISS and can be copied on 145,950 MHz when orbiting over South Africa.

SECOND ZS-WAS TRIPLE PLAY AWARD MADE

Following on the heels of Barry, ZS2EZ, the second Worked All States Triple Play award has been made to a South African Radio Amateur. Certificate no 508 dated 17 January 2011 was awarded to Donovan van Loggerenberg, ZS2DL, for working all 50 US States on phone, CW and RTTY and confirming all the contacts via Logbook of the World.

CONTEST NEWS

The SARL Digital Contest has been created to encourage contacts between radio amateurs in Southern Africa using the PSK31 and/or RTTY. The contest is open to all radio amateurs in Southern Africa.

The first Digital contest for 2011 will be run from 13:00 to 16:00 UTC on Sunday 27 February with activity on 80, 40 and 20 metres. The following segments must be used, on 80 metres 3 580 to 3 600 kHz; 40 metres - 7 040 to 7 060 kHz and 20 metres - 14 070 to 14 099 kHz with PSK31 preferred at the lower end and RTTY preferred at the upper end of the specified frequencies. Please note that USB must be used at all times.

A station may be contacted twice on each band, once on RTTY and once on PSK31. A signal report plus a sequential serial number starting at 001 is exchanged. The complete rules can be found on page 58 and 59 of the 2011 SARL Contest Manual.

Results of the 2011 Summer QRP Sprint.

15 logs were received which showed that at least 72 stations were on the air. Of the 15 received logs, 5 stations operated both modes (SSB and CW).

All the divisions were active as well as 2 DX stations. There were only a few ZR and ZU's - wonder why ??

In total 255 contacts were made of which 234 were voice and 21 CW.

The final results are as follows:-

1st ZS6WR 792 points

2nd ZS6A 768 points

3rd ZS6AF 720 points

4th ZS2J 675 points

5th ZS6XT 560 points

6th ZS6SKY 528 points

7th ZS6BNE 240 points

8th ZS6SGM 234 points

9th ZU6TAN 180 points 10th ZS5J 168 points 11th ZU6HOT 165 points 12th ZS6RBJ 150 points 13th ZS6ARQ 140 points 14th ZS6APT 88 points 15th ZS2EC 60 points

CLUB NEWS

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1 153 is rotating out of direct earth view and Sunspot 1 156, which is located in the southern hemisphere has been quiet. The effective sunspot number is expected to be less than 20 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be fair towards Europe on 15 m, later to be followed by fair 20 m openings. Good 15 m contacts with the USA are possible during the evenings. Contacts with Australia are possible on 20 m at sunrise. 15 and especially 20 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the workhorse for contacts around the country with 20 and 30-m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

13 February - SARL National Field Day and ZS85SARL on the air for the last time, ends today Sunday at 12:00 CAT. 18 February - Comments on ZS9 call signs to be in to armi@sarl.org.za. 21 February - Logs for the SARL field day to be in to the Bloemfontein ARC. 25 February - Logs for AWA CW Activity day to be in to Andy, ZSADY. 27 February - The first Digital contest for 2011 will be run from 13:00 to 16:00 UTC on Sunday with activity on 80, 40 and 20 metres. 28 February - Offers to host a station at Sun City during IARU Region 1 conference to be in to iaru2011@sarl.org.za. 25 March - SAiSAT briefing session at the NARC.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to

www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 13th February 2011

Request for Return of IRTS Trophies and Cups

It is time once again to recall all trophies presented at the 2010 IRTS, AGM held in Dundalk.

Trophies and Cups can be returned to the IRTS Stand at the Phoenix Radio Club Rally in Coolmine on Sunday February 20th 2011 or to any IRTS Committee Member before end of February 2011.

This will allow for any engraving to be done, or to allow any repairs as needed.

Early return will be appreciated. Peter EI4HX can be contacted on ei4hxperimental / at/eircom / dot/ net.

IRTS Awards Nominations.

The time is here again for nominations for the several awards for IRTS Trophies and cups that are required from within the membership, this includes the awards for,

1. Service to the Society or to Amateur Radio. Awards in this category can be to members or non-members.

2. Awards for other achievements.

Awards in this category [2] include the 4 and 6 Meter Shields, the SWL Award, and the awards for Quality Construction Projects. These are confined to members only.

When considering your nominations, please refer to previous successful winners as included in www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or Individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX and Pat EI9HX, or to Peter Grant EI4HX, Chair of Awards Committee, QTHR, or by e-mail to ei4hxperimental/ at/ eircom/ dot/ net.

Closing date for nominations is February 30th 2011.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 998
BID: $OPDX.998
February 14, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1AC, K1XN & GoList, NJ1Q, W2VU, WO2N, W3UR & The Daily DX, NG3K & ADXO, N4AA & QRZ DX, W5FKX, KH6BZF, N6PSE, K8AQM, K8YSE, NE8Z, W8GEX (60m News), N0TG, AT International, DJ8NK, DL1SBF, DL7AOS, DL7MAE & The DX News Letter, DxCoffee.com, DX-World.Net, EA8BVP, F6AJA & Les Nouvelles DX, G3XTT, I1JQJ/IK1ADH & 425 DX News, JR3TVH, LA9VDA, OK1DOT, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, S51NM, TG9NX, VA3RJ & ICPO, VE3VHB and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th-February, through Sunday, 13th-February there were 227 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VK9M, VP2E, VP2V, VP5, VP6, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4W6, TIMOR-LESTE. Operators Stuie/VK8NSB, Franck/VK8FNCY, Steve/9M6DXX, John/9M6XRO and Oliver/MW0JRX will be operating from the coast of Timor-Leste (East Timor) between September 16-26th. The location will be Atauro Island (OC-232), 30km north of the capital Dili. The group is working

closely with the Timor-Leste licensing authority and the DXpedition callsign will be announced soon. There will be three stations, two using full licensed power linear amplifiers, and a third running 100W. Antennas will mainly be quarter-wave verticals and vertical dipoles, all located within a few meters of the ocean. For 160m an inverted-L will be used. Activity will be on all bands 160-10 meters using CW, SSB and RTTY. Atauro Island was chosen in order to provide a quiet location well away from the electrical noise of downtown Dili. The beach-front site will allow the group to put up vertical antennas right by the ocean, providing additional low-angle gain. In addition, the island counts as OC-232 and is part of a very rare IOTA group having being confirmed by only 18% of active IOTA participants. This is not a "fly in, hotel, and fly out" DXpedition! Accommodation on Atauro Island is very basic and will be in beach huts with no means of electricity or running water. All power for the DXpedition will be provided using hired generators. As such, the group will be requesting donations. A Web site will be available soon, and further details will be published on the Web site. QSL via M0URX, direct (SAE plus 1 IRC/2 USDs), by the Bureau, or LoTW. Alternatively, QSLs may be requested using M0URX's OQRS form at: http://www.m0urx.com/qsl-request-form

5B, CYPRUS. Zoli, HA5PP, will once again be active as 5B/HA5PP during the CQ WW WPX SSB Contest (March 26-27th) as a Single-Op/All-Band entry. QSL via HA5PP.

5X, UGANDA (Update). Nick, G3RWF, will once again be active as 5X1NH from Fort Portal in western Uganda, and will be there between February 19th and April 14th. Usually he is there to do voluntary work, so his activity is usually outside the work hours. He prefers to operate CW but plans to also be on the Digital modes with some SSB. Activity will be on all bands except 160m (no room for an antenna) and 6 meters is not licensed. He mentions that he will be taking a linear (thanks G3PJT) and hopes to make a better effort on 80 meters. His rig is a K3. QSL via his home callsign and LoTW.

9V, SINGAPORE. Marco, DL4MN, is now active as 9V1/DL4MN until the end of February. He is currently operating sporadically using a dipole on CW, SSB and RTTY. He was heard this past weekend on the CQ WPX RTTY Contest. QSL via his home callsign.

9Y, TRINIDAD AND TOBAGO. Mickey, AK5Q, will be active as 9Y4/AK5Q from Port of Spain, Trinidad, during the ARRL DX CW Contest (February 19-20th) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL via his home callsign, direct (w/SASE) or by the Bureau.

CQ PRESS RELEASE. Richard Moseson/W2VU, Editor of CQ Amateur Radio, sent out the following press release on February 8th: "George Tranos, N2GA, Named CQ Magazine Contesting Editor -- George Tranos, N2GA, of Long Island, New York, has been named Contesting Editor of CQ Amateur Radio magazine, Editor Rich Moseson, W2VU, announced today. Tranos succeeds John Dorr, K1AR, who stepped down after writing the magazine's contesting column for nearly 22 years.

Tranos has two decades of contesting experience in a variety of station settings, and has several top scores to his credit, both as a single operator and as part of contesting teams. He has operated extensively from the Caribbean as well as from his home station in New York, and has been a referee at three World Radio Teamsport Championship competitions, in 2000, 2006 and 2010.
George is a member of the Yankee Clipper Contest Club and the New York-based Order of Boiled Owls contest club. He is also a former ARRL Section Manager and past Chairman of Ham Radio University, a day of amateur radio seminars and fellowship on Long Island.
Professionally, Tranos is president of a software and management consulting firm, vice president of a school for professional motorcycle riders, and a freelance journalist. He is married to Diane Ortiz, K2DO, an accomplished contester herself and a former columnist for CQ Contest magazine which was published in the 1990s.
CQ Editor Rich Moseson said, 'I am confident that George will uphold the high standards for this column established by K1AR and will bring his to it his own perspective. I look forward to working with him over the coming years.'
'I am honored to have been asked to contribute to CQ magazine,' said Tranos. 'The contesting column is always the first thing I read. I hope to be able to keep up the great standards and traditions that compel me and many others to look forward to each issue.'
George's first column will appear in the March 2011 issue of CQ."

CY0, SABLE ISLAND (Update). Randy, N0TG, reports (edited): The team has set March 7-15th as the target schedule to activate Sable Island. We welcome, Wayne, K8LEE, who has recently joined the team replacing WA4DAN who had to withdraw due to business commitments. We will be traveling to Halifax, Canada, on March 5th to take care of final logistics details in preparation for the charter flight to Sable. The team has maximized their personal schedules to be as flexible as possible to adapt to any potential weather delays. The Web site will be updated periodically as to the status and any potential impact on the planned activation date, including while in Halifax." The CY0 Web page is at: http://www.cy0dxpedition.com

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the following has been approved for DXCC credit:
9X0SP - Rwanda; 2010 DXpedition
"If you had cards that were recently rejected for this operation, please send an E-mail to the ARRL DXCC Desk," Moore said. "Please note that due to extremely heavy E-mail, DXCC staff may not respond to your message. Once your record is updated, results will appear in Logbook of The World (LoTW) accounts or in the live, daily DXCC Standings."

E2, THAILAND. Champ, E21EIC will be active during the ARRL DX CW Contest (February 19-20th) as a Single-Op entry. QSL via E21EIC. Visit his Web page at: http://www.e21eic.net

EG8, CANARY ISLANDS (Special Event). Look for special event station EG8ISS to be on the air between February 12th and March 11th, from Las Palmas,

Gran Canaria (AF-004, DIE S-005, WLOTA L 0969). Activity is to celebrate/
publicize the first ARISS (International Space Station) contact with one
of the "Institute for Technological Development and Innovation in Communi-
cations" (IDeTIC) facilities on campus. The special event station will be
on the HF bands, 40-10 meters, using CW, SSB, RTTY, PSK31 and SSTV. Also,
activities are planned for VHF (2m FM local and R7 repeater) and the
satellites (AO-27, SO-50, AO-51 and VO-52). There is a special QSL card
designed for this event that will be automatically mailed to your QRZ.com
address. Please, keep in mind that they aren't highly skilled radio
operators, so be patient if there are any pileups. More info is available
on the QRZ.com under EG8ISS. A Twitter page is also available at:
http://twitter.com/eg8iss

FO, FRENCH POLYNESIA. Ted, K8AQM, is once again heading to the Pacific,
but this time to Tahiti. Look for him to be active as FO/K8AQM from
Morrea Island (OC-046) between February 20-25th. Activity will be holiday
style with 100 watts and a vertical on 20 meters (maybe 30m if possible).
QSL via his home callsign, direct, by the Bureau or LoTW.

FS & PJ7, ST. MARTIN AND SINT MAARTEN. Jeff, VA3QSL, will be active as
FS/VA3QSL from St. Martin Island (NA-105, DIFO FS-001, WLOTA 0383), and
as PJ7/VA3QSL from Sint Maarten Island (A-105, WLOTA 0711) between
February 23-27th. Activity will be holiday style on 40-10 meters using
CW and SSB. Watch around or near the usual IOTA frequencies. QSL via
his home callsign, direct or by the Bureau.

HC, ECUADOR. Rick, NE8Z, will once again be heading south to Ecuador and
be active from two different location between February 23rd and March 12th.
His activity will be mainly on the 30/17/12 meter bands from the following
QTHs and using the following callsigns:
HC1MD - QTH: Tumbaco, Pichincha Province; between February 23rd and
March 3rd, and again between March 9-12th. Activity will be on
80-10 meters using CW, SSB and RTTY. He plans to have 500 watts
and use a Cushcraft A3WS 17/12m yagi, Cushcraft R-7 vertical
and a Carolina Windom antenna.

HC1MD/HC4 - QTH: Canoa, Manabi Province (NOT an IOTA) on the Equator
at the Pacific Ocean; between March 4-8th. Activity will be
on 40-10 meters using CW and SSB. He plans to use 100 watts
and a Cushcraft R-7 vertical and Carolina Windom Mini antenna.
Rick states that he will be able to monitor the DXCluster. QSL via K8LJG:
John Kroll, 3528 Craig Drive, Flint, MI 48506 USA. View and apply for the
HC/Ecuador and HC8/Galapagos DX-Diplomas at:
http://webpages.charter.net/ne8z

HI, DOMINICAN REPUBLIC. Operators Tino/HI3CC, Franky/HI3FVA,
Ezequiel/HI3EPR,
Naomi/JM6EBU and Hiro/JA6WFM will be active in the ARRL DX SSB Contest as
HI3CC
(March 5-6th) from Lomas del Toro in Santiago (Lomadeltoro Contest Team's
HI3CCP station) (NA-096, WLOTA LH-2974) as a Multi-Single/Low-Power entry.
QSL via ON4IQ. Visit their contest Web page at: http://www.lomadeltoro.com

Look for Naomi (NP3JA/HI3) and Hiro (NP3J/HI3) to be active before and after the contest. ADDED NOTE. Look for NP3JA and NP3J to be active from Ponce, Puerto Rico, between February 25-27th. QSL NP3JA via JM6EBU and NP3J via JA6WFM, direct or LoTW.

II9, ITALY. Members of the IU9T team will use the special callsign II9T from Sicily (EU-025) during the ARRL DX CW Contest (February 19-20th) and the CQ WPX SSB Contest (March 26-27th) as a Multi-Single entry. QSL via IT9ESW.

IOTA NEWS.....
AF-018. Operator Raffaele, IH9YMC, will be active from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc. JM56XT), African Italy, during the CQ WW WPX SSB Contest (March 26-27th) as a Single-Op/low-Power entry. QSL via eQSL.

AF-019. (REAL EARLY ANNOUNCEMENT) Operator Luigi, IK8HCG, will be active as IG9R from Lampedusa Island, African Italy, during the next CQWW DX SSB Contest (October 29-30th). QSL via IK8HCG.

EU-125. Stefan, DL7AOS, will be using the special callsign 5P5K from Romo Island between March 20th and April 1st. Activity will be on 80-6 meters using a FT-857 with 500w into a vertical antenna near the beach. Look for 5P5K to also be operating in the CQ WPX Contest (March 26-27th) as a Single-Op/All-Band/ High-Power entry. QSL via DL7AOS, direct using the QRZ.com address or by the Bureau.

OC-239. Joni, YB9WZJ, will be active as YB9WZJ/p from Doom Island during the RSGB IOTA Contest (July 30-31st) as a Single-Op entry. QSL only direct ti YB9WZJ.

KH2, GUAM (Update). Take, JS6RRR, is now active as KH2/JS6RRR from Guam (OC-026) until 0300z, February 15th. Activity will be on 160-6 meters using CW, SSB, FM, RTTY and PSK31. QSL KH2/JS6RRR via JS6RRR, by the Bureau (E-mail requests to JS6RRR@jarl.com) or direct (SASE).

KH6BZF PROPAGATION FORECAST/REPORT (For February 14-20th)....
Feb 14 AN SOLAR REFERENCE KEYS
Feb 15 AN --------------------
Feb 16 AN BN - Below Normal
Feb 17 AN AN - Above Normal/Geomagnetic Level is QUIET
Feb 18 AN LN - Low Normal
Feb 19 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Feb 20 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

JW, SVALBARD. Operators Glenn/LA8XRA and Trond/LA9VDA will be active as JW8XRA and JW9VDA, respectively from Svalbard, between February 20-25th. Activity will probably be from the JW5E club station in Longyearbyen on Spitsbergen Island (EU-026) and on all bands, CW and SSB. QSL via their home callsigns. For direct QSLs, please add 3 USDs or 1 new and stamped IRC with a SAE. Cards without this will be sent through the Bureau.
A big thanks to Dave, W5BXX, for his support.

PJ2, CURACAO (Correction). Operators Don/W5FKX, Jim/N5HZ, Dave/W5XU and Mike/W5ZPA will be active as PJ2/homecall from the Signal Point Station (PJ2T) on Curacao (SA-099, WLOTA LH-0942) between March 10-17th. Activity will be on all bands and modes. All QSLs for this should be sent via the individual operator's home callsign.

PJ2, CURACAO. Operators Hawa/DK9KX, Dieter/DJ9ON and Jan/DJ8NK will operate from Curacao (SA-099, WLOTA LH-0942) between June 26th and July 7th. They will have a strongly emphasis on 6 meters, but the HF bands will also be used on CW, SSB and RTTY. Callsign and further info will be published soon.

PJ7, SINT MAARTEN. The PJ7X team is pleased to announce that they will be operating from Sint Maarten (NA-105), one of the newest entities on the DXCC list, for 12 days in October and November 2011. The international team consists of the following experienced operators with 187 years of amateur radio involvement among them:
Jan Harders, DJ8NK Kan Mizoguchi, JA1BK
Paul Granger, F6EXV Rich Gelber, K2WR
They will arrive in St. Maarten on October 26th, and depart on November 9th. This time span includes the CQWW DX SSB Contest (October 29-30th), which they will enter in the Multi-2 category. Their intention is to keep 2 stations on the air for 24 hours a day to the extent possible. During peak periods, they may be able to run a third station. Emphasis will be on CW and SSB, but they will also operate RTTY as much as possible. The operation will include all bands from 80-10 meters, including the 30/17/12 meter bands, but not including 60 meters. Also, they will not be operating on 160 meters due to space limitations at their operating location, nor on 6 meters. The primary callsign used will be PJ7X. Other callsigns will be PJ7NK and PJ7J. The PJ7J callsign will be reserved for use on 75 and 80 meters, and a principal goal of this operation will be to make as many QSOs as possible with Europe and Japan on this band. QSL information is:
PJ7X via F6EXV PJ7NK via DJ8NK PJ7J via JA1BK
Internet log checking, updated daily, is planned. All logs will be uploaded to "Logbook of the World" a few months after completion of the operation. Website is coming soon! They hope to fill in lots of band/modes slots for those who need them and even provide an all-time new one for some.

NEW MANAGER. Petr, OK1DOT, informs OPDX that he is the new QSL Manager for HR2DMR. ONLY QSL direct since Petr is no longer a member of the Czech Radioklub, so the Bureau QSL service is not available. Please enclose sufficient return postage (2 USDs or 2 new IRCs) and a Self-Addressed Envelope (SAE) if you QSL direct.

QSL STATUS S59DJK, S50W AND S50PTUJ. Herman, S51NM, informs OPDX that the Radioclub Ptuj (S59DJK) has announced to all who had made QSOs with a special club callsign S50PTUJ between August 5th and November 5th, 2010, that their QSL cards are coming from the printer next week. The first batch of direct QSLs will go to the post office first, and all others (about 5600 of them) will go to the S5 (ZRS) Bureau. They also inform that since January 1st, 2011, QSOs with the club callsigns S59DJK, S50W and S50PTUJ (after Feb. 20th, 1998) have been uploaded to the LoTW. Herman states, "Thanks for the patience, to all who sent direct QSLs (mostly JA and USA), who have been waiting for an answer so long."

QSLS VIA LoTW: HI3TEJ, JS3CTQ, T32OU and T88ZM

QSLS RECEIVED VIA MAIL: 1A0KM, 3C0C, 5B50AIF, 5V7TT, 5W0BR, 5X1NH, 5Z4/G4OHX, 6V7T, 8Q7FF, C6AKQ, C91DL, C91JR, CO8ZZ, CX5CW, D44TBV, EK3SA, FO5RH, FR/DJ7RJ, HI3TEJ, HK0GU, HK1R, HK1X, KC4AAA, KC4USV, KL7RA, KL7RRC/P, MJ/PA3EWP, OA4TT, PJ2/K2NV, PJ2/N2MF, PJ2T, RI1FJ, S21YX, T80W, TL0A, V73TM, VK5AUQ, VY2ZM, XR0Y, ZB3R, ZD9AH, ZD9GI and ZD9T

QSLS RECEIVED VIA THE BUREAU: 5B/DL2HRT, 9Q/DK3MO, CG3AY, DF1SZ, DL6DH, DL7ON, HI7/DK7PE, LW3DG, OE100M, OY3AA, PJ2T (2006/2007), SP9KRT, T33R, UA9NN, V31YN/P, VE3ZZ/VY2 and YS4/N0AT

RUSSIAN WW PSK CONTEST 2011. The Contest-Committee of EPC Russian section hopes to see your callsigns among the participants of Russian WW PSK Contest from 2100z Friday, February 18th, until 2100z Saturday, February 19th. Modes BPSK31, BPSK63 and BPSK125 will fly through all bands from 160-10 meters. They ask you to support them and take personal part as well as in team, in order to:
- represent worthy the amateurs of digital modes on air;

- define the strongest among the sportsmen in the world, on the continents, in Russia and in other countries;
- struggle for prize-winning places and receive our plaques, cups and awards;
- enlarge collections of hunters for EPC awards and get necessary points for the most complex and prestige awards, for example, PSFA (do not forget to fill up locators in the log after the contest).
If you make less than 50 QSO's and indicate in line "soapbox" of your report that it is your first PSK contest, they shall be glad to present you with the memorable award for participation after checking of this declaration and confirming of the final result.
All popular contest-programs support their contest. For users of MixW they have prepared the help file on adjustment of MixW for RUS WW PSK.
They wish you great success, and they hope to work on air during Russian WW PSK Contest-2011! 73.... Contest Committee <www.epc-ru.ru>

SOUTHERN SUDAN TO RETURN TO COUNTRY STATUS. Over the last few months many have been waiting for the final outcome of the referendum vote for the separation of the Sudan and Southern Sudan, and now the great outcome is here. With the overwhelming majority of 90% of the people voting for another independent state, the Southern Sudan will once again become independent. With the Republic of Sudan agreeing to honor the referendum, and the United States pledging to recognize the new country status in July, it would seem that the DXCC Entity List would be going up one. Currently, reports indicate that the Southern Sudan will declare its independence on July 9th. There is even talk that this new country may even change its name, possibly without the name Sudan in it. Anyway, with this separation taking place, there were two major announcements this past week (possibly more in the coming weeks) of DXpeditions to take place in the middle of 2011 to activate this one (once the DXCC makes its ruling). Here are the two press releases:

1] Excerpts from "The Daily DX" states (edited): "...a working group has been established to enable Amateur Radio to enter the scene with a professional, supportive role in the context of introducing the new country to the world of Amateur Radio. It should be noted that this potential new country is emerging with a limited administrative structure, and the first Amateur Radio activation should - prior to the operation - be accompanied with a well-thought-out plan prepared in partnership with Southern Sudan's relevant authorities, such as telecommunications, security and education.
The group of Alex/5Z4DZ/PA3DZN, Robert/S53R and Martti/OH2BH has organized such an effort in discussions with Southern Sudan's insti-tutions and other related parties in the region.
Many of Southern Sudan's current institutions are represented in Nairobi, the home base of 5Z4DZ. Nairobi makes a practical hub for the project, facilitating the conduct of negotiations and travel to Juba, the region's future capital.
S53R and his team, with several well-known hams, are based in the region and maintain the telecommunications structure for UNWFP with related professional contacts. Their regional offices are in Southern

Sudan with all needed facilities and equipment.
The plan is to use OH2BH's past work and material for the establishment of Amateur Radio in evolving societies as a foundation for assisting the newborn nation to draft and utilize Amateur Radio to its full potential in a professional setting when Southern Sudan joins the international family of nations.
As public interest in Southern Sudan will run high over the next several months, this group has invited Bernie, W3UR, to be its spokesman in dealings with the Amateur Radio community. The group will also be holding discussions about the provision of potential help to Southern Sudan's prospective Amateur Radio Service with several entities, such as NCDXF, in addition to obtaining resources from Japan.
The group wants to encourage the DX community to closely follow the rather complicated process unfolding around the emerging new nation, and hopes for a peaceful continuation of the process as the official referendum results are announced, leading up to the ultimate declaration of independence by the new country.
Updates will be released from time to time between now and July, and it is predicted that prospects for a new DXCC counter are some months away with preparations well underway."

2] Paul, N6PSE, reports (edited): "The 'Intrepid-DX Group' and the 'DX Friends' have combined efforts to announce our next DXpedition, to the newly created country of Southern Sudan, to take place after July 9th, 2011.
The Intrepid-DX Group is the group which brought you the 2010 YI9PSE, IRAQ DXpedition. The DX Friends have brought you the 2006 S01R DXpedition to Western Sahara, the 2008 DXpedition to Rwanda as 9X0R, the 2009 DXpedition to Western Sahara as S04R, the 2010 DXpedition to Palestine as E4X and the 2010 DXpedition to San Marino as T70A.
Once again, ICOM America has agreed to be Global Radio Sponsor, while ACOM-K1LZ has agreed to provide the venerable ACOM amplifiers for this operation.
It is hoped that the callsign ST0DX will be issued this next week following our meeting with the Government of Southern Sudan Mission in America.
As with previous DXpeditions, this will be a major effort with a target of more than 150,000 QSOs. There will be up to ten stations on the air, using amplifiers along with high performance beams and vertical dipole arrays, 24 hours a day, for almost three weeks.
Our primary objective is to activate Southern Sudan with a view to giving as many DXers as possible a first contact with this new DXCC entity and, as a secondary objective, to give as many band-slots as possible.
We will soon be seeking contributions from sponsors to help defray the very significant logistics costs of this DXpedition. For example, there is limited electricity in Southern Sudan so generators will have to be shipped.
Details of how to donate will appear on our website which will be live very soon. PayPal donations may be made directly via the site.

All donations of 10 USDs or more will be acknowledged.
The logos of all DX clubs etc which have helped to sponsor the DXpedition will be shown on the QSL card, as will the names and callsigns of those who make an individual contribution of 100 USDs or more.
This first Press Release is intended mainly to alert you to our upcoming DXpedition. More information will be available soon via our website.
Thank you,
The Intrepid-DX Group and The DX Friends."
The groups Web page are: http://www.intrepid-dx.com
http://www.dxfriends.com

SV9, CRETE (EU-015). Willi, DJ7RJ, will once again be active as SV9/DJ7RJ between February 24th and March 15th. Activity will be on 160-6 meters, using CW and SSB. He prefers the lower bands. QSL via his home callsign, direct or by the Bureau.

T31, CENTRAL KIRIBATI (Update). An international team will activate T31A from Kanton Island (OC-043) between April 17-28th. See OPDX.994 for more details. The latest update states, "We are finalizing the manifest and shipping arrangements. All equipment is to be moved from the QTH of N7CQQ to the port near Los Angeles for shipment to Apia." The T31A Web page is available at: http://www.T31A.com

TG9, GUATELMALA (160m). Franco, TG9NX, wants to inform the 160 meter DX community that he continues to receive requests for operations on the top band. However, Franco states that he is having big difficulties receiving on 160m due to noise and the fact that in Guatemala the Power Company uses the power lines to transmit. Despite this enormous inconvenience, he has logged 300+ QSOs. He states, "Therefore, it is not a matter of working split or simplex, the main problem is copying through this very high level of noise." He mentions also that his 160m operations have NOT stopped -- due to the harsh comments and his operating skills, is totally false.

TJ, CAMEROON (Update). The international team composed of members of the Provins ARC (F6KOP) will continue to be active as TJ9PF from Kribi until February 20th. As of press time, the team has worked 14220 QSOs (as of 1618z on February 13th) with 6457 unique callsigns. The team has reported power problems. For more details and updates, visit the TJ9PF Web page at: http://www.tj9pf.fr

UA2, KALININGRAD. Members of the UA2 Contest Club will be active as UA2F (ex-RW2F and RK2FWA) during the ARRL DX CW Contest (February 19-20th) as a Multi-Single entry. They will also be active in the CQ 160-Meter SSB Contest (February 25-27th) as Multi-Op entry. QSL via DK4VW.

UK9, UZBEKISTAN. Fedor, UK9AA, will be active during the CQ 160-Meter SSB Contest (February 25-27th). He plans to use his new 5 element full size 160m yagi. QSL via UK9AA direct.

V5, NAMIBIA. Gert, ZS6AYU, will be active as V5/ZS6AYU from various locations between March 6-16th. Activity will be holiday style on 30-15 meters CW only (usually late afternoon and/or early morning). QSL via ZS6AYU direct only. LAST UPDATE: Gert's schedule is as follows:
March 6-7th - QTH Aus March 10-12th - QTH Swakopmund
March 8-9th - QTH Sesriem March 13-16th - QTH Okaukuejo near Etosha

VP8O, SOUTH ORKNEY ISLANDS. Members of the Microlight Penguins went QRT as VP8ORK from Signy Island (AN-008) on February 8th, at 0800z. The VP8ORK log shows (at 0800z, February 8th) that they have made 63643 QSOs with 17679 unique callsigns (41945/CW, 17090/SSB and 4608/RTTY). The online log can now be found at: http://www.clublog.org/charts/?c�8ork
If you want a QSL card there are three ways available to receive one: OQRS direct (on the VP8O Web page), OQRS Bureau (on the VP8O Web page) and direct by mail via VE3XN [w/SASE/Green Stamps/IRC(s)]. For more details and updates, visit the VP8O Web page at: http://www.vp8o.com

VP9, BERMUDA. Mark, AA1AC, will be operating from the Hamilton Parish, Bermuda (NA-005), as VP9/AA1AC from March 7-12th. QSL via to his home callsign, direct or by the Bureau.

VU4, ANDAMAN ISLANDS. It was announced that a team of members from the Amateur Radio Society of India plan to be active as VU4PB from Port Blair, between March 15�31st. They will have 4 stations on the air. More details will be forthcoming.

XU7, CAMBODIA. Look for Peter, NO2R, to be active as XU7ACY from Sihanouk Ville during the ARRL DX CW Contest (February 19-20th) as a Single-Op/ All-Band/Lower-Power entry. QSL via W2EN.

153. MMMonVHF SPECIAL Newsletter 2011-02-15

Newsgroup: rec.radio.amateur.misc
Date: 2011-02-15 18:52:38 UTC
From: MMMonVHF News Mailer <noreply@mmmonvhf.de>
Message-ID: <201102151722.p1FHMQmg022849@server13.web4a.de>
Source record: 4843
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.info

Hallo dear MMMonVHF friends,

please find below our SPECIAL NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-02-15
We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page
http://www.mmmonvhf.de/latest.php - welcome and enjoy ...

****
144 MHz AURORA - PROPAGATION
MMMonVHF The VHF-DX-Portal
****

Hallo Gents,

we suppose you've seen the 2 Solar Blasts from past hours?
Yesterday morning an M6 and this morning an X2.2 flare occured!
Both were accompanied by a CME and the spot was rather well
situated in direction earth... hence, perhaps Aurora-Propagation

! FINALLY ! The sun is active for us VHF people again!

BE PREPARED! Keep an eye at the VHF bands and if you have any
AURORA Observation, please do spot it via www.mmmonvhf.de/au.php
DO NOT FORGET TO SPOT THE QTF (direction) of your antennas...!

More about AURORA Propagation please follow our infos at:
http://www.mmmonvhf.de/minibb/index.php?action=vtopic&forum=15

The VHF-DX-Portal will start to document the 144 MHz AURORA Openings
as you well know it from 144 MHz TROPO and 144 MHz ES Openings!

SOURCE: Peter, PA3BIY, on behalf of the MMMonVHF Team

** DEADLINE for your NEWS input to MMMonVHF**

... for your News (pse use: http://www.mmmonvhf.de/newsuser.php)
to the next MMMonVHF Newsletter will be next thursday 2359 UTC ...

****
The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USER of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats

like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USER who did send us info and news **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/kontact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

154. [DXNL] DXNL 1715 (Feb 16, 2011)

Newsgroup: rec.radio.amateur.misc
Date: 2011-02-15 23:47:41 UTC
From: Robert Busch - DL7VOA <dl7voa@gmx.de>
Message-ID: <118812156015.20110216004346@dxhf.darc.de>
Source record: 4844
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.info

DXNL 1715 - Feb 16, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

C6 - BAHAMAS, NA-080
Bob,N4BP (C6AKQ), and Kevin,K4PG (C6APG), are in Freeport/Lucaya on
the Bahamas (NA-080) and will stay there until Feb 21 (including the
ARRL DX CW Contest). Bob arrives on Feb 15 and Kevin two days later.
A third OP may join them later who plans to focus on 160m then.
Outside of the contest they will work in CW and digital modes on the
WARC bands. QSLs direct or via LoTW to their homecalls.

FS - ST MARTIN / PJ7 - SINT MAARTEN, NA-105
From Feb 23-27 Jeff,VA3QSL, will be active as FS/VA3QSL from the
French part of St. Martin (NA-105, DIFO FS-001, WLOTA 0383) and
as PJ7/VA3QSL from the Dutch part Sint Maarten (NA-105, WLOTA 0711).
Jeff works "holiday style" in CW and SSB on 40m-10m, mostly on the
usual IOTA frequencies. QSLs via bureau or direct to his homecall.

HC - ECUADOR
Rick,NE8Z, is travelling through Ecuador again and will show up in CW,
SSB and RTTY on 80m-10m (WARC preferred) between Feb 23 and Mar 12 as
HC1MD from Pichincha Province (Feb 23-Mar 3 and Mar 9-12)
HC1MD/HC4 from Manabi Province (Mar 4-8)
QSL cards should be sent to K8LJG.

HH - HAITI, NA-096
Jan,HH4/K4QD, and Don,HH4/AF4Z, will stay on Haiti (NA-096) from Feb 18
until Mar 5. Activities will take place in CW, SSB, RTTY and maybe also
in PSK on 80m-10m. Both are working for the NW Haiti Christian Mission
(http://www.nwhcm.org) in Saint-Louis-Du-Nord.
Jan prefers QSLs direct or via LoTW, but via bureau is ok as well.
QSLs for AF4Z can be sent only direct unfortunately.

J7 - DOMINICA, NA-101
Lars,SM0CCM, is going to visit Dominica (NA-101) again from Feb 21 till
Mar 28. He will sign J73CCM in CW, SSB, RTTY and PSK31 on all bands.

Stig,SM3PHM, will join him on Mar 14 and plans to be active as J79M.
Stig prefers working in CW on 160m.
QSLs should be sent via their homecalls, preferably via bureau or LoTW.

J8 - ST VINCENT, NA-109
Dave,G3TBK, plans to activate St. Vincent (NA-109) as J88DR between
Feb 16 and Mar 14. He wants to join the ARRL DX CW Contest, the ARRL
DX SSB Contest and the RSGB 74th Commonwealth Contes during this time.
Dave works in CW/SSB/RTTY on all HF bands (WARC bands preferred).
QSLs via RSGB bureau or direct via G3TBK.

JW - SVALBARD, EU-026
From Feb 20-25 Glenn,LA8XRA, and Trond,LA9VDA, will be active from
Svalbard (EU-026, WLOTA: LH-0125) signing JW8XRA and JW9VDA mostly in
CW and some RTTY or SSB on 160m-10m.
QSL cards should be sent via bureau or direct to their homecalls.

KH0 - NORTHERN MARIANA ISLANDS, OC-086
OM Yuichiro,KH0/JM2RUV, announced to be active in CW and SSB on all
bands from Feb 18-22. He wants to take part in the ARRL DX CW Contest.
QSL via bureau or direct to his homecall.

TG - GUATEMALA
David,TG7/N6HD, is working in CW and SSB on all bands from 160m-10m
between Feb 15 and Mar 7. QSL cards should be sent via his homecall.

V3 - BELIZE
Will,AA4NC, is staying Placencia from Feb 16-23 and wants to become
active as V31RR in CW, SSB and RTTY also on the WARC bands. He wants
to take part in the ARRL DX CW Contest as well.
QSL via AI4U or LoTW but NOT via bureau.

V4 - ST CHRISTOPHER AND NEVIS, NA-104
Jon,V47JA (W5JON), and his XYL Cathy,V4/W5HAM, are going to spend their
holidays in Calypso Bay (NA-104) between Feb 16 and Mar 30. Activities
will take place in SSB on 80m-6m including the ARRL International DX
SSB Contest (Mar 5/6) and the WPX SSB Contest (Mar 26/27).
All QSLs via W5JON.

V5 - NAMIBIA
Klaus,V5/DJ4SO, will be QRV again in CW and also RTTY/PSK31 on
160m-10m from a farm southeast of Windhoek between Feb 22 and Mar 23.
QSL via bureau or direct to his homecall (via e-mail request to
klaus@dj4so.de). Another possibility to get a QSL is the LoTW.

V8 - BRUNEI, OC-088 / 9M8 - EAST MALAYSIA, OC-165
John,9M6XRO, and Steve,9M6DXX, will stay in Brunei (OC-088) from Feb 22
till Mar 2 signing V85/GD3OOK and V85/G4JVG or V85/9M6XRO and V85/9M8Z.
In between they will show up from Pulau Satang Besar (OC-165) from
Feb 25-28 signing 9M6XRO/8 (CW) and 9M8Z/p (SSB). They will work with
two stations including amplifiers, a Hexbeam and verticals on the beach
QSLs for all calls should be sent via bureau, direct or LoTW to M0URX.
QSLs can be requested via OQRS at http://www.m0urx.com/qsl-request-form

VK9/C - COCOS (KEELING) ISLANDS, OC-003
Phil,G3SWH, and Jim,G3RTE, are expected to show up as VK9C/G6AY from
Cocos (Keeling) Islands (OC-003) between Feb 22 and Mar 5. They will
work in "CW only" on 80m-10m with two stations.
QSL cards should be sent via bureau or direct to G3SWH.
On their website you can find more information and request bureau QSLs:
http://www.g3swh.org.uk/vk9c-g6ay.html

ZF - CAYMAN ISLANDS, NA-016
John,K6AM, is working as ZF2AM from the Cayman Islands (NA-016) between
mid and end February. He also plans to join the ARRL DX CW Contest and
the CQWW 160m SSB Contest (Feb 25-27). John prefers working on the
WARC bands before and after the contests.
QSL via bureau, direct or LoTW via K6AM.

5X - UGANDA
Nick,G3RWF, will return to Fort Portal in Western Uganda signing 5X1NH
from Feb 20 until Apr 14. Primarily Nick is working there but will
spend time for his hobby during his spare time. Nick prefers CW but
will work also in digital modes and some SSB on all bands except 160m.
QSL cards should be sent via bureau or LoTW to his homecall.

6W - SENEGAL
Dave,WJ2O/6W, will show up from Senegal only in CW on all HF bands
from Feb 17-22. He also plans to take part in the ARRL DX CW Contest.
Dave will focus on the WARC bands before and after the contest.
QSL via WJ2O. Logs will be available on: http://www.wj2o.com

9V - SINGAPORE
Marco,9V/DL4MN, is QRV in CW, SSB and RTTY until the end of February.
QSLs are preferred via bureau to his homecall.

ANTARCTICA
Mehdi,F5PFP, has left Ushuaia onboard a yacht on Feb 14 starting a
six week trip which will bring him to several island groups, islands
and territories. Stops have been planned on the Beagle Channel Islands,
the South Shetland Islands, West Graham Land, Palmer Islands,
Biscoe Islands, Adelaide Island, Marguerite Bay and on his way back
also on the Melchior Islands. Mehdi will use the callsigns FT5YK/p,
VP8DLM and CE9XX but still waits for a LU call.
Mehdi can be found in SSB on 40m mostly around 2200-0200 UTC and maybe
also on 20m a little earlier. His equipment includes an IC-706, FT-897,
an IC-2KL amplifier and quarterwave verticals for 20m and 40m.

CANARY ISLANDS, SPECIAL EVENT STATION
The special event station EG8ISS will be QRV from Feb 12 until Mar 11.
The license has been issued after the first radio contact of a school
class on the Canary Islands with the International Space Station (ISS).
All QSOs will be confirmed automatically even direct if you are listed
at QRZ.com. More information can be found at: http://www.isscontact.eu

SILENT KEYS: Following DXers passed away during the last weeks:
Fernand Leroy (F6BSF), Agostino Sereno (I1SEA), Dick Scarvaci (K9CAN),

Alessandro Sarru (IS0MYN), Norma Mendel (KC5DDO), Scott Wayland (N1HXC)
Matti Nummeli (VE3EEI, ex-OH2ZD) and John P. Burgio (W2JB).

DXCC: The QSL cards of 9X0SP (operation from Ruanda in 2010) are accepted
for DXCC credit now.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Feb 18/19: Russian WW PSK Contest
Feb 19/20: ARRL International DX Contest, CW

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AF-086, D4, Cape Verde, Windward Islands: A group of HAMs will be QRV as
D44AC from Sao Vicente Island from Feb 16-22. They will sign D4C in the
ARRL DX CW Contest. The QSL route for D44AC can be found at QRZ.com.
QSLs for D4C via CT1ESV (bureau) or IZ4DPV (direct).

NA-002, VP5, Turks and Caicos Islands: Stan,VP5/AC8W, Jim,VP5/KB8TXZ, and
Lee,VP5/N8LJ, are working from Providenciales Island from Feb 15-23.
They will sign VQ5D in the upcoming ARRL DX CW Contest.
QSLs for VQ5D via AC8W, all other QSLs via homecalls (bureau/direct).

OC-046, FO, Windward Islands: Ted,FO/K8AQM, will activate Moorea Island
from Feb 20-25. Ted will work "holiday style" with 100 watts on 20m
and 30m. QSL via homecall (bureau/direct/LotW).

SA-055, LU, Buenos Aires Province Group: Ezequiel,LU1EEZ/D and Mark,LU7CAW/D
will show up from Martin Garcia Island from Feb 23-28.
QSLs for LU1EEZ direct (see QRZ.com) and for LU7CAW via bureau.

8th ANTARCTIC ACTIVITY WEEK (AAW)

The 8th Antarctic Activity Week (AAW) will take place from Feb 21-27, 2011.
Several special event stations will be activated and this is a good chance
to collect WAP reference numbers for the Worldwide Antarctic Program (WAP).
For more information check the website: http://www.waponline.it
One special event station will be AO1AAW from Spain operated by Jose,EA1CUB,
Juanjo,EA1WX, Javier,EC1KV, Daniel,EB1LA, Juan,EA1AUM, and Jose,EA1CS. They
are QRV on all bands from 160m-10m handing out the reference number WAP-023.
QSL cards should be sent to EA1GHT, via bureau, direct or via LoTW.
Another special event station will be IO5ANT from Italy (WAP-210).
The station is situated in the "Museo Nazionale Dell Antartide" in Siena.

QSL cards should be sent to IW5EFX, via bureau, direct or via LoTW.

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WINQSL), DJ5AV,

The ARRL Contest Update

Published by the American Radio Relay League
****************************************

February 16, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Dots of Ditstruction - ARRL CW DX
- A Touch of Typistry - NAQP Digital
- CQ WPX Cabrillo Checker
- Where Do Our Frequencies Come From?
- The Crowd on Top Band
- 10 GHz Contest Writeup
- Will the Real G5RV Please Stand Up?
- Using HFTA
- Sailin' Cross the Sea Lanes

NEW HF OPERATORS - THINGS TO DO

The ARRL DX Contest <http://www.arrl.org/arrl-dx> - in which all the DX
stations vie for contacts with US and Canadian stations - is a great
opportunity for Little Pistol stations to fill their logbooks (as well
as their QSL bureau envelopes and LOTW accounts) with DX QSOs from
around the world. The contest has new categories for Low Power
operation, too. This weekend features CW followed by Phone two weeks
later!

BULLETINS

Sunspot 1158 is firing off all sorts of flares - the strongest in four
years - and causing disruptions to the geomagnetic field as this issue
is being readied for distribution (Tuesday morning). Depending on how
active it remains over the next couple of days there may be significant
impact to HF propagation for the ARRL DX CW Contest this weekend. Watch
Spaceweather.com <http://spaceweather.com/> for the latest solar news!

BUSTED QSOS

None reported from last week's issue!

CONTEST SUMMARY
```

Complete information for all contests follows the Conversation section

Feb 19-20

- ARRL International CW DX Contest
- Semi-Automatic Key Evening (Feb 16)
- Russian WW PSK Contest (Feb 18)
- Feld-Hell Annual WAS Sprint
- AM QSO Party
- FM Simplex Contest
- CQ WW 160 Meter SSB
- Pennsylvania FM Sprint

Feb 26-27

- REF Contest
- UBA Contest CW
- Mississippi QSO Party
- North American QSO Party--Digital
- North Carolina QSO Party
- CQC Winter QSO Party (Feb 28)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

CQ WPX Director, Randy K5ZD, continues innovating like that giant sunspot firing off solar flares. "I am pleased to announce a new tool <http://www.cqwpx.com/logcheck/> to help everyone format their logs correctly for the WPX Contest. The Cabrillo Log Check page will check the format of your Cabrillo log file for any mode of the CQ WPX Contest. Use this to check your log before submitting it to the robot." The new page by Tzetzo LZ2FQ supports CQ WPX RTTY, SSB, and CW in Cabrillo 2 or 3 formats.

More innovation in contest administration comes from the Russian DX Contest Committee as they tighten up the requirements for winning logs with new rules <http://www.rdxc.org/asp/pages/rulesg.asp>. Competitive logs will now be required to specify frequencies with a 1-kHz resolution and to be submitted within 36 hours. The intent is to crack down on post-contest log editing and during-the-contest spotting information poaching. (Thanks, Harry RA3AUU)

Ham radio was a key element of the February 2011 Scientific American article, "Citizen Satellites on CubeSats <http://Scientificamerican.com/feb2011/cubesats>". The story covers satellite standardization of design and internal structure and how it has enabled a CubeSat <http://www.cubesat.org/> "community", likened to a cottage industry of universities and organizations that can now launch their own satellite for less than $100,000.

So why does ham radio still have such a devoted following in the face of modern telecommunication wizardry? This article on the Wired web site <http://www.wired.com/epicenter/2011/02/ham-radio-tweets> by David Rowan offers some opinions. As the author says, "You can tweet all you like, but this is the way to communicate." (Thanks, Jim W4JTP and Brad

W1NT)

An article reviewing CQ WW 160 Meter CW by the YE1C team <http://ye1c.wordpress.com/2011/02/08/review-of-cq-160-cw-2011/> may be of interest to those who want to know how the noise and static crashes affect Top Band operation in Indonesia. "For the first time ever in Indonesia, we installed nine RX antennas but due to poor propagation on 160 meters, the QSO totals are lower than in 2010." (Thanks, Jo YC0LOW)

Speaking of Top Band, reservations and tickets are now available for the 22nd Annual Dayton Top Band Dinner <http://topbanddinner.com/> to be held on Friday, May 20 at the Crowne Plaza in downtown Dayton, Ohio. (Thanks, Tim K3LR)

Since the Universe now seems to be more than 250 times bigger than observable <http://www.technologyreview.com/blog/arxiv/26333/>, hams everywhere know the answer - we need bigger antennas!

Bob N6TV made a good suggestion - the simplicity of Morse code might be a way to communicate with someone who is incapable of speaking due to a stroke or other injury. Does your family know about code readers and other means of engaging via CW? If you can wiggle your fingers, the message might be able to get through!

How much does it cost to mail something? You can find out by using the online USPS postage calculator <http://www.usps.com/tools/calculatepostage/>. It might take a while to lick enough stamps to mail that Collins 75A4 receiver, though.

We have a celebration coming up - Leo Meyerson, W0GFQ, turns 100 years old on February 24th. Leo was the founder of World Radio Labs in Council Bluff, Iowa, and his WRL Globe and Galaxy lines of radios put a lot of hams on the air from the 1950's through the 1970's. (Thanks, Phil K3UA)

Web Site of the Week - In the latest IARU e-letter <http://www.iaru.org/e-letter/>, ARRL ex-president Rod W6ROD presents an in-depth look at the International Telecommunications Union (ITU), the international regulatory body that oversees the radio spectrum. It makes for informative reading and W6ROD promises more articles about international licensing and allocations in future issues.

WORD TO THE WISE

"Temporary" adj. - used by a ham radio operator in obtaining permission to erect antennas and meaning "until I die".

==> SIGHTS AND SOUNDS

It was a little crowded in the UK early on Sunday morning during the CQ WW 160 Meter contest as this visual display from Ian G3NRW's SDR <http://homepage.ntlworld.com/wadei/110130_top_band.jpg> attests.

The Minnesota QSO Party proved to be a great training ground for Sarah W0MSW using her school's club call sign <http://www.youtube.com/watch?v=L7rBtYQjWT8> under the watchful video camera of her dad, Scott K0MD. Sarah's two sisters are also licensed and the younger brother getting into the act in the background will soon be clamoring for rig time, as well. State QSO parties are great introductions to radiosport!

Dan K1TO recalls climbing a 600-foot tower in Vienna, Austria during his European trip to WRTC-2000 from which he could see HA, OE, OK, OM, and 4U1VIC. Where else could you see a similar sight? The Wikipedia pages on country borders <http://en.wikipedia.org/wiki/List_of_sets_of_four_countries_that_border_one_another> give some clues. Surprisingly, there are no "Four Corners <http://en.wikipedia.org/wiki/Quadripoint>" in the world of international borders.

Not exactly radio, but definitely one of the better homebuilt accomplishments <http://www.wimp.com/kineticsculpture/> you will ever see. (Thanks, Kirk K4RO)

==> RESULTS AND RECORDS

Don't forget the new categories in the ARRL DX Contest <http://www.arrl.org/arrl-dx> - Multioperator, Single Transmitter and Single-Operator, Assisted now have High and Low Power divisions. Delivered by contest writeup author Bruce W9FZ, results for the 2010 ARRL 10 GHz and Up Cumulative contest are now online <http://www.arrl.org/contest-results-articles>. Watch for K9LA's writeup for the 2010 IARU HF Championship contest before long. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

AA5B and KK6MC are sponsoring a major award for the top multioperator entry in the Spring QRP-ARCI QSO Party <http://qrparci.org>. "The multioperator category is a great one in many ways and it is a shame that many QRP contests do not offer this option and that more QRP operators do not pursue this category when available in a contest. By offering a major award to the winners of the multioperator category, we are hoping to encourage more participation in the multioperator category, and perhaps to encourage more contest organizers to include a multioperator category." (Thanks, James KK6MC)

OPERATING TIP

Pre-de-caffeinate yourself during the week before a major contest so that when you really need that coffee kick late in the game you aren't fighting your normal tolerance. Soak up the sleep now and save the stimulation for after you've exhausted your regular resources.

==> TECHNICAL TOPICS AND INFORMATION

The term "G5RV antenna" is applied to lots of antennas that would be hard for G5RV to recognize as his creation. If you want "the original Greek", G5RV's original article <http://www.k6mhe.com/n7ws/G5RV.PDF>

from 1958 is available online. (Thanks, Bill K4CIA)

Glenn KD0Q is a big fan of the Safety LifeLine <http://www.anwireless.com/lifeline.html> for climbing his AN Wireless free-standing tower. "The sleeve that attaches to the cable also attaches directly to the front of my harness - I use no lanyard. The sleeve slides right along the cable with me as I climb. It really reduces the time it takes to climb the tower compared to hooking and unhooking two lanyards. I feel much safer as the hooking and unhooking is eliminated and there is little slack to take up if something happens."

If you want a reliable, rugged footswitch, follow the lead of the tattoo artist whose customers would not care at all for incomplete body art. Ron WW8RR - who is not a tattoo artist - recommends the Linemaster Gem switches <http://www.linemaster.com/Industrial/Footswitch.aspx?catNo=GemVandGemVK>. "These are round, heavy duty, weighted, non-skid, virtually indestructible foot switches. Since they are round it doesn't matter which angle your foot hits the switch, it activates. The internal design does not use any micro switch, but instead has three compression springs, heavy brass rings, and steel plate. It is as robust as it gets. There is really nothing in the design to wear out or fatigue."

Homebuilders and repair techs are finding that PCB-mounted pots and controls are more likely to have 6-mm diameter shafts that won't securely hold a knob designed for a 0.25-inch shaft. Ken WA4MNT shows how to add a plastic sleeve over the shaft <http://www.qrpbuilder.com/downloads/6mm_sleeve.pdf> to solve the problem. Use the next smaller size from 3/16" and slit it to fit - don't heat it up. Graham VE3GTC notes that some brass shim of 0.005-006" thickness will also do the job.

The CalculatorEdge <http://www.calculatoredge.com/> is another great web page with tons of engineering calculators for just about any kind of technical problem. (Thanks, Russ KD0EIA)

KL7RA asked if the Data Shark coax trimming tool mentioned in the previous issue might nick the inner conductor of RG-213, so I asked N4ZR about it. "I made the original statement based on the diameters of the outer jackets, but wondered about the inner conductor myself, so I tried it. To my pleased surprise, even with no skill involved, it did not touch the inner conductor. In the event of slight variations in RG-213, perhaps a caution would be in order - you'll hear the blade cut the braid, then silence while it goes through the dielectric. If you don't hear it at the end, then it hasn't hit the inner conductor. If it has, back out, try again, and stop a little short of the point where it starts to sound off. Not much skill required."

When using steel conduit for running coax cables, Roger K8RI points out, "Carefully de-burr the ends of the conduit as a tiny burr can peel the jacket right off a piece of coax. Leave no rough edges that can

contact the coax." Ends of conduit need to be fully seated into couplers and fittings, too. "If not fully seated [the edge] will form a squared-off edge of 1/4 to nearly 3/8"" on which cables can catch. If need be, bevel the inside of the male end to a 60-degree angle so there is no lip." Roger also recommends the use of two 45-degree "sweeps" to make a 90-degree turn as they put a lot less stress on the cable when pulling it through. And use lots of inexpensive wire soap, too!

For someone with a few years of antenna work ahead of them and an interest in welding, check out your local school system's nighttime adult education classes. (Thanks, Gene W2LU)

Pat KC0ZIW recommends an outstanding tool for finding the correct beam heading and distance <http://www.njdxa.org/dx-tools/beam-headings.php> for DX countries that's also a good prefix reference. Just follow the instructions on the web page.

Technical Web Site of the Week - For information on how to use HFTA by Dean N6BV and what it can do for your station take a look at the Yankee Clipper Contest Club's website <http://www.yccc.org/Articles/index.htm> for presentations by Dean. You can also find webinars on HFTA and other resources on the Potomac Valley Radio Club <http://www.pvrc.org/> and Northern California Contest Club <http://nccc.cc/> websites as well. (Thanks, Jim K7WA)

==> CONVERSATION

Sailin' Cross the Sea Lanes

The VP8ORK team has returned to continental land, having successfully crossed the rough seas of the Drake Passage after 60,000+ QSOs from the South Orkneys. With the team including many call signs very familiar in the world of radiosport, I thought a song might be appropriate with a nod to Rich KL7RA for providing the initial seed of inspiration. Thanks for the strong work, fellows!

73, Ward N0AX

Sailin' Cross the Sea Lanes
Pirated from Peter, Paul, and Mary's "Leavin' On a Jet Plane"
by Captain Beldarrrgh

My Pelican's packed, I'm ready to go
Standing here on this foreign shore
I think that must be salt spray in my eyes

But the dawn is breakin', it's early morn
The Braveheart's waitin', they're blowin' the horn
Already I'm so seasick I could die

So work me and spot for me
Tell me that you'll tune for me
Call me with your final tubes aglow
'Cause I'm sailin' cross the sea lanes

I'm all too sure that I'll get wet again
Oh, man, I love radio

There's so many times I've worn you down
With small antennas near the ground
I'll tell you now, they can't hear a thing

Every place I go, I listen for you
Every Q I make, I hope it's you
When I come back the logbooks I will bring

So work me and spot for me
Tell me that you'll tune for me
Call me with your final tubes aglow
'Cause I'm sailin' cross the sea lanes
I'm all too sure that I'll get wet again
Oh, man, I love radio

Now the time has come to leave, to
Don my patch and find a close loo
Hoist the anchor, we'll be under way

Dream of dinner talks to come
Entertaining everyone
Until the time when I'll no longer say...

So work me and spot for me
Tell me that you'll tune for me
Call me with your final tubes aglow
'Cause I'm sailin' cross the sea lanes
I'm all too sure that I'll get wet again
Oh, man, I love radio
I really must love radio
I really, really, really love radio...

==> CONTESTS

16 February through 1 March

An expanded, downloadable version of QST's Contest Corral in PDF format
<http://www.arrl.org/contest-calendar> is available. Check the
sponsor's Web site for information on operating time restrictions and
other instructions.

HF CONTESTS

Semi-Automatic Key Evening--CW, from Feb 16, 1900Z to Feb 16, 2030Z.
Bands (MHz): 3.5. Exchange: RST, serial, first year of bug use. Logs
due: Mar 15. Rules <http://www.agcw.org/>

Russian WW PSK Contest--Digital, from Feb 18, 2100Z to Feb 19, 2100Z.
Bands (MHz): 1.8-28. Exchange: RST and oblast code or serial. Logs due:
15 days. Rules <http://www.qrz.ru/contest/detail/384.html>

ARRL Int'l CW DX Contest--CW, from Feb 19, 0000Z to Feb 20, 2400Z. Bands (MHz): 1.8-28. Exchange: RST, state/province or power. Logs due: Mar 21. Rules <http://www.arrl.org/contests/soapbox>

Feld-Hell Annual WAS Sprint--Digital, from Feb 19, 2000Z to Feb 19, 2200Z. Bands (MHz): 1.8-28. Frequencies: Monthly on 3rd Saturday. Exchange: RST, QTH, Feld-Hell number. Rules <http://www.feldhellclub.org/>

AM QSO Party--Phone, from Feb 19, 2300Z to Feb 20, 2300Z. Bands (MHz): 3.5-14. Exchange: RS, name, and S/P/C. Logs due: 4 weeks. Rules <http://www.antiquewireless.org/>

CQ WW 160 Meter SSB--Phone, from Feb 25, 2200Z to Feb 27, 2200Z. Bands (MHz): 1.8. Exchange: RST and state/province or CQ zone. Logs due: Mar 31. Rules <http://www.cq160.com/>

REF Contest--Phone,CW, from Feb 26, 0600Z to Feb 27, 1800Z. Bands (MHz): 3.5-28. Exchange: RS and French dept or serial. Logs due: 30 days. Rules <http://www.ref-union.org/concours>

UBA Contest--CW, from Feb 26, 1300Z to Feb 27, 1300Z. Bands (MHz): 3.5-28. Exchange: RS, serial, and ON province. Logs due: 2 weeks. Rules <http://www.uba.be/en/hf/contest-rules>

Mississippi QSO Party--Phone,CW, from Feb 26, 1500Z to Feb 27, 0300Z. Bands (MHz): 3.5-28, 50-432, Frequencies: CW 3.545,7.045,14.045,21.045, 28.045;Phone 3.857-862-867,7.238,14.275,21.375,28.375;VHF 50.13,144.22,146.55,446. Exchange: RS(T) and MS county or S/P/C. Logs due: Mar 31. Rules <http://www.arrlmiss.org/>

North American QSO Party--Digital, from Feb 26, 1800Z to Feb 27, 0600Z. Bands (MHz): 3.5-28. Exchange: Name and S/P/C. Logs due: 14 days. Rules <http://www.ncjweb.com/>

North Carolina QSO Party--Phone,CW, from Feb 27, 1700Z to Feb 28, 0300Z. Bands (MHz): 3.5-28. Frequencies: CW 3.54,3.74,7.04,7.14,14.04,21.04,21.14,28.04,28.14, Phone 3.86,7.26,14.26,21.36,28.36. Exchange: RS(T) and NC county or S/P/C. Logs due: Apr 1. Rules <http://www.w4nc.com/>

CQC Winter QSO Party--Phone,CW, from Feb 28, 0100Z to Feb 28, 0259Z. Bands (MHz): 3.5-14. Frequencies: 3.560, 7.040, 14.060. Exchange: RS(T), S/P/C, name, CQC nr or power. Logs due: 30 days. Rules <http://www.cqc.org/>

YL CW Party--CW, from Mar 1, 1900Z to Mar 1, 2100Z. Bands (MHz): 3.5. Exchange: RST, serial, if YL "YL," name. Logs due: Mar 31. Rules <http://www.agcw.org/>

VHF+ CONTESTS

FM Simplex Contest--Phone, from Feb 20, 1900Z to Feb 20, 2130Z. Bands (MHz): 50-440. Exchange: Call sign and grid square. Logs due: Mar 20. Rules <http://www.w9rh.org/>

Pennsylvania FM Sprint--Phone, from Feb 26, 7 PM to Feb 26, 11 PM.
Bands (MHz): 50-440. Exchange: Call sign, serial, and 5-digit Zip code.
Logs due: Mar 18. Rules <http://www.harcnet.org/>

Mississippi QSO Party--Phone,CW, from Feb 26, 1500Z to Feb 27, 0300Z.
Bands (MHz): 3.5-28, 50-432, Frequencies: CW 3.545,7.045,14.045,21.045,
28.045;Phone 3.857-862-867,7.238,14.275,21.375,28.375;VHF
50.13,144.22,146.55,446. Exchange: RS(T) and MS county or S/P/C. Logs
due: Mar 31. Rules <http://www.arrlmiss.org/>

==> LOG DUE DATES

16 February through 1 March

February 18 - SKCC Weekend Sprint
<http://www.skccgroup.com/sprint/wes/>

February 19 - Asia-Pacific Spring Sprint, CW
<http://jsfc.org/apsprint/aprule.txt>

February 19 - WAB 1.8 MHz Phone

==> THE VIEW FROM THE WORLD

IARU, ITU, and Emergency Communication

If you were to ask most Amateur Radio operators what entity is
responsible for granting privileges to use portions of the radio
spectrum the answer would likely be their own national
telecommunication authority. Here in the US, that would be the FCC, of
course. However, that's only partially true. The ultimate authority for
the use of the radio spectrum is the International Telecommunication
Union <http://www.itu.int/en/pages/default.aspx> (ITU). Every radio
amateur should understand what the ITU is and why its work and
decisions are important.

There are three sectors in the ITU: Radio-communication (ITU-R),
Development (ITU-D) and Standardization (ITU-T). The International
Amateur Radio Union <http://www.iaru.org/> (IARU) is a Sector Member of
both the ITU-R Sector and the ITU-D Sector. The IARU participates in
both sectors by attending meetings that involve issues that may impact
the amateur or the amateur-satellite services.

The ITU-R Sector is important for radiocommunication services,
including the amateur and amateur-satellite services. Every four or
five years the ITU holds a World Radiocommunication Conference (WRC) to
revise the international Radio Regulations.

ITU-D is where much of the ITU's work on disaster response takes place.
The development arm of the ITU considers emergency telecommunications
an integral part of its projects integrating
telecommunications/information and communication technology in disaster
predication, detection, and alerting. Emergency telecommunications play
a critical role in the immediate aftermath of disasters by ensuring
timely flow of vital information, which is much needed by government
agencies and other humanitarian actors that are involved in rescue
operations and providing medical assistance to the injured. IARU's task
in the ITU-D Sector is to ensure that Amateur Radio's role in disaster
```

communications is understood and appreciated by the ITU members. The ITU-D Sector also conducts a worldwide conference.

The ITU also sponsors regional and global exhibitions called TELECOMS. An ITU Telecom offers a global Information and Communication Technologies (ICT) community platform that gathers stakeholders from across the telecommunications/ICT sector to connect, collaborate and create the future ICT landscape. Forums and seminars are conducted at the Telecoms and IARU has participated in such forums, usually on topics related to emergency communications. - IARU E-Letter, January 2011 issue, International Amateur Radio Union (IARU <http://www.iaru.org/>) Secretary Rod Stafford, W6ROD [Here <http://www.itu.int/emergencytelecoms/index.html> is a good site for information on ITU activities relating to disaster response, mitigation, and the Tampere Convention - K1CE]

==> ARRL SETS EMCOMM INTERESTS IN LEGISLATIVE GOALS

The ARRL Board of Directors held its 2011 Annual Meeting January 21-22, 2011 in Windsor, Connecticut, under the chairmanship of President Kay Craigie, N3KN, a former Section Emergency Coordinator of the ARRL Eastern Pennsylvania section. The Board discussed its legislative program in the 111th Congress and plans for the 112th, particularly the reintroduction of the Amateur Radio Emergency Communications Enhancement Act <http://www.govtrack.us/congress/bill.xpd?bill=h112-81> into the House of Representatives and the expected similar Senate bill. The Board voted to adopt seven legislative objectives for the 112th Congress that affects us as ARES&#65533; members and emergency communicators,

and Amateur Radio as a whole:

- Expansion of the "reasonable accommodation" of Amateur Radio antennas
to all forms of land use regulation;
- Opposition to the reallocation of amateur spectrum;
- Opposition to legislation that diminishes the rights of federal
licensees in favor of unlicensed emitters;
- Seeking recognition of the unique attributes of the Amateur Radio
Service in any legislation addressing communications in emergencies,
disasters and homeland security matters;
- Supporting the legislative objectives of other radiocommunication
services that require spectrum access and protection from interference
for noncommercial purposes that benefit the public;
- Opposition to distracted driving legislation that does not exempt
two-way mobile transmitters operated by FCC licensees, and
- Supporting The FCC Commissioners' Technical Resource Enhancement Act.

<http://www.arrl.org/news/arrl-board-sets-legislative-agenda-at-2011-annual-meeting>.

==> NEW MONTHLY ARES/EMCOMM SURVEY

Starting in February we will have a monthly survey question related to
ARES and EmComm similar to the Quick Stats found in QST and on the ARRL
website. To access the poll click here
<http://www.arrl.org/ares-monthly-poll>. The February survey will be
available until the 28th and results will be published in next month's
ARES E-Letter. We ask that you only submit your answer once.

Do you have an idea for a survey question? Submit your idea to
emergency@arrl.org

==> EMERGENCY MESSAGING WEBINAR FEBRUARY 26

ARRL Atlantic Division Director Bill Edgar, N3LLR, will host a webinar
for ARRL members on using Narrow Band Emergency Messaging Software
(NBEMS) -- a set of programs used to send messages and files via
Amateur Radio using an audio interface. On Saturday, February 26 at 10
AM (EST), NBEMS developers Dave Kleber, KB3FXI, and Western
Pennsylvania Assistant Section Emergency Coordinator Harry Bloomberg,
W3YJ, will present a two hour webinar that covers NBEMS's advanced
features. Learn about the use of NBEMS FLWRAP
<http://www.w1hkj.com/Flwrap/index.html> and FLMSG
<http://www.w1hkj.com/flmsg-help/index.html> to send and receive spread
sheet/database data and form-based messages such as the ICS-213 and
NTS/Radiogram forms. Bloomberg and Kleber will also be covering HF
digital net procedures and protocols and hope to incorporate a live HF
demonstration that will be viewable by all those attending the webinar.
Register for this webinar here
<https://www1.gotomeeting.com/register/497568192>. -- ARRL Letter

==> URBAN SEARCH FOR CERT AND ARES&#65533;

Amateur Radio operators and CERT members can help save lives by learning how to search for missing children and at-risk adults during a one-day training event to be held Saturday, March 19, in Stockton, California.

The "Urban Search for CERT and ARES" workshop will kickoff creation of a new rapid-response program using Amateur Radio operators and Community Emergency Response Team <https://www.citizencorps.gov/cert/> members as searchers. Volunteers attending the class will become the program's first members.

Taught by leaders of the Alameda County Sheriff's Search and Rescue Team, the class will give volunteers the basic skills necessary to safely look for missing kids and at-risk adults in the urban or suburban environment.

The event will be held at the San Joaquin County Agricultural Center, 2105 E. Earhart Ave., Stockton, California, adjacent to the Stockton airport. The event runs from 8 AM until 4 PM. It is sponsored by the Amateur Radio Emergency Service of San Joaquin County <http://sjham.com/sjares/>. The workshop is open to anyone interested; however, seating is limited and priority will be given to current ARES and CERT members. You need not be a San Joaquin County resident to attend. There is no fee for the class, although donations will be accepted to support the event and search program.

The workshop marks the second anniversary of the search for Sandra Cantu, an 8-year-old Tracy girl who was abducted near her home on March 27, 2009. Her body was discovered just over a week later. The organizers and instructors were involved in the search for Sandra. While later investigation found the child was likely deceased even before she was noticed to be missing, San Joaquin ARES hopes this program will make a difference in the lives of children in the future.

Elders with dementia or other cognitive disorders are a second focus of the program. Statistics show that many of these patients will wander from facilities and caregivers. If not found quickly, a significant number will eventually be discovered deceased.

The goal of the program is to, in cooperation with law enforcement, get 10 two-searcher teams on-scene within one hour of notification. Such a response would dramatically increase the resources available to search for the missing person. For additional information, please contact David Coursey, N5FDL <n5fdl@arrl.net>, ARES Emergency Coordinator, San Joaquin County, California

==> ARE YOU TRAINING FOLLOWERS OR LEADERS?

Here's something that I've known for a while but recently jumped out at me: Am I training leaders or followers?

Our group has become involved in a project -- setting up and managing portable emergency vaccination clinics -- that is supposed to require

between 40 and 75 volunteers per shift per site. With four sites, that's potentially 300 volunteers per shift or 1,200 per day!

Obviously, we don't have enough volunteers to staff this ourselves. At best we could run one clinic all by ourselves for two shifts-a-day. And that's if we brought lots of friends to help!

Nevertheless, when the time comes (I am no longer thinking "if" in terms of public health emergencies), I am betting we will have all the volunteers we need. They will come, if not out of the woodwork, out of churches, schools, and other volunteer sources.

But these volunteers will all have one thing in common: No training.

That means the volunteers we train in advance, such as ARES®/ACS/CERT members, will need to train and then manage the convergent volunteers that appear when we need their help.

That subtly changes how we train our own people. Our folks need to know not just how to set-up an emergency clinic, but how to manage it, and train the other volunteers who will do all the non-medical work, such as registering people, organizing supplies, maintaining order, etc.

If all we create are good followers, "do as you're told" volunteers, we don't have a chance of success. We need volunteers trained to, as the military puts it, "take charge and move out."

You don't even need a complex assignment, like managing vaccination clinics, to require your volunteers to have management training. All you need is a mutual aid incident.

If a bunch of mutual aid ARES® members are headed for your county, someone is going to have to get them organized, equipped (if necessary), signed-in, staged, dispatched to their assignments, etc. That means your local folks may spend a lot of their time getting the out-of-towners positioned to actually do the work that needs to be done.

In my county, the worst disaster we plan for is a big earthquake or other emergency in San Francisco that sends us thousands and thousands of urban refugees. We're sixty miles out from SF and a major staging area for Bay Area relief efforts, which will also need our support. See where this is headed? Mayhem that can only be controlled if we train for it.

So, let me thank you in advance for all the help we're going to need in such an emergency. But, to be ready for all the help that will arrive, our members have to be able to manage the stampede.

There is a corollary to this management story: Our folks also need to know how to be a good mutual aid resource if sent to help somewhere else. But, that's for another discussion. In the meantime, think about your members as being managers when your "big one" -- whatever it may

be -- hits. -- David Coursey, N5FDL, EC, San Joaquin County,
California. His emcomm blog is n5fdl.com
<http://webmail.cfl.rr.com/do/redirect?url=http%253A%252F%252Fn5fdl.com>.

==> RADIO CLUB D'HAITI RECEIVES REPEATER FROM ARRL AND RADIO CLUB
DOMINICANO

As part of the relief efforts after the earthquake in Haiti, the ARRL
-- through its Ham Aid Program -- with the help of IARU Region 2 and
the Radio Club Dominicano (RCD <http://www.radioclubdominicano.com/>),
delivered a Vertex VXR-7000
<http://www.vertexstandard.com/ap/vxr-7000.html> repeater to the Radio
Club d'Haiti. This repeater, part of the original equipment sent by the
ARRL during the devastating Haitian earthquakes in January 2010
<http://www.arrl.org/news/arrl-sends-ham-aid-equipment-to-haiti>, will
help with radio communications coverage in that devastated nation. Both
the Radio Club Dominicano and the Radio Club d'Haiti are IARU
Member-Societies.

The repeater was originally sent by the ARRL to members of the RCD who
were helping to provide communications support in Haiti following the
earthquake. Earlier this month, Doug Lapin, K1OY, the Dominican
Republic's Ambassador Accredited to the Secretary of State of Foreign
Relations, delivered the repeater to Radio Club d' Haiti President
Jean-Robert Gaillard, HH2JR. According to Lapin, the repeater will be
linked to other repeaters on the island nation, building a new
nationwide Amateur Radio network.

The Ham Aid Fund was created in 2005 in response to the need for
equipment and resources to support the Amateur Radio response to
Hurricanes Katrina, Rita and Wilma. Ham Aid equipment is available on
loan to Amateur Radio organizations during disaster response when
communications equipment is unavailable. The ARRL Ham Aid Fund is
supported by businesses, manufacturers and individual financial
contributions. If you are interested in contributing to the Ham Aid
Fund, please contact ARRL Chief Development Officer Mary Hobart, K1MMH,
via e-mail <k1mmh@arrl.org> or by phone at (860) 594-0307. -ARRL Letter

==> LETTERS

Twitter for Alerting?

I have requested a quote from the One Call Now company that you
mentioned in the January issue of the ARES® E-Letter. Are you aware of
any ARES® groups using Twitter <http://www.twitter.com/> for alerting?
One of my members recently suggested it, but I couldn't find anything
with a quick search so I thought that I would ask you. Once I get that
quote I will be getting in touch with our membership as well as polling
to see who's on Twitter -- I bet most of my members are not. -- Jeff
Dovyak, VE4MBQ, Emergency Coordinator, Winnipeg ARES®

Tabletops in Colorado

Since 2006, O.M.E.G.A. <http://www.omegaresponders.org/php/index.php> has worked table top exercises to full scale exercises for the Colorado North Central Region All Hazards District involving a number of our ARES® Districts. We are participating in an exercise with FEMA Region VIII's DICE 2011. Mile High D.I.C.E. 2011 <http://www.colorado.feb.gov/useruploads/files/2011-01-11_dice_msel_planning_workshop.pdf> is an exercise to allow agencies to discuss and validate Agency continuity plans and capabilities after a series of Improvised Explosive Device (IED) detonations along the Colorado Front Range Area causes agencies to activate their respective Continuity Plans. OMEGA's portion of the exercise is titled Operation Snake Eyes. For more info, please see our Web site <http://www.omegaresponders.org/php/index.php>:- Dave Cook, KC0MHT, RMMC 70 Weather Spotter: D-12 OMEGA

Transmitting the ICS-213 Form

I noted some discussion in the December ARES® E-Letter regarding the issue of transmitting the ICS-213 form. Here's how I explain it to radio amateurs:

When you ship a package via UPS, FEdEx, etc. you've addressed the package. The shippers will place some additional labeling information on your package, however; such things as tracking numbers, routing codes, etc. This is for their audit trail.

The same is true for the 213 form if it must go via relay. If you're sending it directly to the site where it will be received and handled, by all means, send the 213 form raw. But, if your station isn't Winlink equipped, an attachment isn't an option.

If it must be handled via a relay, and that's *any* intermediate step between you and the receiving location by all means append that radiogram header information, i.e. number, precedence, handling instructions, call sign of originator, group count, place of origin, time and date filed. For best results, and to alleviate confusion, use local time and date. But, if you use UTC make sure the UTC date corresponds with UTC time.

The radiogram information allows those intermediate stations to provide proper tracking control. The 213 in its raw form is an interoffice speed memo, and does not contain information to enable proper tracking through a system of relays. If you ask me to relay that information, or any information via manual modes, i.e. voice or cw, then to adequately provide the accountability you *must* have that seemingly irrelevant radiogram information gives me, and you, the tools we must have. -- Richard Webb, NF5B, Chair, ARRL NTS Central Area Staff

Training Suggestion: IS-317, IS-324

After reading your latest newsletter on training, I would like to suggest IS-317 (CERT) and IS-324 (Community Hurricane Preparedness). CERT gives a lot of good knowledge on self-survival for the first 72

hours of a disaster. Taking the course online though does not give you the hands-on CPR training, etc. I also took the CERT training here so I could get the hands-on training. ICS-324 is for the Emergency Manager, but it also helps to understand the decisions he or she has to make. It explains how the NWS works with EM in trying to make sound decisions. -- John T. Fleming <john@w3gqj.net>, W3GQJ, The Villages, Florida

==> LARGE EMCOMM EXERCISE IN GEORGIA A COOPERATIVE EFFORT

An emcomm exercise conducted by the Cherokee County, Georgia, ARES® group, Church of Jesus Christ of Latter Day Saints, and a significant number of clubs throughout the Atlanta, Georgia North Metro area took place Saturday, January 15. It was the first exercise of this type or magnitude ever conducted in the state. There were more than 113 check-ins recorded during the drill, encompassing 16 counties. During the previous week Atlanta was crippled by a massive snow and ice storm, which served as the backdrop for the exercise.

Net schedules were formulated, repeater coordination and permissions for use were secured and net control operators were designated. Coordination with the LDS Church Bishops Central Storehouse (K4BCS) was a major focus. Finalization of all net schedules took place and the Friday afternoon e-mail notification was sent out to the participating ham groups. Five repeater clubs across Atlanta granted use of their repeaters for the exercise and were participating. In total, the drill involved five coordinated, simultaneous nets all working together and checking in on a schedule with the LDS Church Bishops Central Storehouse located in Tucker, Georgia.

Repeaters weren't the only communication conduits. Simplex was used on one net to test its effectiveness. Taking it a level lower, some neighborhoods having ham operators activated an FRS <http://www.frsfamilyradioservice.com/> calling tree making contacts with unlicensed residents and even, in some cases, sending runners out to get face to face contact with members that did not have access to radios of any kind. This went a long way towards adding realism. A few direct EchoLink check-ins to one net control operator also took place.

One Church unit tested an emergency preparedness plan and established a command center as part of that plan. They, as part of their operations test, formulated a simulated casualty and loss message that was transmitted and verified with the Tucker location.

The drill was so successful that several organizations are calling for a six month interval for similar tests. -- Jim Alderdice, N1ABM <n1abm@arrl.net>, Woodstock, Georgia

NVOAD

National Level Exercise 2011 (May 16-20, 2011) -- The purpose of
National Level Exercise 2011
<http://www.fema.gov/media/fact_sheets/nle2011_fs.shtm> (NLE 2011) is
to prepare and coordinate a multiple-jurisdictional integrated response
to a national catastrophic event - specifically a major earthquake in
the central United States region of the New Madrid Seismic Zone
<http://pubs.usgs.gov/fs/2009/3071/> (NMSZ).

NLE 2011 will involve thousands of government officials at the federal,
state, local and tribal levels, members of the private sector, and the
general public. Participants will conduct simultaneous, related

exercise activities at command posts, emergency operation centers and other locations in the Washington D.C. area and the eight affected central U.S. states (Alabama, Arkansas, Illinois, Indiana, Kentucky, Mississippi, Missouri, and Tennessee).

REACT

While REACT <http://www.reactintl.org/> has been associated primarily with Citizens Band in the past, the organization has widened its focus to embrace amateur and other services. ARRL and REACT share common goals in terms of emergency communication.

Salvation Army

The Salvation Army ALM Division Ready As Winter Weather Approaches <http://disaster.salvationarmyusa.org/media/?ID=b140d3eb46ccc0c0e86e3ff728507889>. Once again, much of Alabama, Louisiana, and Mississippi are bracing for frozen precipitation and The Salvation Army is preparing to respond. As sub-freezing temperatures settle in across the region, The Salvation Army is expanding shelter capacity. (February 9, 2011).

Society of Broadcast Engineers

SBE at the 2011 NAB Show (February 3, 2011). The Society of Broadcast Engineers has been NAB's organizational partner for the presentation of the NAB <http://www.nab.org/> Broadcast Engineering Conference (BEC) since 1995. Following previous years, this year's BEC will be the largest and most comprehensive broadcast technical conference in the world. The conference begins with the SBE Ennes Workshop on Saturday, April 9 and ends on Thursday, April 14.

==> SKYWARN TRAINING ON ST. JOHN A WIN-WIN FOR ISLAND AND FORECASTERS

It always helps to have eyes on the ground. A SKYWARN training session, hosted last year by local St. John hams and presented by representatives of NOAA and the National Weather Service, will help forecasters fill a critical void in on-the-ground weather information from this small, tropical US Virgin Island - a gateway for weather traveling to Puerto Rico and westward. St. John's unique geographic location - being the eastern-most part of the United States Virgin Islands and resting on the edge of FAA radar located in San Juan - makes on-the-ground weather information critical and necessary for accurate forecasting. "There is no accurate way to tell if there is a waterspout just off shore, or just how intense rain and other aspects of storms are on St. John by looking at current data," said Robert Mitchell, Lead Forecaster from the NWS in San Juan, one of the presenters at the training. Mitchell was joined by Althea Austin - Smith, senior hydrologist with NWS and NOAA, who toured the island before the training session looking at areas currently impacted by flooding and landslide during heavy rains.

The St. John SKYWARN session was the culmination of four years of effort by St. John Amateur Radio Club member George Cline KP2G, and

Club President Paul Jordan NP2JF. "With severe weather crossing from one country to another, and moving from island to island each day, cohesion in reporting and collection of weather data is critical to local public safety," said Jordan, who is also a member of St. John Rescue and St. John ARES�. "We had the training session set up several times, only to have it postponed, largely due to budget. We were eager to get the National Weather Service training here to help residents and visitors better prepare for and respond to weather events, and to help local forecasters," said Jordan, NP2JF.

Part of the unique challenge here is that, unlike areas in the contiguous 48 states where radar often overlaps to provide several views of a given area, St. John is only seen on the edge of the San Juan radar. With weather radar angled to avoid picking up ground objects, that degree above the earth becomes more elevated at the outer circumference of the radar, sometimes missing lower-lying clouds or other weather-related features. This is what makes the need for on-the-ground weather watchers so critical. More than a dozen attendees took part in the training including members of the St. John Amateur Radio Club, St. John Rescue (an all-volunteer emergency first-responder group), representatives of the Transportation Safety Administration from St. Thomas international airport, and the St. Thomas Amateur Radio Club. Weather watchers were provided with direct contact numbers and e-mail addresses for reporting severe weather events to the National Weather Service in San Juan, PR. - Phyllis Benton, NP2MZ, ARRL Public Information Officer, US Virgin Islands Section News

==> ARRL INTERNATIONAL HUMANITARIAN AWARD GOES TO EMCOMM OP

Ron Tomo, KE2UK, of North Bellmore, New York, is the recipient of the 2010 ARRL International Humanitarian Award. Tomo's life exemplified Public Service through Amateur Radio, from providing phone patches during the Vietnam War, and providing communications support during 9/11 with MARS and the United States Service Command, as well as serving in the US Coast Guard Auxiliary as a Communications Officer where he played a pivotal role during Hurricanes Katrina and Rita.

During the Haitian earthquake in January 2010, Tomo -- at his own expense -- served with a team of doctors, providing communication support between the on-site doctors and the hospital in Miami. According to Jack Satterfield, W4GRJ -- one of his many nominators -- Tomo provided critical communication links at multiple levels, "from coordinating helicopter relief to a stranded village, to handling emergency evacuations to the nearby USS Comfort hospital ship. Ron even provided the extra hands needed to hold flashlights at the operating table when the power went out at night. He went on a rescue mission to help carry stretchers, bringing back patients to their facility. Ron has a polio-inflicted disability which never seemed to slow him down; however, in the dark and confusing night while carrying a stretcher, he missed a step and took a pretty bad fall. He needed medical attention, but Ron was adamant about seeing to the other patients before himself.

His efforts while in Haiti were undoubtedly and directly attributable in the saving of so many lives."

ARRL New York City/Long Island Section Manager Mike Lisenco, N2YBB, concurred: "At his own expense -- about $10,000 -- Ron purchased more than 15 new radios and added others from his massive collection which he used to set up a tactical network in a tent hospital. This network proved to be a lifesaving setup where Ron was personally credited by the doctors in his tent hospital for saving at least eight lives and helping hundreds more due to his ability to find hospitals to handle the patients who had been triaged and stabilized. Ron gave out his radios to several people and hospitals, thereby giving his hospital both incoming and outgoing communications to expedite the transport and intake of new patients." -- ARRL

==> ARES® STAFF CHANGES

New Indiana Section Emergency Coordinator

Tony Langer, W9AL, has departed the Indiana Section staff as of December, 2010, with thanks for his four years of service. The new SEC is Joseph Lawrence, K9RFZ. In setting his initial priorities, Lawrence centered on ARES® net topics: "I think the ARES® Net should be used to discuss recent ARES® policy changes, significant lessons learned from public service events or emergency exercises, problems the EC faced and how he or she solved them, and problems the EC faces and wants suggestions for solving."

"Some issues need more discreet one on one consideration, but most EC's face similar problems of team participation, EMA cooperation, etc," Lawrence said. "What works in one team may work fine for others. Rather than re-inventing the wheel, EC's need more opportunities to share ideas. I'd run the net more like a corporate staff meeting. Each member is expected to discuss recent issues, actions, and plans forward. I think it's also useful for the general ARES® team member to hear and participate in these discussions." -- John Poindexter, W3ML, Indiana Section Manager

Alabama Searches for New SEC

Spencer Edwards, KZ4J, has resigned as Alabama Section Emergency Coordinator. Edwards' recovery from a number of surgeries over the past months has taken longer than expected and due to health concerns he has stepped down. He is hopeful that he will be able to return in some capacity in the future. Alabama Section officials wish Edwards a speedy recovery, and thanked him for his work as SEC.

The search has begun to seek a replacement for the Section Emergency. -- David M. Drummond, W4MD <w4md@arrl.org>, Alabama Section Manager

==> K1CE FOR A FINAL

It has been an extremely difficult winter for many parts of the country, with probably countless ARES activations conducted in severe environments. I am looking for reports on how operators worked under these conditions

of cold, snow and ice for educational purposes in future newsletters. Please send brief accounts and observations to your editor <k1ce@arrl.net>. Thanks! See you next month!

WIANEWS FOR WEEK COMMENCING FEB 20 2011.- presnted from the Central Coast
Amatur Radio Club the hosts of Wyong Hamfest by:-

Fred VK2FSP

Rod VK2FVRJ

Karen VK2AKB

Ian VK2HK and

Col VK2ZCO.

They present ALL TODAYS STORIES IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING FEBRUARY 20 2011.

Just 1 week to go until Amateur Radio's Big Day out!

The Central Coast Amateur Radio Club Field day at Wyong will be
held on Sunday the 27th of February 2011 at Wyong Race course.
Gates will open at 6.30 am to allow entry and setup for Traders /
Exhibitors and Flea Marketeers.

The Trader/ Exhibitor areas will open to the public at 9am.
Admission is $12 for Adults with free admission for those under 17.

Amateur radio examinations will be conducted on the day by Brian Kelly who can be contacted on 0418659043 for further information.

For help on the day, there will directions and information on the local VHF repeater, 146.725MHz, with a 91.5 sub tone.

For further information and regular updates, please go to the Field Day website, www.fieldday.org.au or email Central Coast Amateur Radio Club - ccarc@ccarc.org.au

So don't miss out! Come along and grab a bargain!

SDR Expert touring Australia

Software-Defined Radio (SDR) expert, Kjell Karlsen LA2NI, arrived in Sydney last week for a holiday tour around Australia. Kjell is a major contributor to the Hermes project, a high performance SDR transceiver, and is also the project leader on Apollo, a power amplifier and filter for Hermes.

For information on these projects, just Google the words "H e r m e s" and "h p s d r", then click on the first result.

Kjell has been an Amateur since 1962. His primary amateur interest is in constructing VHF and HF equipment, and he built his first digital synthesiser in 1968. In 1995, he built a small 25 W HF transceiver that was used by Norwegian adventurer Brge Ousland during a solo Antarctic crossing.

Now, Kjell's passion is Software-Defined Radio. He has already given a lecture on SDR to the Manly-Warringah Radio Society in Sydney.

Kjell will be on APRS, so you'll be able to follow him as he travels around Australia. He plans visit to Adelaide, Alice Springs, and Perth. Keep an eye and ear out for his callsign, LA2NI

(vk2sky)

TAIT EXPANDS

Tait Radio Communications, has opened a new facility in Clayton Victoria to service its expanded Victorian business. A new workshop and project planning centre will manage the rollout of radio equipment, ongoing maintenance and upgrades for the emergency services sector.

Tait is currently working with the Country Fire Authority (CFA) on its Radio Replacement Project, which will create up to 12 new jobs during the next year. As part of the deal, it is rolling out 13,000 digital trunked radios, which is expected to be completed mid-2012.

The new facility will also house existing Melbourne staff.

VIRUS INFECTS AMBULANCE COMPUTERS.

Computers handling ambulances in NSW are back online a major virus forced staff to shut them down for more than 24 hours on Saturday, prompting staff to coordinate paramedics by telephone and handwritten notes.

General Manager Mike Willis said the time it took to fix the problem was "regrettable , but I wouldn't allow the system to be turned back on until our technicians cleaned every workstation."

The cause and source of the virus was still not known, he said.

HAMS ACROSS AUSTRALIA.

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news

Morning broadcast for Wyong Field Day.

As is the New South Wales custom there will be no VK2WI news on the morning of our Central Coast Hamfest - Sunday the 27th of February.
In its place there is a transmission on Saturday evening at 7.30 pm with the normal morning format.
Sunday evening, after the field day, will be as normal at 7.30 pm.

Loki is the name of the edge of space balloon experiment that Tamworth Radio Club members & Tamworth Oxley Scout members will be launching in the coming weeks.

As airspace is heavily regulated regarding its use negotiations are well in hand with Australia's airspace regulator the Civil Aviation Safety Authority, or CASA and air traffic controllers regarding a host of regulations that need to be complied with regarding the flight of the balloon through controlled airspace.

Non compliance with all the necessary regulations have large and hefty fines along with a optional holiday in gaol. Controlled airspace starts at various altitudes above ground depending on where you are, up to 60,000 feet. Most jet passenger aircraft cruise at an altitude between 25,000 and 40,000 feet. How would anyone get to see the photos if the little baby craft gets swallowed and shredded by a big nasty jet engine.

Up to date information can be found on Tamworth Radio Club's web site www.trci.org.au, then follow the links to projects.

VK2BOZ is publicity officer and VK2YGV project director.

(sourced to vk2sky)

The Orange club in VK2 now meets at the Orange SES advises Ross VK2ER.

GETTING PLASTERED AT THE CLUBROOMS.

Finishing off the ceiling plastering is being done at the Summerland clubrooms in Northern NSW.

The "Good Guy" involved with this project is Steve Price, Plasterer, Goonellabah, who has DONATED his time to the Amateur Radio Club!

"On Yah Steve".

ARNSW will be starting an Amateur Radio training course at Dural on
Monday the 7th of March.

It will be in the evening from 1900 to 2130 hours advises Terry VK2UX who will
be the instructor.

It will run every Monday evening and is free for members or $5 per night for
non members. Non members can join on the night if they wish.

More details are available on the ARNSW web site, www.arnsw.org.au
under training and exams.

Bookings are not required, although expressions of interest would be welcome
to the office phone 9651 1490 and leave a message and contact details.

local news email qnews-vk-subscribe@yahoogroups.com
VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Way back when Model T Fords and Austin 8 motor cars were sought after prizes of
the new industrial age, the radio experimenter was adapting available
paraphernalia to the hobby. By the time Australia could claim its own motor car,
the surplus of war time electronics were being used to grow many a ham station.

By the time the first 8-bit computers were appearing, surplus boards from
obsolete mainframe computers were supplying active and passive components to
the hobbiest. A few projects featured in "Amateur Radio" magazine. The
commercial land mobile industry has bequeathed many rigs to the amateur cause
with varying amounts of success.

The one thing that marks these practices has been the personal desire to learn.
learn by doing. When we look over recent times there has been an exponential
growth in the semiconductor industry to feed the communication/IT markets.
The upshot of this is that mass produced components with performance that would
have classed them as laboratory grade standard in years gone-by are now being
used by the home constructor.

The major demand for home brewing is stronger eyes as surface mount components
get smaller.

I'm Geoff Emery and that's what I think....how about you?

QAC NEWS

I'm Mike Charteris VK4QS, the new chairman of the Queensland Advisory Committee
for the Wireless Institute of Australia.

My fellow QAC members include Mr Don Wilschefski VK4BY from Rockhampton,
Mr Ken Fuller VK4KF from Brisbane, and Dr Kevin Johnson VK4UH also of Brisbane.
We look forward to serving you as best we can over the next three years and
and can be contacted by way of email as per the WIA website, or as previously

broadcast on QNews.

Bunya Mts & District AmCom

Good morning/evening to all. I'm Neil VK4NF

It is that time of the year again when the Bunya Mts & District AmCom and the Sunchine coast Amateur radio club host our annual camp out at Kirkleigh Somerset Dam. This year the dates are the 2nd & third of April.

This is a good opportunity to get together with friends that have similar interests, make new friends, exchange some good ideas and get away from the normal routine of life for a couple of days.

We have secured a discount on camping fees from $14.50 down to $10 per person per night, but we must have a minmium of 20 bookings per night and we need to have your booking confirmed with payment by Wednesday the 23rd of march, more details later. So mark your diaries now, the weekend of April 2nd & 3rd.

For more details please contact.

TREC

G'day again, this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

Well the clean-up is still ongoing after TC Yasi. Fortunately here on the Atherton Tablelands we experienced far less damage than those unfortunate folks in the areas south of the Mission Beach/Tully region. Some of those areas are still without power and telephone.

TREC held our first social get-together for the year followed by a Management Committee meeting on Saturday. Howard Small, VK4BS, president of the Cairns Amateur Radio Club was a guest speaker and he outlined some of the activities that the Cairns Club have planned for the year and hopefully some of these events will be joint ventures with TREC.

Howard also asked if TREC can install and run an APRS node in Atherton to be linked into the Cairns system. A suitable transceiver is being sourced. Art VK4GO has offered to provide some hardware and expertise.

Visit the TREC website at www.treclub.org.au for club information and you can also download the latest monthly news in TREC-NEWS.

This has been Dale VK4DMC. Travel Well

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe Amateur Radio club.

Next Monday night the club is holding one its very popular technical talks.

This coming Monday will be David, VK4DC with his talk about his experiences of scratch building and making electronics kits entitled, "the Good, bad & the ugly !!!"

David has finished a large number of projects and will enthral you with how the finished projects turned out.

Just a reminder that there will not be any technical talk in March due to the John Moyle and the next talk in April, will be a beauty and it will be by Kevin VK4UH - Lord Howe Island DX expedition January 2011.

Allen VK4KZ, the Club's education manager announced at the club monthly meeting, that there are some 22 students starting Foundation, standard & advanced courses at the club. The cost of the course fees were set at $45 for club members and $55 for non-club members. If you wish to join any of the courses please contact the Club Secretary, Peter, VK4TAA via the club web site for more information.

The meeting was very appreciative of the work done by Stuart, VK4TSB for the Car Park lightning. This will improve the security of vehicles and visitors to the club during meeting nights.

The club is planning to celebrate the National field day in April this year with a display within one of the larger shopping centres in the Redcliffe area. The exact location is still being planned and will be announced in the next few weeks.

Planning is almost complete for the John Moyle Field Day in March. Again the club will be setting camp up on Friday 18th March at the Murrenbong Scout Camp at Petrie. Peter VK4EA is leading this year's event. Please contact Peter if you are able to assist with either the Friday setting up of clean-up on Sunday afternoon.

The club will have operators on all bands 10m to 160m. The club will be operating again mostly on battery power with the Club's Genset to top up the batteries as we go. This year the club hopes that all operators will be able to use the VC logger program on laptops to capture logs. Any amateur in the Greater Brisbane area is also invited to join in and if you plan for just a day visit or to stay for the whole weekend please contact Peter, VK4EA via the club website. We will be pleased to see you.

Chris VK4ANI advises that the latest edition of the club's magazine QRM is available on the club's website & on the web.

And before I go, it was pleasing to hear that club members Stanthorpe Kelly gang (Gary, Anita & family) have moved into the new house. Over the coming weeks, they hope to finalise their antennas and get a big signal up and running again. Thanks for that news Scott, VK4FLAE.

So now it's 73 from Ray, VK4CF.

Help wanted.

The Logan West Amateur Radio club is seeking help in supplying Communications in the Maryvale area of Qld, on the weekend, 9th and 10th April.

VHF and UHF operators and some one to do data entry at the ride base.

Fuel vouchers will be issued to assist in their travel cost.

Please contact Peter Harding,

vk4od@wia.org.au

News from North Queensland and the TARCinc.

Reading the early edition in the Townsville footprint?

Here is a chance to get a sneek preview of the venue that theTARCinc will be going to for this years John Moyle Field Day and help out with a worthy cause.

A Community Working Bee will be taking place at the Bluewater Girl Guides Training Centre Toolakea Beach Road from 9am this Saturday February 19th.

Chainsaw operators, storm debris helpers, trailers utes and tippers are all required to help bring the grounds back to their pristine beauty following the passage of Severe Tropical Cyclone Yasi.

Be sure to wear stout clothing, boots, hat and bring along plenty of drinking water.

Hopefully, with many hands making light of the work, the place will be back in tip top condition after a day of toil. Be There !

VK5

Good morning.

This is Deano, VK5HOG.

Secretary of the Port Adelaide Radio Club.

I wish to advise listeners, that the club is still in existence.

Our club rooms are situated at St Patrick reserve, Melbourne Place, Alberton.
We meet every Wednesday, and the club rooms are opened from 4pm to 8pm.
All visitors are welcome.

Enquires may be made on 82774397, I repeat - 82774397. Thank you.

South Coast Amateur Radio Club - Subsidised Members Dinner 20 th March 2011

The South Coast Amateur Radio Club Inc. will be holding its 2011 Subsidised Members Dinner on Sunday 20th March 2011 at Fresh Choice Family Restraunt in Sturt South Australia.

Members are required to register numbers, as bookings are essential for this event. If you are planning on attending, please contact Secretary by email at secretary@scarc.org.au

It would be great to see as many members and partners as possible in attendance, to allow members to socially meet outside the Clubrooms environment.
Registration can also be done through the eventlist function on the SCARC Website www.scarc.org.au

Look forward to seeing you there. Enjoying the hospitality of fellow members of the club.

Regards,
Stef Daniels VK5HSX
Secretary
South Coast Amateur Radio Club Inc.
E-mail: secretary@scarc.org

Cradle Coast Amateur Radio Club will be holding its AGM on Saturday, 26th of February at the Penguin Lion's club rooms, 19 Ironcliff road.

Start time will be 1.30pm.

Business will be the election of office bearers, so now is your chance to be on the committee. Nomination forms are available on the club website.

Please note, nominations must be delivered to the secretary at least 5 days prior to the election, and members must be financial for the current year 2011 to stand for a committee position or vote in any election.

A general meeting will be held after the AGM finishes.

http://www.my-x15.net/ccarc/

(David, VK7DC, Secretary, CCARC)

DISCUSSION POINT
(Views of authors not the WIA)

The IPocalypse is upon us. This is Stuart, VK4MSL and I'm talking about the Internet Protocol, specifically version 4, which has come to dominate all aspects of computer networking. So popular is this protocol, that on the 4th of February, the Internet Assigned Numbers Authority "ran out" of addresses.

At a recently held linux.conf.au conference in Brisbane, Google Vice President Dr Vinton Cerf and APNIC Chief Scientist Geoff Huston both gave keynote speeches covering this issue. These keynotes are viewable online, and are well worth watching.

http://linuxconfau.blip.tv/file/4683393/ (-- Keynote: Dr. Vinton Cerf)
http://linuxconfau.blip.tv/file/4692762/ (-- Keynote: Geoff Huston)
http://stuartl.longlandclan.yi.org/blog/2011/02/05/the-impending-ipocalypse/

The upshot is that with the increase in Internet users in the next few years, we can expect rough times ahead as ISPs are forced to take radical steps to conserve address space. Any software or device that relies on direct peer-to-peer contact such as Skype and EchoLink will suffer at the very least, significant performance degradation over time.

On top of this, will be a substantially worsened spam and malware problem, as the culprits become harder to trace.

IPv4 has a successor, IPv6 which was designed to solve this problem, among others. The catch is, not enough people are taking it up, and time is running out.

If you write software for a living or as a hobby that talks to the Internet, we need you to ensure your software is able to communicate over this protocol. If you are a consumer, we need you to contact your ISPs, device manufacturers and software companies and ask them what they are doing to address this issue.

Let's work together, to ensure that the Internet as we know it today, remains as open as possible for all into the future. This has been Stuart, VK4MSL reporting from Brisbane for WIA Front Page News.

We asked an IT expert for her comments, and were told

"The reality is that IP6 is totally incompatible with IP4"

It's like saying digital and analogue radio, it uses the same airwaves bit the two technologies are completely different. And it's because of the these incompatibilities that pretty much nobody has taken it up.

What makes it worse is there is (at this point in time) no way to make a IP4 to IP6 gateway"

So ... my take ... and it is my personal view ...

Is that IP6 will never take off, ever, and that someone will think of something better as the next generation networking layer, and this will be driven by the ability to interconnect with what we currently have.

Is the world really running out of address space ?

It's running out of address space that has been allocated for use by the ISP's.

So is there any address space that has been allocated to other organisations that is not being utilised ? - Yes ! and there is bucket loads of it.

Some VERY large address blocks (Class A blocks) were allocated in the beginning to Universities and companies like IBM and these address blocks are not being utilised.

So there is a administrative solution to this that could see us good with enough address space for the next 5-10 years so I am told".

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Potential candidates are reminded that exams can be conducted across the north west coast of Tassie at a mutually agreed time and place by the Cradle Coast Amateur Radio Club examiners.

For further details on gaining a licence or upgrading, contact Cradle Coast Amateur Radio Club learning organiser, Keith Winkler, VK7KW.

Contact details are available on the club website, best found when you visit wia.org.au and look up vk7 clubs.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Len ZL3IE SK at 100

Veteran New Zealand Radio Amateur Len Hopkinson ZL3IE has passed away at the age of 100.

ZL3PN writes:

"ZL3IE HAPPY DAYS......Was the sign-off saying of Len for 75 years after every contact. Len was visited by scores of Russian Seamen from ships loading meat from Timaru right thru the decades.....Sunspots low or high his cubical Quad got into the Russian hams."

Len has been described as "a true home brew gear ham from the 1930s".

The Reqium Mass for Len was celebrated at St Josephs Catholic Church, Temuka February 15.

(SouthGate News)

ALLOCATION OF ZS9 CALL SIGNS

When the original request was made to ICASA to issue ZS9 calls, the proposal by a group of zs radio amateurs who had formed a contest group, was based there-on that ZS9 call signs would only be allocated to a club for contesting purposes.

Of late individual radio amateurs are applying for ZS9 call signs for their own general use.

ICASA (The South African version of our ACMA) is now looking at setting guidelines that will determine the conditions under which ZS9 call signs will be issued.

The item is on the Agenda of the ICASA/SARL liaison meeting to be held February 25th.

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE

TIMOR-LESTE 2011 DXPEDITION

VK8NSB, VK8FNCY, 9M6DXX, 9M6XRO and MW0JRX will be operating from Timor-Leste (East Timor) between 16 and 26 September 2011. The location will be Atauro Island, OC-232, 30km north of the capital, Dili.

The group is working closely with the Timor-Leste licensing authority and the DXpedition callsign will be announced soon.

There will be three stations, two using full licensed power linear amplifiers, and a third running 100W. Antennas will mainly be quarter-wave verticals and vertical dipoles, all located within a few metres of the ocean. For 160m an inverted-L will be used.

Activity will be on all bands 10 - 160m using CW, SSB and RTTY.

Atauro Island was chosen in order to provide a quiet location, well away from the electrical noise of down-town Dili. The beach-front site will also allow the group to put up vertical antennas right by the ocean, providing additional low-angle gain. In addition, the island counts as OC-232 and is part of a very rare IOTA group, having being confirmed by only 18% of active IOTA participants.

Accommodation on Atauro Island is very basic and will be in beach huts with no mains electricity or running water. All power for the DXpedition will be provided using generators.

QSL via M0URX, direct, via the bureau, or LoTW.

Alternatively, QSL's may be requested using M0URX's OQRS form at

HAM RADIO ON THE BOOKSHELF: WE BE BIG - A BOOK ABOUT BROADCASTING AND HAM RADIO

A new book from a couple of New York Times bestselling authors who are also nationally-syndicated broadcast personalities will offer readers unprecedented exposure to the hobby of amateur radio.

"We Be Big" from Thomas Nelson Publishers is the autobiography of Rick Burgess and Bill "Bubba" Busses, whose morning radio show is heard in over fifty cities across America as well as on XM satellite radio. The team has previously published several books that landed near the top on the New York Times bestseller list. Their highly successful Rick and Bubba Show feature their down-home view on life in a spirited and fun presentation.

The amateur radio connection comes from several angles. First, Bill "Bubba" Bussey is a long-time active ham radio operator. He holds an Advanced class license and the call sign KJ4JJ. He cites amateur radio as one influence that led to a career in broadcast engineering, ownership, and on-the-air success. Bussey talks in the book about how he came to the hobby at an early age and has been active ever since. He also often discusses the amateur radio on the show.

Additionally, "We Be Big" was co-written with the help of national-bestselling author Don Keith, who also happens to be an active amateur radio enthusiast. Keith holds an Amateur Extra class license and his call sign is N4KC, and has been licensed for almost fifty years.

Keith has over twenty books in print, both fiction and non-fiction, and writes on subjects such as college athletics, broadcasting, submarines and World War II history. N4KC was also a long-time broadcaster, twice named Billboard Magazine's "Broadcast Personality of the Year."

Publication date for "We Be Big" is scheduled for March 22nd. Pre-orders are being accepted by many booksellers across the USA.

2nd Sunday each month.
April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

ARISSat-1 was NOT deployed last Wednesday, subsequently, RSC-Energia informed NASA that deployment of ARISSat-1 will be added to RSC EVA 29 currently NOT scheduled until July 2011.

However the Russian Federal Space Agency reports that ARISSat-1 will be activated April 12 on 145.950MHz FM to celebrate the 50th anniversary of the first human space flight.

ARISSat-1 is also known as Kedr, the callsign of Cosmonaut Yury Gagarin on his historic flight.

The satellite is currently inside the International Space Station (ISS) and will be connected to an Amateur Radio antenna mounted on the ISS for the commemorative transmission.

It is still planned to deploy the satellite during a space walk in July.

THE NEW LONG WAVELEGNTH ARRAY

What's being termed as an innovative new radio telescope array is now under construction in central New Mexico. One that will eventually harness the power of more than 13,000 antennas and provide a fresh eye to the sky.

This antenna farm will form what is being called the Long Wavelength Array. This is a radio telescope designed to survey the sky from horizon to horizon

over a range of frequencies in the High Frequency spectrum from 20 to 80 MHz.

The first station in the Long Wavelength Array, with 256 antennas, is scheduled to start surveying the sky by this summer. When complete, the entire system will consist of 53 station locations, with a total of 13,000 antennas strategically placed in an area nearly 248 miles in diameter.

The overall receiving system is expected to provide sensitive, high-resolution images of a region of the sky hundreds of times larger than that of a full moon. Investigators believe that these images could reveal radio signals coming from planets outside our solar system, and thus would turn out to be a new way to detect these worlds. In addition to planets, the telescope will hopefully reveal a host of other cosmic phenomena.

The University of New Mexico is the lead researcher in this project,. NASA's Jet Propulsion Laboratory in Pasadena, California is providing the advanced digital electronic systems, which represent a major component of the observatory

MARS MISSION LANDS 3 SPACEMEN.

In an 18 month mission to study the effects of a mission to Mars, 3 of 6 volunteers "touched down" on Sunday last before moving out of their lander for their first "space walk" on the Martian surface - all without leaving a Moscow research centre.

The landing marks the approximate halfway point for the experiment in which the participants must spend 520 days in isolation from the world to test how humans would respond to the pressures of the long voyage to Mars.

SPECIAL INTEREST GROUPS - VHF AND ABOVE

The news is that in South-East Queensland, local interest is growing in having gear available for the microwave amateur radio bands - 1296 MHz and the many bands above.

The Brisbane VHF Group recognises this and is organising a time when local microwaving amateurs will be out at public places using their gear.

Weather permitting, this will be on Sunday the 6th of March, just three weeks away.

Liaison on the day will be on the Group's Mt Glorious 2 metre repeater on 147 MHz.

Sunday the 6th of March 10:00 a.m. to 2:00 p.m., starting just after the morning National and QNEWS broadcast.

One central location on the southside will be Mount Gravatt.

Contact club president Doug, VK4OE

on 3391 5526 or at uwaves@bigpond.com

All amateurs and other interested folk in the area or travelling through are invited to come along and see microwave amateur radio in action!

REWIND

There were many major events of 1971, among them, the first ever one day cricket match between England and Australia.

Idi Amim became President of Uganda.

Apollos 14 and 15 land on the moon and return safely to earth.

Bangladesh becomes an independent nation and West German President Willy Brandt wins the Nobel Peace prize.

Arguably the most notable event however was the founding of the St. George Amateur Radio Society.

The society will be 40 years old in May and to commemorate, a dinner is being held Wednesday May 4 at the South Hurstville RSL Club.

Check out the club's website

THE FINAL FINAL

AGAIN we remind you only 1 week to go until Amateur Radio's Big Day out!

The Central Coast Amateur Radio Club Field day at Wyong will be
held on Sunday the 27th of February 2011 at Wyong Race course.
Gates will open at 6.30 am to allow entry and setup for Traders /
Exhibitors and Flea Marketeers.

The Trader/ Exhibitor areas will open to the public at 9am.
Admission is $12 for Adults with free admission for those under 17.

Amateur radio examinations will be conducted on the day by Brian
Kelly who can be contacted on 0418659043 for further information.

For help on the day, there will directions and information on the
local VHF repeater, 146.725MHz, with a 91.5 sub tone.

For further information and regular updates, please go to the Field
Day website, www.fieldday.org.au or email Central Coast Amateur
Radio Club - ccarc@ccarc.org.au

So don't miss out! Come along and grab a bargain!

Please think of the environment before printing this email

==> + LEGISLATIVE NEWS: SPECTRUM MANAGEMENT BILL THREATENS AMATEUR
FREQUENCIES

On February 10, Representative Peter King (R-NY-3), Chairman of the
House Homeland Security Committee, introduced HR 607, the Broadband for
First Responders Act of 2011. The bill been referred to the House
Energy and Commerce Committee, which handles telecommunications
legislation. HR 607 addresses certain spectrum management issues,
including the creation and maintenance of a nationwide Public Safety
broadband network. As part of that network, the bill provides for the
allocation of the so-called "D-Block" of spectrum in the 700 MHz range
for Public Safety use.

The D-Block consists of two, 5 megahertz-wide segments of spectrum
(758-763 and 788-793 MHz) that became available when the FCC ended
analog television broadcasts in June 2009 and reallocated the 698-806
```

MHz band for Public Safety and commercial broadband. It was anticipated that the D-Block would be auctioned for commercial use. There are several bills in Congress providing for the allocation of the D-Block for Public Safety use, and HR 607 is one of those. But HR 607 uniquely provides for the reallocation of other spectrum for auction to commercial users, in order to offset the loss of revenue that would occur as the result of the allocation of the D-Block to Public Safety instead of commercial auction. HR 607 lists the paired bands of 420-440 MHz and 450-470 MHz among the bands to be reallocated for commercial auction within 10 years of its passage. Read more here <http://www.arrl.org/news/spectrum-management-bill-threatens-amateur-frequencies>.

==> + SPACEWEATHER : SUNSPOT 1158 PRODUCES LARGEST FLARE OF SOLAR CYCLE 24; CME HEADED TOWARD EARTH

Over the past few days, there has been a lot of activity on the Sun. On Sunday, February 13 at 1738 UTC, sunspot 1158 unleashed an M6.6-level blast and on Tuesday, February 15, the same sunspot unleashed an X-class flare, the strongest solar flare in more than four years. On Thursday, February 17, the solar flux index reached 114, the highest yet in Solar Cycle 24. It is expected to continue to be at least 100 for the next few days.

The source of this activity is growing rapidly. Sunspot 1158 is in the Sun's southern hemisphere, which has been lagging behind the northern hemisphere in activity for Solar Cycle 24. This active region is now more than 100,000 km wide, with at least a dozen Earth-sized dark cores in the group. More Earth-directed eruptions are likely.

In addition to flashing Earth with UV radiation, data from NASA's Solar Terrestrial Relations Observatory (STEREO) and its Solar Heliospheric Observatory (SOHO) show that the explosion also hurled a coronal mass ejection (CME) toward Earth. According to the Space Weather Prediction Center (SWPC), three CMEs are headed toward Earth. The last of the three seems to be the fastest and may catch both of the forerunners about mid- to late day on Thursday, February 17.

Solar activity is expected to be moderate with a chance for an isolated major flare through February 19. Sunspot group 1158 is expected to produce more M-class flares and still has the potential for producing an M5 or greater x-ray event. There is also a chance for isolated M-class activity from sunspot group 1161. Geomagnetic storms are possible when the CME hits the Earth's magnetic field, and auroras are possible. Read more here <http://www.arrl.org/news/sunspot-1158-produces-largest-flare-of-solar-cycle-24-cme-headed-toward-earth>.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 DEPLOYMENT POSTPONED

According to the AMSAT News Service, the deployment of the ARISSat-1 satellite from the International Space Station -- previously scheduled

for Wednesday, February 16 -- has been postponed. The postponement was necessary because of changes in the work schedule for the February 16 space walk. Instead, ARISSat-1 deployment will be added to a spacewalk scheduled for July 2011.

When launched, ARISSat-1 will add another dimension to science classrooms worldwide, in addition to space communications for the Amateur Radio community. Unfortunately this delay will considerably narrow the window of opportunity for US school calendar activities, but may provide opportunities for summer learning activities.

The project is a cooperative effort between AMSAT, ARISS (Amateur Radio on the International Space Station,) RSC-Energia (the Russian space agency) and NASA. The design, development and construction of the satellite were done entirely by AMSAT volunteers. Original plans called for the satellite to be hosted inside an old Russian spacesuit. But when the suit became unavailable, the radio equipment was modified and refitted to a newly designed space frame and named ARISSat-1.

After it is deployed from the International Space Station, ARISSat-1 is expected to be operational in orbit for up to six months. For more on ARISSat-1, check out this article
<http://www.arrl.org/files/file/ARISS/Get%20Ready%20for%20ARISSat-1-QST%20Feb%202011.pdf>
from the February 2011 issue of QST.

==> + DAYTON HAMVENTION : ASTRONAUT DOUG WHEELOCK, KF5BOC, TO BE HONORED GUEST OF ARRL AND AMSAT

Doug Wheelock, KF5BOC, will be attending the 2011 ARRL EXPO - part of the Dayton Hamvention&#65533; -- as a special guest of the ARRL and AMSAT. While at Hamvention, Wheelock will share his experiences about using Amateur Radio in space. Wheelock spent six months on the ISS, seven weeks as ISS Commander; while on board the ISS, he, along with fellow astronaut Shannon Walker, KD5DXB, participated in the Amateur Radio on the International Space Station (ARISS) program. Together, the two made 22 ISS-to-school and ISS-to-camp QSOs. Read more here <http://www.arrl.org/news/astronaut-doug-wheelock-kf5boc-to-be-guest-of-arrl-and-amsat-at-hamvention>.

==> + ROCKERS WITH HAM CONNECTION WIN BIG AT GRAMMYS

One of the biggest prizes handed out during the February 13 Grammy awards went to rockers Arcade Fire. Their highly acclaimed album The Suburbs was crowned Album of the Year. While Arcade Fire's win was a surprise -- facing competition from Eminem, Lady Antebellum, Lady Gaga and Katy Perry -- it wasn't totally unexpected, as The Suburbs dominated many critics' best-of lists of 2010.

Arcade Fire's Win Butler was visibly stunned as the group accepted their trophy and then quickly rushed to perform the last song of the night. Band members Win and Will Butler are the grandsons of the late

orchestra leader Alvino Rey, W6UK.

The song We Used to Wait from their winning album relates to communications and, during their concert performances of the song, the band displays images of Amateur Radio QSL cards. Arcade Fire was profiled in an article by ARRL Media and Public Relations Manager Allen Pitts, W1AGP, in the November 2010 issue of QST.

==> QEX -- THE MARCH/APRIL 2011 ISSUE

The March/April issue of QEX is coming soon, and it is full of theoretical and practical technical articles that you won't want to miss. QEX is the ARRL's "Forum for Communications Experimenters." Published bimonthly, it features technical articles, columns and other items of interest to radio amateurs and communications professionals. The mission of QEX is threefold: To provide a medium for the exchange of ideas and information among Amateur Radio experimenters; to document advanced technical work in the Amateur Radio field, and to support efforts to advance the state of the Amateur Radio art. Read more here <http://www.arrl.org/news/qex-the-march-april-2011-issue>.

==> + ARRL ATLANTIC DIVISION TO HOST TWO WEBINARS IN FEBRUARY

Periodically, the ARRL's Atlantic Division hosts a "webinar" -- an interactive web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. During February, Atlantic Division Director Bill Edgar, N3LLR, will host two webinars for ARRL members, one on 501(c)(3) organizations and one on using Narrow Band Emergency Messaging Software (NBEMS) -- a set of programs used to send messages and files via Amateur Radio using an audio interface. Read more here <http://www.arrl.org/news/arrl-atlantic-division-to-host-two-webinars-in-febr
uary>.

==> ARRL HEADQUARTERS TO CLOSE IN OBSERVANCE OF PRESIDENTS' DAY

ARRL Headquarters will be closed in observance of Presidents' Day on Monday, February 21. There will be no W1AW bulletin or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Tuesday, February 22 at 8 AM Eastern Standard Time. We wish everyone a safe Presidents' Day holiday.

==> SOLAR UPDATE

Tad "The glory of the departing Sun piled up masses of gold and burning fire" Cook, K7RA, reports: A dramatic surge in solar activity is underway, with a level of sunspot numbers and solar flux not seen since 2005-2006. Tuesday's sunspot number of 100 has not been observed since April 6, 2006 when it was 105. On Wednesday the solar flux was 114.1, and the last time it was that high was September 15, 2005 when it was 119.4. The average daily sunspot numbers rose this week by more than 25 points to 69.9, and the average daily solar flux was up 20 points to 103.5. NOAA/USAF predicts solar flux at 105 on February

17-18, 100 on February 19-21, 98 on February 22-24 and 80 on February 25-28. The planetary A index is predicted at 18, 25 and 12 on February 17-19 and 5 on February 20-28. Look for more information on the ARRL website on Friday, February 18. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Charles Dickens' The Old Curiosity Shop.

==> ARRL FIELD DAY: 2011 FIELD DAY PACKETS AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 25-26, 2011! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/files/file/Field-Day/2011/2011_FD_Packet.pdf>and include the complete rules (including a change for 2011), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press. Read more here <http://www.arrl.org/news/2011-field-day-packet-now-available>.

==> THIS WEEK ON THE RADIO

This week:

- February 18 -- NCCC Sprint Ladder
- February 18-19 -- Russian PSK WW Contest
- February 19 -- Feld Hell Sprint
- February 19-20 -- ARRL International DX Contest (CW) <http://www.arrl.org/arrl-dx>, AWA Amplitude Modulation QSO Party
- February 21 -- Run for the Bacon QRP Contest
- February 23 -- SKCC Sprint

Next week:

- February 25 -- NCCC Sprint Ladder
- February 25-February 27 -- CQ 160 Meter Contest (SSB)
- February 26-27 -- Mississippi QSO Party; North American QSO Party (RTTY)
- February 27 -- High Speed Club CW Contest
- February 27-28 -- North Carolina QSO Party
- February 28 -- CQC Winter QSO Sprint
- March 1 -- AGCW YL-CW Party

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 18-19 -- ARRL Arizona State Convention
<http://www.arrl.org/hamfests/arizona-state-convention-yuma-hamfest-emergency
-preparedness-show>,
Yuma, Arizona
- February 26 -- ARRL Vermont State Convention

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-02-18
We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page
http://www.mmmonvhf.de/latest.php - welcome and enjoy ...

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** NEW TEAM MEMBER at MMMonVHF **

We are happy to announce that we did find an experienced VHF
HAM in Lins, PA3CMC, who will start in february 2011 to join
the VHF-DX-Portal MMMonVHf and specially in the sections EME
and NEWS, parallel to Guido, DL8EBW. We are still open for
other proposals and looking for someone who is able to help
Ansgar, DG2KBC in programing and web design...
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** VK9NA Log and QSL Status **

The complete log for the January VK9NA 2m EME operation has now
been uploaded to the expedition's website. Stations are listed in
the order worked. The log includes information about QSLs received,
and in due course will show when QSLs are dispatched:
http://vk9na.com/emeqsls.html
SOURCE: tnx to Guy, VK2KU via MoonNet

** AURORA and SUN Activity **

IMPACT! A CME hit Earth's magnetic field at approximately 0100 UT
on Feb. 18th (8:00 pm EST on Feb. 17th). The impact was not as
strong as expected considering the cloud's X-class origin.
Nevertheless, geomagnetic storms are possible in the hours ahead!
SOURCE: www.SpaceWeather.com

! FINALLY ! The sun is active for us VHF people again!
BE PREPARED! Keep an eye at the VHF bands and if you have any
AURORA Observation, please do spot it via www.mmmonvhf.de/au.php

DO NOT FORGET TO SPOT THE QTF (direction) of your antennas...!
More about AURORA Propagation please follow our infos at:
http://www.mmmonvhf.de/minibb/index.php?action=vtopic&forum=15
The VHF-DX-Portal will start to document the AURORA Openings
as you well know it from 144 MHz TROPO and 144 MHz ES Openings!

LATEST EME NEWS and NEWSFLASH from the C56-Team, dated 2011-02-18:
EME: All goes very well, we are over 300 inits. This DXpedition is
already second best in history (QSO rate EME DXpedition). We are
over our own record set in Kenya (5Z4EME 2009) where we made 283 QSO
We are on our way to attack (our own) world record (340 inits from
3B8EME Mauritius 2010). It is getting difficult because we have
worked them almost all, but we do not give up hoping for a new
record. We did work 315 inits so far. Dgrd is very low. Promising
for this weekend when we also will do so efforts on 70cm EME. We
have a single yagi with no LNA. Last year we worked 7 inits in 90
minutes. We now will take some more time. Our goal is ten inits.
Maybe a little to high, but this is what we focus on!
Our log is online on http://www.emelogger.com/gambia and we daily
update photos or YouTube movies. See you tomorrow on our moonrise
on 144.117 MHz. C56EME always first. 73 from C56EME
SOURCE: tnx to Rene, PE1L, direct to MMMonVHF
Tips how to QSO with them: www.mmmonvhf.de/latest.php?id=3654

** VE1JF FN74cq QRV 6M EME for my moonsets--hope for company **

After solving several issues, I believe I am now QRV for EME during
my coming moonsets. This morning, I got up and found not a soul
responding on the ON4KST 50/70 EME site. Hoping some folks will be
interested in QSOing an initial, Iï¿½ll try again:
ï¿½18 Feb starting around 0904 by prearrangement or 0950-1110
ï¿½19 Feb starting around 0931 by prearrangement or 1018-1138
ï¿½20 Feb starting around 0953 by prearrangement or 1043-1205
The difference in the prearrangement vs. later start is that the
later starts are when my moon is below 12o, when I seem to get the
best echoes. The earlier times are 20o and I include them because
the difference might be important to some potential QSOs.
Skeds would be welcome, but if you happen to be on during those
times you can see if Iï¿½m checked into ON4KST. At some point, I will
also be open to some moonrises, but wonï¿½t have the saltwater
working for me. With the wx here, the rotator is periodically
freezing in place or jamming at irrelevant azimuths, and I donï¿½t
want to play much with it until I have made some good progress with
the moonsets. SOURCE: Jim, VE1JF via Magic Band EME

** EG8, CANARY ISLANDS (Special Event) **

Look for special event station EG8ISS to be on the air between
February 12th and March 11th, from Las Palmas, Gran Canaria
(AF-004, DIE S-005, WLOTA L 0969). Activity is to celebrate/
publicize the first ARISS (International Space Station) contact
with one of the "Institute for Technological Development and
Innovation in Communications" (IDeTIC) facilities on campus. The
special event station will be on the HF bands, 40-10 meters, using
CW, SSB, RTTY, PSK31 and SSTV. Also, activities are planned for VHF
(2m FM local and R7 repeater) and the satellites (AO-27, SO-50,
AO-51 and VO-52). There is a special QSL card designed for this
event that will be automatically mailed to your QRZ.com address.
Please, keep in mind that they aren't highly skilled radio
operators, so be patient if there are any pileups. More info is
available on the QRZ.com under EG8ISS. A Twitter page is also
available at: http://twitter.com/eg8iss
SOURCE: Ohio/Penn DX Bulletin #998

** PJ2, CURACAO, HF and 50 MHz Acivity **

Operators Hawa/DK9KX, Dieter/DJ9ON and Jan/DJ8NK will operate from
Curacao (SA-099, WLOTA LH-0942) between June 26th and July 7th.
They will have a strongly emphasis on 6 meters, but the HF bands
will also be used on CW, SSB and RTTY. Callsign and further info
will be published soon. SOURCE: Ohio/Penn DX Bulletin #998

** IOTA JI6 Activity **

TAKE JI3DST plans to visit to Kuchino-shima Is., Tokara Archipelago
(AS-049) between 0600 Mar.11 and 0000UTC, Mar 20,2011. He is active
as JI3DST/JI6 through 160 to 6m SSB,CW,FM,RTTY and PSK31. This time
he will have two installation locations on either side of voclanic
edge. Loc.A is installed for NA,SA,JA,other areas on 40-6m, every
23-0300 and 04-0600UTC. Loc.B,for EU,AF,JA,other areas on 160-6m
,every 08-2200UTC. QSL to JI3DST/JI6 via the BURO to JI3DST(QRZ.com)
e-mail to JI3DST(AT)jarl.com
SOURCE: TAKA 73,DE JR3TVH via Frank, DL8YHR to MMMonVHF

** PJ7, SINT MAARTEN HF and 50 MHz Acivity **

The PJ7X team is pleased to announce that they will be operating
from Sint Maarten (NA-105), one of the newest entities on the DXCC
list, for 12 days in October and November 2011. The international
team consists of the following experienced operators with 187 years
of amateur radio involvement among them: Jan Harders, DJ8NK
Kan Mizoguchi, JA1BK Paul Granger, F6EXV Rich Gelber, K2WR
They will arrive in St. Maarten on October 26th, and depart on
November 9th. This time span includes the CQWW DX SSB Contest
(October 29-30th), which they will enter in the Multi-2 category.
Their intention is to keep 2 stations on the air for 24 hours a day
to the extent possible. During peak periods, they may be able to
run a third station. Emphasis will be on CW and SSB, but they will
also operate RTTY as much as possible. The operation will include
all bands from 80-10 meters, including the 30/17/12 meter bands,
but not including 60 meters. Also, they will not be operating on
160 meters due to space limitations at their operating location,
nor on 6 meters. The primary callsign used will be PJ7X. Other
callsigns will be PJ7NK and PJ7J. The PJ7J callsign will be
reserved for use on 75 and 80 meters, and a principal goal of this
operation will be to make as many QSOs as possible with Europe and
Japan on this band. QSL information is: PJ7X via F6EXV, PJ7NK via
DJ8NK, PJ7J via JA1BK Internet log checking, updated daily, is
planned. All logs will be uploaded to "Logbook of the World" a few
months after completion of the operation. Website is coming soon!
They hope to fill in lots of band/modes slots for those who need
them and even provide an all-time new one for some.
SOURCE: Ohio/Penn DX Bulletin #998

** RADIO EXPEDITION SIERRA LEONE 2011 (IK38JK) **

A hospital ship - helping the poorest - radio amateur volunteers
- supporting a Mercy Ships project
In close cooporation between the DAGOE Foundation, Mercy Ships,
4 Dutch and 1 Liberian radio amateur will run a Radio DXpedition
from Sierra Leone. We will be on-site in Freetown between March

15th and April 4th using the amateur radio callsign 9L5MS.
They will only have 500w and a 5 element Tonna antenna for 6m, but
are planning to be active calling CQ during their moonsets at the
beginning of their trip. The positive thing is that they are going
arrive there during period of the best EME cndx for March. More
information will be made available as the DXpedition approaches.
SOURCE: Lance, W7GJ via Magic Band EME

** SV9, Crete qrv on HF and 50 MHz **

Willi, DJ7RJ, will once again be active as SV9/DJ7RJ from the island
of Crete (IOTA EU-015, GIOTA KRS-005, MIA MGC-005, WLOTA 1400, Grid
Loc. KM25) between 24th of February and 15th of March 2011. QRV on
160-6 metres, using CW and SSB. He prefers the lower bands. QSL via
home call, bureau or direct.
SOURCE: [OPDX Bulletin] via ICPO Bulletin (18-25 February 2011)

** New DXCC entity? South Sudan **

As stated earlier there was a referendum held in Sudan to find
out whether the south of the country should become an own country.
With an overwhelming majority of more than 99 % the population
voted for the separation of the south. South Sudan was an own DXCC
counter before and may find its way onto the DXCC Entity List again
soon. More information about the referendum can be found online at:
http://www.bbc.co.uk/news/world-africa-12201063 - SOURCE: DXNL 1714

>From the WebPage:
Welcome to SOUTHERN SUDAN 2011 DXpedition web site
(http://www.dxfriends.com/SouthernSudan2011/index.php) where we
will give you more information about our DXpedition.
The Intrepid-DX Group and the DX Friends have combined efforts to
planning a multi-national DXpedition to Southern Sudan to celebrate
the birth of a new country. it will take place over twenty days in
july, 2011. The Intrepid-DX Group is the group which brought you
the 2010 YI9PSE, IRAQ DXpedition. The DX Friends have brought you
the 2006 S01R DXpedition to Western Sahara, the 2008 DXpedition to
Rwanda as 9X0R, the 2009 DXpedition to Western Sahara as S04R, the
2010 DXpedition to Palestine as E4X and the 2010 DXpedition to San
Marino as T70A. It is hoped that the callsign ST0?DX will be issued
this next week following our meeting with the Government of
Southern Sudan Mission in America. As with previous DXpeditions,
this will be a major effort, with target of more than 150,000 QSOs.

Amateur Radio Newsline(tm) Report 1749 - February 18 2011

Amateur Radio Newsline report number 1749 with a release date of
Friday, February 18, 2011 to follow in 5-4-3-2-1. The following is a

Q-S-T. The deployment of ARISSAT One is delayed until this summer but
a test from inside the I-S-S shows that the bird should perform
flawlessly. Also, the Sun wakes up with a big flare on February 13th,
the United States recognizes reciprocal C-E-P-T licensing with
Montenegro, lots of enforcement news from the FCC and a cockroach may
soon be headed to the edge of space. Find out the details on Amateur
Radio Newsline(tm) report number 1749 coming your way right now.

HAM RADIO IN SPACE: ARISSAT-1 DEPLOYMET DELYED UNTIL JULY

A delay until this summer for the deployment of ARISSAT One from the
International Space Station. This as the Russian space station manager
RSC Energia announces the delay based on the work schedule of the
Cosmonauts and Astronauts during the upcoming space walk otherwise
known as an Extra Vehicular Activity or E-V-A.

On Wednesday, February 9th NASA had announced that E-V-A number 28 will
be broadcast live on NASA TV, starting at 1245 UTC on February 16th.
Included in the schedule posted by NASA was the deployment of ARISSAT
One.

On Thursday, February 10th Energia decided to have the crew do a
checkout of ARISSAT One to make certain that it had survived the trip
up on board the re-supply cargo flight that had carried it to its
temporary home on the I-S.S.. This test was not an event that was
previously scheduled and there was no public announcement of it made.
Instead, a message was sent to the I-S-S- crew to connect ARISSAT to
one of the external ham radio antennas, to turn it on and listen to it
on the Kenwood dual-bander normally used for ARISS school contacts.
During the test, Energia decided to keep the ARISSAT transmitter on
through to the next day after with the crew reported back that the
satellite was functioning flawlessly and it was ready to go off into
space on its own.

But that was not to be. On Friday, February 11th Energia management
announced that the deployment of the ARISSAT One satellite had been
removed from the schedule of events for E-V-A 28. This Energia said
was due to changes in the tasks associated with the work scheduled to

be performed during this spacewalk. Subsequently, Energia informed NASA that deployment of ARISSAT One will be added to E-V-A number 29. It's currently scheduled for sometime this coming July.

But the good news in all this is that ARISSAT One will likely work exactly as it was designed to once deployed on-orbit. Hams on the ground who heard ARISSAT One during the test period said its signal was definitely loud and clear.

(ANS, ARISSAT)

**
PROPAGATION: EARTH-DIRECTED SOLAR FLARE COMES OUR WAY

Has Mother Nature finally heard the prayers of hams worldwide? This may be the case as Old Sol unleashed Sunspot number 1158 at 17:58 UTC on Sunday, February 13th.

Sunspot 1158 is described as the strongest solar flare of the year so far. It was an M6.6-category blast. The eruption produced a loud blast of radio waves heard in shortwave receivers around the dayside of our Eaeth. NASA's Solar Dynamics Observatory recorded the intense flash as being of extreme ultraviolet radiation.

Preliminary data from the STEREO-A and SOHO observatories in space agree that the explosion produced a fast but not particularly bright coronal mass ejection. The actual cloud was predicted to hit our planets magnetic field on or about February 15th and held the potential to cause high latitude auroral displays.

At its initial peak also on February 15th the active region of this solar eruption was more than 100,000 km wide with at least a dozen Earth-sized dark cores scattered beneath its unstable magnetic canopy.

RADIO LAW: USA RECOGNIZES MONTENEGRO UNDER CEPT LICENSE

The FCC has added Montenegro as the latest nation that the United States recognizes in accord with the C-E-P-T reciprocal agreement for radio amateurs. Under the compact, US citizens who hold an FCC-issued General, Advanced or Amateur Extra class Amateur Radio licenses may now operate in Montenegro, as well as the other countries covered by the European Conference of Postal and Telecommunications Administrations This, subject to the regulations in force in the country visited, to operate in those countries. US amateurs with a General class license will be granted CEPT Novice Radio Amateur License privileges while those holding an Advanced or Amateur Extra class license will be granted CEPT Radio Amateur License privileges.

BREAKING DX NEWS: SABLE ISLNAND TEAM HOPES MARCH 7 - 15 WILL BE A

CHARM

The C Y Zero DXpedition team has set March 7th to the 15th as its target schedule to be on the air from Sable Island.

The operators plan to travel to Halifax, Nova Scotia, Canada on 5 March to take care of final logistics details in preparation for the charter flight to Sable on the 7th. The team says that it has maximized its personal schedules to be as flexible as possible to adapt to any potential weather delays. One change in operators has K8LEE replacing WA4DAN who had to withdraw due to business commitments.

As most listeners know, this will be the third try to make it to Sable with the previous attempts put on hold due to long term weather delays. The team leaders say that even weather will always be impossible to predict, they have been encouraged by several successful supply flights to Sable in the past month. Should they experience yet another weather delay, they hope to stay in Halifax in anticipation that the delay with be short term rather than an extensive one. In other words they will remain ready to go on a day-to-day basis for a period of time as the weather permits.

The website will be updated periodically as to the status and any potential impact on the planned activation date. Its in cyberspace at www.cy0dxpedition.com. We will have more DX news at the end of this week's Amateur Radio Newsline report.

ENFORCEMENT: FCC ENORCEMENT BUREAU AGREES TO POSTPONE K1MAN LICENSE RENEWAL HEARING

The FCC's Enforcement Bureau has agreed with Glenn Baxter, K1MAN, that the hearing on his license renewal should not go forward until the civil action to collect a $21,000 fine against the Maine radio amateur has been adjudicated.

In her February 10th filing to Chief Administrative Law Judge Richard Sippel, Enforcement Bureau Chief Michelle Ellison stated that the Bureau agrees with K1MAN that the proceeding in the matter of Baxter's pending license renewal should not be scheduled until the matter of the federal litigation to collect the fine has concluded.

She did however include one proviso. This being that the discovery aspect of the case continue per its schedule to provide for judicial economy and efficiency. Ellison says that this will permit the parties to move to trial as quickly as possible after a final decision in the federal collection action is reached.

(FCC)

**

ENFORCEMENT: $25000 NAL ISSUED TO UTAH U-NII OPERATOR

The FCC has issued a $25,000 Notice of Apparent Liability for Forfeiture and Order to Utah Broadband who the regulatory agency clams to be the operator of two Unlicensed National Information Infrastructure or U-NII transmission systems in Salt Lake City, Utah. This by operating intentional radiators not in accordance with Part 15 of the Rules and the devices Equipment Authorization.

In its February 11th release the FCC says that on October 5, 2010, FCC agents from the Enforcement Bureau's Denver and San Diego Offices, along with FAA personnel, used direction-finding techniques to locate emissions on the frequencies 5580 and 5640 MHz. On the following day, FCC and FAA personnel used those same techniques to confirm that the identified interference resulted from radio emissions emanating from a pair of transmission systems located on the rooftop of the Brody Chemical Building in Salt Lake City.

The FCC agents inspected the systems which were operated by Utah Broadband. Both U-NII systems utilized the modular transceiver model XtremeRange5, an intentional radiator manufactured by Ubiquiti Networks, Inc. The FCC Equipment Authorization for the Ubiquiti XtremeRange5 transceiver limits the device to operations within a frequency range of 5745 MHz to 5825 MHz. During the inspection the FCC agents observed that both were operating out of band. The FCC agents also observed, and Utah Broadband personnel acknowledged, that the required frequency assurance functionality of each transceiver was disabled. During the inspection, Utah Broadband adjusted the devices' operating frequencies to end any interference they were causing.

In assessing the $25,000 N-A-L the FCC says that based on the evidence before it the agency finds that Utah Broadband apparently willfully and repeatedly violated sections 301 and 302(b) of the Act, and sections 15.1(b) and 15.1(c) of the FCC's Rules, by operating intentional radiators in a manner not in compliance with the Part 15 Rules. Also doing so in a manner inconsistent with their Equipment Authorization and, consequently, without authorization.

Utah Broadband was given the customary 30 days to pay the N-A-L or to file an appeal.

**

ENFORCEMENT: FCC ISSUES $10000 NAL TO ALLEGED NJ UNLICENSED STATION

And the FCC has also issued a $10,000 Notice of Apparent Liability for Forfeiture to one Bernabe Moreno. This, for his alleged operation of an unlicensed radio transmitter on the frequency 102.3 MHz in Passaic, New Jersey.

On April 3 and April 7, 2010, in response to a complaint, agents of the Enforcement Bureau's New York Office used mobile direction-finding techniques to monitor the frequency 102.3 MHz in Passaic and determined the source of the transmissions to be a radio station operating from a building located on Passaic's Monroe Street. The agents observed an FM broadcast antenna on the roof of the building and a coaxial cable going from the antenna on the roof to the second floor of the building. The agents subsequently took field strength measurements and determined that the signals being broadcast exceeded the limits for operation under Part 15 of the Commission's rules and therefore required a license. A review of the Commission's records revealed no evidence of a Commission authorization for operation of a radio station on 102.3 MHz in the Passaic, New Jersey area.

On April 7, 2010, the agents returned to the building to conduct an inspection of the radio station and knocked on the door where they believed the station was located. The person who answered the door identified himself as Bernabe Moreno.

Moreno told the agents that he owns and operates the station on 102.3 MHz at this location. The agents observed that the station was active at the time of the inspection until Mr. Moreno turned off the transmitter at the agents' request. The agents then verbally warned Moreno about the consequences of continued operation of an unlicensed radio station and provided him with a written Notice of Unlicensed Operation, requiring him to permanently cease operation.

Now in its follow-up, the FCC has issued the $10,000 Notice of Apparent Liability to Moreno for operating the unlicensed station. Moreno was given the usual 30 days to pay or to file an appeal.

**

HAM HAPPENININGS: VISALIA DX CONVENTION TOP BAND DINNER

Turning to the ham radio social calendar, the 2011 Top-Band Dinner Banquet at the Visalia DX Convention is now open for reservations. This year's event will take place on Friday, April 15th, at 6:30 PM at the Holiday Inn, Visalia, California. This years program will be a presentation titled The Low Bands from VP8ORK South Orkneys. The cost is $37 per person. If you wish to attend, please send an E-mail with the number of reservations you would like along with your call, name and e-mail to wb6rse (at) mac (dot) com.

(WB6RSE)

**

HAM HAPPENINGS: IRTS AGM AND RALLYE IN LIMERICK MARCH 26-27

The Irish Radio Transmitting Society's Annual General Meeting weekend, including the Annual Dinner and Rally will be held on Saturday March 26th and Sunday March 27th. The event will be hosted by the Limerick Radio Club. The venue is the Radisson Blu Hotel in the city of Limerick. For more information contact, Ger McNamara EI4GXB by e-mail to ei4gxb (at) gmail (dot) com. And for those of you not aware, in Europe a rally is the same as a convention or large hamfest here in the USA.

**

NAMES IN THE NEWS: GEORGE TRANOS, N2GA, NAMED NEW CQ MAGZINE CONTEST EDITOR

Some names in the news. First up is George Tranos, N2GA, of Long Island, New York, who has been named the new Contesting Editor of CQ Amateur Radio magazine.

George Tranos comes to this position with over two decades of contesting experience in a variety of station settings, and has several top scores to his credit. Both as a single operator and as part of contesting teams. He has operated extensively from the Caribbean as well as from his home station in New York. He has been also been a referee at three World Radio Teamsport Championship competitions.

Professionally, N2GA is president of a software and management consulting firm, vice president of a school for professional motorcycle riders, and a freelance journalist. He is married to Diane Ortiz, K2DO, an accomplished contester herself and a former columnist for CQ Contest magazine during the 1990s.

Tranos succeeds John Dorr, K1AR, who stepped down after writing the magazine's contesting column for nearly 22 years. George Tranos' first column will appear in the March 2011 issue of CQ.
**

NAMES IN THE NEWS: WEATHER BRAINS AT AGE 5

And a well done to Alabama Meteorologist James Spann, W-Oh-4-W and the crew at Weather Brains. This, as the on-line show about the weather celebrates its 5th anniversary this month.

For those of you who never heard of Weather Brains, this is a weekly audio presentation delivered over the Internet that says it unites weather geeks worldwide. According to its website, the presenters do their best to cover the world of weather in a fun way, and believe that they have the best weather show on the web.

Each show generally runs 60 to 80 minutes. They are recorded on Monday nights and are usually available about midnight Monday nights Eastern Time. So far, W-Oh-4-W and his Weather Brains associates have produced over 200 shows and have never missed a week since the day they started.

You can hear a new show each week on-line at www dot weatherbrains dot com. And we add our own congratulations to the crew at Weather Brains

on a job well done.

WORLDBEAT: NORWAY TO END ANLOG FM BRODCASTING IN 2017

The Norwegian Government has announced plans that would see both the nations national public and commercial radio services cease all analog FM broadcasts in 2017. A report in Radioworld Online quotes a Norwegian government press release as saying that the nation's radio industry wants an end of analog FM and the government is now taking active steps to facilitate a transition to digital radio and to take care of listeners' interests. More is on-line at www (dot) rwonline (dot)com/article/113286.

(RW)

**

WOLDBEAT: COMMEMORATING RADIO PRAGUE

Mike Barraclough reports that a special broadcast commemorating the end of Short Wave transmissions from Radio Prague is now available online. Included are two recordings from 1937 and two from 1968 along with an interview with Oldrich Cip, now head of the High Frequency Co-ordination Committee. Back in the 1960's he hosted the stations DX program in the 1960's using the stage name of Peter Skala. Also included are contributions from listeners. The show is on line at tinyurl.com/48pn5qd .

**

WORLDBEAT: NEW DUTCH CONTEST CLUB FORMED

A new Dutch amateur radio contest group has been born and located in the northwest part of the Noord-Holland Province. Its call sign is PA6NH with PA2PAC, PA3FUN, PA7TWO, PH9HB, PD1AIQ and PE1OPK as the charter members. Currently, their station setup consists of surplus Harris 590 receivers and Telefunken S2525 amplifiers, with Yaesu and ICOM equipment as backup. This new radiosporting team plans to participate in all the major contests as they come along. As a general rule, all QSOs will be uploaded electronically to the Logbook Of The World. The group invites you to checkout the PA6NH pictures on QRZ.com.

**

ON THE AIR: COMMEMORARTING THE LAST SWISS MEDIUM WAVE TRANSMITTER

On the air, members of Switzerland's Rav Radio Amateurs of Vaudios whose regular club call sign is HB9MM will activate the special callsign HE3OM from the town of Sottens during the month of February. Sottens is a small village where the last medium wave transmitter active in Switzerland was located. It ceased operation on December 31st, 2010.

Permission has now been granted to the club to use the stations two giant antennas for amateur radio purposes. The tallest is 188 meters high, and is being used on the High Frequency bands, especially the lower frequencies such as 160 and 80 meters. The somewhat smaller mast at 125 meters in height is connected to the VLF station transmitting on the 137 kHz amateur band.

QSL cards go to HE3OM via HB9TOB. For more details, see www (dot) hb9mm (dot) com/sottens

**

DX

In DX, the X-F-4 Revillagigedo DXpediton has been assigned callsign 4A4A. A team of 9 operators will take to the air from Isla Socorro March 4th to the 19th on 160 to 10 meters using CW, SSB and some digital modes. A possibility of 6 meters was also mentioned. More on line at www (dot) revillagigedo2011 (dot) com

ARRL DXCC Manager Bill Moore, NC1L, reports that the 9X0SP 2010 DXpedition to Rwanda has been approved for DXCC credit. If you have cards that were recently rejected for this operation, please send an e-mail to the ARRL DXCC Desk. Moore says that once your record is updated, results will appear in Logbook of The World accounts or in the live, daily DXCC Standing.

VK8NSB, VK8FNCY, 9M6DXX, 9M6XRO and MW0JRX will be operating from TImor-Leste in East Timor between September 16th and the 26th. The precise location will be Atauro Island, which is about 30 kilometers north of the capital, Dili. The group says that it is working closely with the Timor-Leste licensing authority and the DXpedition callsign will be announced soon. They will have three stations on all bands 10 - 160m using CW, SSB and RTTY. QSL information will be announced in a future news release.

Lastly, VK3FY is reporting on DX-World.Net he is hoping that the weather improves in the South China Seas so that he and his group can board the ship which will take four operators to Pag-Asa in the Spratly Islands. He notes that as this is a scouting trip, operating time on the island will be limited to a few hours to a maximum of three days. The time on the island will be utilized in taking pictures of prospective sites and time permitting getting D-X-Zero-D-X on the air

as a prelude to the planned April operation. QSL for this trip will be as per D-X-Zero-D-X via N-2-O-O.

**

THAT FINL ITEM: VK CLUBS TO LUNCH COCKROCH TO NEAR SPACE

And finally this week, two clubs down-under are joining forces to send a cockroach to the edge of space in a balloon aptly named Loki One. Yes, we said a cockroach as in those kind of disgusting bugs that nobody wants to find in their homes. Here's the rest of the story.

Norse mythology claims that Loki is the great mischief-maker. It's also the name of the edge of space balloon experiment that the Tamworth Radio Club members and Tamworth Oxley Scout members will be launching in the coming weeks.

The payload of Loki-1 includes APRS equipment for tracking and flight data; a camera set to take photo's at 1 minute intervals; sensors to record temp and radiation, some paper aircraft that will be dropped from a height of approx. 30 kilometres with information on them about the scout group and, of coarse, the previously mentioned cockroach.

The Tamworth radio club has installed 7 ground stations around the North West and New England regions of New South Wales. These will be used to receive APRS data from Loki-1 then transfer it to the internet for live tracking via the APRS network. It is expected that Loki-1 will reach an altitude of about 100,000 feet giving the craft a radio horizon of 700 kilometers.

As airspace is heavily regulated regarding its use, the flight planners say that negotiations are well in hand with Australia's airspace regulator the Civil Aviation Safety Authority as well as air traffic controllers. This, regarding a host of regulations that need to be complied with regarding the flight of the balloon through controlled air space which in Australia starts at various altitudes above ground depending on where you are, and extends right straight up to 60,000 feet. Most civilian jet aircraft cruise at an altitude between 25,000 and 40,000 feet. Non compliance with all the necessary regulations can carry severe penalties.

As to the welfare of the cockroach? Well nothing has been said if it will fly in a pressurized compartment or just have to take its chances as the balloon makes its way to the edge of space and back down to the ground. And at airtime there has not been any outcry of inhumane treatment of the bug from the Society for the Prevention of Cruelty to Cockroaches, if such a group even exists.

Up to date information on this high altitude balloon flight can be found on Tamworth Radio Club's web site under the topic of projects. It's in cyberspace at www.trci.org.au (Southgate, VK2BOZ and VK2YGV)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. GB2RS NEWS

Sunday 20th February 2011

The news headlines:

* Data across the Atlantic on 502kHz

* Voice of Russia moves from 7200 to 7265kHz

* National Science & Engineering Week 2011

At 2134GMT on 13 February, Joe, VO1NA managed a full beacon decode from Graham, G0NBD on 502kHz using the ROS mode. It is believed this was the first live data mode decoded over the Atlantic on this band. The signal to noise ranged from -23 to -27dB, giving a 100% decode of the test message. The transmission was sent using MF-7 with an estimated ERP of 1 watt from a 35ft top loaded vertical. ROS mode did a good job of resolving the signals despite deep and rapid QSB over the 3500km path. At just over a year old the ROS data mode is relatively new and uses an adaptation of multiple frequency shift keying and forward error correction to help make successful contacts under very difficult band conditions. The software for the mode is completely free and more information can be found via the ROS website, http://rosmodem.wordpress.com.

Voice of Russia was first heard on 7200kHz on 1 February 2011 and reported to the IARU Monitoring System by Dick, PA0GRU. Ulrich, DJ9KR from the IARU Monitoring System in Region 1 reported the station on 2 February to the German Telecoms authorities. Following correspondence with the Russian General Radiofrequency Centre he was able to demonstrate the interference. Subsequently, Voice of Russia moved to 7265kHz.

National Science & Engineering Week will take place between 11 and 20 March. As part of this event, Sheffield Amateur Radio Club is providing hands-on experience of amateur radio at a local school as well as to the community at large. On Saturday 12 March between 10am and 4pm the Club will be at Tapton School. They plan to install two temporary radio stations and aerials and put the school on the air for the day using the club callsign GX3RCM/P. They will be working alongside the Sheffield Astronomical Society who have held an annual exhibition and demonstration at the school for the past few years. The event is open to all members of the public.

According to the AMSAT News Service, the deployment of the ARISSat-1 satellite from the International Space Station, previously scheduled for Wednesday 16 February, has been postponed. The delay was necessary because of changes in the work schedule for the February 16 space walk. Instead, ARISSat-1 deployment will be added to a space walk scheduled for July 2011.

The United Kingdom Six Metre Group (UKSMG) has launched an initiative initially to UK radio clubs and societies, to keep them informed regarding operating on 50MHz. A bi-monthly newsletter will be e-mailed to club secretaries who have registered to receive it. The newsletter will contain a wide variety of information including practical operating tips. Much will be specifically targeted at the large number of operators who have not previously experienced the enhanced F2 propagation expected during the sun spot cycle peak in 2012. Any club secretaries who have not already registered to receive the newsletter can do so at www.uksmg.org/phplist. The first Douglas Byrne Marconi Lecture, to be delivered by Professor Peter Scott from the University of Reading, will be held at the Museum of the History of Science, Broad Street, Oxford, on Tuesday 1 March at 5.30 to 6.30pm. The subject of the lecture will be, `The sources of competitive advantage and innovation in the interwar British radio industry'. Entrance is free to the lecture and the reception following in the Bodleian Library. For further information, e-mail bookcentre@bodleian.ox.ac.uk. The Fellowship was established to recognise the contribution made by Douglas Byrne, G3KPO to radio history as the Founder of the Wireless Museum on the Isle of Wight.

And now for the details of rallies and events for the coming week

There are no rallies this weekend.

On 27 February. Rainham Radio Rally will take place at Rainham School for Girls, Derwent Way, Rainham, Gillingham, Kent ME8 0BX. Doors open at 10 am. More details from Trevor, G6YLW, 0771 7678 795.

Also on 27 February, Swansea ARS Rally will be held at Court Herbert Sports Centre, Neath Abbey, Neath SA10 7BE. Doors open at 10.30am and entry is £2 with free car parking. There will be trade stands and a Bring & Buy along with special interest groups. Details from Roger, GW4HSH, on 01792 404422.

Now for the news of special events

North Cork Radio Group will be activating the call EI1NC/P on 20 February from the Blackrock Castle Observatory from 1000 to 1700UTC. The venue is a 16th century Castle located 4km from the heart of Cork city on the banks of the river Lee. The Castle has seen many uses in its long history and now houses a cutting edge space observation post.

Members of the Coventry Amateur Radio Society will be activating the Birth of Radar Memorial site at Litchborourgh on 26 February. They will sign GB4WWR, standing for Watson Wilkins Radar. They chose the callsign because Wilkins and Watson-Watt worked on the project. The station will

be using SSB on the bands 80m through to 20m. Further information can be obtained from Brian, G8GMU on 07801 862 686 or by e-mail to brlean@freenetname.co.uk.

EG8ISS will be on the air until 11 March from Las Palmas in Gran Canaria, which is IOTA reference AF-004. Activity is to celebrate the first ARISS contact with one of the Institute for Technological Development and Innovation in Communications facilities on campus. The special event station will be on the HF bands, from 10 to 40m using CW, SSB, RTTY, PSK31 and SSTV. Activities are also planned for VHF and the satellites AO-27, SO-50, AO-51 and VO-52. There is a special QSL card for this event that will be automatically mailed to your QRZ.com address. More info is available on QRZ.com under EG8ISS.

And now the HF DX news compiled from 425 DX News and other sources

Phil, G3SWH and Jim, G3RTE plan to operate from the West Island in the Cocos Islands group from 22 February to 5 March. They will be active as VK9C/G6AY on 10 through to 80m using CW only. The Cocos (Keeling) Islands, IOTA reference OC-003, is ranked number 75 worldwide. You can QSL VK9C/G6AY via G3SWH either direct with an SAE and adequate return postage, via Phil's website for a bureau reply or via the bureau. Stan, VP5/AC8W, Jim, VP5/KB8TXZ and Lee, VP5/N8LJ are working from Providenciales Island in the Turks and Caicos Islands until 23 February. QSL via their home callsigns, either via the bureau or direct.

Ted, FO/K8AQM, will activate Moorea Island, which is IOTA reference OC-046, until 25 February. He will be operating holiday style with 100 watts on 20 and 30m. QSL via homecall either via the bureau, direct or using LogBook of the World.

Buenos Aires Province Group LU1EEZ/D and LU7CAW/D will be operating from Martin Garcia Island, which is IOTA reference SA-055 from 23 to 28 February. QSL LU1EEZ direct, see QRZ.com for details and for LU7CAW you can QSL via the bureau.

G3TBK will be re-activating J88DR on St Vincent until 14 March. Operation will be on all HF Bands using CW, SSB and RTTY. Entries are planned in the RSGB Commonwealth Contest and the ARRL International DX Contests, both CW and SSB legs. QSLs as usual to G3TBK either direct or through the RSGB Bureau. Logs will be uploaded daily to Clublog.

Dennis, WA2USA plans to be active as WA2USA/4 from St George Island, which is IOTA reference NA-085, until 3 March. He will be operating on 10 to 160m using RTTY, CW and SSB. QSL via his home callsign either direct or via the bureau.

Now the contest news

On 22 February the 50MHz UK Activity Contest takes place between 2000 and 2230UTC. Using all modes on the band the exchange is signal report, serial number and locator.

Also on 22 February, the SHF UK Activity Contest takes place at the same time, 2000 to 2230UTC. Using bands between 2.3 and 10GHz and all modes, the exchange is signal report, serial number and locator.

The 80m Club Championships CW leg takes place on 24 February from 2000 to 2130UTC. The exchange is signal report and serial number.

On 25 to 27 February the CQ WW 160m SSB Contest takes place between 2200 and 2200. The exchange is signal report and CQ Zone.

The SSB leg of the REF Contest is on 26 to 27 February from 0600 to 1800UTC. Work French stations only, send a report and serial number, and expect to receive a report and a Department code (or prefix from French overseas territories). There are no separate categories for different power levels and only a few entry categories. Single-op stations can enter single- or multi-band, while multi-op stations can make a single- transmitter all-band entry only.

On 27 February the 70MHz Cumulative Contest takes place from 1000 to 1200UTC. Using all modes the exchange is Signal report, serial number and locator. And now the solar factual data for the period from the 7th to the 13th of February, compiled by Neil Clarke, G0CAS on the 14th of February.

On the 25th of October 2006 NASA launched two identical spacecraft to observe the Sun. This became known as the STEREO mission. Since then they have travelled to each side of the Sun. On the 6th of February they were separated by 180 degrees. That allowed us for the very first time to view the entire Sun. STEREO is a key addition to the fleet of space weather detection satellites and is a major breakthrough in space weather forecasting, one that as been used in compiling this report and will continue to do so.

Solar activity increased twice to moderate levels when a M1 solar flare occurred on the 9th and a M6 on the 13th. Interestingly, both these M class flares took place from different sunspot groups. The first, from region 1153 as it was rotating out of view over the west limb. The second, from a region that emerged on the solar disc on the 11th and grew rapidly in size and magnetic complexity and by the 13th had produced the M6 flare. In total 12 C class solar flares took place. Only two days saw solar activity at very low levels which were the 8th and the 11th, the remaining days activity was low. Solar flux levels increased from 82 units on the 7th to 107 by the 13th. That's the highest daily figure since the 9th of July 2005. The average was 92 units, the highest weekly average going back to December 2006. The 90 day solar flux average on the 13th was 84. That's one unit up on last week. X-ray flux levels increased from A5.6 units on the 7th to B4.4 by the 13th and the average was B1.1 units. Geomagnetic activity was quiet every day. The highest daily Ap index was only 4 units that occurred on three days. The average was Ap 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 550 kilometres per second on the 7th to 320 by the 13th. Particle densities were low throughout the period. Bz never varied more than minus and plus 7 nanoTeslas, that

is what we would expect with quiet geomagnetic activity.

And now the solar forecast. Around midweek an active region is expected to rotate back into view. As this group rotated out of sight around the 10th of February it produced several C class and a M class solar flare. Therefore, solar activity could increase later in the week. Solar flux levels could be around the high 80s later in the week. Geomagnetic activity is expected to be quiet every day. MUFs during daylight hours at equal latitudes should be around 22MHz for the south and 19MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 28MHz. The optimum working frequency with a 90 per cent success rate will be about 23MHz. The best time to try the path will be between a couple of hours either side of midday.

And that's all for this week from the propagation team.

NEWS FOR THE MIDLANDS On Sunday 20 February Welland Valley Amateur Radio Society is taking part in Thinking Day On The Air as GB0MHG. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Monday 21 February Gloucester Amateur Radio & Electronics Society is having a construction and workshop evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 21 February South Birmingham Radio Society is holding a committee meeting. Contact Don, on 0121 458 1603.

On Monday 21 February South Normanton Alfreton & District Amateur Radio Club is having a junk sale. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Monday 21 February Welland Valley Amateur Radio Society is constructing a 70cm HB9CV antenna. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Tuesday 22 February Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 22 February Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 23 February Hinckley Amateur Radio Society is having a talk on getting started with satellites by Brian Leathley-Andrew, G8GMU. Details from John, M0JAV, on 07836 731544.

On Wednesday 23 February Lincoln Short-Wave Club is having a talk on RAYNET by Alan Clarke, M0LNR. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 23 February Midland Amateur Radio Society is on the air, running training classes and having a laptop computer evening. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 23 February Telford & District Amateur Radio Society is having an illustrated talk on Pacific Ocean DXpeditions by Derek Cox, G3KHZ. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 24 February South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 25 February Coventry Amateur Radio Society has a radio workshop on HF, VHF and UHF. Contact John, G8SEQ, on 07958 777363. On Friday 25 February Nunsfield House Amateur Radio Group is discussing the RSGB Project. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 25 February South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 26 February Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND On Monday 21 February Sheffield Amateur Radio Club is having a quiz night and mini flea market. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 21 February Thornton Cleveleys Amateur Radio Society is having a Brains Trust evening. Details on the web at www.tcars.org.uk.

On Tuesday 22 February Chester & District Amateur Radio Society is conducting radio operations at Waverton Institute. Details from Barbara Green on 07957 870770.

On Tuesday 22 February Halifax & District Amateur Radio Society continues its Foundation and Intermediate training, starts developing the new UHF project and will be investigating the viability of using crystal sets to encourage youngsters to join the hobby. Contact Martin, M0GQB, on 01422 341317.

On Tuesday 22 February Otley Amateur Radio Society is having a natter night and taking part in the 50MHz UKAC. Contact Paul, 2E0PAK, on 07768 996370.

On Tuesday 22 February Wakefield & District Radio Society continues its Intermediate and Advanced courses. Contact Ken, 2E0SSQ, on 07900

563117.

On Thursday 24 February Preston Amateur Radio Society is having a talk on the UKFMGW Repeater Network by Dave and Kath Wilson. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 24 February East Yorkshire Repeater Group is holding its AGM at the Hull & District ARS. Details from Mario Brashill, G2DPA, on 07831 145244.

On Thursday 24 February Ripon & District Amateur Radio Society is looking at junk box amateur radio, sometimes described as an altogether different kind of skip. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 24 February South Manchester Radio and Computer Club is having a talk on the Atmospheric Engine by Dave, G4UGM. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 24 February Wakefield & District Radio Society is having a talk and demo on the new IRLP and Echolink node MB7IWR by Dave, G4CLI. Contact Ken, 2E0SSQ, on 07900 563117.

On Saturday 26 February Wakefield & District Radio Society continues its Intermediate and Advanced courses. Contact Ken, 2E0SSQ, on 07900 563117.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 22 February Livingston & District Amateur Radio Society has Morse Code practice. Details from Norman on 07740 946192.

On Wednesday 23 February Ayr Amateur Radio Group is having a presentation on WSPR. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Wednesday 23 February West of Scotland Amateur Radio Society is having Solder Group homebrew projects & licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 24 February Aberdeen Amateur Radio Society is having a video night. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 25 February West of Scotland Amateur Radio Society is having presentations, guest speakers, a quiz and a raffle. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Monday 21 February Braintree & District Amateur Radio Society is having a construction evening. For more information contact John, M5AJB, on 01787 460 947.

On Monday 21 February Burnham Beeches Radio Club is having a talk on the BBC by Tony, G0OVA. Contact Dave, G4XDU, on 01628 625 720.

On Monday 21 February Felixtowe & District Amateur Radio Society is holding a junk sale. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Monday 21 February Surrey Radio Contact Club is having a talk on Croydon Airport Model Flying Club by Darren Parvin, M0PRV. Contact John, G3MCX, on 020 8688 3322.

On Tuesday 22 February Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 22 February Dorking & District Radio Society is having a talk on The Radio Amateurs' Emergency Network by Alan Stuart, G3ZHB. Contact Garth, G3NPC, on 01737 359472.

On Tuesday 22 February Harwell Amateur Radio Society is having a shack activity night. Contact Malcolm, G8NRP, on 01235 524844.

On Tuesday 22 February Horndean & District Amateur Radio Club is having a talk on the Hampshire and IOW Air Ambulance. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 23 February Hastings Electronics and Radio Club is holding its AGM. Details from Gordon, on 01424 431 909. On Wednesday 23 February Havering & District Amateur Radio Club is having a talk on getting to know RadCom by its editor, Elaine Richards, G4LFM. Contact John, M0UKD, on 07817 365354.

On Wednesday 23 February Newbury & District Amateur Radio Society is having a talk on QRM by Tim, G3PJD. For more information contact Rob, G3LMW, on 01635 862737.

On Wednesday 23 February Norfolk Amateur Radio Club is having a talk on ionosondes by Steve Nichols, G0KYA. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 23 February Worthing & District Amateur Radio Club is putting GX3WOR on the air. Contact Phil, G4UDU, on 01903 816684.

On Thursday 24 February Bittern DX Group is having an informal meeting to plan the coming year. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 24 February Echelford Amateur Radio Society is having a quiz night with Neil Hilbery, G8LPA. Contact John, G4GSC, on 01784 451898.

On Thursday 24 February Edgware & District Radio Society has a round table discussion on the ideal shack, led by Steve, G0PQB. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 24 February Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564242.

On Thursday 24 February Norfolk Amateur Radio Club is taking part in the RSGB CC CW contest. Details from Chris Danby, G0DWV, on 01603

898678.

On Thursday 24 February Reading & District Amateur Radio Club is having a talk on aerial tuning units by Peter Chadwick, G3RZP. Details from Pete, G8FRC, on 01189 695 697.

On Friday 25 February Cambridge & District Amateur Radio Club is looking at how to operate the club rig. Details from Ron Huntsman, on 012233 501712.

On Friday 25 February Loughton & Epping Forest Amateur Radio Society is on the air. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Friday 25 February Mid-Sussex Amateur Radio Society is having a radio night and table top sale. Contact Peter, G4AKG, on 01444 239371.

On Friday 25 February Waterlooville Amateur Radio Club is running CW training. Details from Rich, G4IBW, on 02392 680852.

On Friday 25 February Wimbledon & District Amateur Radio Society is having a talk on military radio for the amateur by Denis, MONDJ. Contact Andrew Maish, G4ADM, on 020 8335 3434.

On Sunday 27 February Horsham Amateur Radio Club is having a morning fox hunt. Details are on the web at www.harc.org.uk.

NEWS FOR THE SOUTH WEST On Monday 21 February Appledore & District Amateur Radio Club is having a talk on modulation by Terry, G4CHD. Contact Brian Jewell, M0BRB, on 01237 473251 for more information.

On Wednesday 23 February Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 24 February South Bristol Amateur Radio Club is on the air. Details from Andrew Jenner, G7KNA, on 07838 695471.

On Thursday 24 February Swindon & District Amateur Radio Club is having a talk on the Mozambique DXpedition by Tony, G4LDL. Contact Den, M0ACM, on 07810 317750.

On Friday 25 February Torbay Amateur Radio Society is holding its AGM. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Monday 21 February Dragon Amateur Radio Club Software Defined Radio by John MW0XHO. More information from Stewart Rolfe, GW0ETF, on 07833 620733.

SARL NEWS - SUNDAY 20 FEBRUARY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

VOICE OF THE OCEAN GOES SILENT

For the past twenty six years his voice kept yachtsmen and women company as they sailed the oceans, providing them with regular weather reports and assisted those who ran into trouble. Alister Campbell, ZS5MU, went silent key on the afternoon of 14 February 2011.

Alistair's interest in marine matters started many years ago when Alistair helped a friend build a yacht. Once the yacht was completed and on the water they kept in contact via amateur radio. It wasn't long before other yachts started checking in with Alistair and the South African Maritime Mobile Net was born in October 1979.

With Davina, ZS5GC, at his side they devoted themselves tirelessly to the building up of the South African Maritime Mobile Net which is now internationally renowned and held in high regard in the yachting fraternity.

Alister believed so much in the importance of the net that he groomed Graham Griggs, ZS2ABK, and others to carry on the tradition and when his health started failing handed the reigns over to Graham.

In 2000 Alister and Davina were awarded the ICOM Excellence Award by the SARL. This award is bestowed annually by Council on the amateur who through his/her activity in the Amateur Service has brought international recognition to South Africa.

In 2005 Alister was awarded the Nokia Siemens Community Service Award by the South African Amateur Radio Development Trust, and, on the 25th anniversary of the net the SARL awarded a special certificate.

We extend our sincere condolences to Davina and his family. The couple showed South Africa and the world what real amateur radio spirit is about. Alister's voice is silent but will live on in our memories and in the memories of those whose lives he saved through his action on the daily net.

A special tribute with some historic audio clips will be broadcast on Amateur Radio TODAY this morning.

(PAUSE)

In the news today

SA AMSAT DECIDES ON THE KLETSKOUS PAYLOAD

SARL STRATEGY INDABA

LEARN TO PROGRAM IN WINDOWS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SA AMSAT DECIDES ON THE KLETSKOUS PAYLOAD

SA AMSAT this week announced that the main payload on the KLETSkous CubeSat will be a linear UV transponder with a bandwidth of 20 kHz. The UV mode which is 70 cm uplink and 2 metre downlink was chosen in line with internationally recommended practice as it will minimize interference. The aim is to have it operating over Africa without the need of an access tone to open the transponder.

A multi city team is working on the designs and will soon finalise the specifications. Fundraising for the project has started in all earnest and radio amateurs are invited to make contributions to the fund. Visit www.amsatsa.org.za for bank details and more about the KLETSkous project.

SARL STRATEGY INDABA

The SARL Council meets annually for a two-day strategic session ahead of the National Convention to plan for the year ahead. These plans are then presented at the Annual General Meeting which this year will be held on 15 and 16 April at the Vaal University of Technology. This is the only time that councillors meet face to face as all other council meetings are held via teleconference.

Members are invited to make input to the strategic indaba by submitting suggestions of what they would like the SARL to plan for the coming year or issues which they feel require attention. Send your input to armi@sarl.org.za before 28 February 2011.

LEARN TO PROGRAM IN WINDOWS

Learning to program in Windows is a new SARL course presented by John Willescroft, ZS6EF. Learn how to produce your own applications in Windows to run peripherals from an USB port. The course includes an USB

interface that will switch relays and read push buttons and voltages. Design your own shack control program with stand-alone applications. Your very own EXE files.

The first course will be presented in Cape Town on Saturday 19 March 2011. There is a substantial discount for SARL members. Full details and a booking form can be found on www.sarl.org.za and select RTA.

SA AMSAT SPACE SYMPOSIUM

The 2011 SA AMSAT space symposium will be presented in at the Talk100 Auditorium at Vodaworld in Midrand on 2 April. The date was changed by one week to avoid building operations at Vodaworld. Book now and benefit from the early bird rate. Find full details on www.amsatsa.org.za. It the symposium you do not want to miss.

DIGIMODE ACTIVITY IN THE 40 m CW SEGMENT

At WRC03, the ITU allocated frequency segment 7 100 - 7 200 kHz to the Amateur Service in Region 1. This extension of the 40 m band allowed IARU Region 1 to modify the Region 1 band plan. These changes became effective on 29 March 2009. Some of these changes include extension of the exclusive CW segment by 5 kHz, and is now 7 000 - 7 040 kHz; the segment for Narrow Band Modes (Digimodes) with a maximum bandwidth of 500 Hz was extended by 5 kHz (doubled) and moved to 7 040 - 7 050 kHz and the segment for All Modes (Digimodes) with a maximum bandwidth of 2 700 Hz was extended by 7 kHz and moved to 7 050 - 7 060 kHz.

Although the separation of the segments is by frequencies that are easy to remember (7 040, 7 050, 7 060 kHz), there is still a lot of PSK31 activity around 7 037 kHz. Radio amateurs are requested to adhere to the guidelines as stipulated in the IARU Region 1 HF Band Plan.

ARISSAT-1 DEPLOYMENT DELAYED UNTIL JULY

The launch from the International Space Station of ARISSAT-1 has been delayed till July.

On Thursday, 10 February Energia decided to have the crew do a checkout of ARISSAT One to make certain that it had survived the trip up on board the re-supply cargo flight that had carried it to its temporary home on the ISS. This test was not an event that was previously scheduled and there was no public announcement made of it. Instead, a message was sent to the ISS crew to connect ARISSAT-1 to one of the external amateur radio antennas, to turn it on and listen to it on the Kenwood dual-bander normally used for ARISS school contacts. During the test, Energia decided to keep the ARISSAT transmitter on through to the next day after which the crew reported back that the satellite was functioning flawlessly and it was ready to go off into space on its own.

On Friday, 11 February Energia management announced that the deployment of the ARISSAT One satellite had been removed from the schedule of

events for E-V-A 28. This, Energia SAID, was due to changes in the tasks associated with the work scheduled to be performed during this spacewalk. Subsequently, Energia informed NASA that deployment of ARISSAT One will be added to EVA number 29. Its currently scheduled for sometime this coming July.

The good news in all this is that ARISSAT One will likely work exactly as it was designed to, once deployed in-orbit. Amateurs on the ground who heard ARISSAT One during the test period said its signal was definitely loud and clear.

CONTEST NEWS

The first SARL Digital Contest will be on the air next Sunday, 27 February from 13:00 to 16:00 UTC. The SARL Hamnet 40 Metre Simulated Emergency Contest will be run on Sunday 6 March from 12:00 to 14:00 UTC.

The rules for both these contests can be found in the 2011 SARL Contest Manual, the rules will also be included in the next issue of the HF Happenings newsletter.

Log sheets for the SARL National Field Day must be submitted by midnight on Monday 21 February 2011 to zs4bfn@netactive.co.za or by normal mail to Box 12104, Brandhof, 9324.

CLUB NEWS

The Overberg Amateur Radio Club held their AGM at the field station on 12/2 at Stanford. The following committee was chosen. Chairman - Andre Meintjes - ZS1AZ Vice chairman - Sam McLeary - ZS1OR Secretary - Judy Gardener - ZS1JEG Treasurer - John Martin - ZS1DI Technical _ Len van Riell - ZS1LEN

ZS6PTA FLEA MARKET AND BOOT SALE IN PRETORIA

The Pretoria Amateur Radio Club will be hosting their next flea market and boot sale on Saturday 5 March. The fleamarket will be held at the Pretoria Motor Club facilities in Keunig street Silverton. The starting time is 08:00.

Everyone is welcome to attend. Come and visit the Mega Fleamarket in Pretoria. Phone Almero, ZS6LDP, on 083 938 8955 if you want to book a table or if you need more details about the flea market.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, can at last report that the solar activity has increased from low to moderate levels, as the biggest solar flare since December 2006 was produced by Sunspot 1 158. Sunspot 1 158 remains very large as it heads towards the western limb and a new sunspot is also forming just to the north of Sunspot 1 161. The effective sunspot number is expected to be around 50 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be good towards Europe on 15 m, later to be followed by fair 20 m openings. Fair 15 m contacts with the USA are possible during the evenings. Contacts with Australia are possible on 20 m after sunset. 15 and especially 20 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises. With the increase in solar activity 10 m may also come alive from time to time.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the workhorse for contacts around the country with 20 and 30-m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

21 February - Due date for the SARL field day logs to zs4bfn@netactive.co.za or Box 12104, Brandhof, 9324. 25 February - Logs for AWA CW Activity day to be in to Andy, ZSADY. 27 February - First SARL Digital Contest for 2011 from 13:00 to 16:00 UTC on 80, 40 and 20 metres. 28 February - Offers to host a station at Sun City during IARU Region 1 conference to be in to iaru2011@sarl.org.za. 28 February - Due date for inputs for SARL Strategic Indaba to armi@armi.sarl.org. 5 March - ZS6PTA Flea Market at POMC Club house in Keunig St, Silverton from 08:00. 6 March - SARL Hamnet 40 Metre Simulated Emergency Contest will be run from 12:00 to 14:00 UTC. 19 March - RTA, Programming in Windows course in Cape Town, book at www.sarl.org.za. 25 March - SAiSAT briefing session at the NARC. 2 April - SA AMSAT, book at www.amsatsa.org.za. Space Simposium at Vodaworld,

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73.

Please think of the environment before printing this e-mail
****

>From The Business Manager ZL2DL
Debby says...
Last weekend a special edition of HQ Info Line was sent out as I appeared to be receiving a considerable number of e-mails and phone calls regarding envelopes for voting.

If you have been unable to find yours included in the last issue of Break In, please send your vote in an envelope marked "Returning Officer", then INTO another envelope, to the address of HQ, but include your name and address details on the reverse of the outer envelope so I can confirm your membership status before it is opened.

Only envelopes were missing - all voting papers were issued.

For those of you who have included your Break In Readers Survey form in the election envelope, I have forwarded them to John Walker, however cannot guarantee they will be placed into the lucky prize draw.

The address to send these surveys to is on the survey form in bold lettering at the bottom.

Finally, Datamail did not include Branch details and Membership Expiration dates on the front wrapper. You will ONLY have received Break In if your membership is current to the end of 2011. Therefore you don't need to confirm if you are financial.

Talk soon...Debby ZL2DL

FMTAG Notes For February 20 HQ Infoline
Please click HERE to go to the FMTAG Applications Being Processed

Proposals
Published in HQ Infoline and on the NZART website, inviting comments from members.

1.. Branch 83 Raglan has applied for a 2 metre Voice and Data repeater at Ward Street, Topo50 map reference BD33 007.88 154.66. The transmit frequency will be 145.350 MHz and the receive frequency will be 144.750 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.

2.. Branch 83 Raglan has applied for a 70 centimetre Voice and Data repeater at Ward Street, Topo50 map reference BD33 007.88 154.66. The transmit frequency will be 439.425 MHz and the receive frequency will be 434.425 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.

Comments and Applications
Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to:
fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:
http://www.nzart.org.nz/nzart/fmtag/

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

END

****

Report - Face to Face Meeting
>From the NZART Council meeting held at Wellington Airport 19th February 2011
1.. Council decided to seek legal opinion on the compliance of the Wellington VHF Group Constitution and the REG constitution with the NZART Constitution. These will be forwarded to Malcolm Webster, Solicitor, for his opinion.

2.. The Draft Annual Accounts were approved and Evan was thanked for the work he had done. Evan suggested that the Constitution requires an update in order for NZART to gain charitable status and save paying considerable tax. There is a need to update the NZART Constitution and ways to do this are being considered.

3.. An application for branch status was received from the Radio Electronics Group. It was decided that the following branches be contacted to seek their opinions on the formation of Radio Electronics Group Branch status and if this formation would adversely affect them (as per the NZART Constitution requirement). Responses to be received by Council by end of April: Cambridge, Te Awamutu, Huntly, Hamilton, Raglan, Waitomo, Waikato VHF Group.

4.. 13 remits for the AGM in June were received. These were classified into their various categories: Constitutional, Transmitting, and Non-Transmitting. These remits, along with Annual Reports, will be published in the next issue of Break-In.

5.. Jamie Pye ZL2NN and Jim Tittsler ZL2IA were appointed joint moderators of the NZART members' reflector.

6.. Council was addressed by Dick Greenbank, ZL2TGQ, of ARTANZ who explained their aims and objects. A decision was made not to support ARTANZ at this stage because there were remits to be decided at the AGM which would make this decision.

7.. Debby ZL2DL gave council a report on the arrangements for the 2011 Conference to be held in Silverstream. Everything looks good for this event.

8.. Topsy ZL2LS gave a report on the progress being made for the 2012 Conference to be held in Nelson.

9.. Rugby World Cup: NZART ALO, Don Wallace ZL2TTL, reported the following (approved by RSM): To promote the Rugby World Cup, New Zealand Amateur Radio operators are encouraged to use the ZM callsign prefix during September and October 2011. For more information, visit the RWC website at http://www.rugbyworldcup.com/ and the NZART website at http://www.nzart.org.nz/

Spectrum Management Bill Threatens - 70 cm - ARRL Report
02/17/2011 (mm/dd/yyyy)

.....The D-Block consists of two, 5-megahertz-wide segments of spectrum (758-763 and 788-793 MHz) that became available when the FCC ended analog television broadcasts in June 2009 and reallocated the 698-806 MHz band for Public Safety and commercial broadband. It was anticipated that the D-Block would be auctioned for commercial use. There are several bills in Congress providing for the allocation of the D-Block for Public Safety use, and HR 607 is one of those. But HR 607 uniquely provides for the reallocation of other spectrum for auction to commercial users, in order to offset the loss of revenue that would occur as the result of the allocation of the D-Block to Public Safety instead of commercial auction. HR 607 lists the paired bands of 420-440 MHz and 450-470 MHz among the bands to be reallocated for commercial auction within 10 years of its passage.....

Proposed Changes to 27 MHz Amateur Band
This topic has been a subject in a special Infoline but is repeated here for information EDITOR

It has just come to our notice that changes being proposed by the Radio Spectrum Policy and Planning group to the CB licence (see
http://www.rsm.govt.nz/cms/pdf-library/policy-and-planning/current-projects/cb-discussion-paper-gul-2010.pdf)
will, if approved, give CB radio users access to our 26.95 to 27.3 MHz Amateur Band. (There are also changes planned at UHF but these do not appear to affect Amateurs.)

NZART ALO, Don Wallace, ZL2TLL

NZART Conference 2011
Queen's Birthday Weekend June-3/6-2011
Upper Hutt Branch 63 NZART cordially invite NZART Members and their guests to join us at the - Upper Hutt NZART Conference 2011.

Venue
This year's Conference is being held at the Silverstream Retreat which is located near the Upper Hutt suburb of Silverstream and just north of the entrance to Stokes Valley.

It is easily accessible from the nearby State Highway 2 and State Highway 58 (Hayward's Road).

Physical address is:
Silverstream Retreat, Corner Eastern Hutt Rd & Reynolds Bach Drive Lower Hutt 5019

Provisional Programme
The program will include lectures and forums by several guest speakers, the NZART AGM plus the usual AREC, AMSAT-ZL, OTC, SPAM, WARO, and other section meetings, forums and AGMs. An exciting range of other talks and displays has

been organised.

Registration Costs and Accommodation
Final costs for both Conference Registration and Accommodation are almost complete, and will be available from 10 March 2011.

Pictures of Silverstream Retreat main reception (left) and the Boardwalk (right). The Boardwalk is directly opposite the main reception at the venue. The Boardwalk will be the Conferences' main hub of Registration, gathering point and entrance for the NZART AGM on the Saturday.

Branch Data - The Information on NZART Branches and Affiliates
The format for advising the Call Book Editor about changes to Branch details has been changed to a more efficient CMS based system.

Please use the new form
http://www.nzart.org.nz/branches/branch-data/branch-list-report-form/
to advise changes to Branch details.

An update to the Branch list will be done early March and the old system of spreadsheet, Word document and pdf removed.

The new system has a menu 'BRANCH LIST MENU' and a simple database 'BRANCH LIST DATA'. The Branch List menu has a list of all NZART branches in alphabetical and branch number order. Branch List Data has 88 records with each record having 19 fields with the details of each branch.

For those that like their data in Excel format, instructions on how to convert the branch data is at:
http://www.nzart.org.nz/branches/branch-data/#conversion

NASA's First Solar Sail NanoSail-D Deploys in Low-Earth Orbit
21-JAN-2011

HUNTSVILLE, Ala. ï¿½ Friday, Jan. 21 at 10 a.m. EST, engineers at NASA's Marshall Space Flight Center in Huntsville, Ala., confirmed that the NanoSail-D nanosatellite deployed its 100-square-foot polymer sail in low-Earth orbit and is operating as planned. Actual deployment occurred on Jan. 20 at 10 p.m. EST and was confirmed today with beacon packets data received from NanoSail-D and additional ground-based satellite tracking assets. In addition, the NanoSail-D orbital parameter data set shows an appropriate change which is consistent with sail deployment...more info at:
http://www.nasa.gov/mission_pages/smallsats/11-010.html

Note frequency of its transmissions: 437.270 MHz

Kiwi Digital Modes Group
2011 VK/ZL RTTY SPRINT CONTEST
The third running of the Kiwi Digital Modes Group RTTY contest will take
place in April 2011.

PLEASE NOTE: These rules differ from previous years.

This year's contest format see's a change in the points system and operating periods. To make life that more interesting and to hopefully generate a bit more interest in the contest this year I have decided to break each nights operation in to two half hour periods. I have also changed the points system with 2 points being awarded for each contact worked in the first half hour period, and five points being awarded if the same station is worked in the second half hour period.

This contest will take the format of two half hour period sprints run over two consecutive Saturdays. The first night will be on 80 metres and the second night will be on 40 metres.

The contest is open to all licensed amateur radio operators living in the VK & ZL callsign districts.

DATES & TIMES
Saturday April 23rd 2011 - 1000 UTC - 1100 UTC, in two half hour periods (1000 - 1030 UTC) & (1031 - 1100UTC) - 80M only

Saturday April 30th 2011 - 1000 UTC - 1100 UTC, in two half hour periods (1000 - 1030 UTC) & (1031 - 1100 UTC) - 40M only

Operators can choose to enter one of the following three categories:

* 80 Metres Only.
* 40 Metres Only.
* 80 Metres / 40 Metres Combined.

Certificates will be issued for the following categories:

1.. * 80M ONLY: The top three scores from VK & the top three scores from ZL.

2.. * 40M ONLY: The top three scores from VK & the top three scores from ZL.

3.. * 80M / 40M COMBINED: The top three scores overall, irrespective of which country the contestant has entered from. In other words, there will not be separate certificates issued for the top three from each country as is the case in the 80M & 40M only categories. This will hopefully encourage more operators to partake in both nights operations.

The points system is as follows:

1.. * For the first half hour period of operation, 2 points for each station contacted.

2.. * For the second half hour period of operation, 2 points for each station worked, with a bonus of 3 points if the same station was worked in the first half hour period making for a total of 5 points available if achieved.

3.. * When changing from the first operating period to the second operating period, operators are not allowed to work the same station

consecutively. That is, if ZL2SKY works ZL2AUB as his last contact in the first operating period, he must work a different station first in the second operating period before working ZL2AUB again.

Log Sheets are to contain the following:

1.. * Callsign of station worked.

2.. * Time.

3.. * Signal Report Sent & Received.

4.. * Points Claimed for Each Contact.

A separate Log Sheet is required for each night of the contest with the operating band and date specified. In addition, a separate summary sheet advising what category is being entered into along with the operators Name, Address, Callsign and a declaration that all good amateur radio operating practises have been observed for the duration of the contest.

Logs are to be received by the organizer no later than Sunday the 22nd of May 2011.

Logs can be sent electronically to: zl2sky@zl2ko.org.nz

Alternatively they can be posted to:
KDMG RTTY CONTEST
365 High Street
Dannevirke 4930
New Zealand

Further information may be obtained by contacting the organizer at either of the addresses given above, or check out the Kiwi Digital Modes Group website at:
http://www.qsl.net/zl2sky/new_page_1.htm

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, W3HNK, N4AA & QRZ DX, KH6BZF, N6PSE, K8GI, K8YSE, W8GEX (60m News), AT International, CX3AN, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DX-World.Net, EA1EJ, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, IK7JWY, JR3TVH, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and VU2GMN for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th/February, through Sunday, 20th/February there were 210 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VP2E, VP2M, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

8P, BARBADOS. Yuri, VE3DZ, will continue to be active as 8P9AA until February 22nd. Activity will be on all HF bands using CW, SSB and RTTY. He was active this past weekend during the ARRL DX CW Contest using the callsign 8P3A. QSL both callsigns via his home callsign.

8th AAW. Just a reminder that the 8th "Antarctic Activity Week" (AAW) takes place this week from February 21-27th. Look for several special event stations (some with the AAW suffix) to be active. Many will have WAP reference numbers which are good for the Worldwide Antarctic Program (WAP). For more details and a list of stations to be active, visit the Web site at: http://www.waponline.it

BV100, TAIWAN. Members of the Republic of China (Taiwan) Centenary Foundation will be activating special event station BV100 during the CQ WW WPX SSB Contest (March 26-27th) from Shaio-Liu-Chiu Island (BV9, AS-155) as a Multi-? entry. This special event is to celebrate the 100th anniversary of the Republic of China (Taiwan). Look for it to be active throughout the year until the end of the year. Operations will be on all bands and modes. Complete details on a operating schedule and how to earn a BV100 award is available at: http://www.bv100.tw/EN
QSL via BV2KI at: Bruce Yih, P.O.Box 84-609 Taipei, Taiwan 100
ADDED NOTE: Operators mentioned for the CQ WW WPX SSB Contest are BM2AAV, BU2AT, BV2DD, BV2KI, BV2KS, BV2NT, BX2AB and BX9AAA.

CN, MOROCCO. Members of the UA2 Contest Club will be active as CN2FF during the CQ 160-Meter SSB Contest (February 27-28th) as Multi-Op entry. The operators mentioned are Dmitry/RN2FA (CN2FA), Andy/UA2FB (CN2FB) and Vladimir/UA2FF (CN2FF). Look for some activity before the contest by the operators. QSL CN2FF via DK4VW (direct) or via the UA2 QSL Bureau (http://qrz.ru/qsl/, English version for 2F's address is also there). DK4VW's address is: Ulrich Mueller, Kreutzacker 13, D-35041 Marburg, Germany.

D4, CAPE VERDE. Massimo, IZ4DPV, will be active as D4C from Vicente Island (AF-086) during the CQ 160m SSB Contest (February 25-27th) as a Single-Op entry. QSL only direct via IZ4DPV or by the Bureau to CT1ESV.

DA2, GERMANY (Special Event). Martin, IK2RMZ/DL1GBZ , will be in Germany during the last week in February, and is expected to use the special callsign DA2MORSE which is assigned to the FMC (Friends of Samuel Morse Club). He is a FMC member (#853). Martin states that he should be on air on 80m during the evening hours. This special callsign is expected to be activated by several different operators from several different locations throughout 2011. Operators and locations mentioned are:
Heinz/DF4BV - B2MORSE

ED1, SPAIN. A Spanish group from Ponferrada-Leon (Northwest Spain), in the Province of Leon, will use the special callsign ED1L during the CQWW

160M SSB Contest (February 25-27th). QSL via EA1EJ. This group has participated in the past as AO1L during the past two years.

ED9, CEUTA AND MELILLA. A group of Spanish operators will be active as ED9NA during the CQ 160m SSB Contest (February 25-27th). QSL via EA9GW (QRZ.com). Operators mentioned are: Jose/EA9CD, Manuel/EA9BW, Jose/EA9PY, Mariano/EA9LS, Pablo/EA9AZ, Enrique/EA9GW and Pedro/EA9PD.

EL, LIBERIA. The next DXpedition by the I2YSB team will take place from Liberia between March 31st and April 13th. The callsign will be announced at a later date. The team will consists of Silvano/I2YSB, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA and Stefano/IK2HKT. The pilot station will be Art/IK7JWY. The group plans to use 3 stations for the HF bands and one other for the 50 MHz band (w/beacon and cubical quad antenna). Activity will be on 80-6 meters using CW, SSB and RTTY. An online log will be provided by IH9GPI. QSL via I2YSB. The official Web site is at: http://www.i2ysb.com
Official forum (for any comment, suggestion or to contact the pilot) is available at: http://www.hamradioweb.org/forums

GJ, JERSEY. Russell, G5XW, will be active as GJ5XW from the Isle of Jersey (EU-013, WLOTA 0818) between March 24-38th. Activity will be on the HF bands but will also include the CQWW WPX SSB Contest (March 26-27th). QSL via G5XW, direct only (QRZ.com).

IOTA NEWS.....
AF-093. Laci, HA0NAR, now active as J5NAR, hopes to activate Guinea-Bissau's Coastal Region Group beginning Monday, February 21st. Watch the IOTA frequencies. Length of stay is not known. QSL via his home callsign (see QRZ.com for details).

AS-049. Take, JI3DST, will be active as JI3DST/JI6 from Kuchino-shima, Tokara Archipelago (Kagoshima-Pref; located in JA6 area; takes 20 hours by ship to reach), between March 11-20th. Operations will be on 160-6 meters using CW, SSB, FM, RTTY and PSK31. QSL JI3DST/JI6 via JI3DST by the Bureau. PLEASE NOTE: His activity will be from two different locations on either side of a volcanic edge to benefit different regions:
QTH 1 - For NA, SA, JA and other areas on 40-6m, between 2300-0300z and 0400-0600z.
QTH 2 - For EU, AF, JA and other areas on 160-6m between 0800-2200z.

EU-001. Members of the "DX Plus" Hellenic Amateur Radio Team will be active as SX5F from the Farmakonisi Rocky Islet between May 14-22nd. Operators mentioned are Theodoros/SV1GRM, Sotirios/SV1HER, George/SV1RP, Spiros/SV1RC, George/SV1QN, Giannis/SV1GYG and Takis/SV2FWV. Activity will be on all HF bands using CW, SSB and the Digital modes. QSL via the RAAG Bureau. For more details, see Web site at: http://www.qrz.com/db/SX5F

EU-029. Operators Ben/DO1BEN and Barbara/DO1IQ will be active as OZ/homecall from Lolland Island (DIA SJ-015, WLOTA 2773) between April 22-29th. Activity will be on 80-10 meters using SSB and some Digital modes (PSK31/RTTY). QSL via their home callsigns, by the Bureau or direct. For update, visit the Web site at: http://www.do1ben.de

EU-038. Operators Ben/DO1BEN and Barbara/DO1IQ will once again be active as PD/homecalls from De Cocksdorp, Texel Island (WLOTA 0043) between August 22-28th. Activity will be holiday style on 80-10 meters using SSB and some Digital modes (PSK31/RTTY). QSL via their home callsigns, by the Bureau or direct. For update, visit the Web site at: http://www.do1ben.de

EU-069. Members of the "DXciting Group" will be active as EG5CI from Columbretes Island (DIE E-205, ARLHS SPA-180, EAFF-138 and DME 12040) between April 7-10th. Operators mentioned are Enrique/EA5EOR (Team Leader/SSB), Jose/EA5DTV (Co-leader/SSB), Raul/EA5KA (CW/SSB) and Joan/EA3GHZ (CW/SSB). QSLs will all be sent via the Bureau. Direct QSL are from EA5EOR. For more details, visit their Web page at: http://www.dxciting.com

EU-120. Operators Kevan/2E0WMG and Jonathan/G0DVJ will be active from Lundy Island (English Coastal Islands) between March 21-26th. Activity will be on all HF bands 80-10 meters. G0DVJ will be on CW/SSB, while 2E0WMG will be on SSB only. QSL details on QRZ.com.

EU-123. Members of Camb-Hams will be active as GS3PYE/p and GS6PYE/p from the Isle of Arran (IOSA CL01, SCOTIA CS14) between May 1-8th. The group will be renting a cottage on the westside of the island near Balliekine (WW Loc. IO75HO). Operators mentioned are Bob/G1SAA, Terry/G3VFC, Martin/G3ZAY, Colin/G4ERO, Colin/G8TMV, Mark/M0MJH, Rob/M0VFC, Steve/M1ACB and Gavin/M1BXF. Activity will be on most HF bands using SSB, Digital and some CW. Activity on VHF will be on 6m and 4m SSB/Digital (JT6m) and being a little more south than Harris Island (EU-010) they will again activate 2m both SSB/Digital (FSK441). If they have time, they will also be active on 2m and 70cm satellites. QSL both callsigns to M0VFC, direct or by the Bureau. Visit the club's Web site at: http://dx.camb-hams.com

EU-123. Members of the Macclesfield and District Amateur Radio Society will be active the Isle of Arran (IOSA CL01, SCOTIA CS14) between April 2-7th. Callsign was not provided. Operators mentioned are Adrian/M0PAI, Alan/G0JNJ, Keith/G3VKF and Arthur/2E0CBI. Activity will be on most HF bands and modes. QSL via M0PAI, direct or by the Bureau. More details will be available on the club's Web site at: http://gx4mws.com

NA-066. Members of the Palos Verdes ARC will be active as K6PV from Santa Catalina Island (USI CA016S, WLOTA 2912, Los Angeles County, CA) between February 24-27th. Operators mentioned are

Ray/N6HE, Jeff/K6JW, Joe/NZ6L and Bob/AB6SY. They will have
two stations on the air with simple dipole antennas. Check
the usual IOTA frequencies. On 40 meter SSB try around 7260
kHz. For possible skeds, E-mail Ray/N6HE at: rayday@cox.net.
QSL via K6PV (QRZ.com).

NA-089. Operators Dave/AH6HY and Mike/AB5EB will active as AH6HY/W5
and AB5EB/P from the Louisiana State East (St. Bernard Parish)
IOTA Group between April 16-17th. Activity will be on CW and
SSB, probably on the IOTA frequencies. Operators will use
monoband verticals with a small amp. QSL via their home
callsigns.

OC-138. (Update) Craig, VK4LDX, will be active as VK4LDX/P from Horn
Island between March 10-14th. Activity was orginally going
to be holiday style, but now it is a full time DXpedition.
Craig plans to operate 18 hours per day. Operation will
start at/around 0800z, March 10th. He will use a 40m dipole,
Butternut HF9V vertical and a Spiderbeam 20/15/10m tri-bander.
Modes will be on SSB, PSK31 and RTTY (he doesn't do CW). QSL
via his home callsign, direct or by the Bureau. He does not
use eQSL or LoTW. ADDED NOTE: This IOTA has only been claimed
by 19.5% of participants, it was last activated in 2007 for 2
days and prior to that for two days in 2002.

SA-071. Members of the Cantareira DX Group, with support from LABRE-SP,
is currently awaiting for the release from the Brazilian Navy
to activate stations from Moela Island. The group plans to
operate in the South American Lighthouse Weekend (SALW 2011),
February 25-27th. The ANATEL (Brazilian Government) has issued
the callsign for this operation PR2M.

KH6BZF PROPAGATION FORECAST/REPORT (For February 21-27th)....
Feb 21 AN SOLAR REFERENCE KEYS
Feb 22 AN --------------------
Feb 23 AN BN - Below Normal
Feb 24 AN AN - Above Normal/Geomagnetic Level is QUIET
Feb 25 AN LN - Low Normal
Feb 26 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Feb 27 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

PJ2, CURACAO (Update). Operators Don/W5FKX, Jim/N5HZ, Dave/W5XU and
Mike/W5ZPA (all members of the Delta DX Association) will be active as
PJ2/homecall from the Signal Point Station (PJ2T) on Curacao (SA-099,

WLOTA LH-0942) between March 10-17th. Activity will be on all bands,
160-10 meters, depending upon propagation conditions and using all modes
(CW, SSB, RTTY/PSK). All QSLs for this should be sent via the individual
operator's home callsign, direct or by the Bureau. It is expected that
logs will be uploaded to LoTW after the operation. For updates, pictures
and an online log search, visit:
http://www.deltadx.net/Activities/PJ2/PJ2-DDXA.htm

PJ4, BONAIRE. Bert, CX3AN, will be making a trip to Bonaire (SA-006,
WLOTA L1279), hosted by Peter, PJ4NX, between February 20th and March
1st. As of press time, his callsign is unknown and will be announced
upon his arrival. Activity will only take place during his spare time.
QSL via his home callsign.

PJ7, SINT MAARTEN. Bil/W8EB and his wife Dorothy/W8DVC will once again
be here between February 21st and March 19th. Activity will be on 160-10
meters, CW, SSB, RTTY and PSK31 as PJ7/W8EB and possibly PJ7/W8DVC.
Operations will be limited because he is on holiday. Bil will operate in
the ARRL DX SSB Contest (March 5-6th) as PJ7B, and as a Single-Op/All-Band/
Low-Power entry. This will be Bil's 16th consecutive ARRL DX SSB Contest
participation from St. Maarten. Also look for him to be in any RTTY
contests. All QSL requests go to W8EB. Visit their PJ7B Web site at:
http://www.qsl.net/pj7b

PJ7, SINT MAARTEN (Update to OPDX.998). The PJ7X team is pleased to
announce that their DXpedition to Sint Maarten (NA-105), which takes
place between October 25th and November 8th and is one of the newest
DXCC entities, now has a Web page at: http://www.pj7-2011.org
Web page lists suggested frequencies, details about operators, updates
and QSL info.

ST0, SOUTHERN SUDAN (Press Release #2): "DXpedition to Southern Sudan --
The Intrepid-DX Group and the DX Friends have assembled an outstanding team of operators to activate the new country of Southern Sudan to take place on or after July 9th, 2011.
The Intrepid-DX Group is the group which brought you the 2010 YI9PSE, IRAQ DXpedition. The DX Friends have brought you the 2006 S01R DXpedition to Western Sahara, the 2008 DXpedition to Rwanda as 9X0R, the 2009 DX-pedition to Western Sahara as S04R, the 2010 DXpedition to Palestine as E4X and the 2010 DXpedition to San Marino as T70A.
The DX Friends and The Intrepid-DX Group continue to move forward in our planning with representatives of the new Southern Sudan Government and the ITU/IARU. Our official website is now active at:
http://www.dxfriends.com/SouthernSudan2011
At this time, we are not seeking donations or support until we have an official operating permit/license in hand. We will provide an additional Press Release-Update at that time.
Thank you,
The Intrepid-DX Group and The DX Friends.
http://www.dxfriends.com/
http://www.intrepid-dx.com/ "
ADDED NOTES: Look over the new Web page, the ST0 team is composed of the following operators:
Dave/K3LP (Co-Leader) Antonio/EA5RM (Co-Leader)
Paul/N6PSE (Co-Leader) Roberto/EA2RY
Hrane/YT1AD Manolo/EA7AJR
Krassy/K1LZ Jose/EA7KW
Bob/N6OX Flo/F5CWU
Jun/JH4RHF Bernard/F9IE
Dmitri/RA9USU Fabrizio/IN3ZNR
Al/K3VN Valery/UT7CR
Bill/N2WB
Dave/AH6HY

The Pilots: Chuck/AA6G - USA Pilot
Toshi/JA1ELY - JA Pilot
Col/MM0NDX - EU Pilot

SV9, CRETE. Operator Claude/HB9CRX and his XYL Doris will be on holiday in Kissamos between July 11-27th. Claude will sign SV9/HB9CRX and will be active on 30/20/17/15/12/10 meters CW and QRP. QSL via his home callsign when he returns back home.

TJ, CAMEROON (Update). The international team composed of members of the Provins ARC (F6KOP) are now QRT as TJ9PF from Kribi as of about 1200z, February 20th. The team worked 67611 QSOs with 19383 unique callsigns. The breakdown is: 26198/CW, 23996/SSB and 17416/RTTY. Yann, F1NGP, has uploaded the complete logbook on the Club_log Web page at: http://www.clublog.org/charts/?c&#65533;9PF&a&#65533;bed
The corrections to be made will be considered when Yann returns back home. Visit the TJ9PF Web page at: http://www.tj9pf.fr

V2, ANTIGUA. Operators Babs/DL7AFS and Lot/DJ7ZG will once again be active as V21ZG from Antigua (NA-100) between now and throughout March. Activity will be on 80-6 meters with operations mainly on RTTY, PSK and SSB. They plan to look for JA stations and QRP stations. QSL via DL7AFS.

VK9C, COCOS KEELING ISLANDS (Update/Reminder). Operators Phil/G3SWH and Jim/G3RTE will be active from West Island in the Cocos (Keeling) Islands between February 22nd and March 5th. The Cocos (Keeling) Islands count as OC-003 for IOTA purposes. The 2010 "Most Wanted" survey by the DX Magazine shows the Cocos (Keeling) Islands at #76 worldwide for DXCC purposes. Both operators will use the single callsign of VK9C/G6AY. Their activity will be on CW only on all bands 80-10 meters. There will be no 160, 6 meters or EME activity. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many different bands as possible and plan to make at least 15,000 QSOs. QSL via G3SWH, either direct with SAE and adequate return postage (recommended), via Phil's web site for a bureau reply or via the Bureau. This will be a very expensive DXpedition. They are happy to meet the costs of transport to and from the islands, but are seeking sponsorship and donations from individuals, DX clubs and organizations towards their living expenses on the island, printing QSLs and the like. There is more information at: http://www.g3swh.org.uk/vk9c-g6ay.html

VP2M, MONTSERRAT. Philip, WA1ZAM, will be here between March 1-8th. Callsign is not known yet. Activity will be on the HF bands and he plans to be in the ARRL DX SSB Contest (March 6-7th). Also, look for possible activity before and after the contest. QSL via his home callsign.

VU4, ANDAMAN ISLANDS (Update). Members of the Amateur Radio Society of India (ARSI) plan to be active as VU4PB from Port Blair, between March 15-31st. Operators mentioned are Ananth/VU2PAI, Aravind/VU2ABS, Basappa/VU2NXM, Chetan/VU3DMP, Deepak/VU2CDP, Gopal/VU2GMN (Team Leader), Govind/VU2GGM, Ramesh/VU2LU, Devadas/VU2DH, Krishna/VU2VKU, Prasad/VU2PTT, Ramachandra/VU2RCT, Ramachandra/VU2RCR, Rohit/VU2RDQ, Sanjay/VU2SJD,

Suhas/VU2SMN and Vishnumoorthy/VU2MTT. Activity will be on all HF bands using CW, SSB and RTTY; exploring 6m EME operations. They will have 4 stations on the air using the following equipment: Two Kenwood TS-2000, Two ICOM 756 Pro, Elecraft K3, Yaesu FT 847, Kenwood TS-950, Two Spider beams, SteppIR 3-element Yagi, SteppIR Big IR vertical, Wire and vertical antennas for the lower band operations, 18m Spider poles for Low band antennas, Force12 C3S Yagi, Yaesu Quadra VL1000 Amp, Kenwood TL-922 Amp, Yaesu FL2000 Amp, Ameritron ALS-500 Amp and Ameriton AL-811H Amp. QSL Manager will be W3HNK. A Web page will be available soon at: http://www.arsi.info/VU4PB

XU7, CAMBODIA. Nob, JA1FMZ, will be active once again as XU7FMZ from Cambodia between March 2-28th. This is his 9th trip/visit to Cambodia. Activity will be holiday style on 20-10 meters using only SSB. He plans to be in the ARRL DX SSB Contest (March 5-6th) and the CQWW WPX SSB Contest (March 26-27th) as a Single-Op/Single-Band (??) entry. QSL via JA1FMZ, direct, e-QSL or LoTW (see QRZ.com for details). Visit his Blog page at: http://DXvacation.com

XU7, CAMBODIA (Also 3W). Hiroo, JA2EZD, will be active as XU7SSB from Sihanoukville on two separate trips to Cambodia. Look for him this week between February 21-28th and a again between March 8-15th. QSL via his Laos address (see QRZ.com info). During his second visit, he is expected to team up with Nob/XU7FMZ and XU7NPC. Activity will probably be on all HF bands. ADDED NOTE: Hiroo, JA2EZD, will also visit Ho Chi Minh, Vietnam, in between his two visits to Cambodia between March 1-7th. He plans to be active as 3W6LI on the HF bands. Also QSL via his Laos address (see QRZ.com info).

Request for Return of IRTS Trophies and Cups

It is time once again to recall all trophies presented at the 2010 IRTS, AGM held in Dundalk.

Trophies and Cups can be returned to the IRTS Stand at the Phoenix Radio Club Rally in Coolmine on Sunday February 20th 2011 or to any IRTS Committee Member before end of February 2011.

This will allow for any engraving to be done, or to allow any repairs as needed.

Early return will be appreciated. Peter EI4HX can be contacted on ei4hxperimental / at/eircom / dot/ net.

IRTS Awards Nominations.

The time is here again for nominations for the several awards for IRTS Trophies and cups that are required from within the membership, this includes the awards for,

1. Service to the Society or to Amateur Radio. Awards in this category can be to members or non-members.

2. Awards for other achievements.

Awards in this category [2] include the 4 and 6 Meter Shields, the SWL Award, and the awards for Quality Construction Projects. These are confined to members only.

When considering your nominations, please refer to previous successful winners as included in www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or Individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX and Pat EI9HX, or to Peter Grant EI4HX, Chair of Awards Committee, QTHR, or by e-mail to ei4hxperimental/ at/ eircom/ dot/ net.

Closing date for nominations is February 30th 2011.

IRTS AGM Annual Dinner and Rally 2011

You are reminded of the importance of attending the IRTS AGM weekend, including Annual Dinner and Rally will be held this year on Saturday March 26th and Sunday March 27th. The event will be hosted by the Limerick Radio Club. The venue is the Radisson Blu Hotel, Ennis Road, Limerick.

For more information contact, Ger McNamara EI4GXB on 087 2532512 or ei4gxb/ at /gmail/ dot/ com. A new website for the Rally in Limerick on 27 March 2011 is now available, please go to http://limerickradiorally.com for more details.

The AGM dinner tickets priced at 35 are now available from Tony Condon at QTHR or by email to condona /at / eircom/ dot/ net.

International Marconi Day

International Marconi Day takes place this year on Saturday 30th April. The Howth Martello Radio Group will be participating once again as an award station using the call-sign EI0MAR.

This is not a contest but there are several nice awards available for working the officially listed stations, each of which has an historic connection with Marconi. The event is organised by the Cornish Amateur Radio Club. For more information please visit the club's website http://crac.g4usb.net/cracblog/.

EI0MAR operates from the Martello Tower overlooking the East Pier in Howth. The tower now houses a vintage radio museum. In 1905 the British Post Office carried out wireless telegraphy experiments at the tower in Howth using Marconi equipment.

Visitors are always welcome at the museum and the group hopes to see many visitors during the IMG event in April. The HMRG's website is www.ei0mar.org where a free information booklet in PDF format can be downloaded.

The North Cork Radio Group are pleased to announce that they will be active from the Marconi Signal Station at Goleen, Mizen Head, West Cork, where Marconi sent many of his first test transmissions to America.

Further details will be posted nearer the event, however, please pencil the day free if you'd like to attend or work the station. The Official call sign for the event will be EI-0-IMD and it is hoped we will be excepted on the official International Marconi Day Awards Program.

South East Amateur Radio Group

The South Eastern Amateur Radio Group and the Lough Erne Amateur Radio Club will ensure that Ireland again has its say in the 2011

International Geopark Communication weekend on 28 & 29 May, with special stations, likely EI2GEO again, at the Copper Coast Geopark and, likely GB2MAC again, at the Marble Arch Caves International Geopark in Fermanagh which straddles the border into Cavan.

Geoparks are areas recognised by UNESCO to have exceptional geological heritage. Across Europe there are 42 in 16 countries that include only these two on the island of Ireland. As well as the scientific interest, Geoparks are often major tourism attractions. There are six in Great Britain. This event, in its fourth year, was initiated by Martin Foster G3VOF and others with GB6GEO on the English Riviera Geopark.

LEARC's Alan Gault Gi6PYP will again be licence holder for GB2MAC. Last year's station, with mobile mast and caravan was in a hilltop lay-by just above the Caves entrance building. Six operators logged 51 QSOs with 16 countries, most in Europe, others as far east as Asiatic Russia, and west to USA, Cuba and Argentina.

Last year EI2GEO made many QSOs on various HF bands. On site were Francis EI5GOB, Declan EI5GRB, Jim EI8IG, John EI7IG, John EI8JA and Mark EI7IS. Saturday visitors included scouts interested in radio. Martin EI8FFB did some late night 40 and 20 metre operating. Special thanks to Jim EI8IG for the camper van.

Hopes for 2011 again are enjoyable amateur radio, involving a lot of club members in both Irish stations, north and south, and other Geopark stations in Great Britain and mainland Europe. Amateur radio is an international educational and scientific culture, so it is entirely appropriate that we be involved with Geoparks, recognised as they are by UNESCO - the United Nations Educational Scientific and Cultural Organisation.

For more information contact

Mark Wall, EI7IS, SEARG P.R.O & Webmaster. Email markwall / at/ Vodafone / dot /ie

Michael Clarke, Mi5MTC, Chairman Lough Erne ARC. Email mi5mtc /at/ learc/ dot /eu

---

South Eastern Amateur Radio Group

The Annual General Meeting of South Eastern Amateur Radio Group will take place on Monday 28th February in the Roanmore Social and Sports Centre, Cleaboy Road, Waterford. All are welcome.

For up to date information about the club, visit www.searg.com

---

FERMANAGH in COUNTIES CONTEST

Until a couple of years ago, Fermanagh rarely featured in January's 80M counties contest, a gap well plugged now by Lough Erne Amateur Radio Club with its club station and other stations active this year and last.

LEARC's 2011 club station, set up by a team of eight at Herbie Gi6JPO's QTH on a hill-top in Cavanacaragh, near Enniskillen, logged about 73 QSOs and 28 counties, compared to 43 and 23 last year. Other logs duly submitted by 2 February brought Fermanagh's QSO total to near 120, across Ireland and including a few with Britain and mainland Europe.

These are very modest figures compared to many heard, or listed in 2010 results, yet a good measure of enjoyment of amateur radio together for club and county. It was good to see almost half of those involved were recent new Foundation licensed members building up experience. Two, both teenagers, are pictured Jamie Mi6JNU and Gemma Mi6GDM.

Michael Clarke, Mi5MTC, Chairman LEARC. Email mi5mtc/ at /learc /dot/ eu

PEARL ANNIVERSARY RALLY - Sunday 17 April.

Lough Erne Amateur Radio Club asks anyone who was at its first Rally in April 1982 or others in the next three decades, to contact the Club with memories and memorabilia of events that were always well attended from North and South.

Cliff GI4CZW was Secretary in 1982, when he sent news of the first Enniskillen Rally to Short Wave Magazine. Down the years GI4CZW gathered memorabilia.

More stories and photographs are welcome for a display at this April's thirtieth rally.

RSGB and IRTS will both attend this special Pearl Anniversary rally, as will the usual displays set up by the Club's neighbours, West Tyrone Amateur Radio Club and the

Club's cousin, Mayo Radio Experimenters Network. Fermanagh Talking Newspaper will be there. More displays by Amateur Radio organisations are welcome.

The Club is keen to make its Pearl Anniversary Rally a grand celebration of thirty years of progress and companionship among radio amateurs and experimenters.

Contact Michael Clarke MI5MTC, Chairman, Lough Erne Amateur Radio Club. 3/048-6862-1436. mi5mtc / at / learc /dot / eu

DX News

Nick G3RWF has returned to Uganda and will once again be active as 5X1NH. He will be mainly QRV using CW and hopes to operate all bands 80 - 10m. Look for him on the bands between now and April 14. QSL info is via the home call and also Logbook of the World.

A special event station is on the air from Las Palmas in the Canary Islands signing EG8ISS. The station is QRV from a local college campus and celebrates the first International Space Station contact with the college. They will be on the air till March 11th.

A trip to the Caribbean will see Jeff VA3QSL active from St Martin as FS/VA3QSL and from Saint Maarten as PJ7/VA3QSL. He will be there from February 23 - 27. Both calls count for IOTA NA-105 but are obviously different DXCC countries.

Svalbard will be on the air until February 25 when LA8XRA and LA9VDA activate their JW8XRA and JW9VDA call signs. They will probably be using the club station JW5E on Spitsbergen Island.

The well known DXpeditioner Baldur DJ6SI is now active from Chad as TT8DX. He operates mainly CW and will be there till February 24th.

The North Cork Radio Group

Today, 20th February we will be on air as EI1NC/P operating CASHOTA ref EI009/C from Blackrock Castle in Cork City

19th and 20th March we will be operating EI1NC/P from the original broadcast station of 6CK based in the Governors House at Cork city Gaol and Radio Museum, further enquires are to be made to ascertain if the event would be considered for stately home registration with CASHOTA Ireland, details to follow.

Sun Spot Activity

Following on from last week's item on solar flares, there was further evidence during the week of increased solar activity. On Tuesday last the sun unleashed its strongest flare in four years as NASA's Solar Dynamics Observatory recorded an intense burst of ultraviolet radiation from a sunspot. The Northern Lights (aurora borealis) have already been seen much further south than expected including in the north of Ireland. Further solar activity was expected over the following few days. It looks like the sun is awakening after several years of very low activity. Solar Cycle 24 is now predicted to peak in May of 2013.

Sunspot numbered 1158 which was responsible for the recent solar flare has expanded rapidly in recent days and further solar activity is expected. Chinese state media has already reported some disruption to short-wave radio communications. In 1972, a geomagnetic storm caused by a solar flare knocked out long-distance telephone communications across the State of Illinois in the USA, while in 1989 a similar storm plunged six million people into darkness in Quebec, Canada. Scientists have

about 30 minutes notice before the burst of charged particles from the sun hits the Earth's magnetic field.

Further sun spot activity is imminent.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

168. [DXNL] DXNL 1716 (Feb 23, 2011)

DXNL 1716 - Feb 23, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

C6 - BAHAMAS, NA-001
Bill,NE1B (C6AWB), and Tom,N1GN, will take part in the multi/single
categories of the CQ 160m SSB Contest and ARRL DX SSB Contest (Mar 5/6)
signing C6ANM from New Providence on Nassau (NA-001, FL15).
QSL via LoTW or direct.

D4 - CAPE VERDE
Daniel,DF8UO/F5VMO, is working on Cape Verde until Feb 26 and received
the callsign D44TUO. He is working during the evening hours when he has
some spare time. His equipment includes a FT857 (100 watts), a vertical
and a dipole. Daniel prefers digital modes and CW.
QSL via bureau, direct, eQSL or LoTW to DF8UO.

J7 - DOMINICA, NA-101
Jan,DL7JAN, plans to become active as J79AN (callsign he applied for)
from Dominica (NA-101) between Feb 23 and Mar 6. Jan plans operation
in CW, SSB and RTTY on 40m-10m, maybe also on 80m, and wants to listen
especially for JA stations. QSL via bureau or direct to DL7JAN.

KG4 - GUANTANAMO BAY, NA-015
KG4AS (QSL via N4SIA), KG4KL (QSL via KN4KL), KG4SS (QSL via K4MIL)
and KG4WV (QSL via W4WV) will show up from Guantanamo Bay (NA-015)
in all modes on all bands between Feb 22 and Mar 8.

PJ4 - BONAIRE, SA-006
Bert,CX3AN, is visiting Peter,PJ4NX, on Bonaire (SA-006) since Feb 20
and will stay there until Mar 1. He is going to receive his callsign
upon arrival on the island and thus it was not known at the deadline.
QSL via homecall.

PJ7 - SINT MAARTEN, NA-105
Bil,PJ7/W8EB, and his XYL Dorothy,PJ7/W8DVC, will be active in CW, SSB,
RTTY and PSK31 on 160m-10m from Sint Maarten (NA-105) between Feb 21

and Mar 19. Bil will take part in the ARRL DX SSB Contest as PJ7B and
in all other RTTY contests during this time. All QSLs via W8EB.
More information is available online at: http://www.qsl.net/pj7b

ST - SOUTH SUDAN
The south of Sudan is going to become independent soon. As it looks
right now the south of Sudan may declare its independence on July 9.
It is very likely that the new country will get a new name without
"Sudan" in its name. There are already two DXpedition teams ready to
be there in time. One group includes Alex,5Z4DZ/PA3DZN, Robert,S53R,
and Martti,OH2BH. The "Intrepid-DX Group" led by Paul,N6PSE, plans an
activity as soon the country declares its independence. They already
applied for the callsign ST0DX though it is not clear yet if the south
of Sudan gets its old prefix ST0 back again.
Keep informed about the DXpeditions on the websites:
http://www.intrepid-dx.com and http://www.dxfriends.com

SV9 - CRETE, EU-015
Willi,SV9/DJ7RJ, will be on the air again from Crete (EU-015) from
Feb 24 until Mar 15. He plans to be active in CW and SSB on 160m-6m
but prefers working on the lowbands.
QSL cards should be sent via bureau or direct to his homecall.

T30 - WESTERN KIRIBATI, OC-017
Jacek,SP5EAQ, and Jacek,SP5DRH, are planning an activity as T30AQ and
T30RH from Tarawa (OC-017) from Mar 1-17. They will work in CW, SSB and
RTTY on 160m-10m. Jacek,SP5DRH, will focus on the 160m band, 80m and
30m in RTTY. Jacek,SP5EAQ, is a SSB operator and will take care of the
other bands. They will use two Elecraft K3 transceivers each with a
600 watts amplifier, Spiderbeams in a height of 18m and a GP5 antenna.
Their pilot station will be Rys,SP5EWY. QSLs via their homecalls.
More information can be found on: http://www.sp5drh.com/t30

V2 - ANTIGUA AND BARBUDA, NA-100
Babs,DL7AFS, and Lot,DJ7ZG, are staying on Antigua (NA-100) right now
and will spend their holidays there until March. They are using the
call V21ZG again working in RTTY, PSK and SSB on 80m-6m. They are
listening especially for JA and QRP stations.
QSL via DL7AFS, 100 % via bureau.

VP2M - MONTSERRAT, NA-103
Philip,WA1ZAM, will stay on the volcanic island Montserrat (NA-103)
from Mar 1-8. A callsign is not known yet but he wants to work on all
HF bands and in the ARRL DX SSB Contest. QSL via homecall.

XU - CAMBODIA / 3W - VIETNAM
Hiroo,JA2EZD, is signing XU7SSB from in Sihanoukville from Feb 21-28
and once again from Mar 8-15. In-between he will show up as 3W6LI on
all bands working from Ho Chi Minh City in Vietnam from Mar 1-7.
QSLs should be sent to: Hiroo Yonezuka, PO Box 10003, Vientiane, Laos.

6W - SENEGAL
Luc,F5RAV, will be back again in Senegal reactivating his call 6V7T
from Feb 26 until Mar 7. He also plans to take part in the upcoming
French HF Championship Contest (SSB) and the ARRL DX SSB Contest.
QSL via homecall, unfortunately only direct.

8P - BARBADOS, NA-021
Nathan,KA1YMX, will spend his holidays on Barbados (NA-021) between
Feb 26 and Mar 5. He has a K2 radio and wants to work in SSB and CW.
More information including his callsign is not know yet.
QSL cards should be sent only direct via his homecall.

9G - GHANA
Rob,PA3DEW, and Vincent,PA3FQX, are going to work again for the
"Dorma Ahenkro Hospital" from Mar 1-20. During this time they will
be active as 9G1AA mostly in SSB on 20m and 15m. QSL via PA3ERA.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The "3rd South American Lighthouses Weekend" will take place on
Feb 25-27. A list of ll participating stations can be found on:

http://www.grupodxbb.com.ar/faros2011

We will write about the upcoming DXpedition to Revilla Gigedo/XF4 in
our next issue. You can download a poster of this archipelago from:
http://picasaweb.google.com/EA4AK.Santos/4A4AVARIOS#5575726857431918898

UPCOMING CONTESTS

Feb 25-27: CQ WW 160m Contest, SSB
Feb 26/27: REF Contest
Feb 26/27: UBA DX Contest
Feb 27: HSC Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AF-004, EA8, Canary Islands: Per,EA8/LA5EAA, is working from Gomera Island
until Feb 26. QSL via homecall (bureau/direct).

EU-026, JW, Spitsbergen Island (main): Glenn,LA8XRA, and Trond,LA9VDA, are
active from Svalbard signing JW8XRA and JW9VDA from Feb 20-25.
QSLs via homecalls (bureau/direct).

NA-066, W6, CA State South Group: Some members of the Palos Verdes ARC will
show up as K6PV from Santa Catalina Island (USI CA016S) from Feb 24-27.
QSL direct via K6PV (see QRZ.com).

OC-165, 9M8, Sarawak's Coastal Islands: John,9M6XRO, and Steve,9M6DXX, will be QRV as 9M6XRO/8 and 9M8Z/8 from Satang Besar Island from Feb 25-28. QSL via M0URX (bureau/direct/LoTW).

SA-016, PR8, Maranhao State Centre Group: Orlando,PT2OP, is going to become active as ZW8SM from Sao Luis Island (DIB-07, ARLHS BRA-191) from Feb 25-27. QSL direct via his homecall (see QRZ.com).

SA-071, PY2, Sao Paulo State Centre Group: The "Cantareira DX Group" will sign PR2M from Moela Island (ARLHS BRA-043, DIB SP-06, TWLHD PY-031, WLOTA 1335,DFB SP-07) from Feb 25-27. QSL via PY2DEZ (bureau/direct).

Lighthouse activities (WLOTA/ARLHS/ILLW)

As you can see in the bandspots TJ9PF was very active during the last week.
The team logged its last QSO on Feb 20 around 1200 UTC and the DXpedition
ended with 67.000 QSOs in the log. Very remarkable is a new DXpedition
record in RTTY with 17.000 QSOs in this mode. The complete online log is
available at: http://www.clublog.org/charts/?c=TJ9PF&a=embed

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

** New Zealand earthquake, Christchurch (ZL3) **

With the New Zealand earthquake death toll now at 98, authorities have mounted the country's largest-ever rescue operation in a bid to save as many of the 226 missing people as they can. Since Tuesday's 6.3 magnitude earthquake leveled New Zealand's second-largest city, Christchurch, officials have been scrambling to mount what has become the largest search-and-rescue operation in the South Pacific nation's 170-year history. The VHF-DX-Portal MMMonVHF is happy to report that we have positiv reports from Starr, ZL3CU and Rod, ZL3NW and their families that nothing serious have had happened to them in person... LAST EME NEWS and NEWSFLASH from the C56-Team, dated 2011-02-22: Eleventh day at the moon. We worked 361 inits on 144 MHz and 11 inits on 432 MHz. Yesterday evening we could add 5 more and now we closed down. We dismantled the station and cleaned all cables / elements. The wind and the salt seawater made everything very dirty. Our log is online on http://www.emelogger.com/gambia and we updated a lot of photos or YouTube movies.

Camb-Hams members Bob G1SAA, Terry G3VFC, Martin G3ZAY, Colin G4ERO, Colin G8TMV, Mark M0MJH, Rob M0VFC, Steve M1ACB and Gavin M1BXF will be active on the 1-8th of May 2011 from the Isle of Arran (IOTA EU-123, IOSA CL01, SCOTIA CS14). QTH will be a rented cottage on the west of the island near Balliekine (WW Loc. IO75HO) As usual most HF bands will be activated with SSB, data and some CW. VHF wise they will be on 6m and 4m SSB/data (JT6m) and being a little more south than Harris they will again activate 2m both SSB/data (FSK441). If they have time, they will also be active on 2m and 70cm satellites. This year the CRG (Cambridgeshire Repeater Group) has a new callsign G6PYE which they will use alongside the traditional G3PYE, as the activation is in Scotland the prefix becomes GS for a club station in Scotland. Listen out for both GS3PYE/p and GS6PYE/p. QSL direct or via bureau to M0VFC.

JEFFS WALK2

SOARING SORBENT

Inside Amateur Radio magazine for March

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING FEBRUARY 27 2011.

Jeff Johnson VK4XJJ, with the Gympie Radio Club supporting, set to walk
across Australia from Cape Byron to Steep Point operating his FT817.

JEFFS WALK2 (for NETS) steps off 24th April and is expected to last 162 days.

The crossing is approximately 5,000 kms.

Geoff will transmit on 7045Khz each evening at 1730 AEST.

20m and 80m will also be used on some sections.

jeffswalk2.com and
nets.org.au

Rail crossing safety with the help of RF!

New technology by La Trobe University, to have cars and trains `talking' to each other, could save an average of 37 lives every year and an estimated 100 million dollars, by eliminating rail crossing collisions, especially in rural and regional Australia.

A $4 million project by the University's Centre for Technology Infusion, in partnership with the Australian Automotive Co-operative Research Centre, the Victorian Department of Transport and Queensland University of Technology, intends to have the technology up and running in three years.

It involves dedicated mobile-phone-style wireless networks running in the 5.9 GHz band.

www.latrobe.edu.au/

http://www.radiocomms.com.au/articles/43319-Rail-crossing-safety

(Sourced from the from the Radio Comms E-Zine)

COAST Guard Noosa is facing a potential communications setback with one of the most vital cogs in the system in short supply.

The call has gone out for trainee volunteer radio operators as the flotilla is under continued pressure to maintain the 24/7 safety net for boaties.

Radio operators play a vital role as the first line of defence for boaties in trouble, ready to instantly activate rescue crews when distress calls are received but it would seem none are available in the area!

New recruits are provided with extensive and professional training beginning immediately they join, and which is recognised Australia-wide.

Anyone interested in becoming a radio operator can register with Coast Guard Noosa.

07 5474 3695.

IT'S A GEM MATE

A spokesperson for the Australian government's Digital Switchover Taskforce has confirmed that television transmission infrastructure in Queensland was not significantly affected by Cyclone Yasi and recent flooding in the area.

The region is expected to be switched over entirely to digital TV from the long-running analogue TV service some time in the second half of 2011.

A spokesperson from the Department of Broadband, Communications and the Digital Economy told PC World Australia that while a concrete date for the official switchover from analogue to digital television in Queensland had not been set, the projected window of the second half of 2011 would likely still be met.

"The most recent advice from both commercial and national broadcasters confirms that transmission infrastructure has not been severely impacted by the extreme weather events in Queensland. Transmitter sites, usually situated on higher ground, have escaped serious flood damage. Transmitter sites in the path of Cyclone Yasi did suffer power cuts but these, by and large, have been managed

with the use of portable power generators."

More than 70 per cent of Australians have embraced digital TV and a further 21 per cent plan to get on board this year.

A majority of householders now own devices such as a digital set-top box, a TV with a built-in internet connection, or a PVR, interestingly in a Roy Morgan research for the Herald Sun retirees are least likely to own a "time shifting" TV device such as a Personal Video Recorder (PVR), which allows viewers to record, pause and rewind live TV.

Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Result of Nominations for Director

Nominations for election as a director of the WIA were called for by notice published in the December 2010 issue of the WIA magazine Amateur Radio.

The four retiring directors Michael Owen VLK3KI, Peter Young VK3MV, Ewan McLeod VK4ERM and Philip Adams VK3JNI offered themselves for re-election.

The WIA Returning Officer, Chris Chapman VK3QB, has advised the Board that no other nominations were received and in accordance with the Election Regulations, he had declared the retiring directors elected unopposed as Directors of the WIA.

Each will hold office until the conclusion of the Annual General Meeting in 2013

Around 4 or 5 weeks back WIA National News put out a call to all of the "Advisory Committees" via the office/secretary and the email addresses shown in AR Magazine asking that they might tell you just "who we is!..hihi".

We did get a written response from Tassie and as those who are in VK4 heard last week an audio report from the new QAC Chairman.

"I'm Mike Charteris VK4QS, the new chairman of the Queensland Advisory Committee for the Wireless Institute of Australia.

My fellow QAC members include Mr Don Wilschefski VK4BY from Rockhampton, Mr Ken Fuller VK4KF from Brisbane, and Dr Kevin Johnson VK4UH also of Brisbane. We look forward to serving you as best we can over the next three years and and can be contacted by way of email as per the WIA website, or as previously broadcast on QNews."

SOARING SORBENT

The Tamworth Radio Club sponsored the successful launch of 4 large party balloons from the Tamworth Oxley Scout Hall with a bunch of scouts eagerly involved. The large party balloons are by comparison small compared to the balloon being used for LOKI-1.

2 of the balloons were tied together to carry a payload consisting of a small 10mW transmitter weighing just 5.2g with battery. With some trickery temperature data was superimposed on the transmitted signal.

The other 2 balloons were released separately with several metres of light weight toilet paper streaming below.

The scouts learned how to move the balloons about with the breeze that was blowing to stop the streamers and balloon getting tangled in the trees, flag pole and scout hall.

The miniature electronics package was assembled by Ash, VK2XSO.

Preliminary plans are being made for that launch of LOKI-1 March 5th.

More information can be found at
trci.org.au

(Cris VK2BOZ Publicity officer & John VK2YGV Project Director)

SUMMERLAND

AGM results are in and show as President, Ross Dowse VK2ARD,
Vice President Rob Gallagher VK2ELH with Secretary David Robinson VK2HFK.

Training course at Dural.

Commencing on Monday the 7th of March a training course for Standard and Advanced grades of exam assessments will commence at VK2WI Dural. The course will be conducted by Terry VK2UX.

It will operate each Monday evening - other than on public holidays - for several weeks. Listeners may know of friends who would like to undertake such a course. We ask that you pass

on the details and ask them to register their interest by a phone call to the office telephone and leave a message with contact details. The number is 02 9651 1490.

There are also details about the course on the ARNSW website, www.arnsw.org.au
look under training and exams.

The Gippsland Gate Radio & Electronics Club, 16 July will conduct their annual Hamfest at the Cranbourne Community Hall, corner of Clarendon and High Streets, Cranbourne.

High Street is part of the South Gippsland Highway. Melway 133 K4.

Forty tables of goods will be presented at this large venue, but stall holders should book early as demand is always high. Reservations for stall holders may be made by contacting Steve Harding VK3EGD on 0408 878934 or by emailing hamfest@ggrec.org.au.

More information can be found at
http://ggrec.org.au/hamfest.

Tables will be available for $20 each. Doors open at 8:30 AM for stall holders and at 10:00 AM for the general public. Your admittance fee of $6 as a buyer will go towards the continued upgrading of facilities at our Club Shack & meeting room in Cranbourne.

Take away food, tea and coffee will be available. The entry fee includes a ticket in the Door Prize which will be drawn around 1:30 PM for all who register upon entry. Great prizes to be won as usual.

Additional tickets can be purchased on the day.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

When we show our hobby to the public it is important to stand in the other persons' shoes. What we are doing is showing what are the attractions, the many and varied aspects of amateur radio. Maybe the smart phone apps will excite today's technology savvy person whilst the antique will tickle the nostalgia nerve of another.

With the theme for the international Amateur Radio Day and Australia's National Field Day defining the moment, it is important to consider how we present our interest. The media will be looking for aspects that will grab the attention of

readers, listeners and viewers and the people who come to look will want to experience something that is relevant to them. When the ages of the prospective enthusiasts spread from school age to post retirement and the knowledge and life experience's are so varied, this presents a challenge in designing a display that works.

Equipment and displays can cover from the crystal set to digital, around the world and into space, and the people manning the display should be accepting of the range of interests within the hobby. We want to share our great hobby not preach our own special interests.

In planning our club's activities for the coming National Field Day, let us build on the great beginning of the centenary year. Let's show our local community that amateur radio is the original social network and it's still growing strong.

I'm Geoff Emery and that's what I think....how about you?

CLUBBING - TO SUPPLY NEWS ITEMS:-
email qnews@wia.org.au

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

I'm Trevor Taege, VK4BAT with news from the Gympie Communications & Electronics Group:

Weather has again prevented the planned 2 metre repeater mods and adjustments but the crew hopes to get up to the Mountain as soon as time and conditions permit.

The Gympie Communications and Electronics Group have finally found a new Clubroom.

Details are still being finalised but the Club has been offered a dedicated, secure room at the new Gympie Men's Shed.

GCEG will be able to share workshop, lounge and other facilities with the Men's Shed members and provide some training on basic electronics and soldering.

It's hoped that a few of the members from the facility will become sufficiently interested in Amateur Radio to join the Gympie Group and in time gain their own call-signs.

So, the next meeting of the Gympie Communications and Electronics Group will be at the new location of 16 Barter Street, Gympie, on Thursday 3rd of March at 7:30pm.

For Gympie Area News, I'm Trevor Taege, VK4BAT.

VK4 AREA SPECIAL INTEREST GROUPS --- VHF

Hello from Doug Friend, VK4OE of the Brisbane VHF Group.

Plans are proceeding for the already-announced SouthEast Queensland Microwave Day on the 6th of March.

We want to enable as many folk as possible, amateurs and non-amateurs, to be able to go and see microwave amateur radio in action.

Why? Well there is a new and great experience waiting for anyone who takes the time and trouble to start playing with microwave frequencies. And the Brisbane VHF Group wants to make it easier for anyone to feel the intense satisfaction there is in getting gear working and operating it on any of the amateur bands 1296 MHz and above.

On Sunday the 6th of March, starting just after completion of callbacks to the WIA and QNEWS broadcasts, you should find a group of us using several bands on Mt Gravatt on Brisbane's south side, or to Kevin VK4WA's place (several bands operational) at Redbank Plains in the West, or further West to John VK4JMC's place at Laidley on 1296 and 2403 MHz. On the North side of Brisbane, you can catch up with Roy, VK4ZQ who will be portable with several microwave bands, at a location to be confirmed next week.

Further North again, Adrian VK4OX will be operational on 2.4 GHz from Maleny, and Wayne VK4WS will have a number of bands operational from Howell's Knob also near Maleny.

Operating with low power on 5.7 and 10.3 GHz to the East of Brisbane (yes, East!) should be Peter VK4EA on the beach at Moreton Island, an unusual and potentially interesting contact for many to make.

Primary liaison is expected to be via the VHF Group's 'RBN repeater on 147 MHz, so this repeater will be active on that morning.

Anyone can go to any of these locations to experience the ways of operating, the challenges and the intense fun of microwave amateur radio.

Here's hoping for a fine day on the 6th of March!

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

Hi this Is David vk4pdr for the Redcliffe and districts amateur radio club

Wednesday's at 730 pm local time we hold a trivia night on our 70 cm repeater 438.325 and don't forget the 91.5 kHz tone for access.

It is a fun night for those that join in and the prize for winning is that you get to be next weeks trivia master!

so all of you amateurs out there with inquiring minds and wishing to join in on a fun night for a hour or so come and join us.

This is David vk4pdr for the Redcliffe and districts amateur radio club and you have been listening to and enjoying qnews on vk4wia

South Coast Amateur Radio Club - Subsidised Members Dinner 20th March

The South Coast Amateur Radio Club Inc. will be holding its 2011 Subsidised Members Dinner on Sunday 20th March 2011 at Fresh Choice Family Restaraunt in Sturt South Australia.

Members are required to register numbers, as bookings are essential for this event. If you are planning on attending, please contact Secretary by email at secretary@scarc.org.au

It would be great to see as many members and partners as possible in attendance, to allow members to socially meet outside the Clubrooms environment. Registration can also be done through the event list function on the SCARC Website www.scarc.org.au

Look forward to seeing you there. Enjoying the hospitality of fellow members of the club.

Regards,
Stef Daniels VK5HSX
Secretary
South Coast Amateur Radio Club Inc.
E-mail: secretary@scarc.org

SILENT KEY

Founder of the SA Maritime Mobile Net, Alistair Campbell ZS5MU becomes SK.

The South African Maritime Mobile Net was started by Alistair some 30 years ago and is ably assisted by his wife Davina ZS5GC and several other coastal Radio Ham Operators.

The net operates each day of the week, and provides weather reports from around the SA coast and High Seas, and maintains Ham radio contact with boats off the coast of South Africa "For Met area VII", ie. Brazil's east coast to Australia's west coast and up into the Mozambique channel.

Over the years he had help from many other Hams without whom it would have been extremely difficult, and at times impossible, to run an efficient maritime net. He also liaised with other Nets particularly the Travellers' Net in VK.

South Africa, in fact the World has lost one of it's greatest radio amateurs. A man that gave many hours, actually more than 30 years to the South African Maritime Mobile Net, rendering a valuable service and ZS5MU will be sorely missed for many years to come.

Although his key went silent, he has left behind a legacy that must and will continue. Condolences to Davina, family and his many friends.

(sourced to SouthGate)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

CANTERBURY / CHRISTCHURCH EARTHQUAKE

Quick to offer condolences to our friends in the NZART were the RSGB and IRTS.

>From the RSGB:-

"Dear Roy,

On waking this morning here in the UK we were all devastated to hear on the News details of the earthquake in Christchurch.

May I offer on behalf of all UK Radio Amateurs and in particular the President, Board and members of the Radio Society of Great Britain, our condolences to those Radio Amateurs who may have lost family and friends, and support to those Radio Amateurs who may as I write, be involved in the rescue operations.

Our thoughts and prayers are with you all at this most difficult of times.

Best 73
Peter Kirby G0TWW
General Manager
Radio Society of Great Britain".

>From the IRTS

"You are in our thoughts today following the earthquake in Christchurch and we know that your members will be working hard for the community.

If we can be of any assistance please let us know.

Take care and pass our best wishes to all your operators working at the front line.

Paul EI2CA
President
Irish Radio Transmitters Society
IARU member society for Ireland".

Radio hams keep Civil Defence in touch

Updated from Radio New Zealand

A small team of amateur radio operators are keeping the lines of communication open in earthquake-hit areas of Christchurch.

The head of the Amateur Radio Emergency Communications team, Richard Smart, ZL4FZ says 10 amateurs are using their two emergency broadcast vans to keep rescue teams and Civil Defence staff in touch.

He says one is at a major welfare centre providing portable communication so they can talk to Civil Defence and the other vehicle is assisting search and rescue teams in an area where communication is poor.

ZL4FZ says amateur radio operators from around the country are volunteering to help out and others are sending updates on the disaster to families of people in Christchurch who are overseas.

Former NZART Vice President Stuart Watchman ZL2TW was attending a medical conference and lucky to escape. He told how his hotel swayed and crumbled, managed to free himself and other only to find devastation outdoors and the adjoining building leaning threatening to collapse.

Sorta "ground Zero" in the CBD sits, or sat the now shattered CTV Building.

Canterbury Television is an independently owned television station, some 20 staff and is botha a production house, ansd free-to-air broadcaster on UHF cahnnels 44 and 53.

CTV produced approximately twenty hours of locally based programming every week and showcased content from Deutsche Welle (DW-TV) from Europe, CCTV-9 Asia, Voice of America from the U.S. & Al Jazeera from the Middle East.

The earthquake disaster bill of September 4 was put at $8 billion but the latest quake could be double that amount.

Christchurch and its surrounding areas account for 500,000 people, about half the population of the South Island of New Zealand.

Jim Meachen ZL2BHF is in the 'shaky isles'.

Arnie Coro, C-Oh-2-K-K, the International Amateur Radio Union Region II Area C Emergency Coordinator, has issued a notice to hams in the America's.

Coro advises users of the 40 and 20 meter bands to be aware of possible earthquake emergency communications traffic taking place in and around the affected areas of New Zealand's South Island, where Christchurch is located.

Coro continues that the propagation on 40 meters more likely to cause problems to the New Zealanders from unintentional QRM coming from the Americas in the window that starts about two or three hours before sunrise and lasts until sunrise on this side of the path. A similar pattern, with a slight time shift shows up on 20 meters as well.

Also Chairman IARU Region 3 Disaster Communications Committee Jim Linton VK3PC, suggests we check out the NZART website under What and Who is AREC.

>From Auckland, New Zealand, on the North island, I'm Jim Meachen, Zed-L-2-B-H-F, reporting for vk1wia

A.R.E.C. is the public service arm of Amateur Radio in New Zealand.

Many hams get involved in providing communications for Search and Rescue and Civil Defence at different levels.

The Amateur Radio Emergency Communications organisation (AREC) was formed by the New Zealand Association of Radio Transmitters (NZART) in 1932 after the Napier earthquake, to train licensed amateur radio operators in providing reliable communications over the length of the country for any type of emergency.

Full encouragement was given by the then New Zealand Post and Telegraph Department and they made available special station identifiers for emergency communications on the amateur radio allocated bands.

It has become accepted among Amateur Radio operators that these unique "E" calls have priority over all other users of the widely-spaced amateur radio frequencies.

A highlighted APRS map shows AREC vehicle trackers (ZK9xxx and PATROLxxx)
plus earthquake locations as well as other trackers.

http://aprs.fi/?lat=-43.53&lng=172.2&z=9&mt=m&timerange=43200

ZL listeneres, REMEMBER IF YOU HAVE AN EMERGENCY PLEASE CALL 111.
The Quake helpline is 0800 779 997
If you are in Christchurch, you can contribute information via email
eqnzfeb@gmail.com or free TXT 5627.

Google have a Person Finder App, it's called the
Christchurch Earthquake, February 2011
http://christchurch-2011.person-finder.appspot.com/
It is currently tracking about 10200 records.
All data entered will be available to the public and viewable and usable by
anyone. Google does not review or verify the accuracy of this data.

Christchurch Deputy Mayor Ngaire Button advises parents to limit their
children's exposure to the disaster in the city.

She says parents should not have the news on 24/7 or show children the
devastation around the city.

"There are a lot of things they don't need to know about and is not helpful for
them to know about" the Deputy Mayor has said.

US PRESIDENT TO TAKE PART IN FCC APPROVED EAS TEST

The President of the United States will soon be taking part in a national test
of the of the Emergency Alert System. We have more in this report:

The Federal Communications Commission has taken the necessary action help pave
the way for the first-ever Presidential alert to be aired across the
United States on the Nation's Emergency Alert System. This as the regulatory
agency voted on February 3rd to adopt a Third Report and Order that sets forth
rules that will facilitate the federal government's efforts to conduct a
national E-A-S test by transmitting a Presidential Alert from Washington, D.C.
to television and radio broadcasters, cable systems and satellite service
providers who will then deliver the alert to the American public.

The national test will require EAS participants to be part of the exercise and
to receive and transmit a live code that includes a Presidential alert message
to their respective viewers and listeners. The FCC, FEMA and the Nation Weather
Service, in coordination with E-A-S participants, will work together to launch a
nationwide public education and awareness campaign. This will include press
statements, workshops, regional outreach, and television and radio public
service announcements. All will be targeted to consumers in general, and more
specifically to persons with disabilities and seniors, as well as first
responders and state, local and tribal governments. The outreach will help
ensure that the American public is aware that the national test will be
conducted and the benefits of these kinds of public alerts in a real emergency.

The FCC adds that the national test will also help determine the reliability of
the Emergency Alert System and its effectiveness in notifying the public of
emergencies and potential danger, both nationwide and regionally. (FCC)

==========

IRTS NEWS DESK

South East Amateur Radio Group

The South Eastern Amateur Radio Group and the Lough Erne Amateur Radio Club will ensure that Ireland again has its say in the 2011 International Geopark Communication weekend on 28 & 29 May, with special stations, likely EI2GEO again, at the Copper Coast Geopark and, likely GB2MAC again, at the Marble Arch Caves International Geopark in Fermanagh which straddles the border into Cavan.

"Geoparks are areas recognised by UNESCO to have exceptional geological heritage. Across Europe there are 42 in 16 countries that include two on the island of Ireland. As well as the scientific interest, Geoparks are often major tourism attractions.

Last year, visitors included scouts interested in radio and EI2GEO made many QSOs on various HF bands.

This event, in its fourth year, was initiated by Martin Foster G3VOF and others with GB6GEO on the English Riviera Geopark.

Hopes for 2011 again are enjoyable amateur radio, involving a lot of club members in both Irish stations, north and south, and other Geopark stations in Great Britain and mainland Europe.

Amateur radio is an international educational and scientific culture, so it is entirely appropriate that we be involved with Geoparks, recognised as they are by UNESCO - the United Nations Educational Scientific and Cultural Organisation."

RSGB

Across the Atlantic on 502kHz

At 21.34 GMT on 13th February, Joe, VO1NA managed a full beacon decode from Graham, G0NBD on 502kHz using the ROS mode.

It is believed this was the first live data mode decoded over the Atlantic on this band. The signal to noise ranged from -23 to -27dB, giving a 100% decode of the test message. The transmission was sent using MF-7 with an estimated ERP of 1 watt from a 35ft top loaded vertical.

ROS mode did a good job of resolving the signals despite deep and rapid QSB over the 3,500km path. At just over a year old the ROS data mode is relatively new and uses an adaptation of multiple frequency shift keying and forward error

correction to help make successful contacts under very difficult band conditions.

The software for the mode is free

OPERATIONAL NEWS -

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Feb 26-27 ZL Jock White Field Day

Mar 19-20 WIA John Moyle Field Day weekend

Apr 23 ZL/VK 2011 VK/ZL RTTY SPRINT 80 metres (zl2sky@zl2ko.or.au)

Apr 30 WW Marconi Day 2011 (www.gb4imd.org.uk)

Apr 30 ZL/VK 2011 VK/ZL RTTY SPRINT 40 metres (zl2sky@zl2ko.or.au)

Allan Chandler ZL2SKY from the Kiwi Digital Modes Group advises the
2011 VK/ZL RTTY SPRINT (80M Leg) takes place April 23 1000 UTC.
2011 VK/ZL RTTY SPRINT (40M Leg) takes place April 30 1000 UTC.

Open to all licensed amateurs from the VK/ZL Call Districts.

PLEASE NOTE:
The Points system & format has changed for this years contest.
The updated rules are available at the KDMG website at:
http://qsl.net/zl2sky/new_page_1.htm

The Summer Field Day seemed to go pretty well however only one entry was received in from VK6. Maybe they are all getting ready for the WIA's major annual contest, the RD, which they seem to win hands down every year!

Actually the VK4'ss did really well which was very good going considering that the contest coincided with the Queensland floods! 4th place in the multi was taken out by VK4, from the heart of Yasi Country, Atherton, by VK4WAT in grid QH22

The highest band worked for the Microwave Challenge saw VK2GG nudging out VK4OE for first place on 47GHz, then on 24GHz VK2GG as 3rd, VK2EI as 2nd and first place VK4OE, Doug Friend.

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE

Rwanda DXpedition approved for credit

ARRL DXCC Manager Bill Moore, NC1L, reports that the 9X0SP 2010 DXpedition to Rwanda has been approved for DXCC credit.

If you have cards that were recently rejected for this operation, please send an e-mail to the ARRL DXCC Desk. Once your record is updated, results will appear in Logbook of The World accounts or in the live, daily DXCC Standings.

(rsgb)

G3RWF is active as 5X1NH from Fort Portal in western Uganda until April 14. He prefers to operate CW but plans to also be on the digital modes with some SSB on all bands except 160m.

QSL via his home callsign G3RWF or electronically using Logbook of the World.

(rsgb)

VK4RTL 6metre Beacon back on air

With mains power restored to theTARCinc repeater site at Mount Stuart the way has been clear for the VK4RTL beacons to come back on air.

The 6 metre beacon brought back online during a site visit by Lloyd VK4FP.

A temporary repair to the beacon turnstile antenna during his visits.

VK4RTL 6 metres should be now able to be heard on 50282kHz CW.

FCC CITES COMPANY OVER SALE OF CELLPHONE JAMMERS

The FCC has issued an Official Citation to DeadlyDeal.com. This based on allegations that between August 25, 2008 and January 16, 2010 the company offered for sale a cellular telephone jamming device called the Blocker.

While DeadlyDeal.com says that it no longer offers these devices to its cliental, the FCC states that even the manufacturing or importation of such units to United States shores is a direct violation of its rules. This is because jamming devices cannot be certified or authorized because the main purpose of a jamming device is to block or interfere with radio communications.

In its communication the FCC warns DeadlyDeal.com that if after receipt of the Citation that should the company violate the Communications Act or the FRCS's Rules that the regulatory agency can impose monetary forfeitures of up to $16,000 for each such violation or each day of a continuing violation and up to

$112,500 for any single act or failure to act. In addition, violations of the Communications Act or the Rules can result in seizure of equipment as well as criminal sanctions, including time behind prison bars.

Deadly Deal was given 30 days following the January 26th date of the Citations release to respond either through a personal interview at the closest FCC office or by filing a written statement with the agency.

(ARNEWSLINE)

Deutsche Welle (of lil blue 5inch tape box fame) has experienced jamming of its signals from the Hotbird 8 satellite. It is believed the DW transmissions are being "jammed" by foreign signals, though the source of the signals can not be confirmed.

The disturbances are affecting DW-TV Europe, DW-TV Arabia, as well as very high frequency (VHF) and shortwave signals in regions including Europe, the Middle East and parts of Asia. TV live streaming on Deutsche Welle's multi-language news website is also affected by the disturbances.

Deutsche Welle last experienced jamming in February 2010, which was believed to have emanated in Iran.

Inside Amateur Radio magazine for March

By now, you should have noticed the new appearance of the magazine, thanks to the input from Sergio Fontana VK3SFG.

Overall, the Publications Committee is happy with the new appearance. Of course, we would welcome any comments from readers.

In the WIA comment, WIA President Michael Owen VK3KI discusses the success of the introduction five years ago of the Foundation Licence, which is by far the preferred entry point into amateur radio, and it has lowered the age of licensees.

By all counts he believes the Foundation licence has been successful and will continue to be so.

In the Spotlight on SWLing by Robin Harwood VK7RH comes news that the BBC is to axe languages and aims to reduce it audiences by 30 million.

A plethora of interesting articles includes a simple antenna base for portable vertical antennas presented by Graeme Scott VK2KE, how to aim an antenna using the internet and the sun by Erich Heinzle VK5HSE, an adaptable antenna for portable operation from Henrik Stenstrom VK2HHS and Jim Ayling VK2JA, building an 80 metre SSB kit radio by Lyle Whyatt VK5WL, and Across the Tasman of 2.4Gz with David Smith VK2HZ.

There are regular columns of ALARA, AMSAT, Contests, DX-News and VHF/UHF An Expanding World.

Amateur Radio magazine is a WIA membership service and also available at selected newsagents.

I'm Barry Robinson VK3PV.

North East Primary School contact a success

Tuesday evening 22 nd, students from the Preston North East Primary School in Victoria gathered for a very successful and memorable ARISS contact.

Astronaut Catherine Coleman KC5ZTH answered student questions at this record attendance of over 500 students and parents attending the evening event.

Another unique aspect of this ARISS contact, was that for the very first time the contact was broadcast live via Amateur Television, out via the VK3RTV television repeater on Mount Dandenong and simultaneously streamed live to the internet via the British Amateur Television Group BATV gateway.

Many complimentary reports were received from local and overseas viewers.

We thank astronaut Catherine KC5ZTH, Larry, WD8KUJ, John, AG9D & Kenneth, N5VHO in the US and Robert VK3DN, Jack, VK3WWW, Mich VK3CH for the transmission on ATV, Tony VK3ZAI Australian ARISS coordinator and of course Melisa DeFabrio the students teacher at Preston NE P/S for making the linkup a success for the students this evening.

ARISS is now approaching 600 schools world wide who have spoken live to the crews on the ISS since year 2000.

RSC-Energia has informed NASA deployment of ARISSat-1 will during RSC EVA 29 currently NOT scheduled until July 2011.

However the Russian Federal Space Agency reports that ARISSat-1 will be activated April 12 on 145.950MHz FM to celebrate the 50th anniversary of the first human space flight.

ARISSat-1 is also known as Kedr, the callsign of Cosmonaut Yury Gagarin on his historic flight.

The satellite is currently inside the International Space Station (ISS) and will be connected to an Amateur Radio antenna mounted on the ISS for the commemorative transmission.

It is still planned to deploy the satellite during a space walk in July.

THE NEW LONG WAVELEGNTH ARRAY

What's being termed as an innovative new radio telescope array is now under construction in central New Mexico. One that will eventually harness the power of more than 13,000 antennas and provide a fresh eye to the sky.

This antenna farm will form what is being called the Long Wavelength Array. This is a radio telescope designed to survey the sky from horizon to horizon over a range of frequencies in the High Frequency spectrum from 20 to 80 MHz.

The first station in the Long Wavelength Array, with 256 antennas, is scheduled to start surveying the sky by this summer. When complete, the entire system will consist of 53 station locations, with a total of 13,000 antennas strategically placed in an area nearly 248 miles in diameter.

The overall receiving system is expected to provide sensitive, high-resolution images of a region of the sky hundreds of times larger than that of a full moon. Investigators believe that these images could reveal radio signals coming from planets outside our solar system, and thus would turn out to be a new way to detect these worlds. In addition to planets, the telescope will hopefully reveal a host of other cosmic phenomena.

The University of New Mexico is the lead researcher in this project,. NASA's Jet Propulsion Laboratory in Pasadena, California is providing the advanced digital electronic systems, which represent a major component of the observatory

WW SPECIAL INTEREST GROUPS --- INTERNET --- THE HAMS DOMAIN
TWITTER http://twitter.com/VK1WIA

This Ham Radio specific site, "Ham Radio Nation" is a Social Networking Site, sorta akin to Facebook and such but specifically for Ham Radio.

It has loads of things to do, along with meeting lots of other hams, like blogging, forums, an awards program, classified ads, propogation info, an always current contest calendar, chat rooms, product reviews, and more.

Do yourself a favour. Check it out! You can find it:

HAM RADIO AND SCOUTING: ARRL & BSA TIE KNOT IN MOU

The American Radio Relay League and the Boy Scouts of America have officially tied the knot of cooperation between the two groups. Amateur Radio Newsline's Michael Grebert said:

"After working together for nearly a century to provide Scouts with the ability to learn radio communication skills, Boy Scouts of America and the American Radio Relay League have officially teamed up by signing a memorandum of understanding. This document designates the ARRL as a key resource for K2BSA and Radio Merit Badge training at the BSA National Scout Jamboree and establishes the ARRL as the go-to source for Scouts interested in learning about and becoming involved in radio communication.

In addition to its National Scout Jamboree involvement, ARRL will continue to promote participation in the annual Jamboree on the Air event. ARRL will also serve as contributing editor to the Radio Merit Badge publication, will assist with the review, creation and modification of requirements as necessary, and will assist in developing course material, lesson plans, and other resources for teaching the Radio Merit Badge to Scouts. ARRL also will contribute to the content of the Electricity, Electronics, and Emergency Preparedness and Communications merit badge publications.

As its part of this strategic alliance, the Boy Scouts of America will encourage Scouts and Scouters to become familiar with opportunities for public and community service. It will also foster learning and personal growth through involvement in Amateur Radio.

Boy Scouts of America Chief Scout Executive Bob Mazzuca and ARRL President Kay Craigie , N3KN, launched the partnership by holding a truly unique wireless communications meeting. Mazzuca joined Craigie virtually during an Internet video conference and document-signing ceremony. From separate locations, the pair also took the opportunity to talk about the importance of each organization to the ongoing development of the other. (arnewsline)

REWIND

Kurrajong Radio Museum - Wyong Field Day.

So your listening in the Gosford area this weekend?

Don't forget to visit the Kurrajong Radio Museum display at the Wyong Field Day.

This year the display will be all about VK2 amateur Radio History.

Have you ever wondered who the earlier hams were, what their callsigns were or where they lived? Data will be on show covering the period of 1911 to 1961.

You may even find earlier holders of your callsign!

Limited copies of the data will also be available on CD at the Field Day and later at the Museum.

Also on show will be a selection of photographs from the Pierce Healy collection, this time featuring activities at Dural around 1960.

There is a great photo of the 809 tent, but they weren't selling valves!

(mmm 809? Now I know 807 was beer... ahhh those VK2 yuppies! 809's must have been the Chardonnay tent! hihi...ed)

Perhaps you could help in naming the young lad assisting in erecting a VHF antenna - He assures me he no longer looks like that.

Please call in and say hello,

(Ian O'Toole VK2ZIO Kurrajong Radio Museum).

==> + LEGISLATIVE NEWS: ARRL ASKS MEMBERS TO WRITE IN OPPOSITION TO HR
607

The ARRL is asking its members to contact their US representatives
in opposition to the sections of HR 607 <http://www.arrl.org/hr-607>
that could affect the Amateur Radio Service allocation at 420-440 MHz.
HR 607 -- The Broadband for First Responders Act of 2011 -- would
address certain spectrum management issues, including the creation and
maintenance of a nationwide Public Safety broadband network. It was
introduced
<http://www.arrl.org/news/spectrum-management-bill-threatens-amateur-frequenc
ies>
into the US House of Representatives February 10.
```

ARRL Regulatory Information Manager Dan Henderson, N1ND, clarified that the League opposes HR 607 in its present form. "We do not oppose the concept of dedicated spectrum for the development of a Public Safety infrastructure and wireless network. We object to the bill because of the inclusion of 420-440 MHz as part of the spectrum to be swapped and auctioned to commercial users." You can find a sample letter, "How to Find your Representative" and the contact information for ARRL's legislative consultant, Chwat & Co, here <http://www.arrl.org/sample-letters>.

==> + PUBLIC SERVICE: NEW ZEALAND AMATEURS ASSIST IN EARTHQUAKE'S AFTERMATH

<http://www.arrl.org/images/view/News/2011_Canterbury_earthquake_intensity.jpg>
A 6.3 magnitude earthquake struck the Canterbury region in New Zealand's South Island on Tuesday, February 22 at 12:51 PM local time (2351 on February 21 UTC). According to IARU Region 3 Disaster Communications Committee Chairman Jim Linton, VK3PC, 10 radio amateurs are using their two emergency broadcast vans to keep rescue teams and Civil Defense staff in touch. One is at a major welfare center, providing portable communication so they can talk to Civil Defense, and the other vehicle is on its way to assist search-and-rescue teams in an area where communication is poor . Read more here <http://www.arrl.org/news/new-zealand-amateurs-assist-in-earthquake-s-aftermath>.

==> + WRC-12 : AMATEUR MF ALLOCATION MOVES A STEP CLOSER

Amateur Radio has moved a step closer to a medium frequency (MF) allocation below the AM broadcast band. During the first week of the Conference Preparatory Meeting (CPM) for the 2012 World Radiocommunication Conference (WRC-12) of the International Telecommunication Union, held in Geneva February 14-25, delegates completed the drafting of nine pages of analysis of the technical and regulatory issues related to WRC-12 Agenda Item 1.23: consideration of a possible secondary allocation to the Amateur Service of about 15 kHz somewhere between 415 and 526.5 kHz. Two possible methods of satisfying the agenda item, along with the possibility of there being no change (and therefore no allocation), are set out in the CPM Report, along with the advantages and disadvantages of each . Read more here <http://www.arrl.org/news/amateur-mf-allocation-moves-a-step-closer>.

==> + IN THE NEWS : THREE YACHTSMEN KILLED BY SOMALI PIRATES WERE HAMS

Four Americans -- including three Amateur Radio operators -- who were being held hostage on their yacht by pirates off the coast of Oman have been killed. Scott Adam, K9ESO, and his wife Jean, KF6RVB, along with Bob Riggle, KE7IIV, and Phyllis Macay were on board the S/V Quest when pirates boarded their vessel on Friday, February 18. The Adams were based in the Los Angeles area; Riggle and Macay were from Seattle.

According to the US Central Command, the boat was in the Indian Ocean, headed toward the Somali coast when on Friday, the 58 foot yacht sent a distress signal. The boat was being trailed by US Navy forces; it was about a two day sail from the Somali coast. They had begun tracking the yacht after being alerted that a Danish naval helicopter had seen the Quest off Oman under the pirates' control. The Central Command oversees US anti-piracy operations in the Indian Ocean.

Officials were in the process of negotiating for the Americans' release when gunfire was heard around 1 AM (EST) on Tuesday, February 22. "As (US forces) responded to the gunfire, reaching and boarding the Quest, the forces discovered all four hostages had been shot by their captors," a statement from US Central Command said. "Despite immediate steps to provide life-saving care, all four hostages ultimately died of their wounds." Read more here <http://www.arrl.org/news/three-yachtsmen-killed-by-somali-pirates-were-hams> .

==> + ON THE AIR : THE HF BANDS COME ALIVE FOR THE ARRL INTERNATIONAL DX SSB CONTEST

With the CW running of the ARRL International DX Contest over, it's time to get ready for the phone portion. With the solar flux peaking at 125 during the CW contest -- and 10 meters in unexpectedly good shape and open to Europe during the event -- one wonders if the same kind of conditions will be present for the phone running, 0000 UTC Saturday, March 5-2359 UTC Sunday, March 6. With another region of the Sun coming around to face Earth for this contest, there could be more unstable conditions. But if the solar flux index stays high -- and there aren't any more solar flares -- the ARRL DX SSB Contest could have some openings like there haven't been in years. Are you ready? Read more here <http://www.arrl.org/news/the-hf-bands-come-alive-for-the-arrl-international-dx-ssb-contest>.

==> + SECTION MANAGER ELECTIONS : NEW SECTION MANAGER ELECTED IN ARKANSAS

In the only balloted Section Manager election this winter, ARRL members in Arkansas have elected Dale Temple, W5RXU, North Little Rock, as Section Manager for the next two year term of office that starts April 1. Temple received 362 votes, and his opponent, incumbent Section Manager J. M. Rowe, N5XFW, received 290 votes. Rowe has served as Section Manager since December 2008. Ballots were counted and verified at ARRL Headquarters on Tuesday, February 22. Read more here <http://www.arrl.org/news/new-section-manager-elected-in-arkansas>.
